Lamar (*lȧ-mär′*), **Joseph Rucker,** jurist, was born at Ruckersville, Ga., in 1857. He was educated at the university of Georgia, Washington and Lee university, and Bethany college. He was admitted to the bar, 1879, and practiced at Augusta, Georgia, until 1903. He was a member of the Georgia house of representatives, 1886–89; appointed commissioner to codify the laws of the state, 1895. In 1901 he became associate judge of the supreme court of Georgia, and in 1910 was appointed by President Taft associate justice of the United States supreme court.

Lamar, Lucius Quintus Cincinnatus, American lawyer and statesman, was born in Putnam county, Ga., 1825. He was educated at Emory college, studied law and was admitted to the bar, 1847. He was elected a member of the Georgia state legislature, 1853; removed to Mississippi, 1854, and was a member of congress from that state, 1857–60; served in the confederate army during the civil war, and was sent to Europe as agent of the confederacy. In 1866 he was made professor of political economy at the university of Mississippi; was a member of congress, 1872–77, and of the United States senate, 1877–85. President Cleveland made him secretary of the interior during his first term, and in 1888 made him associate justice of the United States supreme court. Died, 1893.

Lamarck (*lȧ′-märk′*), **Jean Baptiste Pierre Antoine de Monet de,** celebrated French naturalist and pre-Darwinian evolutionist, was born at Bazentin, 1744. At sixteen he joined the French army in Germany. Stationed as an officer at Toulon and Monaco, he became interested in the Mediterranean flora; and, resigning after an injury, he held a post in a Paris bank, and meanwhile pursued the study of botany. In 1778 he published a *Flore Française.* In 1779 he became a member of the French academy and keeper of the royal garden, afterward the nucleus of *Jardin des Plantes,* and here he lectured for twenty-five years on invertebrate zoölogy. About 1801 he had begun to think about the relations and origin of species, expressing his conclusions in his famous *Philosophie Zoölogique,* in 1809. His *Histoire des Animaux sans Vertèbres* appeared in 1815–22. Hard work and illness enfeebled his sight and left him blind and poor. He broke with the old notion of species, expressly denied the unchangeableness of species, sought to explain their transformation and the evolution of the animal world, and prepared the way for the now accepted theory of descent. Died, 1829.

Lamartine (*lȧ′-mȧr′-tēn′*), **Alphonse,** French author and politician, was born at MÂcon, 1790. He was educated at the Jesuit college at Belley, traveled in Italy, and, after the fall of Napoleon, entered the army. He exercised a most important influence upon the revolution, restraining the populace from many of the excesses into which they might otherwise have been led. He was afterward an unsuccessful candidate for the presidency, and after the *coup d'état* of 1851 he retired altogether into private life. Though thus for a short time prominent in the affairs of his country, the greater part of his career was devoted to literature, in which he attained great eminence. His *History of the Girondists,* published in 1847, undoubtedly did much to hasten the revolution; and his *History of the Revolution of* 1848, which appeared in the following year, is a deeply interesting account of a movement which, if it had not been turned into another direction by the temporarily successful ambition of Louis Napoleon, might have gained for France at once that free government which she gained only after the fall of the empire. Of Lamartine's earlier works, one of the best known is his *Voyage en Orient.* His *Works* extend over forty volumes. Died, 1869.

Lamb, Charles, English essayist and poet, was born in London, 1775. He was the son of a clerk to one of the benchers at the Inner Temple, and was educated at Christ's Hospital, where he was the schoolfellow and friend of Samuel Taylor Coleridge. From 1792 to 1825 he was a clerk in the accountant's office of the East India company, retiring at last on a pension; but, during most of these years, and indeed up to the close of his life, he devoted himself, in a spirit of noble self-sacrifice, to the care of his sister Mary, who, like himself, had inherited a taint of insanity. Lamb's earliest literary efforts were in verse. In 1807 he published, in conjunction with his sister, a series of *Tales from Shakespeare;* and in 1808 two volumes of *Specimens of English Dramatic Poets who lived about the time of Shakespeare,* with short but felicitous notes. On the establishment of the *London Magazine* in 1820, he began that series of essays, signed *Elia,* which are the chief foundation of his fame. He died in 1834, his sister Mary surviving him until 1847.

Lambert, John, British general, was born at Calton near Settle, Yorkshire, 1619. He studied at the Inns of Court, but, on the outbreak of the great rebellion in 1642, he became a captain under Fairfax, and at Marston Moor led Fairfax's cavalry. Commissary in general of the army in the north in 1645, and major-general of the northern counties, 1647, he helped Cromwell to crush Hamilton at Preston, and captured Pontefract castle in 1649. In 1650 he went with Cromwell to Scotland as major-general, led the van at Dunbar, won the victory of Inverkeithing, followed Charles to Worcester, and at the battle commanded the troops on the eastern bank of the Severn. He helped to install Oliver Cromwell as protector, but opposed the proposition to declare him king, and became completely estranged from him. He headed the cabal which overthrew Richard Cromwell; was now looked upon as the leader of the fifth monarchy or extreme republican party; suppressed the royalist insurrection in Cheshire, 1659; and virtually governed Great Britain with his officers as the "committee of safety." He was sent to the Tower, tried in 1662, and banished to Guernsey. Died, 1683.

Landor, Arnold Henry Savage, English artist and traveler, was born at Florence, Italy, 1865, and was educated there and at Paris. He traveled in the East several years; also in America, Australia, Azores, and northern Africa. He was the first white man to reach both sources of the great Brahmaputra river and establish their exact position; to settle the geographical problem that no range higher than the Himalayas existed north of the Brahmaputra river; and to explore central Mindanao island, where he discovered the "white tribe," Mansakas. He holds the world's record in mountaineering, having reached an altitude of 23,490 feet on Mount Lumpa, Nepal, 1899. Author: *Alone with the Hairy Ainu, or* 3,800 *Miles on a Pack-saddle; Corea, or the Land of the Morning Calm; A Journey to the Sacred Mountain of Siao-ou-tai-shan; In the Forbidden Land; China and the Allies; Across Coveted Lands; The Gems of the East; Tibet and Nepal; Across Widest Africa*, etc.

Landor, Walter Savage, English poet and prose writer, was born at Ipsley Court, Warwickshire, 1775. He studied at Oxford where he won high reputation as a scholar; and in 1808 raised a body of men, at his own expense, and joined the Spanish patriots under Blake. He was made a colonel in the service of Spain, but resigned his commission on the restoration of King Ferdinand. He first became known as the author of a poem called *Gebir*, in 1798, which was followed by *Count Julian*. In 1820 appeared *Idyllia Heroica*, and in 1824–29 his *Imaginary Conversations of Literary Men and Statesmen*, in 5 vols. He was a thorough classical scholar, and his Greek and Roman characters speak as we should expect the ancient heroes to have spoken. He is greater as a prose writer than as a poet; but, according to Emerson, who visited him in 1833, nature meant him rather for action than for literature. "He has," says Emerson, "an English appetite for action and heroes." Died in Florence, Italy, 1864.

Landseer, Sir Edwin Henry, English painter, was born in London, 1802. The first work that brought him prominently before the public was "Dogs Fighting," exhibited in 1819. It was succeeded by the "Dogs of St. Gothard," the popularity of which was very great. The scene of several of his finest pictures is laid in the highlands of Scotland. For upward of thirty years every London exhibition witnessed his success. In 1830 he was elected a royal academician, and in 1850 was knighted. Among his most celebrated achievements are: "The Return from Deer-stalking"; "The Illicit Whiskey-still"; "High Life"; "Low Life"; "Poachers Deer-stalking"; "Bolton Abbey in the Olden Time"; "The Drover's Departure"; "Return from Hawking"; "The Old Shepherd's Chief Mourner"; "Dignity and Impudence"; "Peace"; "War"; "Stag at Bay"; "The Drive — Shooting Deer on the Pass"; "A Random Shot"; "Night"; "Morning"; "The Children of the Mist"; "Saved"; "Highland Nurses"; "Deer-stalking"; "Flood in the Highlands"; "Windsor Park"; "Squirrels Cracking Nuts"; and "Man Proposes, but God Disposes." He was elected president of the royal academy in 1865, but declined the honor. He was the most superb animal-painter of his time. Died, 1873.

Lane, Edward William, English orientalist and Arabic scholar, was born at Hereford, 1801, the son of a prebendary. He began life as an engraver, but the condition of his health took him to Egypt, and with Egypt the whole of his subsequent work was connected. The result of his visits was his *Manners and Customs of the Modern Egyptians*, still a standard authority. This was followed by the annotated translation of the *Thousand and One Nights*, which was the first accurate rendering, and by *Selections from the Koran*. His later years in Egypt were devoted to laborious preparation for the great work of his life, the *Arabic-English Lexicon*, completed by his grand-nephew, who also wrote his life. Died, 1876.

Lane-Poole, Stanley, English historian and archæologist, professor of Arabic at Trinity college, Dublin, 1898–1904, was born in London, 1854. He was educated by private tutors, and at Corpus Christi college, Oxford; M. A., Oxford and Dublin; Litt. D., Dublin. He was employed in the coin department of the British museum, 1874–92; was sent by the government on archæological missions to Egypt, 1883, and Russia, 1886; visited Australia, 1890; employed by Egyptian government on archæological research at Cairo, 1895–97; lecturer at the royal institution, 1900, and examiner in Arabic to the university of Wales, 1901-02. Author: *Catalogue of the Oriental and Indian coins in the British Museum*, 14 vols.; *Saladin; The Moors in Spain; The Barbary Corsairs; The Mohammedan Dynasties; The Mogul Emperors; Egypt in the Middle Ages; Mediæval India; Story of Cairo; Islam; Egypt; Social Life in Egypt; Studies in a Mosque; The Art of the Saracens of Egypt; Speeches and Table-talk of Mohammed; Essays in Oriental Numismatics*, 3 vols., etc. Edited: Lane's *Arabic-English Lexicon; The People of Turkey*, 2 vols.; Lane's *Koran; Arabian Society in the Middle Ages*, etc.

Lanfranc (*lăn′-frăngk*), prelate and scholar, archbishop of Canterbury, was born in Pavia, Italy, about 1005. In 1045 he was chosen prior of the Benedictine abbey of Bec. William of Normandy appointed him a councillor of state, and in 1066 abbot of a monastery in Caen, where he established a school. Afterward William caused him to be elected to the see of Canterbury, and he was consecrated in 1070. On the accession of William Rufus he was intrusted with the government. He improved discipline, established schools, convents, and hospitals, and built churches and cathedrals. His works consist of commentaries, letters, and sermons. Died, 1089.

Lang (*lăng*), **Andrew,** Scottish writer and critic, was born at Selkirk, Scotland, 1844. He was educated at St. Andrews university and Balliol college, Oxford. Litt. D., Oxford; LL. D., St. Andrews. He was elected a fellow of Merton college, 1868, and shortly became one of the busiest and brightest writers in the world of London journalism. He took a prominent part in the controversy with Max Müller and his school about the interpretation of mythology and folk-tales. He wrote *Ballads and Lyrics of Old France; Ballads in Blue China; Helen of Troy; Rhymes à la Mode; Grass of Parnassus; Ballads of Books;* volumes of graceful verse. *Custom and Myth; Myth, Ritual, and Religion; Modern Mythology; The Making of Religion;* contributions to the study of the philosophy and religion of primitive man. Among his other works are: *The Library; In the Wrong Paradise; Books and Bookmen; Letters to Dead Authors; Lost Leaders; Homer and the Epic; The Monk of Fife; Life of Lockhart; Pickle the Spy; Companions of Pickle; History of Scotland*, 2 vols.; *Prince Charles Edward; The Mystery of Mary Stuart; Magic and Religion; Homer and his Age*, etc. He has translated Theocritus and, with others, Homer, besides editing Scott, Burns, the *Fairy Books*, etc. Died, 1912.

Langevin (*lăNzh′-văn′*), **Louis Philip Adelard,** Canadian prelate, Catholic archbishop of St. Boniface, Manitoba, since 1895, was born at St. Isidore, La Prairie, province of Quebec, Canada, 1855. He was educated at Montreal college; studied theology at the Sulpician grand seminary, Montreal; completed his course of theological study at St. Mary's college, Montreal entered the order of oblates of Mary Immaculate, 1881, and was ordained priest, 1882. He was preacher for diocesan missions, 1882–85; professor of moral theology in the Catholic university of Ottawa, where he soon became vice-dean of the theological faculty, 1885; D. D, 1892; went to Manitoba as superior of the oblates in the archdiocese of St. Boniface, and rector of St. Mary's church, Winnipeg, 1893. He visited England, France, Belgium, Germany, in 1890; Rome in 1896, 1898, and 1904, and in 1908 visited the holy land. He also visited Austria in the interest of 100,000 Galicians, Poles, and Ruthenians coming from this empire; has founded eighty parishes, fifty educational convents, six hospitals, four orphanages, six Indian boarding schools, and has doubled the number of priests and the number of missionaries among the Indians.

Langland, William, one of the great figures in early English literature, was born about 1330, near Malvern. He lived most of his life in London in poverty, a clerk and singer of masses for the dead in the churches. His allegorical poem, *The Vision of Piers Plowman*, containing much vigorous satire on the abuses of the church and the state, is one of the earliest and most eloquent cries from an oppressed people. Excepting Chaucer, Langland was the greatest English poet of the fourteenth century. He died about 1400.

Langton, Stephen, English prelate, was born about 1160. He studied in Paris, and became there canon of Notre Dame and chancellor of the university. He was made a cardinal in 1206 by his former fellow student Innocent III., and in 1207 was consecrated archbishop of Canterbury. In 1213 he joined the barons opposed to the misgovernment of John, and his name stands first among the subscribing witnesses to magna charta. For his refusal to excommunicate the barons at the command of Innocent, he was suspended from the exercise of his archiepiscopal functions until 1216. He again placed himself at the head of the barons, in 1223, to demand from Henry III. the confirmation of their liberties. His writings have perished; but to him is due the division of the Bible into chapters. Died, 1228.

Lanier (*la-nēr'*), **Sidney**, American poet, was born in Macon, Ga., 1842. He was graduated at Oglethorpe college, Ga., 1860, and served in the confederate army during the war. Toward its termination he was captured and held prisoner for five months at Point Lookout, Fla. From 1865 to 1867 he was a clerk in Montgomery, Ala., had a school in Prattville, Ala., and from 1868 to 1872 practiced law in company with his father at Macon. In 1876 he prepared an ode for the centennial exhibition at Philadelphia, and in 1877 settled in Baltimore, where he delivered lectures on English literature. In 1879 he was appointed lecturer on English literature at Johns Hopkins university. In the summer of 1880, enfeebled by the progress of consumption, he sought relief in the mountains of North Carolina, where he died. His two notable books are his *Science of English Verse*, and his *Poems*. The former is an ingenious, well worked out theory, treated somewhat in accordance with the musical system of Marx. Little of his poetry has become particularly noted; but it contains elevated passages that mark the truly endowed poet. Died, 1881.

Lankester (*lăng'-kĕs-tĕr*), **Sir Edwin Ray**, English zoölogist, was born in London, 1847. He was educated at Downing college, Cambridge, and at Christ Church, Oxford; D. Sc., Oxford and Leeds; LL. D., Cambridge. He was fellow and tutor of Exeter college, and was professor of zoölogy, University college, London, 1874–90; regius professor of natural history, Edinburgh, 1882; Linacre professor of comparative anatomy, Oxford, 1891–98, and director of the natural history departments of the British museum, 1898–1907. He is a member of many scientific and learned societies, and has been editor of the *Quarterly Journal of Microscopical Science* since 1869. Author: *A Monograph of the Cephalaspidian Fishes; Comparative Longevity; Developmental History of the Mollusca; Degeneration; The Advancement of Science.* Editor of *A Treatise on Zoölogy; Extinct Animals; The Kingdom of Man*, etc.

Lanman, Charles Rockwell, American orientalist, professor of Sanskrit, Harvard, since 1880, was born at Norwich, Conn., 1850. He was graduated at Yale, 1871; Ph. D., 1873, LL. D., 1902, Yale; LL. D., Aberdeen, 1906. He studied Sanskrit under Weber, Berlin, and Roth, Tübingen, and comparative grammar under Curtius and Leskien of Leipzig, 1873–76. Called to Johns Hopkins the year of its opening, 1876; thence to Harvard, 1880. He was lecturer at Lowell institute, Boston, 1898; traveled in India, 1889, and acquired valuable books and about 500 manuscripts for Harvard. He is the author of numerous works on the Sanskrit language and literature.

Lannes (*lȧn*), **Jean**, duke of Montebello, French marshal, was born at Lectoure, 1769. He entered the army in 1792, and by his conspicuous bravery in the Italian campaign fought his way up to the rank of brigadier-general, 1797. He rendered Napoleon important service, and on the 9th of June, 1800, won the battle of Montebello, and had a distinguished share at Marengo, Austerlitz, Jena, Eylau, and Friedland, and took Saragossa. In 1809 he commanded the center at Aspern, where he was mortally wounded, and died in that year.

Lansdowne (*lănz'-doun*), **Henry Charles Keith Petty-Fitzmaurice, fifth Marquis of**, English statesman, was born in 1845. He was educated at Eton and Balliol college, Oxford; D. C. L., Oxford. He succeeded to the marquisate in 1866, from 1869 held minor offices in the liberal administration, and in 1872–74 was undersecretary of war. In 1880 he became undersecretary for India, but resigned owing to a difference with Gladstone over the compensation for disturbance bill. He was governor-general of Canada, 1883–88, of India, 1888–93, war secretary in 1895–1900, and in 1900–05 foreign secretary, promoting the *entente* with the United States and France and the treaties with Japan.

Laotse (*lä'-ō-tsû'*), Chinese sage, founder of Taoism, was born in the province of Ho-nan about 604 B. C. He was a contemporary of Confucius, and wrote the celebrated *Tao-teh-King* canon, that is, of the Tao, or divine reason, and of virtue, one — and deservedly so on account of its high ethics — of the sacred books of China. He was the founder of one of the principal religions of China, Confucianism and Buddhism being the other two, although his followers, the Tao-sze, as they are called, are now degenerated into a set of jugglers.

Laplace (*lȧ'-pläs'*), **Pierre Simon, Marquis de**, eminent French mathematician and astronomer, was born at Beaumont-en-Auge, in Normandy, 1749. He was for some time a teacher of mathematics in the military school there, and afterward went to Paris, where he attracted the notice of D'Alembert, and was, through his influence, appointed professor in the military school, and admitted to the academy of sciences. He was gifted with wonderful scientific sagacity and solved several problems which had for many years defied the attempts of geometers. He was the author of the nebular hypothesis, and together with Lagrange did much to verify Newton's theory. His *Traité de la Mécanique Céleste,* and supplements to it, are, next to Newton's *Principia,* the greatest of astronomical works. His *Exposition du Système du Monde* is intended for those who can not follow the difficult demonstrations and calculations in his great work. Most of his important investigations were made for the purpose of testing the generality of the law of gravitation and the cause of sundry irregularities in the motions of the planets. Died at Paris, 1827.

Lardner (*lärd'-nĕr*), **Dionysius,** British clergyman and scientific writer, was born in Dublin, Ireland, 1793. He was graduated at Trinity college, Dublin, 1817, and in 1827 became professor of natural philosophy in the university of London. He subsequently visited the United States, and in 1845 established himself in Paris. He published the *Cabinet Encyclopædia,* 1830–44, and numerous works and papers on natural science and railway economics. He died at Naples, 1859.

Lardner, Nathaniel, English divine, was born in Hawkhurst, Kent, England, 1684. He studied at Utrecht and Leyden; became a minister in his twenty-fifth year; and, after having been chaplain and tutor in the family of Lady Treby, acquired equal reputation as a preacher and writer. His most celebrated work is *The Credibility of the Gospel History.* He was also the author of a *Collection of Jewish and Heathen Testimonies.* These two works — the value of which in Christian apologetics can hardly be over-estimated — occupied him for the greater part of forty-three years. Died, 1768.

Larned, Josephus Nelson, author and journalist, was born in Chatham, Ont., 1836. He was educated in the public schools of Buffalo; was on editorial staff of *Buffalo Express,* 1859–72; superintendent of education, Buffalo, 1872-73; and superintendent of Buffalo library, 1877–97. Author: *Talks About Labor; History for Ready Reference; Talk About Books; History of England for Schools; A Multitude of Councilors; Primer of Right and Wrong; History of the United States for Secondary Schools; Seventy Centuries — a Survey.* Editor: *The Literature of American History.*

La Rochefoucauld (*lȧ rōsh'-fo͞o'-kō'*), **François, Duc de,** French moralist, was born at Paris, 1613. At an early age he joined the army, placed himself in opposition to Richelieu, and became entangled in a series of love adventures and political intrigues, the result being that he was forced to live in exile from 1639 to 1642. He then joined the Frondeurs and was wounded at the siege of Paris. In 1652, wounded again, he retired to the country. On Mazarin's death in 1661 he repaired to the court of Louis XIV. A surreptitious edition of his *Mémoires,* written in retirement, was published in 1662; as it gave wide offense he disavowed its authorship. His *Réflexions, ou Sentences et Maximes Morales* appeared in 1665. His last years were brightened by his friendship with Mme. de La Fayette, which lasted until he died. For brevity, clearness, and finish of style the *Maximes* could hardly be excelled. Died, 1680.

Larrey (*lȧ'-rā'*), **Dominique Jean, Baron,** noted French surgeon, was born at Baudéan in 1766. He went to Paris, and entered the navy as surgeon, and afterward became a surgeon in the army. He invented the *ambulance volante,* or flying hospital, an easy wagon for carrying the wounded, and for this was made surgeon-in-chief. He served under Napoleon in the wars of Egypt, Germany, and Spain, and was much loved by the soldiers because of his bravery and skill as a surgeon. Once he killed his own horses to make soup for the wounded men under his care. Napoleon said of him: "If the army ever erect a monument of gratitude, it should be to Larrey;" and in his will said: "I leave 100,000 francs to the surgeon-in-chief Larrey, the most virtuous man I know." There is a bronze statue of Larrey in Paris, in which he is shown standing, and holding Napoleon's will in his hand, open at these words. He died in Lyons, 1842.

La Salle (*lȧ sȧl'*), **René Robert Cavelier, Sieur de,** noted French navigator, was born in Rouen, 1643. He came to America in 1666, and became a trader in furs, and the owner of a great tract of land in Canada. After a voyage of exploration from Lake Erie to Lake Superior and down the Mississippi, he took possession of the land around the gulf of Mexico, called it Louisiana, after the French king, and went to France to get men and means to colonize it. He succeeded in bringing over four vessels. But quarrels arose between him and the commander of the fleet, which ended in the return of the ships, with fifty of the people, to France. With the others La Salle kept on his way, but failed to find the Mississippi again, and wandered from place to place, until his followers were nearly all dead. At last, giving up hope of reaching the land he was looking for, he started for Canada with sixteen men in 1687. On the way two of the men, who hated La Salle, agreed to kill him; and having first murdered his nephew, they shot him in 1687. He was the first European to travel from the headwaters to the mouth of the Mississippi.

Lassalle (*lȧ'-sȧl'*), **Ferdinand,** founder of socialism in Germany, was born in Breslau, 1825, of Jewish parents. He attended the universities of Breslau and Berlin, became a disciple of Hegel, took part in the revolution of 1848, and was sent to prison for six months. In 1861 his *System of Acquired Rights* started an agitation of labor against capital, and he was again thrown into prison. On his release he founded an association to secure universal suffrage and other reforms. Returning to Switzerland, he conceived a passionate affection for a lady betrothed to a noble whom she was compelled to marry, and whom he challenged, but by whom he was mortally wounded in a duel in 1864.

Latimer, Hugh, English bishop and martyr, was born at Thurcaston, in Leicestershire, about 1485, the son of a yeoman. He was educated at Christ's college, Cambridge. In early life he was a zealous Catholic, but, being converted, he became an equally zealous champion of the reformation. After having encountered many perils, he was made bishop of Worcester, 1535, by Henry VIII. The bishopric, however, he resigned, on the passing of the act of the six articles; and was punished by being imprisoned during the remainder of Henry's reign. The accession of Edward VI. set Latimer at liberty, and he resumed his preaching, but refused to resume the mitre. On Mary's ascending the throne, he was again incarcerated; and, in 1555, was brought to the stake, where he suffered with unshaken courage. Ridley was his fellow martyr.

Latour d'Auvergne (*lȧ'-to͞or' dō'-vĕrn'-y'*), **Théophile Malo Corret de,** noted French soldier, was born at Carhaix, Brittany, 1743. He entered the French army when twenty-four years old. He was a man of extraordinary bravery, became distinguished in the wars of 1792–1800, and was commander of the troop called the "infernal column." He refused the rank of general. Napoleon sent him a sword, with an inscription saying that he was the first grenadier of France; but he sent the sword back, saying, "Among us soldiers there is neither first nor last." When peace came, Latour went to his home and lived quietly until the war again broke out; then he joined the army again in place of the only son of a friend. After his death his name was called at roll for many years, and the oldest sergeant used always to answer for him, "Died on the field of honor." Killed at Oberhausen, Bavaria, 1800.

Latrobe (*la-trōb'*), **Benjamin Henry,** American architect and engineer, was born in Yorkshire, England, 1764 In 1785 he entered the Prussian army in a regiment of hussars, and was twice wounded in battle. Returning to England, he studied architecture, and in 1789 was made surveyor of the public offices of London. In 1796 he came to the United States, when he was made engineer of the James river and Appomattox canal, and superintended the building of the penitentiary in Richmond. In 1798 he settled in Philadelphia, where he designed the bank of Pennsylvania, the old academy of art, and the bank of the United States. In 1811 he completed the capitol at Washington, and after its destruction by the British in 1814, superintended its reconstruction. Died at New Orleans, 1820.

Laud (*lôd*), **William,** English prelate, archbishop of Canterbury, was born at Reading, 1573, son of a clothier. He studied at St. John's college, Oxford, and became a fellow; was ordained in 1601, and early gave evidence of his high-church proclivities and his hostility to the Puritans, whom for their disdain of forms he regarded as the subverters of the church. He rose by a succession of preferments to the primacy, but declined the offer of a cardinal's hat at the hands of the pope, and became along with Strafford a chief adviser of the unfortunate Charles I. His advice did not help the king out of his troubles, and his course of action brought his own head to the block in 1645.

Laughlin (*lȧf'-lĭn*), **James Laurence,** American educator, economist, head professor of political economy, university of Chicago, since 1892, was born at Deerfield, Ohio, 1850. He was graduated at Harvard, 1873; Ph. D., 1876. He taught in Hopkinson's classical school, Boston, 1873–78; was instructor, 1878–83, assistant professor, 1883–87, of political economy at Harvard; president of Manufacturers' mutual fire insurance company, Philadelphia, 1887–90; and professor of political economy, Cornell, 1890–92. In 1894-95 he prepared for the government of San Domingo a scheme of monetary reform, which was afterward adopted. He was a member of the monetary commission created by the Indianapolis monetary conference, 1897. Author: *Anglo-Saxon Legal Procedure in Anglo-Saxon Laws; Study of Political Economy; History of Bimetallism in United States; Elements of Political Economy; Gold and Prices Since* 1873; *Facts About Money; Principles of Money; Reciprocity; Industrial America,* etc. He is editor of *Journal of Political Economy;* was lecturer in Berlin on invitation of Prussian cultus ministerium, 1906.

Laurens (*lô'-rens*), **Henry,** American statesman, was born in Charleston, S. C., 1724. He was educated for a merchant, was very successful, and accumulated a large fortune. When the war of the revolution broke out, he showed himself to be a true patriot. In 1776 he became a member of the continental congress from South Carolina, and in the following year was elected its president. In 1779 he was sent on important state business to Holland, but was captured on the way by a British ship-of-war, and taken to London, where he was kept prisoner in the Tower for fifteen months. When the war ended, he was freed and became one of the ministers to Paris, 1782, to conclude the terms of peace. He died in Charleston, 1792.

Laurie (*lou'-rē*), **Simon Somerville,** Scotch educator, was born at Edinburgh, 1829. He was educated at the university of Edinburgh; LL. D., Edinburgh, Aberdeen, and St. Andrews. He was secretary to the endowed schools of Scotland commission, 1872; hon. secretary to association for promoting secondary education in Scotland, founded in 1876; and at one time president of the teachers' guild. He was Gifford lecturer at Edinburgh, 1905-06, and professor emeritus of the institutes and history of education. Author: *Philosophy of Ethics; Primary Instruction in Relation to Education; Notes on British Theories of Morals; Life and Educational Writings of John Amos Comenius; Mediæval Education and Rise and Constitution of Universities; Institutes of Education; Historical Survey of pre-Christian Education; The Training of Teachers and Methods of Instruction; Studies in the History of Educational Opinion from the Renaissance;* and many philosophical and educational articles. Died, 1909.

Laurier (*lō'-rĭ-ā'*), **Sir Wilfrid,** Canadian statesman, first French-Canadian premier of the Dominion, was born in St. Lin, 1841; educated for the bar at L'Assomption college, and at McGill university; B. C. L., McGill, 1864; D. C. L., LL. D., etc. He rose rapidly in his profession, and in 1871 was elected as a liberal to the Quebec provincial assembly. In 1874 he was elected to the federal assembly, and his high personal character, his undoubted loyalty and attachment to the connection of the colony with Great Britain, together with his great oratorical powers, which have earned for him the title "silver-tongued Laurier," soon gave him high rank in the liberal party. On the retirement of Blake in 1891 he was chosen leader of the liberal party, and at the general election of 1896 he led his followers to a notable victory. His tariff legislation during 1897, giving Great Britain the benefit of preferential trade with Canada, aroused much enthusiasm both in the colony and at home, and he was warmly welcomed when he went to London to attend the jubilee festivities. He was then appointed a member of the privy council and made a G. C. M. G. In 1900 he again secured the approval both of the Dominion and of the empire by the prompt despatch of Canadian troops to aid the mother country in South Africa, and led his party to another victory at the polls in November. He attended the colonial conference and the coronation in England in 1902. He was again returned to power in 1904 and 1908, and in 1907 attended the imperial conference in London. The liberal ministry under the leadership of Laurier for fifteen years was defeated in 1911, and Robert Borden as head of the conservative party became premier.

Lauterbach (*lou'-tĕr-bäᴋ*), **Edward,** American lawyer, was born in New York, 1844. He was educated at the college of the city of New York, A. B., 1864, A. M., 1867; was admitted to the bar, 1866, and is now a member of the law firm of Hoadly, Lauterbach and Johnson. He was chairman of the republican county committee, 1895–97; is vice-president and director of the Maurice Grau opera company, and also director in several New York street railway companies. He has been prominent in important railway, telegraph, and maritime cases; is vice-president and counsel to the Pacific Mail steamship company; director of numerous charitable institutions; chairman of board of trustees, college of city of New York.

Laveleye (*lȧv'-lĕ'*), **Émile Louis Victor de,** Belgian political economist, was born at Bruges, 1822. He studied at Ghent, and in 1864 became professor of political economy at Liège. His works include: *De la Propriété; Lettres d'Italie; Le Socialisme Contemporain; Éléments d'Économie Politique; La Péninsule des Balkans;* and works on rural economy in the Netherlands, and on

UNIV. OF CALIFORNIA

SIR WILFRID LAURIER
From a photograph by Pittaway, Ottawa

current topics of the day. His contributions to the *Revue des Deux Mondes*, *Athenæum*, etc., were collected and published in his *Essais et Études*. He was made a baron a few weeks before his death. Died, 1892.

Lavelle, Michael J., American Roman Catholic priest, was born in New York, 1856. He was graduated at Manhattan college, 1873, St. Joseph's seminary, Troy, N. Y., 1874, and was ordained to the priesthood, 1879. He was assistant, 1879–86, and rector since 1886, St. Patrick's cathedral; was appointed vicar general, New York, 1902, and domestic prelate to Pope Pius X., 1903. He has been prominent in educational and philanthropic movements.

Lavoisier (*lȧ'-vwȧ'-zyā'*), **Antoine Laurent.** See page 380.

Lawrence, Abbott, American merchant and philanthropist, was born at Groton, Mass., 1792. In partnership with his brother Amos, he acquired a large fortune, a part of which was invested in the cotton factories of Lowell, which city owes its prosperity in great part to them. He was elected to congress in 1839, and in 1842 was one of the commissioners to settle the northeast boundary question with Great Britain. He founded the Lawrence scientific school at Harvard university, and made a bequest for model lodging houses. Died at Boston, Mass., 1855.

Lawrence, Amos, American philanthropist, and brother of Abbott, was born at Groton, Mass., 1786. Having acquired an immense fortune in trade, he devoted $639,000 of it to charities and donations, among other institutions to Kenyon and Williams colleges, and the theological seminary at Bangor, Me. He died at Boston, Mass., 1852, and his son published his *Life and Correspondence* in 1855.

Lawrence, James, American naval officer, was born at Burlington, N. J., 1781. In the war of 1812 he served under Commodore Decatur, and by brave conduct rose successively to the command of the *Argus*, the *Vixen*, the *Wasp*, and the *Hornet*. In 1813, after a short engagement, he captured the British ship *Peacock*, and soon after was made commander of the frigate *Chesapeake*. After he had been in command of its undisciplined crew for only a few days, in June, 1813, he met the British frigate *Shannon* just out of Boston, and after a hard fight he was mortally wounded and his ship was captured. It was here that he uttered the words, "Don't give up the ship!"

Lawrence, Sir Thomas, English portrait painter, was born in Bristol, 1769; succeeded Sir Joshua Reynolds in 1792 as first painter to King George III. In 1820 he became president of the royal academy. He painted nearly all the monarchs and notabilities of Europe; his pictures are distinguished by fidelity of touch, and by a peculiar softness and grace of finish. Died, 1830.

Lawrence, William, American prelate, Protestant Episcopal bishop of Massachusetts since 1893, was born in Boston, 1850. He was graduated at Harvard, 1871; S. T. D., 1893; S. T. D., Hobart, 1890; LL. D., Princeton, 1904; and S. T. B., Episcopal theological school, Cambridge, Mass., 1875. He was rector of Grace church, Lawrence, Mass., 1876–84; professor of homiletics and pastoral theology, Episcopal theological school, Cambridge, 1884–93; dean of same, 1888–93. Author: *Life of Amos A. Lawrence; Proportional Representation in the House of Clerical and Lay Delegates; Visions and Service; Life of Roger Wolcott, Governor of Massachusetts; Study of Phillips Brooks*, etc.

Lawson, Thomas William, American banker, yachtsman, and author, was born in Charlestown, Mass., 1857. He was educated at the public schools of Cambridge, has been in business as banker and broker since 1870, and was formerly senior member of the firm of Lawson, Arnold, and Company, members of Boston and New York stock exchanges. He is prominent as yachtsman and as a contributor to magazines, reviews, and newspapers. Author: *The Krank; History of the Republican Party; Secrets of Success; Collection of Poems and Short Stories from Magazines; Lawson History of the America's Cup; Frenzied Finance; Friday the Thirteenth*, etc.

Layard (*lā'-ard*), **Sir Austen Henry,** English archæological diplomat, was born in Paris, 1817. He passed his boyhood in Italy. Traveling along the Tigris on his way to Ceylon in 1840, he was struck with the ruins of Nimrud, the supposed site of Nineveh; and in 1845–47 carried on excavations there, finding the remains of four palaces. The walls of the northwest palace, built by Sardanapalus, were lined with large slabs covered with basreliefs and cuneiform inscriptions. Many of these, together with gigantic winged human-headed bulls and lions, were sent by Layard to the British museum, London. He published *Nineveh and its Remains, Monuments of Nineveh*, etc. He was presented with the freedom of the city of London, was made D. C. L. by Oxford, and was lord rector of Aberdeen university, 1855–56. He was member of parliament for Aylesbury, 1852–57, for Southwark, 1860–69, foreign under-secretary, 1861–66, chief commissioner of works, 1868–69, and in 1869 went as British ambassador to Spain, from 1877 to 1880 to Constantinople, being made G. C. B. in 1878. Died, 1894.

Lea (*lē*), **Henry Charles,** American author and historian, was born in Philadelphia, 1825. He received a private education; LL. D., university of Pennsylvania, Harvard, and Princeton, and was made a member of many learned societies in Europe and the United States. He was in the publishing business, 1843–80; then retired, and devoted himself to literary and historical research. Author: *Superstition and Force; An Historical Sketch of Sacerdotal Celibacy in the Christian Church; Studies in Church History; A History of the Inquisition of the Middle Ages; Chapters from the Religious History of Spain; Formulary of the Papal Penitentiary in the Thirteenth Century; A History of Auricular Confession and Indulgences in the Latin Church; The Moriscos of Spain: Their Conversion and Expulsion; History of the Inquisition of Spain;* and also many articles in periodicals. Died, 1909.

Le Brun (*lĕ brŭɴ'*), **Charles,** French historical painter, was born in Paris, 1619. He studied four years in Rome, and for nearly forty years, 1647–83, exercised a despotic influence over French art and artists, being usually considered the founder of the French school of painting. He was the first director of the Gobelins tapestry works, in 1662, and from 1668 to 1683 was employed by Louis XIV. in the decoration of the palace of Versailles; but, being superseded, he became ill and died, 1690. He wrote *Treatise on the Passions* and *Physiognomy*.

Le Brun, Marie Anne Élisabeth Vigée, French painter, was born in Paris, 1755, daughter of one Vigée, a painter. In 1776 she married J. B. P. Le Brun, picture dealer and grand-nephew of Charles Le Brun. Her great beauty and the charm of her painting speedily made her the fashion. Her portrait of Marie Antoinette, in 1779, led to a lasting friendship with the queen. She painted numerous portraits of the royal family, but left Paris for Italy at the outbreak of the revolution, and after a tour of triumphal progress through Europe, arrived in London in 1802. There she painted portraits of the prince of Wales, Lord Byron, and others. In 1805 she returned to Paris. Died, 1842.

Lecky (*lĕk'-ĭ*), **William Edward Hartpole,** British historian and philosopher, was born near Dublin, Ireland, 1838. He was graduated in 1859 at Trinity college, Dublin. In 1861 he published anonymously *The Leaders of Public Opinion in Ireland*, four brilliant essays on Swift, Flood, Grattan, and O'Connell. His later works were *Rationalism in Europe; History of European Morals; History of England in the* 18*th Century;* and *Democracy and Liberty*, with a volume of poems in 1891. A decided unionist, he became minister plenipotentiary for Dublin university in 1895, a privy councilor in 1897, and a member of the order of merit in 1902. He was elected to parliament for Dublin university in 1895 and again in 1900. Died, 1903.

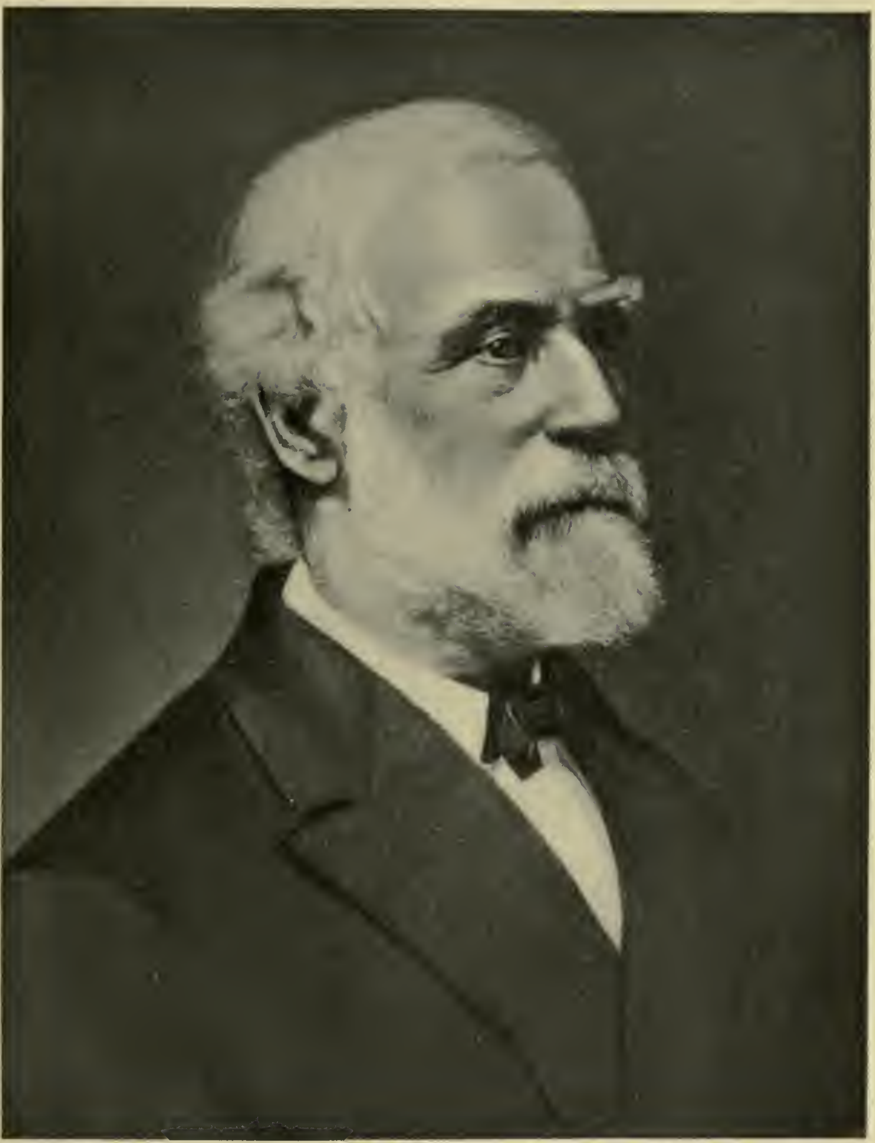
Le Conte (*lē kŏnt'*), **Joseph,** American naturalist and physicist, was born in Liberty county, Ga., 1823. He was graduated at Franklin college, university of Georgia, in 1841, and the New York college of physicians and surgeons in 1845, and practiced his profession at Macon, Ga. In 1850 he went to Cambridge, Mass., where he studied under Agassiz. He subsequently held several professorships, and in 1869 became professor of geology and natural history in the university of California. He published several essays on education and the fine arts: *The Mutual Relations of Religion and Science; Elements of Geology; Sight; A Compend of Geology; Evolution*, etc. He died in the Yosemite valley, California, 1901.

Lee, Fitzhugh, American soldier, nephew of Robert E. Lee, was born in Fairfax county, Va., 1835. He was graduated at West Point military academy, 1856, and became a lieutenant in the second United States cavalry. At the opening of the civil war he resigned and entered the confederate service, advancing to the rank of major-general. At the close of the war he was in command of the cavalry corps of the army of northern Virginia. In 1885 he was elected governor of Virginia, serving until 1890. He was appointed consul-general to Havana by President Cleveland, and was retained at that post by President McKinley. He administered his office with signal ability during the investigation of the explosion of the battleship *Maine*, and throughout the trying times preceding the Spanish-American war. In that war he served as major-general of volunteers and after peace was declared he was made governor of the province of Havana. He was later appointed brigadier-general in the regular army, retiring in 1901. Died, 1905.

Lee, Henry, distinguished American general, was born in Virginia, 1756. He was one of the most daring, vigilant, and successful cavalry officers on the side of the colonists. "Lee's legion" was probably the most effective and courageous body of troops raised in America. In the famous retreat of Greene before Lord Cornwallis it formed the rear-guard, the post of honor, and covered itself with glory. At the battles of Guilford Court House and Eutaw Springs, at the sieges of Forts Watson and Motte, at Granby and Augusta, and at the storming of Fort Grierson, Lee particularly signalized himself. After the war he was sent to congress as a delegate from Virginia, advocated the adoption of a federal constitution, and in 1792 was chosen governor of Virginia. When Washington died, Lee was chosen by congress to write a eulogy of him; in it occurs the famous words, "First in war, first in peace, and first in the hearts of his countrymen." Died, 1818.

Lee, Richard Henry, eminent American patriot, and signer of the declaration of independence, was born in Virginia, 1732, and received his education in England. He returned to his native country in 1752, and at the age of twenty-five was chosen a delegate to the house of burgesses, where he soon distinguished himself by his powers in debate. In 1764 he was appointed to draft an address to the king, and a memorial to the house of lords, which are among the best state papers of the period. His efforts in resisting the various encroachments of the British government were indefatigable, and in 1774 he attended the first continental congress at Philadelphia, as a delegate from Virginia. The memorial of congress to the people of British America, and the second address of congress to the people of Great Britain, were both from his pen. In June, 1776, he introduced the measure that declared the colonies free and independent states, and supported it by a speech of the most brilliant eloquence. He continued to hold a seat in congress until 1780, when he declined a reëlection until 1784. In that year he was chosen president of congress, but retired at its close, and in 1786 was again chosen a member of the Virginia assembly. He was a member of the convention which adopted the present constitution of the United States, and one of the first senators under it. In 1792 he again retired from public life, and died in 1794.

Lee, Robert Edward, American general, was born in Westmoreland county, Va., 1807. At eighteen he entered West Point, was graduated second in his class in 1829, and received a commission in the corps of engineers. In the Mexican war he was chief-engineer of the central army in Mexico, and at the storming of Chapultepec was severely wounded. In 1852–55 he was superintendent of the United States military academy, and greatly improved its efficiency. His next service was as cavalry officer on the Texan border, 1855–59. At the John Brown raid he was ordered to Harper's Ferry to capture the insurgents. He was in command in Texas in 1860, but was recalled to Washington in March, 1861, when seven states had formed the southern confederacy. Virginia seceded on April 17th, and Colonel Lee, believing that his allegiance was due to his state, sent in his resignation. Within two days he was made commander-in-chief of the forces of Virginia. At Richmond he superintended the defenses of the city until the autumn, when he was sent to oppose General Rosecrans in West Virginia. In the spring of 1862 he was working at the coast defenses of Georgia and South Carolina, but on McClellan's advance was summoned to Richmond. General J. E. Johnston, chief in command, was wounded at Seven Pines in May, and Lee was put in command of the army around Richmond. His masterly strategy in the seven days' battles around Richmond defeated McClellan's purpose; his battles and strategy in opposing General Pope, his invasion of Maryland and Pennsylvania, and other achievements are cardinal to the history of the war. The increasing resources of the North and the decreasing resources of the South could only result in the final success of the former. On April 9, 1865, Lee surrendered his army to General Grant at Appomattox Court House, Virginia, and the war was practically ended. After the close of the war he frankly accepted the result, and, although deprived of his former property at Arlington on the Potomac, and the White House on the Pamunky, he declined proffered offers of pecuniary aid, and accepted the presidency of what came to be called the Washington and Lee university, at Lexington, Va., at whose head he remained until his death in 1870. Numerous military critics regard Lee as the greatest military leader produced by the civil war, and one of the very first produced by the nineteenth century.



ROBERT EDWARD LEE
From a photograph

Le Gallienne (*lē găl'-ĭ-ĕn'*), **Richard**, journalist, was born in Liverpool, England, 1866. He was educated at Liverpool college, and engaged in business seven years, but abandoned it for literature. For a few months he was private secretary to Wilson Barrett, then became literary critic for several papers, and settled in London. For some years his journalistic and literary work has been confined to the United States. Editor: Isaak Walton's *The Compleat Angler;* Hazlitt's *Liber Amoris;* Hallam's *Remains.* Author: *My Ladies' Sonnets; Volumes in Folio; George Meredith; The Book-Bills of Narcissus; English Poems; The Religion of a Literary Man; Prose Fancies; Robert Louis Stevenson and Other Poems; Retrospective Reviews; Prose Fancies; The Quest of the Golden Girl; If I were God; Omar Khayyam, a Paraphrase; The Romance of Zion Chapel; Young Lives; Worshiper of the Image; Travels in England; The Beautiful Lie of Rome; Rudyard Kipling, a Criticism; The Life Romantic; Sleeping Beauty; Mr. Sun and Mrs. Moon; Perseus and Andromeda; An Old Country House; Odes from the Divan of Hafiz; Painted Shadows; Little Dinners with the Sphinx,* etc.

Legaré (*lē-grē'*), **Hugh Swinton,** American statesman, was born in Charleston, S. C., 1797. He studied law, traveled in Europe, and was a member of the South Carolina legislature, 1820–22 and 1824–30. In 1830 he was elected attorney-general. During the nullification excitement he ardently supported the cause of the Union in public speeches. He was *chargé d'affaires* at Brussels, 1832–36, and took his seat as a member of congress during the session of 1837. He took a prominent part in the debates, but his opposition to the sub-treasury project led to his defeat at the next election. After the accession of President Tyler in 1841, Legaré was appointed attorney-general of the United States, and in the spring of 1843 he succeeded Webster as secretary of state. He was distinguished as a scholar, and contributed largely to periodicals. Died, 1843.

Leibnitz (*līp'-nĭts*), **Gottfried Wilhelm von.** See page 298.

Leighton (*lā'-tun*), **Frederick, Lord,** English painter, was born at Scarborough, England, 1830. His early years were spent in the study of art, under the best masters in Rome, Florence, Frankfort, Paris, and Brussels. His famous picture, "Cimabue's Madonna carried in Procession through the Streets of Florence," was his first appearance in the royal academy in 1855, and was at once purchased by the queen. Among his other paintings are "Ariadne," "Hercules Wrestling with Death," "Captive Andromache," "The Harvest Moon," "Helen of Troy," "Romeo and Juliet," "Wedded," etc. He was also known as a sculptor. In 1878 he became president of the royal academy, was made a baronet in 1886, and raised to the peerage in 1896. In his lifetime he received almost every honor possible to an artist. Died, 1896.

Lemieux, Rodolphe, French statesman, postmaster-general, and minister of labor of Canada since 1906, was born at Montreal, 1866. He was educated at the seminary of Nicolet, and at Laval university, Montreal; barrister, 1891; professor of law at Laval university, 1897; Q. C., Quebec, 1898, and K. C., Ottawa, 1904. He was a member of parliament for Gaspé, 1896; reëlected, 1900 and 1904; represented Canada before the privy council in England, 1904; appointed substitute to the attorney-general for the district of Montreal; solicitor-general of Canada, 1904–06; fellow of the royal society, Canada, 1908. He is the author of several works on law and a number of addresses.

Lenbach (*lĕn'-bäĸ*), **Franz von,** noted German portrait painter, was born at Schrobenhausen, Bavaria, 1836. He studied at the Munich academy under Gräfle, and Piloty, and in 1858 went to Rome. In 1860 he became professor of art at Weimar, but resigned in 1862 and went to Italy and Spain. On his return to Munich he devoted himself exclusively to portraiture, but after 1872 spent much time in travel and work in Vienna, Morocco, and Egypt. His portraits of Bismarck are specially famous. Died, 1904.

Leo I., the Great, pope of Rome 440–461, was born about 390. He succeeded Sixtus III. in 440; zealously opposed the Manichæans and Pelagians, and secured the condemnation of the Eutychian heresy at the general council of Chalcedon; extended the Roman see, and induced Attila to spare Rome. He published several volumes of letters and sermons. Died at Rome, 461.

Leo X., Pope (Cardinal Giovanni de' Medici), son of Lorenzo the Magnificent, was born in Florence, Italy, 1475. He was banished with his family in 1494; traveled in Germany and Flanders, and formed a friendship with Erasmus. On his return to Italy he became legate to Julius II.; was taken prisoner at Ravenna in 1512, escaped and became pope in 1513. In his efforts to extend the papal dominions he allied himself at one time with France, at another with the empire. In 1515 he signed the famous concordat with Francis I. His pontificate is one of the most brilliant periods in the history of art and literature, and is also memorable as the time when the reformation began. Died, 1521.

Leo XIII., Pope (Gioacchino Pecci), son of Count Ludovico Pecci, was born in Carpineto, in the papal states, 1810. He was educated at the Collegio Romano and the academy of Noble Ecclesiastics; appointed by Gregory XVI. a domestic prelate in 1837, received the title of prothonotary apostolic, and was a vigorous apostolic delegate at Benevento, Perugia, and Spoleto. He was made archbishop of Damietta *in partibus* and sent to Belgium as nuncio in 1843, nominated archbishop of Perugia in 1846, and in 1853 created a cardinal by Pius IX. Upon the death of Pius IX. in 1878 he was elected to the papacy under title of Leo XIII. He restored the hierarchy in Scotland and composed the difficulty with Germany. In 1888 he denounced the Irish plan of campaign. He manifested enlightened views, but on questions affecting the church and his own status held firmly to his rights. He regarded himself as the despoiled sovereign of Rome, and as a prisoner at the vatican; and persistently declined to recognize the law of guarantees. He protested against heresy and "godless" schools, and in his encyclicals affirmed that the only solution to the socialistic problem is the influence of the papacy. In 1894 he constrained the French clergy and the monarchists to accept the republic. In 1883 he opened the archives of the vatican for historical investigations, and made himself known as a poet, chiefly in the Latin tongue. The jubilee of his episcopate in 1893 was marked by pilgrimages, addresses, and gifts, as was that of his priesthood in 1887. In 1896 he issued an encyclical pronouncing Anglican orders null and void. Died, 1903. To the time of his death he was one of the foremost figures of modern times, and a potent force in religion, education, and morals.

Leonardo da Vinci (*lā'-ō-när'-dō dä vēn'-chē*). See page 124.

Leonidas I. (*lē-ŏn'-ĭ-das*), king of Sparta, succeeded his half brother, Cleomenes I., 491 B. C. When the Persian monarch, Xerxes, approached with an immense army, Leonidas opposed him at the narrow pass of Thermopylæ, 480 B. C., with a force of 300 Spartans and more than 5,000 auxiliaries. The treachery of one Ephialtes having made it impossible to bar any longer the progress of the foe, Leonidas and his little band threw themselves on the swarming myriads, and found a heroic death.

Lepsius (*lĕp'-sē-ŏŏs*), **Karl Richard,** noted German Egyptologist, was born at Naumburg, 1810. His first work on palæography as an instrument of philosophy, in 1834, obtained the Volney prize of the French institute. In 1836 at Rome he studied Egyptology, Nubian, Etruscan, and Oscan, writing numerous treatises. In 1842–45 he was at the head of an antiquarian expedition sent to Egypt by the king of Prussia, and in 1846 was appointed professor in Berlin. His *Denkmäler aus Aegypten und Aethiopien* remains a masterpiece. His *Chronologie der Aegypter* laid the foundation for a scientific treatment of early Egyptian history. His other works consist of letters from Egypt, Ethiopia, 'and Sinai, 1852; *A Standard Alphabet*, in which he expounds a modified Roman alphabet for hitherto unwritten languages; the *Königsbuch*, and the *Todtenbuch*, or the Egyptian "Book of the Dead." He wrote on Chinese, Arabic, and Assyrian philology; and was a member of the royal academy, director of the Egyptian section of the royal museum, and director of the royal library at Berlin. Died, 1884.

Lesage (*lē sāzh'*), **Alain René,** French novelist and dramatist, was born in Sarzeau, in Brittany, 1668, and studied at the Jesuits' college at Vannes. After having held a situation under the farmers-general in his native province, he went to Paris in 1692, tried the bar for a short time, and then adopted the profession of an author. For some years he continued to be little known as a writer; but in 1707 he rose at once into popularity by his comedy of *Crispin the Rival of his Master*, and his romance of *Le Diable Boiteux*. The comedy of *Turcaret*, in 1709, added to his fame, which subsequently was rendered imperishable by his admirable *Gil Blas*. He was endowed with great literary fertility. Among his other novels are: *The Adventures of Guzman d'Alfarache; The Adventures of the Chevalier Beauchesne; The History of Estévanille Gonzales;* and *The Bachelor of Salamanca*. He composed twenty-four dramatic pieces, and had a share in the composition of seventy-six others. He died in Paris, 1747.

Leslie, Mrs. Frank (Miriam Florence Folline), was born in New Orleans, La., 1851, of noble French Huguenot family, from whom, now that she has retired from the publishing business, she takes her title of the Baroness de Bazus. She married Frank Leslie, publisher, who died in 1880; succeeded to his business, then badly involved; personally managed it and put it on a paying basis. Leased her business to a syndicate and made extended European tour. On her return, the syndicate having been unsuccessful, the business was put into a company, she being president and editor of the *Popular Monthly*, which increased 200,000 copies in four months under her management. She severed her connection with the publishing company, and now devotes her time to writing books and contributing to European magazines exclusively.

Lesseps (*lĕ'-sĕps'*), **Ferdinand, Viscount de,** French engineer and diplomat, was born at Versailles, 1805. He held various consular offices; in 1854 proposed to the viceroy of Egypt the cutting of the Suez canal, and completed the work in 1869. After its accomplishment he entertained other great projects, such as a central Asian railroad and the conversion of the Sahara into an inland sea, and entered practically upon the construction of the canal across the isthmus of Panama, since taken over by the United States. The sentence of imprisonment pronounced upon him by the French government in 1893, as one of the officers of the French Panama canal company, was never enforced. Until extreme old age he manifested unabated vigor. Died, 1894.

Lessing (*lĕs'-ĭng*), **Gotthold Ephraim.** See page 71.

Leutze (*loit'-sĕ*), **Emanuel,** German-American painter, was born at Gmünd in Württemberg, 1816. He was brought up in America, studied in Europe, 1841–59, then settled in New York. Among his works are: "Washington crossing the Delaware"; "Washington at Monmouth"; "Landing of the Norsemen"; "Cromwell and his Daughter," etc. Died at Washington, D. C., 1868.

Lever (*lē'-vĕr*), **Charles James,** Irish novelist, was born at Dublin, 1806. He was graduated at Trinity college in that city, 1827; studied medicine at Göttingen, and then returned to Dublin. His most popular work, *Charles O'Malley*, is a reflex of his own college life at Dublin, and many of the incidents in this novel are no doubt drawn from his own experience in the world. His other notable novels include: *Harry Lorrequer; Con Cregan; Roland Cashel; Lord Kilgobbin; Tom Burke of Ours*. He died at Trieste, Italy, 1872.

Lewes (*lū'-ĭs*), **George Henry,** English philosopher and critic, was born in London, 1817. He was educated partly at Greenwich under Dr. Burney, and partly in Jersey and Brittany; left school early to enter first a notary's office, and then the house of a Russian merchant. In 1838 he proceeded to Germany, and remained there nearly two years, studying the life, language, and literature of the country. On his return to London he became a miscellaneous writer, and contributor afterward to a dozen journals, reviews, and magazines. He was editor of the *Leader*, 1849–54, and of the *Fortnightly*, which he himself founded, 1865-66. He was married unhappily and had children when his connection with George Eliot began in 1854; it ended only with his death at their house in Regent's Park, 1878. Lewes was one of the best of critics and biographers; as a popularizer of philosophy he was inferior to none, as a popularizer of science he was inferior to few. His works, besides a tragedy and two novels, include: *Biographical History of Philosophy; The Spanish Drama; Life of Robespierre; Comte's Philosophy of the Sciences; Life and Works of Goethe; Seaside Studies; Physiology of Common Life; Studies in Animal Life; Aristotle; On Actors and the Art of Acting; Problems of Life and Mind*.

Lewis, Meriwether, American explorer, was born near Charlottesville, Va., 1774. He was a volunteer at the time of the whisky insurrection of 1794, an ensign in the regular army in 1795, and a captain in 1800. Shortly afterward he became Jefferson's private secretary. In 1803–06 he was engaged with Captain William Clarke in an expedition to the Pacific ocean, the results of which were important to geographical science; and in 1807 he was made governor of the territory of Louisiana. He was subject to periods of mental depression, in one of which he is said to have taken his own life near Nashville, Tenn., 1809. His memoir by Jefferson was published, together with Biddle and Allen's *Narrative of the Lewis and Clarke Expedition*, in 1814.

Lewis, William Draper, American educator and law writer, dean of the law department, university of Pennsylvania, since 1896, was born in Philadelphia, Pa., 1867. He was graduated at Haverford, 1888; university of Pennsylvania, LL. B., Ph. D., 1891. He was instructor in legal historical institutions, Wharton school, university of Pennsylvania, 1891; lecturer on economics, Haverford college, 1890–96. Author: *Federal Power Over Commerce and Its Effect on State*

Action; Our Sheep and the Tariff; Restraint of Infringement of Incorporeal Rights; and numerous articles on legal, economic, and historical topics for periodicals. Editor: Lewis's *Greenleaf's Evidence,* 3 vols.; Wharton's *Criminal Law;* Lewis's *Blackstone's Commentaries,* 4 vols.; *Digest of Decisions of United States Supreme Court and Circuit Court of Appeals;* Pepper and Lewis's *Digest of Statutes of Pennsylvania,* 3 vols.; *Digest of Decisions and Encyclopedia of Pennsylvania Laws,* etc.

L'Hôpital (*lō'-pē'-tål'*), **Michel de,** French statesman, was born about 1507. He was president of the court of accounts, 1554–60, and afterward chancellor of France until 1568. He promoted the edict of Romorantin, which excluded the inquisition from France; the ordinance of Orleans, an administrative, judicial, and religious code; the edict of pacification, for the free exercise of Protestant worship; and the ordinance of Moulins, to reform the administration of justice. As his wife and family had all become Protestants, a troop was sent to protect him at the time of the St. Bartholomew massacre. He died in 1573.

Liddon (*lĭd'-un*), **Henry Parry,** English clergyman, was born at North Stoneham, Hampshire, 1829. He was graduated at Christ Church, Oxford, 1850; was ordained in 1852 as senior student of Christ Church; from 1854 to 1859 was vice-principal of Cuddesdon theological college, and in 1864 became a prebendary of Salisbury, in 1870 a canon of St. Paul's, and Ireland professor of exegesis at Oxford, until 1882. In 1866 he delivered his Bampton lectures on the *Divinity of Our Lord.* He strongly opposed the church discipline act of 1874, and as warmly supported Gladstone's crusade against the Bulgarian atrocities in 1876. In 1886 he declined the bishopric of Edinburgh, and in 1887 visited the holy land. Canon Liddon was a most able and eloquent exponent of liberal high church principles. He published several series of sermons and other works. He died suddenly at Weston-super-Mare, 1890.

Lieber (*lē'-bẽr*), **Francis,** German-American publicist, was born in Berlin, 1800. After suffering imprisonment for his political opinions, he came to America in 1827, and was made professor of history in South Carolina college, 1835–56, of political economy in Columbia college, 1857–60, and of political science in Columbia law school, 1860–72. He edited the *Encyclopædia Americana,* and wrote *Political Ethics; Civil Liberty and Self-Government; Guerilla Parties,* etc. Died, 1872.

Liebig (*lē'-bĭk*), **Justus, Baron von,** German chemist, was born in Darmstadt, 1803. He studied at Bonn and Erlangen; then went to Paris, and attracted the attention of Humboldt by a paper on the fulminates. He was appointed professor at Giessen in 1824, where he established a laboratory celebrated for researches in organic chemistry and the application of chemistry to agriculture, food, etc. Among his chief works are: *Organic Chemistry in its Application to Agriculture; Animal Chemistry, or Chemistry in its Application to Physiology and Pathology; Familiar Letters on Chemistry; Dictionary of Chemistry,* etc. He died at Munich, 1873.

Li Hung Chang (*lē' hŏŏng'-chăng'*), Chinese statesman, was born in 1823, and studied at Hanlin college. In 1853, in the Taiping rebellion, he joined the imperial army as secretary, was appointed a provincial judge, and in 1861 governor of Kiangsu, out of which, in conjunction with "Chinese" Gordon, he drove the rebels in 1863. In 1864 he was appointed governor-general of the Kiang provinces, and in 1872 of Chi-li, and senior grand secretary. He founded the Chinese navy and promoted a native mercantile marine. On the outbreak of the war with Japan in 1894, Li, in supreme command of the military and naval forces in Corea, was thwarted by the incompetence, dishonesty, and cowardice of inferior officers. The Chinese forces were swept out of Corea, and Li, whose policy was that of peace, was deprived of his honors and summoned to Peking. With this last command he refused to comply, and the disastrous course of events soon compelled the emperor to restore him to honor. Through his efforts the war was brought to a termination in 1895, China ceding Formosa and paying a war indemnity of $175,000,000. Professedly friendly to foreigners, and well aware of the value of western culture and industry, he visited Russia, Germany, France, England, and America in 1896. Intriguing with Russia, he fell from power in 1898, but was later appointed by the government with full power to settle the Boxer troubles with the European governments. He died in 1901.

Lincoln, Abraham. See page 500.

Lincoln, Robert Todd, American lawyer, was born at Springfield, Ill., 1843, eldest son of Abraham Lincoln. He was graduated at Harvard, 1864; entered Harvard law school, but left to enter the army, serving until end of war as captain on staff of General Grant. He then finished his law studies, was admitted to the Illinois bar, 1867, and practiced at Chicago. He was presidential elector, 1880; secretary of war, 1881–85, and United States minister to Great Britain, 1889–93. He was special counsel for and, after the death of George M. Pullman, became president of the Pullman company; resigned, 1911, and became chairman of board of directors. He is also vice-president of the Commonwealth Edison company; director of Chicago telephone company, Continental and Commercial national bank, Pullman trust and savings bank, etc.

Lind, Jenny (Madame Otto Goldschmidt), the Swedish singer, was born in Stockholm, Sweden, 1820. At three years of age she could sing correctly any piece she had once heard, and at nine was placed under Croelius, a famous teacher of music. Later she studied in Paris and in 1844 went to Dresden, and afterward to Frankfort, Cologne, Vienna, and London. She visited New York in 1850, under the auspices of P. T. Barnum, and was enthusiastically received, but dissolved the engagement prematurely in 1851, was married to M. Otto Goldschmidt, a skillful pianist and conductor, and retired from the stage. She reappeared in 1855, in 1861, in 1863, and in 1880 for a limited period. She was professor of singing at the royal college of music, London, 1883–86. She died in Wynd's Point, Malvern, England, in 1887.

Lindsey, Benjamin Barr, jurist, reformer, was born in Jackson, Tenn., 1869. He was educated in the public schools, studied law and was admitted to the bar. Judge of the county court and juvenile court of Denver, Colo., since 1901. He is the originator of the juvenile court system, and has an international reputation as an authority on juvenile delinquency. In 1906 he was a candidate for governor of Colorado. Author: *The Beast and the Jungle.*

Linevich (*lĭ-nĕv'-ĭch*), **Nicolay Petrovich,** Russian general, was born in the government of Tchernigoff in 1838. He served in the Russo-Turkish war, and in 1900 succeeded to the command of the Siberian troops in Manchuria. In 1905 he commanded the Russian left at the battle of Mukden, in the Russo-Japanese war, and succeeded General Kuropatkin in the same year, as commander-in-chief in the far East. Died, 1908.

Lingard, John, noted English historian, was born in Winchester, 1771. He studied for the Roman

Catholic priesthood, and took orders when twenty-four years old. For some years he was vice-president of the Roman Catholic college at Crookhall, near Durham, but retired to Hornby in 1811. His greatest work is the *History of England* in 10 vols. It has been translated into several languages, and ranks among the best histories. He also wrote *Antiquities of the Anglo-Saxon Church*, etc. After his *History of England* was published Lingard was offered a cardinal's hat, which he refused. He died at Hornby, near Lancaster, 1851.

Linnæus (*lĭ-nē′-us*), **Carolus** (Carl von Linné). See page 367.

Lipton, Sir Thomas Johnstone, British sportsman and merchant, was born in Glasgow, of Irish parentage, 1850. He started life as a retail merchant, acquired extensive tea, coffee, and cocoa estates in Ceylon, and accumulated a large fortune. He is chairman of Lipton, ltd., and is also largely interested in business enterprises in the United States and Canada. He is the owner of the yachts *Erin* and *Shamrock*, and challenged for the American cup 1899, 1901, 1903 and 1913. He founded the Alexandria trust for providing the poor with cheap wholesome meals; is a member of many clubs; was knighted in 1898, and created a baronet in 1902.

Lister, Joseph, Lord, English surgeon, was born in Upton, England, 1827. He was graduated at London university in 1847, and in medicine, 1852. He was successively lecturer on surgery, Edinburgh; regius professor of surgery, Glasgow; professor of clinical surgery, Edinburgh; professor of clinical surgery, King's college hospital, London, and surgeon-extraordinary to Queen Victoria. In addition to important observations on the coagulation of the blood, inflammation, etc., his great work was the introduction of the antiseptic system, which has revolutionized modern surgery. He was president of the British association in 1896; received many foreign honors, and was made a baronet in 1883 and a peer in 1897. Died, 1912.

Liszt (*lĭst*), **Franz,** noted Hungarian pianist and composer, was born at Raiding, 1811. He made his first appearance at a concert in his ninth year; studied under Czerny and Salieri at Vienna, and from 1839 to 1847 traveled throughout Europe as a virtuoso. In 1849 he became conductor of the court theater at Weimar; in 1861 was made commander of the legion of honor, and in 1865 took orders and received the tonsure. In 1871 his native country granted him a pension of 600 pounds a year, and in 1875 he was named director of the Hungarian academy of music. One of his two daughters married Richard Wagner, his lifelong friend. Though Liszt's fame as a pianist overshadows his name as a composer, yet he was the creator of the symphonic poem, and his *Hungarian Rhapsodies* for the piano are unrivaled. He died at Bayreuth, Bavaria, 1886.

Little, Richard Henry, war correspondent, journalist, was born at Le Roy, Ill., 1869. He graduated at the Illinois Wesleyan college of law; practiced law at Bloomington, Ill., one year and began newspaper work on the *Bloomington Bulletin*. He was reporter on the *Chicago Tribune*, 1895; war correspondent of *Chicago Tribune* during the Spanish-American war, in Cuba, and Philippine islands; was with Major Marsh's column in pursuit of Aguinaldo and with General Bates's expedition in Sulu; traveled in China afterward, writing to the *Tribune;* went to Manchuria for the *Chicago Daily News* at the beginning of the Russo-Japanese war; in charge of dispatch boat *Fawan* when captured by Russians; joined Russian army as correspondent and was present at the battles of Ping Yang, Liao Yang, Sha ho, Grippenberg's advance on Mukden, etc. Was captured by the Japanese after the battle of Mukden and taken to Shidzuoka and interned in Russian officers' prison six weeks. On his return he lectured and wrote for periodicals on the war. He was special writer on the *Chicago Record-Herald* several years, and is now on *Chicago Tribune.*

Littlefield, Charles Edgar, American lawyer, ex-congressman, was born in Lebanon, York county, Me., 1851. He received an academic education, was admitted to the bar, 1876, and rapidly acquired a high reputation for legal and forensic ability. He was a member of the Maine legislature, 1885–89, speaker, 1887–89; attorney-general of Maine, 1889–93; elected to 56th congress, 1899, to fill vacancy caused by the death of Nelson W. Dingley, and was reëlected to the 57th, 58th, 59th, and 60th congresses from second Maine district. In 1908 he retired from congress and took up the practice of law in New York city.

Littleton, Martin W., American lawyer, was born in Roane county, Tenn., 1872. He was practically self-educated and began practicing law in 1891. He was assistant prosecuting attorney, Dallas, Texas; later removed to Brooklyn; was assistant-district attorney of Kings county four years; president of Brooklyn borough, 1904–05; delegate from New York to democratic national convention, 1904, presenting name of Alton B. Parker for presidential nomination on behalf of state of New York; has appeared in many famous legal trials. Elected to congress, 1910.

Littleton, Sir Thomas, English jurist, was born in Worcestershire, England, 1402. He was recorder of Coventry in 1450, king's sergeant in 1455, in 1466 judge of common pleas, and in 1475 a knight of the bath. His reputation rests on his treatise on *Tenures*, written in law French, and turned into English about 1500. It was the text that Coke commented on in his *Coke upon Littleton*. Died, 1481.

Littré (*lē′-trā′*), **Maximilien Paul Émile,** French philosopher and philologist, was born in Paris, 1801. He studied at the Lycée Louis-le-Grand, then graduated in medicine, and finally turned to philology. His translation of Hippocrates procured his election in 1839 to the academy of inscriptions. He fought on the barricades in 1830, was one of the principal editors of the *National* down to 1851, and became an enthusiastic follower of Comte. His *La Poésie Homerique et l'Ancienne Poésie Française* was an attempt to render the first book of the *Iliad* in the style of the Trouvères. In 1854 he became editor of the *Journal des Savants.* His splendid *Dictionnaire de la Langue Française* did not prevent the academy in 1863 from rejecting its author, whom Bishop Dupanloup denounced as holding impious doctrines. In 1871 Gambetta appointed him professor of history and geography at the École Polytechnique; he was chosen representative of the Seine department in the national assembly; and in 1871 the academy at last admitted him. He was one of the first linguists and scientists of his century. Died, 1881.

Livingston, Edward, American jurist and statesman, was born at Clermont, N. Y., 1764. He was elected a member of congress in 1794, and became federal attorney and mayor of New York in 1801. He joined the New Orleans bar in 1804, and speedily acquired a commanding position. In the dispute with England in 1814-15 he became aide-de-camp and secretary to General Jackson. In 1821 he was appointed to draw up a code of civil procedure for Louisiana. It was the simplest known up to that time, and received the warmest approval from Bentham and other jurists. He was thereafter United States senator for Louisiana, 1829–31; secretary of state, 1831–33; minister to France, 1833–35, and supported the demand of $5,000,000 made by the United States government for indemnity on account of French spoliations, and succeeded in securing its payment. Died at his own estate on the Hudson, 1836.

Livingstone, David, African explorer and missionary, was born at Blantyre, in Lanarkshire, Scotland, 1813. He worked during childhood and youth in a cotton mill; was sent to southern Africa by the London missionary society in 1840; resided for several years at various stations near the Limpopo, discovering Lake Ngami in 1849, and penetrating to the Makololo country in 1851; in 1853-54 crossed Africa from the Zambezi to the Congo, and in 1854–56 made his way from Loanda to Quilimane, following the course of the Zambezi, and discovering the Victoria falls. He returned to England in 1856, and published *Missionary Travels*, 1857; returned to Africa as consul at Quilimane in 1858; explored the country north of the Zambezi, 1858–64, discovering Lakes Shirwa and Nyassa, and in 1865 published a narrative of the journey. He undertook his third expedition in 1866, and spent the remainder of his life endeavoring to ascertain whether the Nile flowed from the water-system west of Lake Tanganyika. In 1871 he was found by Stanley at Ujiji. He died in central Africa, 1873.

Livy, or Titus Livius, Roman historian, was born at Patavium (Padua), in the north of Italy, 59 B. C. He was the most eminent of the Roman historians, distinguished for the animation of his narrative and for the purity of his style, though not for the reliability of his historical statements. His history of Rome was written partly at Rome and partly at Naples, under the patronage of the emperor Augustus. It consisted originally of 142 books; but of these only thirty-five have come down to us and some of these in a very imperfect state. Of all but two, however, we possess fragments, with short epitomes from another hand. The history, or as it was called by its author, *The Annals of the Roman People*, begins with the foundation of the city, and ends with the death of Drusus, the younger brother of the emperor Tiberius, 9 B. C. Died, 17 A. D.

Lloyd-George, David, English statesman, chancellor of the exchequer since 1908, was born in Manchester in 1863. He was educated at Llanystymdwy church school and privately. He became solicitor in 1884. Member of parliament since 1890. From 1905 to 1908 he was president of the board of trade. In 1906 his settlement of the railway dispute was generally applauded. He was the author of the old age pension law of 1908 and the insurance act of 1912 insuring working people against illness or disability; he strongly supported the minimum wage law of 1912 which settled by intervention of the government the great coal strike involving a million miners.

Locke, George Herbert, Canadian educator, professor of education and dean of training school for teachers, Macdonald college, McGill university, Montreal, Canada, 1907-08, was born in Ontario, Canada, 1870. He was educated at Victoria college, university of Toronto, and university of Chicago; was lecturer in Greek and ancient history, Victoria college, university of Toronto, 1893-94; fellow in education, university of Chicago, 1895-96; instructor in history and art of teaching, Harvard university and Radcliffe college, Cambridge, Mass., 1897–99; associate professor of education, university of Chicago, 1899–1905; dean of college of education, 1903–05; editor of *The School Review*, 1900–06; in editorial department of Ginn and Company, Boston, 1905–07; associate editor of *The Quarterly Journal of Pedagogy*, 1907. He is the author of many contributions to educational periodicals, notably *The School Review* during the six years as editor.

Locke, John. See page 295.

Lockhart, John Gibson, Scottish biographer, was born in Scotland, 1794. He was graduated at Oxford, studied law at Edinburgh, and was admitted to the Scottish bar in 1816. He early, however, adopted the profession of letters. He and John Wilson were long the chief supporters of *Blackwood's Magazine.* It was this connection which led to his acquaintance with Sir Walter Scott. In 1820 he married Sophia Scott, eldest daughter of Sir Walter. After the publication of other works, and from 1836–38, appeared his *Life of Scott,* a production of undoubted merit, which has given rise to much bitter controversy. In 1837 his wife died, having been predeceased by their eldest son Hugh. His second son died at a later period. In 1843 Lockhart was appointed auditor of the duchy of Cornwall. He died in 1854.

Lockwood, Belva Ann Bennett, American lawyer, was born in Royalton, N. Y., 1830, daughter of Lewis Johnson Bennett. She was graduated at Genesee college, Lima, N. Y., 1857. She then studied law in Washington and graduated at the National university law school, 1873; was admitted to District of Columbia bar; secured passage of a bill admitting women to United States supreme court, 1879, and was herself admitted under it the same year. She has been engaged in many important law cases, several before the United States supreme court. She has also been prominent in temperance, peace, and woman suffrage movements; was nominated, 1884 and 1888, by equal rights party for president of the United States; commissioned by state department to represent United States at congress of charities and corrections, Geneva, Switzerland, 1896; one of committee appointed by federation of women's clubs which secured law giving equal property rights for women and equal guardianship of their children in District of Columbia. She has been a prolific writer on peace and arbitration and on political and social subjects.

Lockyer (*lŏk'-yẽr*), **Sir Joseph Norman,** English astronomer, director of Solar physics observatory, South Kensington, was born at Rugby, 1836. He became a clerk in the war office, 1857; in 1869 was made a fellow of the royal society; in 1870 lecturer on astronomy at the normal school of science at South Kensington; in 1894 a C. B., and in 1897 a K. C. B. President of British Association for advancement of science, 1903-04. He headed eclipse expeditions to Sicily, India, Egypt, and the West Indies. He has written *Elementary Lessons in Astronomy; Contributions to Solar Physics; The Spectroscope; Star-Gazing; The Chemistry of the Sun; The Dawn of Astronomy*, etc., and is editor of *Nature.*

Lodge, Henry Cabot, American author, statesman, was born in Boston, Mass., 1850. He was graduated from Harvard college, 1871; from Harvard law school in 1874, was admitted to the Suffolk bar in 1876, and received the degree of Ph. D. from Harvard university for his thesis on *The Land Law of the Anglo-Saxons;* LL. D., Williams, 1893, Clark university, Yale, 1902, Harvard, 1904. He was a member of the Massachusetts legislature, 1880 and 1881; placed Thomas B. Reed in nomination for presidency, 1896; was member of Alaskan boundary commission; editor *North American Review*, 1873–76; university lecturer on American history, Harvard, 1876–79, and lecturer before

Lowell institute, Boston, 1880. He was elected a member of congress, 6th Massachusetts district, 1887–93, and United States senator since 1893; present term expires 1917. Editor: *Ballads and Lyrics; Complete Works of Alexander Hamilton*, 9 vols. Author: *Life and Letters of George Cabot; Short History of the English Colonies in America; Life of Daniel Webster; Studies in History; Life of Washington*, 2 vols.; *History of Boston*, in Historic Towns series; *Historical and Political Essays; Speeches; Hero Tales from American History*, with Theodore Roosevelt; *Certain Accepted Heroes and Other Essays in Literature and Politics; Story of the Revolution*, 2 vols.; *Story of the Spanish War; A Fighting Frigate and Other Essays; A Frontier Town and Other Essays*, etc.

Lodge, Sir Oliver Joseph, British educator and physicist, principal of the university of Birmingham since 1900, was born at Penkhull, Staffordshire, 1851. He was graduated at University college, London; D. Sc., London, Oxford, Victoria, and Liverpool; LL. D., St. Andrews, Glasgow, and Aberdeen. Was professor of physics, University college, Liverpool, 1881–1900; Rumford medallist of the royal society, 1898; Romanes lecturer at Oxford, 1903. Author: *Elementary Mechanics; Modern Views of Electricity; Pioneers of Science; Signalling Without Wires; Lightning Conductors and Lightning Guards; School Teaching and School Reform; Easy Mathematics for Parents and Teachers; Life and Matter; Electrons; The Substance of Faith; Ministers and Stewards; Man and the Universe*, etc.

Loeb (*lōb*), **Jacques,** German-American physiologist, head department of experimental biology, Rockefeller institute for medical research, since 1910, was born in Germany, 1859. He studied medicine at Berlin, Munich, and Strassburg; M. D., Strassburg, 1884; was state examiner, Strassburg, 1885; assistant in physiology, university of Würzburg, 1886–88; same, university of Strassburg, 1888–90; biological station, Naples, 1889–91; associate in biology, Bryn Mawr, 1891-92; assistant professor of physiology and experimental biology, 1892–95, associate professor, 1895–1900, professor, 1900-02, university of Chicago; professor of physiology, university of California, 1902–10. Author: *The Heliotropism of Animals and Its Identity with the Heliotropism of Plants; Physiological Morphology; Comparative Physiology of the Brain and Comparative Psychology; Studies in General Physiology*, etc.

Logan, John Alexander, American soldier, was born in Illinois, 1826. He served in the Mexican war, was admitted to the bar in 1852, and was elected to congress as a democrat in 1858. He raised an Illinois regiment in the civil war, and retired at its close as major-general. He returned to congress as a republican in 1866, was United States senator from Illinois, 1871–77 and 1879–86. He was nominated for the vice-presidency in 1884, but was defeated with the rest of the Blaine ticket. Died, 1886.

Lombroso (*lōm-brō'-zō*), **Cesare,** famous Italian alienist and criminologist, was born at Verona, Italy, 1836. He was educated at the university of Turin, became professor of mental diseases at the university of Pavia, 1862, and finally professor of forensic medicine and psychiatry at Turin. Lombroso was the author of many books on his special subject, particularly the pathology of genius, and his investigations of insanity and criminology led the way to great reforms in the treatment of these classes in Europe and elsewhere. He was also a noted linguist and a keen student of the occult. He visited England in 1908, and died in 1909.

London, Bishop of. See **Ingram, A. F. W.**

London, Jack, American author and socialistic lecturer, was born in San Francisco, Cal., 1876. He was educated at Oakland high school and the university of California. He left college to go to the Klondike and never completed his course; went to sea before the mast, 1892; went to Japan and seal hunting in Bering sea, 1893; tramped throughout the United States and Canada for sociological and economic study, 1894, and has traveled widely at various times. Author: *The Son of the Wolf; The God of His Fathers; A Daughter of the Snows; The Children of the Frost; The Cruise of the Dazzler; The People of the Abyss; Kempton-Wace Letters; The Call of the Wild; The Faith of Men; The Sea Wolf; The Game; War of the Classes; Tales of the Fish Patrol; White Fang; Before Adam; Love of Life; The Iron Heel; The Road; Martin Eden*, etc. He is also a frequent contributor to magazines.

Long, George, English scholar, was born at Poulton, Lancashire, England, 1800. He was graduated at Trinity college, Cambridge, 1822, and in 1823 was made fellow over Macaulay's head. In 1824 he became professor of ancient languages at the university of Virginia, Charlottesville, Va., and in 1828 of Greek in London university. Subsequently he was professor of Latin at University college, London, 1842–46, reader in jurisprudence to the Middle Temple, 1846–49, and classical lecturer at Brighton college, 1849–71. His great work was the editing of the *Penny Cyclopædia*. He died at Portfield, Chichester, 1879.

Long, John Davis, American lawyer and publicist, was born at Buckfield, Me., 1838. He was graduated at Harvard, 1857; LL. D., Harvard, 1880; studied law in Harvard law school and private law offices, and was admitted to the bar, 1861. He practiced at Buckfield, Me., 1861-62, and since then at Boston, Mass.; was a member of the Massachusetts legislature, 1875–78; speaker, 1876–78; lieutenant-governor of Massachusetts, 1879; governor, 1880–82; member of congress, 2d Massachusetts district, 1883–89, declined renomination, 1888; was for several years on statehouse construction commission of Massachusetts, and secretary of the United States navy, 1897–1902. Is now senior member of the law firm of Long and Hemenway, Boston, and president of the board of overseers of Harvard college. Author: *After-Dinner and Other Speeches; The Republican Party — Its History, Principles and Policies; The New American Navy*, 2 vols.; and also a translation of Virgil's *Æneid*.

Long, John Luther, lawyer, author, was born in Pennsylvania, 1861. He studied law, was admitted to the Pennsylvania bar, traveled extensively, and about 1898 turned to dramatic writing. Author: *Madam Butterfly; Miss Cherry-Blossom of Tôkyô; The Fox-Woman; The Prince of Illusion; Naughty Nan; Heimweh, and Other Stories; Billy Boy; The Way of the Gods*, etc.

Longfellow, Henry Wadsworth, distinguished American poet, was born in Portland, Me., 1807, at which period Maine formed part of the commonwealth of Massachusetts. He was graduated in 1825 from Bowdoin college, when but eighteen years old, and began his poetical career while he was in college. When nineteen he was made professor of modern languages and literature in Bowdoin college, and passed the next three years in Europe, preparing himself for his professional duties. That time was spent in Germany, France, Spain, and Italy. He then held the chair to which he had been appointed from 1830 until 1835. During this period he wrote for the *North American Review*, and translated the *Coplas de Manrique*, a most perfect production. His success with the *Coplas de Manrique* placed him, at the age of twenty-six, in the front rank of great living poets. *Outre-Mer: A Pilgrimage beyond the Sea*, came out two years later, and after its publication he was appointed to the professorship of modern languages and belles-letters in Harvard college, succeeding George Ticknor. He again visited Europe, where he remained a year, traveling in Germany, Switzerland, Holland, Belgium, Sweden, and Denmark. He began his official duties at Cambridge in 1836, and held the professorship until 1854, when he resigned. Meantime his career as an author went steadily on. *Hyperion* was published in 1839, and became immediately popular; in the same year appeared *Voices of the Night. Ballads and Other Poems* dates from 1841. *The Spanish Student* was published in 1843, and in 1845 he prepared *Poets and Poetry of Europe*, a critical compilation. Then came *The Belfry of Bruges, and other Poems*, in 1846, and *Evangeline* in 1847, which is commonly held to be his greatest production. His novel, *Kavanagh*, appeared in 1849, and *The Seaside and the Fireside*, in 1850. *The Golden Legend* has the date of 1851. Four years passed, and in 1855 he published *The Song of Hiawatha*, said to have had the largest sale of any of his poems. Three years later, in 1858, *The Courtship of Miles Standish* met with the applause it deserved. *Tales of a Wayside Inn* appeared in 1863, *Flower-de-Luce* in 1867, and *New England Tragedies* in 1868. The publication of his translation of Dante's *Divine Comedy* took place in 1867–70, and filled three superb and massive volumes. His *Three Books of Song* appeared in 1872, *The Hanging of the Crane* in 1874, and *Morituri Salutamus* in 1875. In 1869 he received the degree of D. C. L. from Oxford university, and in 1874 a large complimentary vote for the lord rectorship of the university of Edinburgh. Died, 1882.

Longford, Joseph Henry, British scholar, professor of Japanese, King's college, London, since 1903, was born in 1849, in County Dublin, Ireland. He was graduated at Queen's college, Belfast, Ireland, entered the British consular service in Japan as student interpreter, 1869, and was subsequently called to the British bar. He served for thirty-three years, traveling during this period throughout the whole of the Japanese empire, from the Kurile islands in the extreme north to Formosa in the extreme south, and was successively consul and judge of consular courts at Tokyo, Hiogo, Hakodate, Tainan, Tamsui, and Nagasaki. He retired on a pension in 1902. Author: *Penal Code of Japan;* many contributions to the transactions of the Asiatic society of Japan, and on Japanese subjects to the *Quarterly* and *National* reviews, the *Nineteenth Century*, and other journals.

Longinus (*lŏn-jī'-nus*), **Dionysius Cassius**, one of the greatest of Greek critics and philosophers, flourished during the third century. After founding a celebrated school of rhetoric and Platonic philosophy at Athens, he resorted to the court of Zenobia, the famous queen of Palmyra, where he acted as her chief adviser during the war carried on against Aurelian. After the latter had triumphed, he put Longinus to death, 273 A. D. The only work of this eminent writer which has been preserved is the celebrated treatise *On the Sublime*.

Longstreet, James, American general, was born in South Carolina, 1821. He was graduated at West Point, 1842, and was on duty on the Mexican frontier until 1846; took part in the Mexican war, 1846–48, where he was wounded; attained the rank of captain and a major's brevet; served subsequently in Texas and as paymaster in the United States army, being promoted major on the staff in 1858. He resigned his commission to take part with the South in the civil war, 1861; commanded the fourth brigade of Beauregard's first corps, near Centerville, and was present at the battle of Bull Run, 1861. In 1862 he was made major-general, and after the battle of Fredericksburg, 1862, Longstreet was promoted to the command of a corps, with the rank of lieutenant-general. He took an active part in the battle of Gettysburg, July 1st–3d, in the campaign of the Wilderness, May 1st–6th, and was severely wounded, but recovered in time to take command of his corps during the siege of Petersburg. He surrendered with General Lee in April, 1865. After the war General Longstreet acted zealously for the restoration of harmony between the two sections. He made New Orleans his residence, and, having been amnestied by President Johnson, he was so cordial toward the administration that President Grant appointed him surveyor of the port of New Orleans. In 1875 he took up his residence in Georgia, and in 1880 was sent as minister to Turkey, where he remained until 1881. He was United States marshal for the northern district of Georgia, 1881–84; and United States railroad commissioner from 1898 until his death in 1904.

Longworth, Nicholas, congressman, capitalist, was born at Cincinnati, Ohio, 1869. He was graduated at Harvard, 1891, student Harvard law school, 1893, LL. B., Cincinnati law school, 1894, and was admitted to the bar in the same year. He was a member of the board of education, Cincinnati, 1898; Ohio house of representatives, 1899–1901, Ohio senate, 1901–03, and member of congress, 1st Ohio district, 1903–13. In 1906 he married Miss Alice Roosevelt, daughter of ex-President Roosevelt, at the White House, Washington. He inherited a large estate from his father, Judge Nicholas Longworth.

Loomis, Elias, American mathematician and physicist, was born in Connecticut, 1811, and was graduated from Yale college in 1830. He was tutor there from 1833 to 1836; was professor of mathematics and natural philosophy in Western Reserve college, Ohio, 1837–44; professor in New York university, 1844–60; and in 1860 was appointed professor of natural philosophy and astronomy in Yale college. He published a series of text books embracing the whole range of mathematics, natural philosophy, astronomy and meteorology. These books attained an aggregate circulation of over half a million copies. His *Treatise on Analytical Geometry and Calculus* has been translated into the Chinese language, and his *Treatise on Meteorology* into Arabic. His scientific papers embrace the various departments of meteorology, the phenomena of auroral exhibitions and atmospheric electricity, territorial magnetism, astronomical observations, shooting-stars, solar-spots, etc. He was a member of the principal scientific societies of the United States and also of several scientific academies of Europe. Died, 1889.

Lope de Vega (*lō'-pā dā vā'-gā*), **Felix.** See **Vega.**

Lorenz (*lō'-rĕnts*), **Adolf**, Austrian surgeon, surgeon-in-chief of the orthopedic department in the imperial royal general hospital, Vienna, was born in Silesia, 1854. He was graduated at Vienna university, M. D., 1880; was docent of general surgery, 1885; professor of general surgery in Vienna university since 1889. He is especially famous for his bloodless methods in orthopedic surgery, and has taught the cure of hip-deformities and all forms of club foot in a rapid bloodless way, without bone resections. In the same way he taught the cure of congenital dislocation of the hip joints by reducing the dislocated head of the femur without opening the joint and without deepening the socket. In 1895 he published a treatise on *Dislocation of the Hip* which has received wide scientific approval. He visited the United States in 1902.

Lorenzo de' Medici. See **Medici.**

Lorimer (*lŏr'-ĭ-mẽr*), **George Horace,** American journalist and writer, editor-in-chief of the *Saturday Evening Post* since 1899, was born in Louisville, Ky., 1868. He pursued a college course at Colby and Yale, and immediately entered upon a journalistic career. Author: *Letters from a Self-Made Merchant to His Son; Old Gorgon Graham; The False Gods; Jack Spurlock — Prodigal,* etc.

Lorimer, William, United States senator from Illinois, contractor, was born in Manchester, England, 1861. When five years old he came with his parents to the United States, and in 1870 settled in Chicago. At ten he became a sign-painter's apprentice; later worked in packing houses and for a street railroad company; entered real estate business, 1886, and later became a member of the firm of Murphy and Lorimer in building and brick manufacturing business. He is now a member of the firm of Lorimer and Gallagher, contractors. He was superintendent of water-main extensions and later superintendent of water department for the city of Chicago; defeated for clerk of superior court, 1892; member of congress, 1895–1901, 2d Illinois district, and 1903–09, 6th district; was elected to the United States senate, 1909. Expelled from the senate, 1912.

Lossing (*lŏs'-ĭng*), **Benson John,** watchmaker, wood-carver, journalist, editor, and historian, was born in Dutchess county, N. Y., 1813. He edited some magazines and prepared several illustrated works, among which are an *Outline History of the Fine Arts, Lives of the Signers of the Declaration of Independence,* and *Pictorial Field-Book of the Revolution.* The last is the result of journeys to every place of note in connection with the American war for independence. Its popularity caused the author afterward to prepare along similar lines the *Pictorial Field-Book of the War of* 1812. He also published a *History of the United States, The Civil War in America,* several biographies of distinguished Americans, and a *Cyclopedia of United States History.* Died, 1891.

Lotze (*lŏt'-sĕ*), **Rudolf Hermann,** German philosopher, was born in Bautzen, Saxony, 1817. He was educated at Leipzig, where he studied medicine and philosophy, and was appointed to a professorship there in 1842. From 1844 to 1881 he occupied the chair of philosophy at Göttingen, and in the latter year was transferred to the university of Berlin. He ranks among the first metaphysicians, and gave a strong impulse to the development of physiological psychology. Among his works are: *Metaphysics; Universal Pathology; Logic; On the Idea of Beauty; Medical Psychology; Microcosmus; Ideas for a History of Nature; Humanity,* and *System of Philosophy.* Died in Berlin, 1881.

Loubet (*lōō'-bĕ'*), **Émile,** French statesman, ex-president of France, was born at Marsanne, in the department of the Drôme, 1838. He became a barrister, practicing at Montélimar, and steadily rose step by step from the municipal council of Montélimar to the presidency. He was mayor of Montélimar, 1870; member of the house of deputies, 1876; senator of France, 1885; minister for public works, 1887; prime minister, 1892; and elected president of the senate, 1895. It was the Panama affair which caused the fall of his ministry, but he was in no way implicated. As president of the senate he was kept more or less outside of parties, though he was known to be a moderate with radical tendencies. On the sudden death of President Faure, in 1899, he was elected by a large majority to succeed him, and held office until 1906. His uprightness, patriotism, and simplicity of demeanor made him the most popular president France has ever had. He was visited at Paris by the king of Sweden, the queen-dowager and queen of Holland, the king of Belgium, the king of Greece, the czar and czarina, the king of Portugal, the king and queen of Italy, the king of Spain, and King Edward VII.; he himself paid visits to the czar at St. Petersburg, to King Edward VII. at Windsor, and to the kings of Italy, Spain, and Portugal.

Louis IX. (Fr., *lōō'-ē'*), or **Saint Louis,** of France, was born in Poissy, 1215, and succeeded his father, Louis VIII., in 1226. When he attained his majority he became involved in a war with Henry III. of England, and defeated the English at Taillebourg, at Saintes, and at Blaye, 1242. During a dangerous illness he made a vow that if he recovered he would go in person as a crusader, and accordingly, having appointed his mother regent, he sailed in 1248 with 40,000 men to Cyprus whence, in the following spring, he proceeded to Egypt, thinking by the conquest of that country to open the way to Palestine. He took Damietta, but was afterward defeated and taken prisoner by the Mohammedans. A ransom of 100,000 marks of silver procured his release in 1250, with the relics of his army. He proceeded by sea to Acre, and remained in Palestine until the death of his mother, in 1252, compelled his return to France. A code of laws was brought into use, known as the *Etablissements de St. Louis.* He embarked on a new crusade, 1270, and proceeded to Tunis; but a pestilence breaking out in the French camp carried off the greater part of the army and the king himself. Died, 1270.

Louis XII. of France, son of Charles, duke of Orleans, was born in 1462, and succeeded Charles VIII. in 1498. He laid claim to the kingdom of Naples and the duchy of Milan. In 1499 he invaded Italy, and gained possession of Milan. With the assistance of Ferdinand of Aragon, he conquered Naples in 1500, but, having quarreled with his ally, was expelled in 1503. In 1508 he united with Ferdinand, Pope Julius II., and the emperor in the league of Cambrai against the Venetians. In 1511 Ferdinand joined Julius in the holy league against the French, who were finally driven out of Italy by means of the Swiss in 1513. In the same year Henry VIII. invaded France, and was successful at Guinegate. In 1499 Louis married Anne, duchess of Brittany, widow of Charles VIII. By his good government he earned the title of "father of his people." Died, 1515.

Louis XIII., king of France, was born at Fontainebleau, 1601. When his father, Henry IV., was assassinated in 1610, he succeeded to the throne, but his mother, Marie de' Medici, was regent during his youth. The Huguenots rose against her alliances with the pope and Spain, but concluded a peace in 1614. When the king was declared of age, he confirmed the edict of Nantes, and summoned the states-general for the last time until the reign of Louis XVI. By some concessions to the Catholics, a religious war was provoked, which ended in 1622. Under the guidance of his great minister, Richelieu, the king gradually increased the power of the monarchy, at the expense of the Protestant nobles, ending in the overthrow of the Huguenots by the capture of La Rochelle in 1628. In the thirty years' war Louis sided with Gustavus Adolphus against Spain and Austria. His possession of Alsace and Roussillon was confirmed in the next reign. Died, 1643.

Louis XIV., king of France, 1643–1715, was born in 1638. He was the son and successor of Louis XIII., the first years of his reign being under the regency of his mother, who was guided in all matters of state by her favorite, Cardinal Mazarin. He inherited from his father the war with Spain, and this was followed by the civil war of the Fronde, which lasted from 1648 to 1653. During the life of Mazarin, Louis interfered little in public affairs; but, after the death of that minister, in 1661, he resolved to become his own minister. He changed the feudal monarchy of France into an absolute one, and his favorite motto, *L'état c'est moi*, "I am the state," was at once the expression of the ruling principles of his life, and a description of his policy. He had several disputes with the court of Rome, in which he treated the pope with great asperity; though, in the later years of his life, he became very superstitious and professedly devout. On the death of Philip IV., the father of his queen, he laid claim to Holland, which he invaded; but this led to the alliance against him of England, Sweden, and Holland, usually called "the triple alliance," and Louis was speedily compelled to make peace. In 1672 he made an attack upon Holland, having engaged on his side the venal and unprincipled Charles II. of England; but at this junction William of Orange, who had been raised to the stadtholdership, revived the drooping spirits of his countrymen, and Holland was evacuated as fast as it had been overrun. Several other wars followed, notably the war of the Spanish succession, in which Louis sought to secure the Spanish monarchy for his grandson, the duke of Anjou. This began in 1701, convulsed Europe for thirteen years, and was terminated by the peace of Utrecht in 1713. Two years afterward, 1715, Louis died at Versailles, in his seventy-seventh year. He left several children. Many of the most famous names in French literature belong to this reign.

Louis XV., surnamed "the well-beloved," king of France, 1715–74, was born at Versailles, 1710. He was the son of the duke of Burgundy, and the successor of his great-grandfather, Louis XIV. The beginning of his reign was troubled by the failure of the famous Mississippi scheme of John Law. In 1723 he was declared of age, and two years later married Maria Lesczynski, daughter of Stanislaus, nominal king of Poland. On the death of Augustus, king of Poland, 1733, Louis supported the pretensions of his father-in-law to the vacant throne, and was opposed by the emperor of Germany, who upheld the claims of the elector of Saxony. On the death of the emperor Charles VI., 1740, new dissensions arose, and Louis, who had guaranteed the pragmatic sanction, and the succession of Maria Theresa, dishonorably united with Prussia and Poland to place the duke of Bavaria, Charles Albert, on the throne. This led to the war of the Austrian succession, which was terminated by the treaty of Aix-la-Chapelle in 1748. Afterward, in 1755, a new war was kindled between England and France, about their possessions in Canada; and this war was not terminated until 1763, when, by the treaty signed in Paris in that year, France formally ceded to England Canada, Nova Scotia, and its other North American colonies, besides Granada, Dominica, and Tobago, in the West Indies. During his later years, Louis suffered himself to be governed wholly by favorites, among whom were the Marchioness de Pompadour and Madame Du Barry. He died at Versailles, 1774.

Louis XVI., king of France, 1774–93, was born at Versailles, 1754. He was the grandson of Louis XV., whom he succeeded, having already, in 1770, married Marie Antoinette of Austria, daughter of Maria Theresa, and sister of the emperor Joseph. The first acts of Louis, after his accession, endeared him to his people, for he gave them immunities to which they had been hitherto unaccustomed, and effected many reforms in the administration; but he soon became embarrassed by financial difficulties, and was not fortunate in his choice of ministers. Turgot and Necker were in turn dismissed, and succeeded by the incapable Calonne, and Loménie de Brienne. Necker was then recalled, and advised the summoning of the states-general, which had always been formidable to monarchical authority but had not been summoned since 1614. It was convoked in May, 1789, and in June was superseded by the national assembly, which assumed the whole legislative authority. The dismissal of Necker was followed by the destruction of the Bastille, July 14, the declaration of the rights of man, and an attack of an armed mob, chiefly women, on the palace at Versailles in October. The king and the queen were forcibly removed by Lafayette to Paris. The revolution then begun culminated, as far as the king was concerned, in the insurrection of 1792, the storm of the Tuileries, the abolition of monarchy, the declaration of the republic, and the execution of the king on the scaffold in January, 1793.

Louis XVIII., king of France, a younger brother of Louis XVI., was born at Versailles, 1755. He fled from Paris on the same night as the king, Louis XVI., and reached the Belgian frontier in safety. From his retreat he issued from time to time declarations against the revolutionists which damaged the king. After the execution of his brother, he proclaimed the dauphin king, under the title of Louis XVII., and in 1795 took the title of king himself. The fall of Napoleon opened the way for him to the French throne and in 1814 he landed at Calais after twenty-three years of exile. He ruled by "the divine right of kings." The revolution had taught him nothing, and his treatment of the Protestants, republicans, and the followers of Napoleon, opened the way for Napoleon's return from Elba, when he fled into exile until after the battle of Waterloo. He was restored to the throne by the allied powers in 1815, and ruled until his death at Paris, 1824.

Louis Philippe (*lōō'-ē' fē'-lēp'*), king of France, was born at Paris, 1773, eldest son of Louis Philippe Joseph, duke of Orleans. He sought, during the revolution, in Switzerland a place of security for his sister Adelaide, wandered about for four months, and accepted a situation as teacher of geography and mathematics in a school at Reicheneau, near Chur, assuming the name of Chabaud-Latour. He afterward wandered for some time in the north of Europe, and then came to the United States. In 1800 he took up his abode at Twickenham, near London, with his two younger brothers, both of whom soon after died. On the fall of Napoleon he hastened to Paris, where he was received with distrust by Louis XVIII. After the second restoration, when he came to the throne, he recovered his great estates. He was very popular in Paris. He kept aloof, however, from political intrigues; and the three bloody days of the revolution of 1830 were nearly over before he was brought forward, the banker Laffitte proposing, in the provisional committee, his appointment as lieutenant-general of the kingdom, from which he proceeded to the acceptance of a constitutional throne, August 9, 1830. The country prospered under his government, but a demand for reform in the electoral system became loud and general, and was unwisely opposed by the king and the Guizot ministry. The French nation became much excited; reform banquets began to be held; the government attempted to prevent them by force; insurrectionary movements ensued in the streets of Paris in February, 1848; and the "citizen king" saw with alarm that the national guard could not be expected to support him. On February 24th Louis Philippe, deserted by his courtiers, fled to the coast of Normandy with his queen, concealed himself for some days, and at length found opportunity of escaping in a British steamboat to Newhaven under the name of Mr. Smith. He died at Claremont, 1850.

Louise, queen of Prussia, was born in 1776, at Hanover, where her father, Duke Karl of Mecklenburg-Strelitz, was commandant. She was married to the crown prince of Prussia, afterward Frederick William III., in 1793, and was the mother of Frederick William IV. and William III., afterward emperor. She endeared herself to her people by her spirit and energy during the period of national calamity that followed the battle of Jena, and especially by her patriotic and self-denying efforts to obtain concessions at Tilsit from Napoleon, though he had shamelessly slandered her. Died, 1810.

Lounsbury (*lounz′-bĕr-ĭ*), **Thomas Raynesford,** American educator and scholar, was born at Ovid, N. Y., 1838. He was graduated at Yale, 1859; LL. D., Yale, 1892, Harvard, 1893, Aberdeen, 1906; L. H. D., Lafayette, 1895; Litt. D., Princeton, 1896. He was engaged on the *American Cyclopædia*, 1860–62; was first lieutenant 126th New York volunteers, 1862–65; instructor of English, 1870-71, professor English language and literature since 1871, librarian Sheffield scientific school, 1873–1906, emeritus professor, 1906, Yale. He edited Chaucer's *Parliament of Foules*, and is the author of: *History of the English Language; Life of James Fenimore Cooper; Studies in Chaucer; Shakespeare as a Dramatic Artist; Shakespeare and Voltaire; The Text of Shakespeare*, etc.

Lovett, Robert Scott, lawyer, president of Union Pacific railroad, was born in San Jacinto, Texas, 1860. He was educated in the public schools; studied law, and was admitted to the bar in 1882; attorney for Houston East and West Texas railroad, 1884–89; assistant general attorney, 1889-91, and general attorney, 1891-92, Texas and Pacific railroad; general attorney and counsel for all Southern Pacific lines in Texas, 1904-09; general counsel for Harriman railroads, 1904–09; succeeded Edward H. Harriman as president and chairman of board of directors, Union Pacific railroad, 1909.

Low, A. Maurice, journalist, author, was born in London, England, 1860; educated at King's college, London, and in Austria. Since 1886 he has been Washington correspondent of *The Boston Globe;* chief American correspondent of the *London Morning Post*, and since 1896 has written every month for *The National Review* of London an article on American affairs. Author: *The Supreme Surrender; Protection in the United States; American Life in Town and Country; A Short History of Labor Legislation in Great Britain*, etc.

Low, Seth, American educator and publicist, mayor of Greater New York, 1902-03, was born in Brooklyn, N. Y., 1850. He was graduated at Columbia, 1870; LL. D., Amherst, 1889, university state of New York, Harvard, university of Pennsylvania, and Trinity, 1890, Princeton, 1896, Yale, 1901. He was clerk, and later partner in his father's tea-importing house. Mayor of Brooklyn, 1881-85, elected on independent ticket; unsuccessful candidate for mayor of Greater New York, 1897, and president of Columbia university, 1890-1901. In 1895 he erected for that institution a university library at a cost of $1,175,000. In honor of President Low's generosity and in accord with his desire, the trustees of Columbia founded twelve scholarships in the university for Brooklyn boys and the same number in Barnard college for Brooklyn girls, and also agreed to found eight annual scholarships. In 1899 he was appointed by President McKinley a member of the delegation to represent the United States at the international peace conference at The Hague. He is a trustee of the Carnegie institution, Washington.

Lowell, Abbott Lawrence, American educator and writer, president of Harvard university since 1909, was born in Boston, Mass., 1856. He was graduated at Harvard, 1877; Harvard law school, 1880; practiced law in Boston, 1880–97. He was lecturer at Harvard, 1897–99; professor of science of government, 1900–03, Eaton professor, 1903-09, Harvard; trustee of the Lowell institute of Boston since 1900, and was elected president of Harvard to succeed Dr. Charles W. Eliot, who resigned in 1909. He is an accepted authority in the field of government and comparative politics. Author: *Essays on Government; Governments and Parties in Continental Europe; Colonial Civil Service*, with Professor H. Morse Stephens; *Transfer of Stock in Corporations; The Influence of Party Upon Legislation in England and America*, etc.

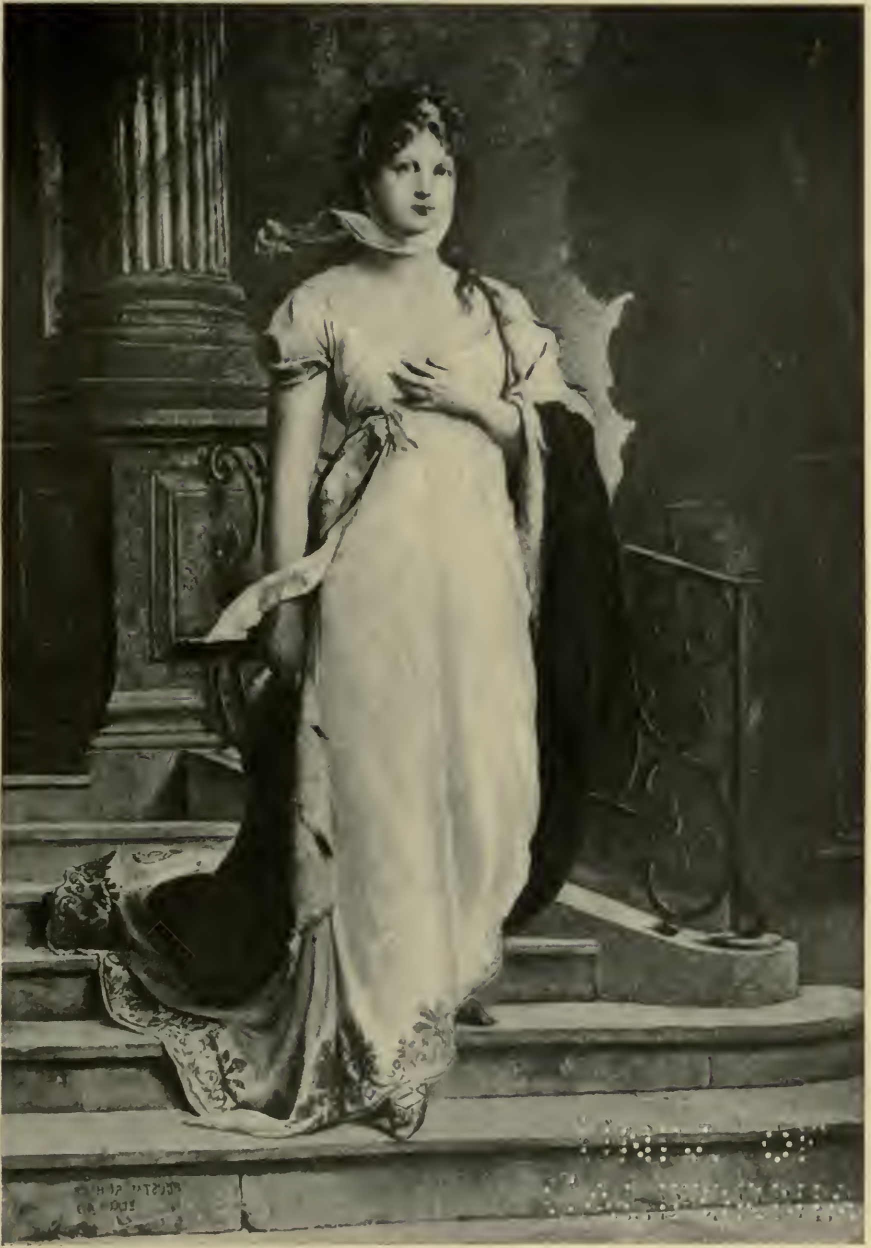
Lowell, James Russell, American poet and diplomat, was born in Cambridge, Mass., 1819. He was educated at Harvard university, spent several years abroad studying languages, and, in 1855, succeeded Longfellow as professor at Harvard. LL. D., Harvard, and Cambridge, England; D. C. L., Oxford. His *Legend of Brittany* appeared in 1844, and in 1845 he published a prose work entitled *Conversations on Some of the Old Poets*. From 1857 to 1862 he was editor of the *Atlantic Monthly*, from 1863 to 1872, of the *North American Review;* was United States minister to Spain, 1877–80, and ambassador to Great Britain, 1880–85. In 1869 he published *Under the Willows, and Other Poems*, and *The Cathedral*, an epic; in 1870, a collection of essays; in 1871, *My Study Windows;* in 1887, *Democracy;* in 1888, *Political Essays, Heartsease and Rue*, etc. Among his poems the best known are *The Vision of Sir Launfal, The First Snowfall*, and the *Commemoration Ode*. Died, 1891.

Lowell, Percival, author, astronomer, was born in Boston, Mass., 1855. He was graduated at Harvard, 1876; LL. D., Amherst, 1907. He went to Japan in 1883, and lived there from time to time until 1893; was counsellor and foreign secretary to Korean special mission to the United States; established the Lowell observatory, 1894, and undertook an eclipse expedition to Tripoli, 1900. He received the Janssen medal of the French astronomical society, 1904, for researches on Mars, and has made discoveries on the planets, especially Mars; appointed non-resident professor of astronomy, Massachusetts institute of technology, 1902. Author: *Chosŏn; The Soul of the Far East; Noto; Occult Japan; Mars; Annals of the Lowell Observatory; The Solar System; Mars and its Canals*, etc.

Lowther (*lou′-THĕr*), **James William,** British statesman, speaker of the house of commons since 1905, was born in 1855. He was graduated at Trinity college, Cambridge, and called to the bar, 1879. In 1883 he was elected to parliament for Rutland; contested Mid-Cumberland, 1885; was under-secretary for foreign affairs, 1891; represented Great Britain at international conference at Venice, 1892; chairman of committee on ways and means and deputy speaker, 1895–1905.

Loyola (*lō-yō′-lä*), **Ignatius de.** See page 237.

Lubbock (*lŭb′-uk*), **Sir John, Lord Avebury,** English naturalist and politician, was born in London, 1834. He was educated at Eton college, then entered his father's banking house, and in 1858 became a member of parliament, where he served at intervals until elevated to the peerage, in



QUEEN LOUISE OF PRUSSIA
From a painting by G. Richter

1900, as Lord Avebury. In parliament he accomplished several economic reforms, but was chiefly noted for his achievements in science. He is the author of *Prehistoric Times; The Origin of Civilization and the Primitive Condition of Man; Fifty Years of Science; Pleasures of Life,* etc. Died, 1913.

Lucretius (*lū-krē′-shĭ-us*), or **Titus Lucretius Carus,** Roman poet of the first rank, was born about 95 B. C. His principal work, *De Rerum Natura,* is a philosophical didactic poem in six books, which appeared 56 B. C. He was a follower of Epicurus, and his poem is, to a large extent, an exposition of the tenets, physical and moral, of that philosopher. Regarded merely as a literary composition, this work stands unrivaled among didactic poems, and, however objectionable its subject matter, takes a high position as a work of art. Died about 55 B. C.

Lucullus (*lū-kŭl′-us*), **Lucius Licinius,** celebrated Roman general, was born about 110 B. C. He commanded the fleet in the first Mithridatic war, as consul in 74 B. C. defeated Mithridates, and introduced admirable reforms into Asia Minor. He twice defeated Tigranes of Armenia; but his legions became mutinous, and he was superseded by Pompey in 66 B. C. He attempted to check Pompey's power, and was one of the first triumvirate, but soon withdrew from politics. He had acquired prodigious wealth; and spent the rest of his life surrounded by artists, poets, and philosophers, exhibiting a luxury which became proverbial. He died about 57 B. C.

Luini (*lo͞o-ē′-nē*), or **Luvino, Bernardino,** painter of the Lombard school, was born at Luino, about 1475. His skill was developed in the school of Leonardo da Vinci; indeed, many of his works were at one time attributed to that great artist. Luini's principal charm is a certain poetic grace and beauty; he is one of the five great painters whose "supremacy" Ruskin affirmed. Died about 1533.

Lummis (*lŭm′-ĭs*), **Charles Fletcher,** American author, explorer, was born at Lynn, Mass., 1859. He was educated at Harvard, class of 1881; Litt. D., Santa Clara college. Edited newspaper in Ohio, 1882–84; in 1884 walked from Cincinnati to Los Angeles, Cal., by roundabout route, purely for pleasure, 3,507 miles in 143 days. He was city editor *Los Angeles Daily Times,* 1885–87; lived five years in Indian pueblo of Isleta, New Mexico, learning Indian languages and customs; traveled all over the Southwest on horseback; also in Mexico and South America; has explored entire continent from Canada to Chile. Editor: *Out West Magazine;* librarian Los Angeles public library, 1905–10. Author: *A New Mexico David; A Tramp Across the Continent; Some Strange Corners of our Country; The Land of Poco Tiempo; The Spanish Pioneers; The King of the Broncos; The Enchanted Burro; The Awakening of a Nation: Mexico To-Day;* and many articles, historical and critical, reviews in *The Nation,* etc.

Lurton, Horace Harmon, American jurist, was born at Newport, Ky., 1844. He was graduated at Cumberland university, Tennessee, 1867; D. C. L., university of the South, 1899. He was admitted to the bar, 1867; was chancellor of 6th division, Tennessee, 1875–78; justice supreme court of Tennessee, 1886–93; chief-justice, January to April, 1893, and judge of the United States circuit court, 6th judicial circuit, 1893–1910, and became associate justice of the United States supreme court in 1910. He was for a number of years professor of constitutional law and dean of the law department, Vanderbilt university.

Luther (*lo͞o′-thẽr*), **Martin.** See page 230.

Luxembourg (*lŭk′-săɴ′-bo͞or′*), **François Henri de Montmorency-Bouteville, Duke of,** marshal of France, was born in Paris, 1628. He was trained by his aunt, mother of the great Condé, and adhered to Condé through the wars of the Fronde. After 1659 he was pardoned by Louis XIV., who created him Duke of Luxembourg in 1661. In 1667 he served under Condé in Franche-Comté; in 1672 he himself successfully invaded the Netherlands, and, driven back in 1673, conducted a masterly retreat. During the war he stormed Valenciennes and twice defeated the prince of Orange. Made a marshal in 1675, soon after the peace of 1678 he quarreled with Louvois, and was not employed for twelve years. In 1690 he commanded in Flanders, and defeated the allies 'at Fleurus, and in 1691 twice more routed his old opponent, now William III., at Steenkerke and Neerwinden. Died, 1695.

Lyall (*lī′-al*), **Edna,** pen-name of Ada Ellen Bayly, English novelist, daughter of a London barrister and bencher of Gray's Inn. She was born at Brighton, Sussex, and at an early age took to writing as a profession. Her first story, *Won by Waiting,* was published in 1879, and was followed by *Donovan; We Two; In the Golden Days; Knight Errant;* and *A Hardy Norseman.* In 1899 she published *Derrick Vaughan, Novelist;* this was followed by *Max Hereford's Dream; To Right the Wrong; Doreen, the Story of a Singer; How the Children raised the Wind; Wayfaring Men; Hope, The Hermit; In Spite of All; The Hinderers,* etc. Her books have attained a wide-spread popularity. Died, 1903.

Lycurgus (*lī-kûr′-gus*), lawgiver of Sparta, flourished in the ninth century B. C. He was uncle of the young king Charilaus, and governed wisely during his nephew's infancy, then traveled in Crete, Ionia, and Egypt. On his return, finding Sparta in anarchy, he redivided property, and remodeled the constitution, military and civil. Lycurgus was afterward honored as a god at Sparta. His laws remained in force for about seven hundred years.

Lyell, Sir Charles, British geologist, was born in Scotland, 1797. He was graduated at Oxford, and studied law, but left his practice and gave himself to the study of geology, to which he had been attracted by William Buckland's lectures when he was at Oxford. He made geological tours in 1824, and again in 1828–30, over various parts of Europe, and published the results of his investigations in the *Transactions of the Geological Society* and elsewhere. The first volume of his great work, *The Principles of Geology,* appeared in 1830, the second in 1832, and the third in 1833. He also published *A First and Second Visit to North America, Canada, Nova Scotia, etc., with Geological Observations,* in 4 vols.; besides a number of important geological papers in the *Proceedings and Transactions of the Geological Society,* the *Reports of the British Association,* etc. In 1863 appeared *The Antiquity of Man,* in which he gave his assent to the Darwinian theory. Died, 1875.

Lyon, Mary, American educator, founder of Mount Holyoke college, was born at Buckland, Mass., 1797. By great effort and perseverance she gained a good education, and for several years taught in the public schools of the state. In 1837 she founded the famous seminary, now Mount Holyoke college, at South Hadley, Mass., upon the plan of uniting domestic service with intellectual culture. Her success as president of this institution caused many similar institutions to be established throughout the country, and the name of Mary Lyon has become a household word among all friends of the education and elevation of women. She died at South Hadley, Mass., 1849.

Lysander (*lī-săn'-dẽr*), Spartan soldier, son of Aristoclitus. In 407 B. C. he became commander of the Spartan fleet in the Ægean, and defeated the Athenian fleet off Notium. His term of service having expired, he was succeeded in 406 by Callicratidas, who was killed at the battle of the Arginusæ. As the Lacedæmonian law did not allow the office to be held twice by the same person, he was now named vice admiral, nominally subordinate to Aracus. He captured, at Ægospotami in the Hellespont, the entire navy of Athens, except eight or nine galleys, which escaped with Conon to Cyprus, and in 404 ended the Peloponnesian war by the capture of Athens. In 395 he was placed in command of a military force to coöperate with the army of Pausanias, entered Bœotia, and laid siege to Haliartus, but was surprised by the Thebans under the walls of that city, and slain, 395 B. C.

Lysias (*lĭs'-ĭ-as*), Greek orator, was born about 450 B. C., son of a rich Syracusan, who settled in Athens about 440. He was educated at Thurii in Italy. The thirty tyrants in 404 stripped him and his brother Polemarchus of their wealth, and killed the latter. The first use to which Lysias put his eloquence was, on the fall of the Thirty in 403, to prosecute Eratosthenes, the tyrant chiefly to blame for his brother's murder. He then practiced with success as a writer of speeches for litigants. His thirty-four surviving speeches show Lysias delightfully lucid in thought and expression, and strong in character drawing. Died, 380 B. C.

Lysimachus (*lī-sĭm'-ȧ-kŭs*), Greek general, king of Thrace, was born about 360 B. C. On the division of the provinces, after the death of Alexander in 323 B. C., Thrace and the region bordering on the Danube were allotted to him. In 315 he joined the coalition formed against Antigonus by Ptolemy, Seleucus, and Cassander. In 306 he assumed the title of king. In 302 he invaded Asia Minor, and in 301 he and his allies vanquished Antigonus in the battle of Ipsus and shared his dominions. Lysimachus so improved and enlarged New Ilium and the Mysian Alexandria that he came to be regarded as their founder In 292 he undertook an expedition against the Getæ, and was compelled by famine to surrender with his whole army, but was soon set at liberty. In 288 he formed a confederacy with Ptolemy, Seleucus, and Pyrrhus against Demetrius Poliorcetes, and acquired Macedonia. Having consented to the death of his son Agathocles at the instigation of his new wife Arsinoë, daughter of Ptolemy, his Asian subjects rebelled, and with the aid of Seleucus defeated and slew Lysimachus at Corus in Phrygia, 281 B. C.

Lytton, Edward George Earle Lytton Bulwer, Lord, eminent English novelist, was born in London, of an ancient family, 1803. In 1826 he was graduated at Cambridge, and published in 1827 his first novel, *Falkland*. In the year following *Pelham* appeared — a work which placed him at once in the first rank of contemporary writers of fiction. Thenceforward his literary career was one of meteoric brilliancy; novel after novel, drama after drama, flowed from his pen almost without intermission. For a quarter of a century he reigned the great master of English fiction — the successor to Scott, the predecessor of Dickens. In 1866 he was created a peer of the realm. Among his principal novels are: *The Disowned; Devereux; Paul Clifford; Eugene Aram; The Pilgrims of the Rhine; The Last Days of Pompeii; Rienzi, the Last of the Roman Tribunes; Ernest Maltravers*, and its sequel, *Alice, or the Mysteries; Night and Morning; Zanoni; The Last of the Barons; Lucretia, or the Children of the Night; Harold, the Last of the Saxon Kings; The Caxtons; My Novel; A Strange Story; What Will He Do With It? The Coming Race; Kenelm Chillingly*, etc. He is also author of the plays, *The Lady of Lyons, Richelieu*, and *Money*, and of the poems, *The New Timon*, and *King Arthur*. Died, 1873.

Lytton, Edward Robert, Earl of, "Owen Meredith," poet, diplomat, and statesman, was born at London, 1831. He was educated at Harrow and at Bonn. In 1849 he came to Washington as an attaché and private secretary to his uncle Sir Henry Bulwer, and subsequently was sent in a diplomatic capacity to Florence, 1852, to The Hague, 1856, to St. Petersburg and Constantinople, 1858, Vienna, 1859, Belgrade, 1860, Copenhagen, 1863, Athens, 1864, Lisbon, 1865, Madrid, 1868, Vienna again, 1869, and Paris, 1873. In the last named year he succeeded his father as second Lord Lytton, and in 1876 became viceroy of India. In 1880, on the fall of the Beaconsfield government, he resigned, and, returning to England, was made earl of Lytton. In 1887 he was appointed English ambassador to France. His literary works, of which perhaps the most popular is *Lucile*, have been published under his pseudonym. He also wrote *Clytemnestra; The Wanderer; The Ring of Amasis;* and *Fables in Song*. He died at Paris, 1891.

Maartens (*mär'-tĕns*), **Maarten,** pen name of J. M. W. van der Poorten-Schwartz, Dutch author, was born at Amsterdam, 1858. He attended school in Germany, and studied law at Utrecht university. He is the author of a series of powerful novels, including *The Sin of Joost Avelingh; A Question of Taste; God's Fool; The Greater Glory; My Lady Nobody; Her Memory; Some Women I Have Known; My Poor Relations; Dorothea; The Jailbird*, a one-act play; *The Healers; The Woman's Victory; The New Religion*, etc.

Mabie, Hamilton Wright, American journalist and writer, associate editor of *The Outlook*, was born at Cold Spring, N. Y., 1846. He was graduated at Williams college and Columbia law school; L. H. D., Williams; LL. D., Union college and Western Reserve university. Author: *Norse Stories Retold from the Eddas; Nature in New England; My Study Fire; Short Studies in Literature; Under the Trees and Elsewhere; Essays in Literary Interpretation; Nature and Culture; Books and Culture; Work and Culture; The Life of the Spirit; William Shakespeare — Poet, Dramatist, and Man; Works and Days; Parables of Life; Backgrounds of Literature; Myths Every Child Should Know; Fairy Tales Every Child Should Know; The Great Word; Heroes Every Child Should Know; Legends Every Child Should Know*, etc.

Mabillon (*mȧ'-bē'-yôɴ'*), **Jean,** French scholar and historian, was born at St. Pierremont in Champagne, 1632. In 1653 he entered the Benedictine order, in 1663 became keeper of the monuments at St. Denis, and from 1664 worked in the abbey of St. Germain-des-Prés at Paris. He edited St. Bernard's works, and wrote a history of his order; also *De Re Diplomaticâ; Vetera Analecta; Musæum Italicum*, etc. Died, 1707.

Macaulay (*mȧ-kô'-lĭ*), **Thomas Babington, Lord,** British historian and statesman, was born at Rothley Temple, Leicestershire, 1800. He entered Trinity college, Cambridge, at the age of eighteen, where he acquired a brilliant reputation both as a scholar and debater. The periodical to which he first contributed was *Knight's Quarterly Magazine;* for this he wrote several of his ballads; e. g., *The Spanish Armada, Moncontour*, and *The Battle of Ivry*, besides essays and critiques. In 1825 he contributed to the *Edinburgh Review* his famous essay on Milton, the learning, eloquence, penetration, brilliancy of fancy, and generous enthusiasm of which quite fascinated the educated portion of the public. He was elected to parliament in 1830, where he made a brilliant reputation; and in 1834 went to India as legal adviser of the supreme council. Here he remained until 1838. His chief labor was the preparation of a new Indian penal code. In 1839 he was appointed war secretary. While holding this office he composed the *Lays of Ancient Rome*, which appeared in 1842. In the following year he published a collected series of his *Essays*, in three volumes. In 1846 he was made paymaster-general. In 1848 appeared the first two volumes of his *History of England from the Accession of James II.* The following year he was chosen lord rector of the university of Glasgow. The third and fourth volumes of his *History* were published in 1855. He died in 1859, and was buried in Westminster abbey.

McAdoo (*măk-ȧ-do͝o'*), **William Gibbs**, lawyer, railway official, was born near Marietta, Ga., 1863, and was educated at the university of Tennessee. He was deputy clerk of United States circuit court of Tennessee, 1882; studied law, and was admitted to the bar, 1885; practiced at Chattanooga. He removed to New York to practice in 1892. In 1902 he was elected president of the Hudson and Manhattan railroad, which completed in 1909 the fourth tunnel under the Hudson river. Appointed secretary of the treasury, 1913.

MacArthur, Arthur, American soldier, was born in Springfield, Mass., 1845. He was educated in the public schools of Milwaukee and by private tutors. He entered the union army in 1862 as first lieutenant, served throughout the civil war, and entered the United States army, 1866. He was brevetted lieutenant-colonel of volunteers, 1865, for battles of Perryville, Ky., Stone river, Missionary Ridge, and Dandridge, Tenn., and colonel for battle of Franklin, Tenn., and Atlanta campaign; awarded medal of honor, 1890, for seizing colors of regiment at critical moment and planting them on captured works on the crest of Missionary Ridge, 1863. Participated in battles of Perryville, Stone river, Dandridge, Missionary Ridge, Resaca, Adairsville, New Hope church, Kenesaw mountain, Peach Tree creek, Jonesboro, Lovejoy's station, Atlanta, and Franklin, and was twice wounded. He commanded the third expedition to Manila, and took part in the battle of Manila, August, 1898. He was subsequently commander of the division of the Philippines and military governor, 1900-01, and was created lieutenant-general of the United States army, 1906. Retired, 1909. Died, 1912.

MacArthur, Robert Stuart, American clergyman, was born at Dalesville, Quebec, Canada, 1841. He was graduated at the university of Rochester, 1867; Rochester theological seminary, 1870; LL. D., Columbian (now George Washington), 1896. He was for years correspondent of the *Chicago Standard;* long editorially connected with *Christian Inquirer*, and *Baptist Review*, and is also a well-known lecturer on foreign travel. He has been pastor of Calvary Baptist church, New York, since 1870. Author: *Calvary Pulpit; Divine Balustrades; The Attractive Christ and Other Sermons; Quick Truths in Quaint Texts; Current Questions for Thinking Men; On Bible Difficulties; Lectures on the Land and the Book; Celestial Lamp; Old Book and Old Faith; Sunday Night Lectures; Around the World; Palestine; Old Testament Difficulties; The Preëminence of Christ, and Other Sermons; Advent, Christmas, Easter, and Other Sermons*, etc.

McBurney, Charles, American surgeon, was born in Roxbury, Mass., 1845. He was graduated at Harvard, 1866, and from the college of physicians and surgeons, New York, 1870. He has been in practice as surgeon in New York since 1870; professor of clinical surgery, college of physicians and surgeons, 1892–1907; was consulting surgeon to President McKinley after he was shot by an assassin in 1901.

McCall, Samuel Walker, American congressman, lawyer, was born in East Providence, Pa., 1851. He was graduated at Dartmouth college, 1874, and was admitted to the bar, 1876. He was a member of the Massachusetts house of representatives, 1888, 1889, and 1892; member of congress, eighth Massachusetts district, 1893–1913. Author: *Life of Thaddeus Stevens*, etc.

McCarthy, Justin, British novelist and historian, was born at Cork, Ireland, 1830. He was educated privately at Cork, and engaged in journalism there, 1848–52; in Liverpool, 1852–60; and London, 1880. He was editor of the *Morning Star*, 1864–68; editorial writer for *Daily News* from 1870; member of parliament for Longford county, 1879; Derry city, 1886–92; North Longford, 1892–1900; was chairman of Irish parliamentary party, 1890–96. Author of many novels, including: *Miss Misanthrope; Dear Lady Disdain; Donna Quixote; Maid of Athens; Red Diamonds; Mononia*, etc.; histories: *A History of Our Own Times; A History of the Four Georges and William IV.; Epoch of Reform; Life of Sir Robert Peel; Life of Pope Leo XIII.; The Story of Mr. Gladstone's Life; Modern England; Reminiscences; The Reign of Queen Anne; Portraits of the Sixties; The Story of an Irishman;* and other works. Died, 1912.

McClellan, George Brinton, American general, was born at Philadelphia, Pa., 1826. He was graduated at West Point, 1846; distinguished himself in the Mexican war, and drew up a report on the organization of European armies after a visit to the Crimea. In 1861 he was commissioned major-general of the United States army, and appointed in command of the department of the Ohio. He subsequently commanded the army of the Potomac, but after indecisive engagements, was superseded by General Burnside, 1862. In 1864, as a democrat, he was the unsuccessful opponent of Lincoln for the presidency. In 1877 he was elected governor of New Jersey. Died, 1885.

McClellan, George Brinton, lawyer, public official, was born at Dresden, Saxony, 1865, during the residence of his parents, General George Brinton and Ellen M. McClellan, in that city. He was graduated at Princeton, 1886, LL. D., 1905; LL. D., Fordham university, 1905, Union college, 1906. He worked as reporter and in editorial positions on New York dailies; was treasurer of New York and Brooklyn bridge, 1889–92; admitted to the bar, 1892; president of board of aldermen, New York, 1893 and 1894; member of congress, 1895–1903, and mayor of New York, 1903–10. Stafford Little lecturer public affairs, 1908–10, university lecturer public affairs since 1911, Princeton university.

McCloskey, John, American prelate, first cardinal of the Roman Catholic church in America, was born at Brooklyn, N. Y., 1810. After pursuing a collegiate and theological course at Mount St. Mary's college, Emmitsburg, Maryland, he was ordained a priest at St. Patrick's cathedral, New York, 1834. He was the first president of St. John's college (now Fordham university), Fordham, N. Y., 1841-42; was consecrated bishop of Albany in 1847; archbishop of New York in 1864, and in 1875 was created cardinal. He built the cathedral at Albany, the theological seminary at Troy, was an effective preacher, and otherwise noted as an able executive and administrator. He died at New York, 1885.

McCormick, Robert Sanderson, American diplomat, was born in Rockbridge county, Va., 1849. He was educated at the university of Virginia; was secretary of legation in London, 1889–92;

official representative of World's Columbian exposition in London, 1892-93; envoy extraordinary and minister plenipotentiary, 1901-02, and first ambassador, 1902, to Austria-Hungary; United States ambassador to Russia, 1902–05, to France, 1905-07.

McCosh, James, Scottish-American educator and philosopher, was born in 1811, in Ayrshire, Scotland. He was educated at the universities of Glasgow and Edinburgh; was ordained at Arbroath a minister of the church of Scotland in 1835, but joined in the free-church movement in 1843. He was appointed to the chair of logic and metaphysics in Queen's college, Belfast, 1851, and remained there until 1868, when he was elected president of the college of New Jersey, at Princeton. He was president at Princeton until 1888, and wrote many important philosophical works, among them: *The Method of Divine Government, Physical and Moral; Typical Forms and Special Ends in Creation; Intuitions of the Mind Inductively Investigated; An Examination of Mill's Philosophy; Laws of Discursive Thought; Logic; Christianity and Positivism; The Scottish Philosophy;* besides papers on education and the relation of science to religion. In 1888 he resigned his office as president, to give his attention more closely to philosophical writing, and published *First and Fundamental Truths,* and *Religious Aspects of Evolution.* Died at Princeton, N. J., 1894.

MacCracken, Henry Mitchell, American educator, chancellor of New York university, 1891–1910, emeritus chancellor since 1910; was born at Oxford, Ohio, 1840. He was graduated at Miami university, 1857; D. D., Wittenberg, 1878, LL. D., Miami, 1887; studied at United Presbyterian theological seminary, Xenia, Ohio, Princeton theological seminary, Tübingen and Berlin universities; teacher of classics and school superintendent, 1857–61; pastor of Westminster church, Columbus, Ohio, 1863-67, First Presbyterian church, Toledo, Ohio, 1868–81; chancellor of Western university, Pittsburgh, Pa., 1881–84; professor of philosophy, New York university, since 1884, vice-chancellor, 1885–91; delegate to general assembly, Free church of Scotland, 1867, and to Irish Presbyterian general assembly, 1884. Author: *Tercentenary of Presbyterianism; Kant and Lotze; A Metropolitan University; The Scotch-Irish in America; John Calvin; The Three Essentials; The Hall of Fame; Leaders of the Church Universal,* 3 vols., etc.

McCrea, James, American railway president, was born in Philadelphia, 1848. He entered the railway service in 1865, as rodman and assistant engineer of Connellsville and Southern Pennsylvania railroad until 1867; rodman on construction, Wilmington and Reading railroad, 1867-68; assistant engineer, Allegheny Valley railroad, 1868–71; with Pennsylvania railroad, 1871–82, consecutively as assistant engineer and division superintendent; manager, general manager, and fourth vice-president, Pennsylvania lines west of Pittsburgh, 1882–90; second vice-president, 1890-91, first vice-president, 1891-1907, and president of Pennsylvania railroad company, 1907–13. He was also president of numerous other railway companies. Died, 1913.

McCumber, Porter James, lawyer, United States senator from North Dakota, was born in Illinois, 1858. He removed to Rochester, Minn., the same year; was brought up on a farm and educated in the district schools, afterward in the city schools; taught school for a few years, and took a law course in the university of Michigan, graduating in 1880. He removed to Wahpeton, North Dakota, 1881, where he has since practiced his profession. He was a member of the territorial legislature, 1885–89; was elected to the United States senate, 1899, and reëlected in 1905 and 1911.

McCutcheon, George Barr, journalist, author, was born on a farm in Tippecanoe county, Indiana, 1866. He was educated at Purdue university, and was city editor of the *Lafayette Courier*, 1893. Author: *Graustark; Beverly of Graustark; Brewster's Millions; Nedra; Castle Craneycrow; Jane Cable; The Husbands of Edith; Man from Brodney's; Purple Parasol; Cowardice Court; The Flyers; The Daughter of Anderson Crow; Truxton King; The Butterfly Man; The Rose in the Ring; Mary Midthorne,* etc., and numerous short stories in various magazines.

Macdonald, George, Scottish poet and novelist, was born at Huntly, 1824; was educated at Aberdeen and the Independent college at Highbury, and became pastor at Arundel and at Manchester, but ill-health drove him to literature. His first book was one of verse, and a long series of novels followed, including *David Elginbrod; The Portent; Alec Forbes; Annals of a Quiet Neighborhood; Guild Court; The Seaboard Parish; Robert Falconer; Wilfred Cumbermede; Malcolm; St. George and St. Michael; The Marquis of Lossie; Sir Gibbie; What's Mine's Mine; Lilith; Salted with Fire,* etc. These novels reveal deep spiritual instincts of their author in reaction against Calvinism. He also published the following books for the young: *Dealings with the Fairies; Ranald Bannerman's Boyhood; At the Back of the North Wind; The Princess and the Goblin;* besides *Unspoken Sermons; The Miracles of Our Lord;* and *Poetical Works.* In 1872-73 he made a lecturing tour in the United States; in 1877 received a pension of 100 pounds. Died, 1905.

Macdonald, Sir John Alexander, distinguished Canadian statesman, was born in Glasgow, 1815. His parents settled in Canada during his childhood, and he was educated at Kingston grammar school, studied law, and was admitted to the Canadian bar in 1836. He entered the Canadian parliament in 1844; became receiver-general of Canada, 1847; commissioner of crown lands, 1847-48; attorney-general, 1854–62 and 1864–67; prime minister, 1857; government leader in the assembly, 1864–67; and minister of militia affairs, 1862–65–67. He was chairman of the London colonial conference of 1866-67, and more than any other person was responsible for Canadian federation. After its establishment, he was head of the new Dominion government, as minister of justice and attorney-general, 1867–73, when he resigned from the cabinet. From 1878 until his death he was premier of the Dominion. He died at Earnscliffe Hall, near Ottawa, 1891.

Macdonald, J. A., Canadian journalist, managing editor of *The Globe*, Toronto, since 1902, was born in Middlesex, county of Ontario, Canada, 1862. He was graduated at Knox college, Toronto, 1887; edited *The Knox College Monthly* during his college course and until 1891; was ordained to ministry of the Presbyterian church, and inducted pastor of Knox church, St. Thomas, Ontario, 1891; resigned pastoral charge, 1896, and removed to Toronto to become first editor of *The Westminster*, a religious monthly magazine; subsequently acquired the *Canadian Presbyterian, The Presbyter, The Presbyterian Review,* and *The Western Presbyterian,* which were consolidated under his editorship and issued as *The Presbyterian,* a weekly devoted to Presbyterian church interests. He was principal of the Presbyterian ladies' college, 1896–1901; he was appointed by Ontario government to serve for six years on first board of governors of the university of Toronto, 1906. Author: *From Far Formosa,* a volume on life-work of Dr. G. L. MacKay, and many fugitive articles on literary, social, political, and religious subjects.

McEnery, Samuel Douglas, United States senator, was born at Monroe, La., 1837. He was educated at Spring Mill college, near Mobile, Ala., the United States naval academy, and the university of Virginia. He served in the confederate army, studied law, and was admitted to the bar; was elected lieutenant-governor of Louisiana, 1879, and on the death of Governor Wiltz, 1881, succeeded him in the executive office. He was then nominated for governor and elected in 1884; was associate justice of the Louisiana supreme court, 1888–97; was elected United States senator for the terms 1897–1915. Died, 1910.

McGee, Anita Newcomb, American physician, was born at Washington, D. C., 1864, daughter of Professor Simon Newcomb. She was educated in private schools, Washington, followed by special courses at Newnham college, Cambridge, England, university of Geneva, etc., and graduated at Columbian university, M. D., 1892; took special post-graduate course in gynecology, Johns Hopkins hospital, and was in practice in Washington, 1892–96. In 1888 she married W. J. McGee, the anthropologist. She was appointed, in 1898, acting assistant surgeon of United States army, being the only woman to hold such a position, and was assigned to duty in the surgeon-general's office, in charge of the army nurse corps, which she organized. When United States congress approved this work by making the nurse corps of trained women a permanent part of the army, the pioneer stage was passed, and she resigned in 1900. In 1904, acting as president of the society of Spanish-American war nurses and as representative of Philadelphia red cross society, and by agreement with Japanese government, she took a party of trained nurses, formerly in the United States army, to serve in the Japanese army for six months gratuitously. Was appointed by minister of war as supervisor of nurses, which placed her in the same rank with officers of the Japanese army, and inspected and reported on relative nursing conditions. She has lectured throughout the United States and written for various magazines.

McGiffert, Arthur Cushman, American theological writer and critic, professor of church history, Union theological seminary, New York, since 1893, was born at Sauquoit, N. Y., 1861. He was graduated at Western Reserve college, 1882; Union theological seminary, 1885; university of Marburg, Germany, Ph. D., 1888; studied in Germany, 1885–87, and in France and Italy, 1887-88. He was instructor in church history, Lane theological seminary, Cincinnati, 1888–90; professor in the same, 1890–93. Author: *Dialogue Between a Christian and a Jew;* translation of Eusebius' *Church History; A History of Christianity in the Apostolic Age; The Apostles' Creed;* and joint author of *The Christian Point of View,* etc.

McGrath, Harold, journalist, author, was born in Syracuse, N. Y., 1871, and has been engaged in journalism since 1890. Author: *Arms and the Woman; The Man on the Box; Hearts and Masks; Half a Rogue; The Best Man; The Lure of the Mask; The Puppet Crown; The Grey Cloak; The Princess Elopes; Enchantment; The Watteau Shepherdess,* an operetta; *The Goose Girl;* and numerous magazine stories.

Machiavelli (*mä'-kyä-věl'-lē*), **Niccolo di Bernardo dei,** Italian statesman and author, was born in Florence, Italy, 1469, son of a jurist of good family. He was secretary of state at Florence from 1498 to 1512, went on several important missions, but was deprived of office and exiled in the latter year by the Medici. Subsequently released, he retired to a country estate near San Casciano, and devoted himself to literary pursuits. His chief works were *Il Principe; Istorie Fiorentine; Arte della Guerra;* some comedies and poems; and *Discorsi sulle Deche di Tito Livio.* In 1521 he again took part in affairs for a short time, but died in poverty, 1527.

Mack, Norman Edward, American journalist and politician, editor and publisher of the *Buffalo Times,* was born in Canada, 1858. He was educated in the public schools; went West and engaged in business pursuits; established the *Sunday Times* in Buffalo, 1879; the *Daily Times,* 1883; and the *National Monthly,* 1909. He was a delegate to the democratic national conventions of 1892, 1896, 1900, 1904, and 1908; has been a member of the democratic national committee and member executive committee of the same, since 1900, and chairman since 1908.

McKenna, Joseph, American lawyer and jurist, was born at Philadelphia, Pa., 1843. At the age of twelve he removed to California with his parents. He was educated at the Benicia collegiate institute, at which he studied law, and was admitted to the bar in 1865. He was soon after elected county attorney of Solano county, and in 1875 was sent to the state legislature. Although twice defeated for congress, he ran again in 1884 and was elected, serving four consecutive terms. During his career in congress he was an intimate friend of William McKinley and assisted in the framing of the McKinley tariff of 1890. He was appointed to the United States circuit bench of the Pacific slope in 1892; was attorney-general of the United States, 1897-98, and associate justice of the supreme court of the United States, since 1898.

Mackenzie, Alexander, Canadian statesman, was born near Dunkeld, Scotland, 1822. He moved to Canada in 1842, and engaged in business as a contractor and journalist until 1861. He was elected to the assembly of Canada, 1861–67, and was a member of the Dominion parliament representing the same constituency for twenty-five years. He was offered a seat in the Canadian cabinet in 1865, but declined it. Upon the resignation of Sir John Macdonald he became premier of the Dominion and minister of public works. Upon the election of a conservative majority to parliament in 1878, he, with his cabinet, resigned. He possessed great ability as an administrator, was a gifted orator, and his influence throughout the Dominion was salutary. Died, 1892.

McKenzie, Alexander, Congregational clergyman, was born at New Bedford, Mass., 1830. He was graduated at Harvard, 1859, Andover theological seminary, 1861; D. D., Amherst, 1879, S. T. D., Harvard, 1901; was pastor of South church, Augusta, Me., 1861–67, First church, Cambridge, Mass., 1867–1910, pastor emeritus since 1910. He is a trustee of Phillips academy, Andover, and Hampton institute, Virginia; lecturer at Andover theological seminary, 1881–82 and 1894–97; emeritus president of trustees of Wellesley college. Author: *Two Boys; Lectures on the History of the First Church in Cambridge; Cambridge Sermons; Some Things Abroad; Christ Himself; The Divine Force in the Life of the World; A Door Opened; Now; Getting One's Bearings,* etc.

McKim, Charles Follen, American architect, was born in Chester county, Pa., 1847. He was educated at Lawrence scientific school, Harvard, 1866-67; École des Beaux Arts, Paris, 1867–70; hon. A. M., Harvard, 1890, Bowdoin, 1894. He began practice, 1872, joined in partnership by William R. Mead, 1877, and by late Stanford White in 1879 as McKim, Mead and White. Among the notable buildings erected by the firm are: Columbia university; state capitol, Rhode Island; Brooklyn institute of arts and sciences; Walker art gallery, Bowdoin college; department of architecture, Harvard; music hall, public library, Boston; Newport casino; university, Harvard, Century clubs, New York, etc. He was a member of the congressional commission for the improvement of Washington park system; member of New York art commission; member Accademia di San Lucca, Rome, 1899; American academy in Rome. He was awarded the royal gold medal by King Edward for promotion of architecture, 1903. Died, 1909.

McKinley, William, American statesman, twenty-fifth president of the United States, was born in Niles, Ohio, 1843. He was educated in the public schools, at the Poland, Ohio, academy, and entered Allegheny college, though he never finished the course. In 1861 he volunteered in the Union army, and entered the 23d Ohio infantry as a private. He served four years, rising by merit and faithfulness to the captaincy of his company, and to the rank of major when mustered out in 1865. He then at once began the study of law; in 1867 he was admitted to the bar, and commenced practice at Canton, Ohio, where he afterward had his residence. In 1869 he was elected prosecuting attorney for Stark county, where his success attracted local attention. Entering politics, he was elected to congress in 1876, and was reëlected for six successive terms. In 1882 his election was contested, and he was unseated, but triumphantly returned at the next election. His reputation in congress rests chiefly on the tariff bill that bears his name. It was drawn by him as chairman of the ways and means committee, and passed by the fifty-first congress. This bill and his able advocacy of it before the house distinguished him as the leader of the republican party, on the tariff question. The republican party went before the country in 1892 almost solely on the issue raised by the McKinley tariff, but a reaction against it had set in, and Cleveland was elected. Meanwhile McKinley failed of reëlection in his district, though largely reducing the adverse plurality created by a redistricting that changed the limits of the district. In 1891 he was elected governor of Ohio by a large plurality over former Governor James E. Campbell, a very popular democrat, and reëlected in 1893 in the reactionary tidal wave of politics following a contrary tariff policy, that carried the republican party back to power in congress. By this time his name was frequently mentioned as a future candidate for the presidency. In 1895 a systematic canvass in McKinley's behalf was instituted by his supporters, which was continued until the election of 1896. He was nominated and elected by an electoral majority of ninety-five, after a campaign of more intense interest than was displayed in any election since the civil war. President McKinley's first term is memorable chiefly for the occurrence of the Spanish-American war and its unexpected results. That his policy during 1896–1900 was acceptable was shown by his unanimous renomination and reëlection in 1900 by an electoral majority of 137. His second term began most auspiciously and ended tragically. On September 5, 1901, he visited the Pan-American exposition in Buffalo, N. Y., that day having been set apart in his honor and called the "President's day." On the afternoon of the following day, while holding a public reception in the temple of music, he was shot twice by Leon F. Czolgosz, an anarchist, who was at once arrested. The wounded president was first taken to the emergency hospital on the exposition grounds, for immediate treatment, and then removed to the residence of John G. Milburn, president of the exposition. Hopes of his recovery were entertained for several days, but on September 13th he began to sink rapidly and died at 2.15 A. M., September 14th. His remains were removed to Washington on September 16th, laid in state in the capitol on the 17th, and taken to his home city, Canton, Ohio, where they were interred on the 18th, amid universal mourning.

Mackintosh, Sir James, Scotch philosopher and politician, was born in Inverness-shire, 1765. He first took his degree in medicine, but went to London and was admitted to the bar at Lincoln's Inn, 1795. He was recorder at Bombay, 1803; judge of admiralty, Bombay, 1806; returned to England, 1811, and entered parliament, 1813. He wrote *Vindiciae Gallicae* in reply to Burke's philippic; defended Peltier, Bonaparte's enemy, in a magnificent style; contributed a masterly preliminary *Dissertation on Ethics* to the *Encyclopædia Britannica;* wrote the *History of the Revolution in England in* 1688, etc. Died at London, 1832.

Maclaren, Ian, pseudonym of John Watson, Scotch preacher and writer, was born at Manningtree, Essex, 1850, of Scottish parents. He was educated at Edinburgh university, and at Tübingen; ordained a minister of the Free church of Scotland, and had his first important charge at Free St. Matthew's, Glasgow. He was afterward transferred to the Sefton Park Presbyterian church, Liverpool. In 1893 he acquired great distinction and a wide fame by a series of Scottish prose idylls, written for the *British Weekly,* and afterward published under the title of *Beside the Bonnie Brier Bush.* This work won deserved praise for the fidelity with which he portrayed humble and reverent Scottish life and scenes. The volume was followed by *The Days of Auld Lang Syne; Kate Carnegie; A Doctor of the Old School; Rabbi Saunderson; Afterwards;* and other stories. His religious writings embrace *The Upper Room; The Mind of the Master; The Potter's Wheel;* and *Companions of the Sorrowful Way.* In 1896, and again in 1907, he visited the United States on lecture tours, and delivered the Lyman Beecher lectures at Yale university on practical theology, published under the title, *The Cure of Souls.* Died, 1907.

McLaughlin (*măk-lŏk'-lin*), **Andrew Cunningham,** American historian and educator, was born at Beardstown, Ill., 1861. He was graduated at the university of Michigan, 1882, law department, 1885, A. M., 1896. He was instructor in Latin, 1886–87, instructor in history, 1887–88, assistant professor, 1888–91, professor of American history, 1891–1906, university of Michigan, and professor of history, university of Chicago, since 1906. He was director of the bureau of historical research, Carnegie institution, Washington, 1903–05. Author: *Lewis Cass,* in American Statesmen series; *History of Higher Education in Michigan; Civil Government in Michigan; A History of the American Nation; The Confederation and the Constitution,* etc. Editor: Cooley's *Principles of Constitutional Law; The Study of History in Schools;* has been associate editor since 1898, and managing editor, 1901–05, of the *American Historical Review.*

McLaurin (*măk-lô'-rĭn*), **Anselm Joseph,** lawyer, United States senator, was born at Brandon, Miss., 1848. He joined the confederate army and served as a private; after the war attended Summerville institute, and was admitted to the bar, 1868. He was elected district attorney, 1871; representative in the legislature, 1879; presidential elector for the state at large, 1888; delegate to the constitutional convention, 1890; United States senator, 1894; governor of Mississippi, 1895, and served four years; again elected to the United States senate, 1900, and reëlected for the term 1907–13. Died, 1909.

McLean, Emily Nelson Ritchie (Mrs. Donald McLean), president general of national society of Daughters of the American Revolution, 1905–09, was born at Prospect hall, Frederick, Md., 1859,

UNIV. OF CALIFORNIA

WILLIAM McKINLEY
From a photograph by Clinedinst

daughter of Judge John Ritchle. She was graduated at Frederick seminary, now Woman's college, 1873, and pursued post-graduate courses in language, history, and mathematics. She married Donald McLean, 1883. She is a charter member of the Daughters of the American Revolution; regent of New York city chapter ten years, and a scholarship bearing her name was established in 1898 in Barnard college by the New York chapter of the Daughters of the American Revolution. She was commissioner from New York to Cotton States and International exposition, 1895-96, to South Carolina exposition, 1901-02, to Jamestown exposition, 1907, and is well known by her public addresses throughout the country on patriotic and educational themes.

MacLean, George Edwin, American educator, was born at Rockville, Conn., 1850. He was graduated at Williams college, 1871; Yale theological seminary, 1874; university of Leipzig, Ph. D., 1883; studied at university of Berlin; LL. D., Williams college, 1895. He was minister of the Memorial Presbyterian church, Troy, N. Y., 1877–81; professor of English language and literature, university of Minnesota, 1883–95; chancellor university of Nebraska, 1895–99; president of the university of Iowa, 1899–1911. Author: *A Chart of English Literature; Old and Middle English Reader; A Decade of Development in American State Universities;* and periodical articles and reviews.

MacMahon (*mȧk'-mȧ'-ôɴ'*), **Marie Edme Patrice Maurice de,** French general and statesman, was born at Sully near Autun, 1808. He was descended from an Irish Jacobite family. Entering the army, he served in Algeria, distinguished himself at Constantine, 1837, commanded at the Malakoff, 1855, was again conspicuous in Algeria, 1857-58, and for his services in the Italian campaign of 1859 was made marshal and duke of Magenta. He became governor-general of Algeria in 1864. In the Franco-Prussian war, 1870-71, he commanded the first army corps, but was defeated at Wörth, and captured at Sedan. After the war, as commander of the army of Versailles, he suppressed the commune. In 1873 he was elected president of France for seven years, and was suspected, perhaps not unjustly, of reactionary and monarchical leanings. He resigned in 1879, and died at Château la Foret, 1893.

McMaster, John Bach, American historian, professor of American history in the university of Pennsylvania since 1883, was born in Brooklyn, N. Y., 1852. He was graduated at the college of the city of New York, 1872; Ph. D., Litt. D., LL. D.; was a civil engineer, 1873–77, and instructor in civil engineering at Princeton, 1877–83. Author: *A History of the People of the United States,* 8 vols.; *Benjamin Franklin as a Man of Letters; With the Fathers, Studies in American History; Origin, Meaning, and Application of the Monroe Doctrine; A School History of the United States; A Primary School History of the United States; Daniel Webster; Brief History of the United States; The Struggle for the Social, Political, and Industrial Rights of Man,* etc.

MacMonnies (*măk-mŭn'-ĭz*), **Frederick William,** American sculptor, was born in Brooklyn, N. Y., 1863. He studied under Augustus Saint Gaudens, at the academy of design, and art students' league; he completed his art education at Munich, in the atelier of Falguiere in École des Beaux Arts, and in the private studio of Antonin Mercie. He received the first prize of the national academy of design, 1884; the *prix d'atelier,* highest prize open to foreigners, 1886, and established his own studio in Paris, 1887. He has received many prizes and decorations, and executed the following works: three life-size bronze angels, St. Paul's church, New York; Nathan Hale, City Hall park, New York; James Samuel Thomas Stranahan, Prospect park, Brooklyn; "Pan of Rohallion"; "Faun with Heron"; Sir Henry Vane, Boston public library, 1893; colossal fountain, World's Columbian exposition, Chicago; "Bacchante with Infant Faun," Metropolitan museum of art, New York, and Luxembourg gallery, Paris; two pediments, Bowery bank, New York; four spandrels, Washington arch, New York; "Venus and Adonis"; "Cupid"; figure of Victory for battle monument, West Point; central bronze doors and statue of Shakespeare, Congressional library; army and navy groups for soldiers' and sailors' arch, Prospect park, Brooklyn; two groups of horses, Prospect park, Brooklyn; equestrian statue of General Slocum, Brooklyn; equestrian statuette of Theodore Roosevelt; equestrian statue of General G. B. McClellan, Washington; two fountains, Knickerbocker hotel, New York, etc.

Macready, William Charles, English actor, was born in London, 1793. He was educated at Rugby, made his first appearance at Birmingham in 1810, and was engaged at Covent Garden, London, in 1816. He played Richard III. in 1819, removed to Drury Lane in 1823, and after a tour of the United States, appeared as Macbeth in 1827. He subsequently visited Paris, and held the management of Covent Garden and Drury Lane. In 1849 he nearly lost his life in a riot promoted by the friends of Forrest at the Astor opera house, New York. He made his last appearance at Drury Lane in 1851. Died, 1873.

MacVeagh, Franklin, merchant, secretary of the treasury, 1909-13; was born in Chester county, Pa. He was graduated from Yale, 1862, Columbia law school, New York, 1864; abandoned the practice of law because of ill health and went to Chicago, where he engaged in the wholesale grocery business. He became president of the citizens' association in 1874, which inaugurated many important municipal reforms; was nominated by the democrats of Illinois, in 1894, for United States senator and made a canvass of the state, but was defeated in the legislature. He was president of the bureau of charities and municipal art league; member of the executive committee, national civic federation, and vice-president of the American civic association, 1905.

MacVeagh, Wayne, American lawyer, was born near Phœnixville, Chester county, Pa., 1833. He was graduated from Yale, 1853, and was admitted to the bar, 1856. He was district attorney for Chester county, Pa., 1859–64; captain of infantry, 1862, and of cavalry, 1863, when invasions of Pennsylvania were threatened; chairman republican state committee of Pennsylvania, 1863; United States minister to Turkey, 1870-71; member of Pennsylvania constitutional convention, 1872–74; head of "MacVeagh commission" sent to Louisiana, 1877, by President Hayes to amicably adjust disputes of contending parties there; United States attorney-general in cabinet of President Garfield, 1881, but resigned on accession of President Arthur, resuming law practice at Philadelphia. He supported Cleveland for president, 1892; was ambassador to Italy, 1893–97, and chief counsel of the United States in the Venezuelan arbitration before The Hague tribunal, 1903. Contributor of several articles to North American review in advocacy of international peace and other subjects.

Madison, James, fourth president of the United States, was born in King George county, Va., 1751. He was graduated at Princeton, N. J., 1771, and studied law. In 1776 he was a member of the Virginia convention, and, though too modest for an orator, he became one of the most eminent, accomplished, and respected of American statesmen. He was sent to the federal congress, 1780; in 1784, to the legislature of Virginia, in which he supported the measures of Jefferson in the revision of the laws, and placing all religious denominations on an equality of freedom without state support. As a member of the convention of 1787, which framed the federal constitution, Madison acted with Jay and Hamilton, and with them wrote the *Federalist*. He supported the adoption of the constitution, but opposed the financial policy of Hamilton, and became a leader of the republican or Jeffersonian party. He declined the mission to France, and the office of secretary of state, but in 1792 became the leader of the republican party in congress, and wrote the Kentucky resolutions of 1798, which contain the basis of the state-rights doctrines. In 1801, Jefferson having been elected president, Madison was made secretary of state, which post he held during the eight years of Jefferson's administration. In 1809 he became president of the United States. The European wars of that period, with their blockades and orders in council, were destructive of American commerce. The claim of the English government to impress seamen from American vessels was violently resisted. Madison vainly endeavored to avoid a war with England, which, nevertheless, was declared in 1812, and continued for two years, at a cost of 30,000 lives and $100,000,000. He was one of the nine presidents elected for a second term, during which he approved the establishment of a national bank as a financial necessity — a measure he had opposed and vetoed. In 1817 he retired to his seat at Montpelier, Va., where he served as a rector of the university of Virginia, and a promoter of agriculture and public improvements. Without being a brilliant man, he was a statesman of eminent ability and purity of character. Died at Montpelier, 1836.

Mæcenas (*mē-sē'-năs*), **Gaius Cilnius**, Roman statesman, was born about 70 B. C. He was the friend of Virgil and Horace, and was celebrated for his patronage of letters. He had a talent for private diplomacy, and was employed mainly in that capacity. In 36 B. C. he was in Sicily, helping Octavian. Five years later, when the latter was fighting the great sea battle of Actium with his rival Antony and the Egyptian Cleopatra, Mæcenas proved himself an able and vigilant governor of Rome by crushing a conspiracy of the younger Lepidus, and thereby preventing a second civil war. Died, 8 B. C.

Maeterlinck (*mä'-tĕr-lĭngk*), **Maurice**, Belgian author, was born at Ghent, 1862. He was greatly influenced in his thought by Novalis and Emerson, and his first writings were poetical. The following is a list of his chief works, some of which have been translated into English and have attracted considerable attention: *La Princesse Maleine; Pelléas et Mélisande; Alladine et Palomides; Aglavaine et Sélysette; Douze Chansons; Le Trésor des Humbles; La Mort de Tintagiles; L'Intruse;* and *La Sagesse et la Destinée.* He is also the author of the dramas *Ariane et Barbebleue; Sœur Béatrice; Monna Vanna,* and *Joyzelle.* Received Nobel prize for literature, 1911.

Magellan, Ferdinand, Portuguese navigator, was born about 1470. He served his country first in the East Indies and Morocco, but, dissatisfied with King Manuel's treatment, he offered himself to Spain. Under Charles V.'s patronage he and Ruy Falero set out to reach the Moluccas by the west in 1519, reached the Philippines, and died in battle in Mactan. On this voyage he discovered the Magellan strait, 375 miles long and fifteen miles wide, between the South American mainland and Tierra del Fuego. He also gave name to the Pacific ocean from the exceptional calm he experienced on entering it. Died, 1521.

Magoon, Charles E., lawyer, administrator, was born in Minnesota, 1861. He studied at the university of Nebraska, was admitted to the bar in 1882, and engaged in general practice. He was judge-advocate of the Nebraska national guard; law officer of the bureau of insular affairs, war department, Washington, 1899–1904; general counsel, isthmian canal commission, 1904-05; governor of canal zone, 1905-06; American minister to Panama, 1905-06; provisional governor of Cuba, 1906–09. Author: *The Law of Civil Government Under Military Occupation.*

Mahaffy, John Pentland, Irish educator, writer, was born in Switzerland, 1839. He was educated in Germany and at Trinity college, Dublin, where he was graduated in 1859; LL. D., St. Andrews; D. C. L., Oxford. He was made professor of ancient history at Dublin university, 1871, and was Donnellan lecturer, 1873-74. He is noted for a wide range of scholarship, has been a frequent contributor to periodicals, and has published books on many subjects. Among these are: *Lectures on Primitive Civilization; Prolegomena to Ancient History; Greek Social Life from Homer to Menander; Rambles and Studies in Greece; History of Classical Greek Literature; Empire of the Ptolemies; The Silver Age of the Greek World,* etc.

Mahan (*ma-hăn'*), **Alfred Thayer**, American naval officer and writer, was born at West Point, N. Y., 1840. He was graduated at the United States naval academy, 1859; served in the civil war; was president of the naval war college, Newport, 1886–89 and 1892-93; visited Europe in command of the *Chicago*, 1893, receiving many honors, among them degrees from both Oxford and Cambridge. He was retired at his own request in 1896. During the war with Spain he was a member of the naval board of strategy; and in 1899 was appointed by President McKinley one of the American delegates to the universal peace conference at The Hague. Author: *The Gulf and Inland Waters; Influence of Sea Power Upon History; Influence of Sea Power Upon French Revolution and Empire; Life of Admiral Farragut; Life of Nelson,* 2 vols.; *The Interest of the United States in Sea Power; Lessons of Spanish War; The Problem of Asia; The South African War; Types of Naval Officers; Retrospect and Prospect; Sea Power in Its Relations to the War of* 1812; *From Sail to Steam; Some Neglected Aspects of War,* etc.

Mahomet (*ma-hŏm'-ĕt*). See **Mohammed**, page 218.

Maine, Sir Henry James Sumner, celebrated English lawyer and writer, was born in 1822. He was educated at Cambridge university, where, in 1847, he became regius professor of civil law. In 1862 he went to India as law member of the council in India, an office held by Lord Macaulay. Before going to India, he had been reader at the Temple, London, and in 1870 he became Corpus professor of comparative jurisprudence at Oxford. In 1887 he was elected Whewell professor of international law at Cambridge. He introduced wise reforms into Indian law, but his work on the origin and growth of legal and social institutions is the work on which his fame mostly rests. His publications include: *Ancient Law; Village Communities; Early History of Institutions; Popular Government; International Law;* and *Dissertations on Early Law and Custom.* He died at Cannes, France, 1888.

Major, Charles, American lawyer, author, was born in Indianapolis, Ind., 1856. He was educated in the common schools at Shelbyville and Indianapolis; studied law and engaged in practice at Shelbyville. Author: *When Knighthood was in Flower; Bears of Blue River; Dorothy Vernon of Haddon Hall; A Forest Hearth; Yolanda, Maid of Burgundy,* etc. Died, 1913.

Malebranche (*mȧl'-bräɴsh'*), **Nicolas,** French philosopher, was born at Paris, 1638. He was deformed and sickly, and from his childhood fond of solitude. At the age of twenty-two he entered into the congregation of the Oratory, and devoted himself to the study of Bible history and of the fathers of the church. He subsequently devoted much attention to Descartes's *Traité de l'Homme,* which led him to the study of philosophy, and called forth his famous work, *De la Recherche de la Vérité.* This work displays great depth and originality of thought combined with perspicuity and elegance of style. He wrote several other works of merit. Died at Paris, 1715.

Malherbe (*mȧl'-ĕrb'*), **François de,** French poet, was born at Caen, 1555. He studied at Paris, Basel, and Heidelberg, and published his first volume of poems in 1587. In 1605 he became court poet, and is called the founder of classic poetry in France. He was a favorite with Louis XIII., and also with Richelieu. Died in Paris, 1628.

Malibran (*măl'-ĭ-brăn*), **Maria Felicita,** celebrated mezzo-soprano singer, was born at Paris, 1808, daughter of Manuel Garcia, Spanish singer and teacher of singing. She very early showed extraordinary talent, and made her début in Italian opera, 1825, in London. Shortly afterward her father attempted to establish Italian opera in New York, but without success. There she married M. Malibran, a French banker. After her husband's failure in business she returned to the stage, and was received with great enthusiasm in France, England, Germany, and Italy. She divorced M. Malibran, and in 1836 married M. Beriot, a famous violinist, but in September of that year she died at Manchester, England, in consequence of a fall while riding. She was one of the most popular and successful prima donnas of modern times.

Mallet (*măl'-ĕt*), **John William,** American chemist and educator, emeritus professor of chemistry, university of Virginia, 1908-12, was born in Dublin, Ireland, 1832. He was graduated at Trinity college, Dublin; studied at Göttingen, and came to the United States in 1853, but was always a British subject. He was chemist to the geological survey of Alabama; professor of chemistry in the university of Alabama; officer on the staff of General Rodes in confederate army of northern Virginia; transferred to artillery corps, and placed in general charge of ordnance laboratories of confederate states; paroled as lieutenant-colonel of artillery, 1865; professor of chemistry, medical department of the university of Louisiana, New Orleans, 1865–68; at Virginia, 1868–83; at university of Texas, 1883-84; Jefferson medical college, 1884-85; and again at university of Virginia 1885–1908; is ex-president of the American chemical society. He was a member of many scientific societies. He was joint author with his father of *British Association Catalogue of Earthquakes;* sundry reports on water analysis, etc. Died, 1912.

Malpighi (*mäl-pē'-gē*), **Marcello,** Italian anatomist, was born near Bologna, Italy, 1628. He lectured in Bologna, Pisa, and other places, and wrote works on the anatomy of plants, the physiology of the silkworm, and medical subjects. His name was given to the Malpighian genus. He is well known for his discoveries in capillary circulation, and in connection with the anatomy of the kidneys. In 1691 he became physician to Pope Innocent XII., but died in 1694.

Malthus (*mȧl'-thŭs*), **Thomas Robert,** English political economist, was born near Guildford, England, 1766. He was graduated at Cambridge, 1788; was for some time fellow of Jesus college, Cambridge; published in 1798 his *Essay on Population* in which he maintained that population tends to increase out of proportion to the increase of means of subsistence. He afterward took orders, and held from 1805 the professorship of history and political economy in the East India company's college, Haileybury. Others of his works are *The Nature and Progress of Rent* and *Political Economy.* He died at St. Catharine's, near Bath, 1834.

Mann, Horace, American statesman and educator, was born at Franklin, Mass., 1796. He was graduated at Brown university, 1819, studied law, and was admitted to the bar, 1823. He was a member of the Massachusetts legislature, 1827–37; secretary of the Massachusetts board of education, 1837–48; member of congress, 1848–53; and from 1853 to 1859 president of Antioch college, Ohio. He wrote: *Lectures on Education; Report of an Educational Tour of Germany, Great Britain, and Ireland;* and was untiring in his efforts in the cause of educational extension and reform, in the suppression of slavery, and in the promotion of temperance. It was through his efforts that the first normal school in the United States was established. Died, 1859.

Mannering, Mary, actress, was born in London, England, 1876, daughter of Richard and Florence Friend. She was educated in private schools; studied for the stage under Herman Vezin; went on the stage at the age of fifteen; appeared in *Hero and Leander* at Shaftesbury theater, London; toured English provinces two years, playing Shakespearean rôles; then leading parts in *Sowing the Wind; The Late Mr. Costello; Called Back,* etc. She came to the United States under management of Daniel Frohman; made her American début at Parsons' theater, Hartford, Conn., 1896, in *The Courtship of Leoni;* New York début, Lyceum theater, four days later. She has since appeared in leading rôles in modern drama. In 1897 she married J. K. Hackett.

Manning, Henry Edward, English prelate, was born in Hertfordshire, England, 1808. He was graduated at Oxford in 1830, studied theology, and was appointed rector of Lavington and Graffham, Sussex, 1834. He became archdeacon of Chichester, 1840; in 1851 resigned his preferments in the church of England, and joined the Roman Catholic church; was ordained a priest in 1857; nominated archbishop of Westminster, 1865, and created cardinal, 1875. He founded the Roman Catholic university of Kensington, 1874, and took an active part in the vatican council, defending the infallibility dogma. His controversial writings are very voluminous, and include: *Unity of the Church; The Temporal Mission of the Holy Ghost; Temporal Power of the Pope; England and Christendom,* etc. Died, 1892.

Mansel, Henry Longueville, English philosopher and theologian, was born at Cosgrove, England, 1820. He was graduated at Oxford where he was successively Waynflete professor of moral philosophy and professor of ecclesiastical history. In 1858 he delivered the Bampton lectures on *The Limits of Religious Thought.* He had previously published *Prolegomena Logica,* and several works on metaphysics. His appointment to the deanery of St. Paul's, in 1868, was strongly opposed. Died, 1871.

Mansfield, Richard, American actor, was born in Heligoland, Germany, 1857. He studied in

England for the East Indian civil service; came to Boston and opened a studio, and later entered theatrical profession. He played small parts in comic opera; made his first American appearance at the Standard theater, New York, as Dromez in *Les Manteaux Noirs*. Was very successful in a wide repertoire from Koko in *Mikado* to Richard III. Was head of his own company, and created such parts as Beau Brummel, Baron Chevrial, and the titular rôles in *Dr. Jekyll and Mr. Hyde*. Appeared as Cyrano de Bergerac in 1898, and played Shylock, Henry V., Beaucaire, and Brutus in *Julius Cæsar*. Married Beatrice Cameron, his leading woman. Author: *Blown Away; Monsieur; Ten Thousand a Year*, and *Don Juan*. Died, 1907.

Mantegna (*män-tān'-yă*), **Andrea**, Italian painter, was born in or near Padua, 1431. He was the favorite pupil and adopted son of Squarcione, the tailor-painter. A precocious genius, he set up a studio of his own when only seventeen years old. Having married a sister of the Bellinis and quarreled with Squarcione, he was in 1460 induced by Lodovico Gonzaga, duke of Mantua, to settle in his city. There he remained, with the exception of a visit to Rome, 1488–90, to paint a series of frescoes for Pope Innocent VIII., until his death in 1506. His greatest works at Mantua were nine tempera pictures representing the "Triumph of Cæsar," now at Hampton court, England. Mantegna was also engraver, architect, sculptor, and poet. He did not aim at grace and beauty in his pictures, but his technical excellences greatly influenced Italian art.

Mantell (*măn'-tĕl*), **Robert Bruce**, actor, was born in Irvine, Ayrshire, Scotland, 1854. He made his professional début at Rochdale, England, as the Sergeant in *Arrah-na-Pogue*, 1876; came to the United States and played juvenile rôles with Mme. Modjeska, 1878; returned to England, and for three years supported Miss Wallis as leading man. Later appeared in New York as Loris Ippanhoff in *Fedora* with Fanny Davenport; afterward became a star, and has since been at the head of his own company in classic and romantic plays, including *Hamlet; Othello; Richard III.; Macbeth; Romeo and Juliet; Richelieu; Lady of Lyons; Corsican Brothers; Monbars; Dagger and Cross*, etc.

Manzoni (*män-dzō'-nē*), **Alessandro**, Italian novelist and poet, was born at Milan, 1785. He published his first poems in 1806, married happily in 1808, and spent the next few years in writing sacred lyrics and a treatise on the religious basis of morality. His first tragedy, *Il Conte di Carmagnola*, was a trumpet-blast of romanticism; but the work which gave him European fame is his historical novel, *I Promessi Sposi*, a Milanese story of the seventeenth century, and probably the greatest novel in all Italian literature. His noble ode, *Il Cinque Maggio*, was inspired by the death of Napoleon. In spite of his Catholic devoutness, he was a strong advocate of a united Italy. His last years were darkened by the frequent shadow of death in his household. He himself died at Milan, 1873, leaving the memory of a great writer and singularly noble man.

March, Francis Andrew, American philologist, professor of English language and comparative philology, Lafayette college, 1856–1906, was born at Millbury, Mass., 1825. He was graduated at Amherst, 1845; LL. D., Princeton, 1870; Amherst, 1871; L. H. D., Columbia, 1887; D. C. L., Oxford, England, 1896; Litt. D., Cambridge, England, and Princeton, 1896. He was admitted to the New York bar in 1850; was president of the American philological association, 1873-74, 1895-96; of the modern language association, 1891–93. Was a member of many learned societies. Author: *Method of Philological Study of the English Language; Comparative Grammar of the Anglo-Saxon Language; Anglo-Saxon Reader;* many addresses and articles in encyclopædias, periodicals, and the transactions of learned societies on philosophical and philological subjects, and on literature. Editor: *Latin Hymns, with English Notes; Eusebius; Tertullian; Athenagoras; A Thesaurus-Dictionary of the English Language*, with his son, F. A. March, Jr., etc. Died, 1911.

Marconi (*mär-kō'-nē*), **Guglielmo**, electrical engineer and pioneer of wireless telegraphy, was born in Griffone, near Bologna, 1874. His father was an Italian, his mother an Irish woman. He was educated at Leghorn and Bologna universities; LL. D., Glasgow, Aberdeen, and university of Pennsylvania; D. Sc., Oxford. He began in 1890, on his father's estate, experiments to test the theory that the electric current is capable of passing through any substance, and, if started in any given direction, of following an undeviating course without need for a wire or other conductor. He invented an apparatus for wireless telegraphy which attracted the attention of Sir William Henry Preece, engineer and electrician-in-chief English postal telegraph, who tested the apparatus, with success, in England; soon afterward he succeeded in sending messages from Spezia to a steamer fifteen kilometers distant; also sent messages from Queen Victoria ashore to the prince of Wales on royal yacht, 1897; came to the United States, 1899; used his method in reporting election, 1900; succeeded in establishing wireless telegraphic communication across the Atlantic ocean, 1902; daily ocean news service by wireless telegraphy inaugurated by him on trans-Atlantic liners, 1904. Invented directive method of wireless telegraphy, 1905, continuous-wave system, 1906, and in 1907 began a public service of wireless telegraphy across the Atlantic. Awarded Nobel prize, 1909.

Marcus Aurelius Antoninus, son of Annius Verus and Domitia Cavilla, was born at Rome, 121 A. D. His original name was Marcus Annius Verus. On the death of his father he was adopted by his grandfather, who spared no pains to render him preëminent in every art and science. His qualities attracted the notice of the emperor, Hadrian, who used to term him not *Verus*, but *Verissimus*, and who conferred high honors on him, even while a child. When only seventeen years of age he was adopted, with Lucius C. Commodus, by Antoninus Pius, the successor of Hadrian; and Faustina, daughter of Pius, was selected for his wife. He was made consul in 140 A. D., and from this period to the death of Pius, 161 A. D., he continued to discharge the duties of his various offices with the greatest promptitude and fidelity. On his accession to the throne he illustrated the magnanimity of his character by sharing the government, which Pius had left him in his last moments, and the senate offered to him alone, with young Commodus, who henceforth bore the name of Lucius Aurelius Verus, and to whom he gave his daughter Lucilla in marriage. He died at Vienna, or at Sirmium, 180 A. D., after a reign of twenty years. He was the flower of the stoical philosophy. He studied oratory under Herodes Atticus and Cornelius Fronto, and his love of learning was insatiable. Even after he had attained to the highest dignity of the state he did not disdain to attend the school of Sextus of Chæronea. Men of letters were his most intimate friends, and he received the highest honors both when alive and dead. His range of studies was extensive, embracing morals, metaphysics, mathematics, jurisprudence, music, poetry, and painting. Though gentle and tolerant by nature and creed,

QUEEN MARIA THERESA
From a painting by W. Camphausen

be was actively hostile to Christianity. His death was felt to be a national calamity; he was deified, and for more than a hundred years his image was found among the household gods of the Romans.

Margaret of Angoulême (*äɴ'-gōō'-lâm'*), queen of Navarre, and daughter of Charles of Orleans, was born in 1492. Out of love for her brother, Francis I., she went to Madrid to attend him in his sickness, during his imprisonment there. In 1527 she was married to Henri d'Albret, king of Navarre, to whom she bore a son, who died in infancy, and a daughter, Jeanne d'Albret, mother of the great French monarch, Henry IV. She encouraged agriculture, the arts, and learning, and to a certain extent embraced the cause of the reformation, and she never ceased to act with a courageous generosity toward the reformers, who always found an asylum and welcome in Navarre. She was author of *L'Heptaméron* and other notable works. She died at Odos, 1549.

Margaret of Anjou (*äɴ'-zhōō'*), daughter of René of Anjou, was born in 1430. In 1445 she was married to Henry VI. of England. Owing to his weak intellect she was the virtual sovereign; and the war of 1449, in which Normandy was lost, was laid by the English to her charge. In the wars of the Roses, Margaret, after a brave struggle of nearly twenty years, was finally defeated at Tewkesbury, in 1471, and was kept in the Tower four years, until ransomed by Louis XI. She then retired to France, and died at the castle of Dampierre near Saumur, 1482.

Margaret of Austria, daughter of the emperor Maximilian and Mary of Burgundy, was born at Brussels, Belgium, 1480. She married first John of Castile, and second Philibert of Savoy; was made governor of the Netherlands in 1507, and negotiated both the league of Cambrai, in 1508, and the "paix des dames," in 1529. She died at Mechlin, Belgium, 1530.

Margaret of Denmark, daughter of Waldemar IV. of Denmark, was born in 1353. She succeeded her father, became queen also of Norway on the death of her husband, Hakon VI., but was soon expelled. She recovered Norway in 1387, and, having defeated Albert of Mecklenburg in 1389, united the three Scandinavian kingdoms by the union of Calmar in 1397. Died, 1412.

Maria Christina, ex-queen-dowager of Spain, was born at Naples, 1806, daughter of Francis I., king of the Two Sicilies. In 1829 she became the fourth wife of Ferdinand VII. of Spain. In 1854 a revolution expelled her from the country, and she took refuge in France, but returned to Spain in 1864, only to retire again in 1868. Died, 1878.

Maria Theresa (*mȧ-rī'-ȧ tĕ-rē'-sȧ*), daughter of the emperor Charles VI. of Germany, was born at Vienna, 1717. By the "pragmatic sanction," for which the principal European powers became sureties, her father appointed her heir to his hereditary thrones. In 1736 she married Francis of Lorraine, afterward grand-duke of Tuscany; and at her father's death, in 1740, she became queen of Hungary and of Bohemia, and archduchess of Austria. At her accession the monarchy was exhausted, the people discontented, and the army weak; while Prussia, Bavaria, Saxony, and Sardinia, abetted by France, put forward claims to her dominions. Frederick II. of Prussia claimed Silesia, and poured his armies into it; Spain demanded the Austrian dominions in Italy; and the Bavarians, assisted by the French, invaded Bohemia, the elector of Bavaria being crowned emperor as Charles VII., in 1742. The young queen was saved by the chivalrous fidelity of the Hungarians, supported by Great Britain. The war of the Austrian succession, 1740–48, was terminated by the peace of Aix-la-Chapelle. The empress-queen lost Silesia to Prussia, Parma and Piacenza to Spain, and some Milanese districts to Sardinia, but her rights were admitted and her husband was recognized as emperor. Maria Theresa instituted financial reforms, fostered agriculture, manufactures, and commerce, and nearly doubled the national revenues, while decreasing taxation. Marshal Daun reorganized her armies; Kaunitz took charge of foreign affairs. But the loss of Silesia rankled in her mind; and, with France as an ally, she renewed the contest with the Prussian king. But the issue of the seven years' war, 1756–63, was to confirm Frederick in the possession of Silesia. After the peace the empress renewed her efforts to ameliorate the condition of the peasantry, mitigating the penal code, founding schools, and organizing charitable societies; her son Joseph, after the death of her husband, in 1765, being associated with her in the government. She joined with Russia and Prussia in the first partition of Poland, 1772, securing Galicia and Lodomeria; while from the porte she obtained Bukowina, 1777, and from Bavaria several districts. She died in 1780. A woman of majestic figure and an undaunted spirit, she combined feminine tact with masculine energy; and not merely won the affection and even enthusiastic admiration of her subjects, but raised Austria from a wretched condition to a position of assured power. Of her ten surviving children, the eldest son, Joseph II., succeeded her.

Mariana (*mä'-rē-ä'-nä*), **Juan,** Spanish historian, was born in 1536. He was a Jesuit, taught theology in Rome, Sicily, and Paris, and finally lived in retirement in Toledo. His arrangement of the *Index Expurgatorius*, and still more his work *De Rege et Regis Institutione*, in which he intimates that unrighteous kings and usurpers may be put to death, displeased his ecclesiastical superiors. The latter aroused a violent controversy, was ordered to be burned in Paris, and brought great odium upon his order. In 1609 he published at Cologne *Seven Theological and Historical Treatises*, two of which were censured by the inquisition, and the author was subjected to imprisonment and penance. His chief work is his *History of Spain*, which extends to the accession of Charles V. with a summary of later events down to 1621. He died in 1623.

Marie Antoinette (*mȧ'-rē' äɴ'-twȧ'-nĕt'*), **Josèphe Jeanne,** wife of Louis XVI. of France, youngest daughter of Francis I., emperor of Germany, was born at Vienna, 1755. Her mother was the famous Maria Theresa. At the age of fourteen she was betrothed to the dauphin, and in the same year was married at Versailles. Soon after the accession of Louis XVI. libels were circulated by her enemies, accusing her of constant intrigues, not one of which has ever been proved. From the first hour of the revolution she was an object of fanatical hatred to the mob of Paris. Her life was attempted at Versailles by a band of assassins in 1789, and she narrowly escaped. After this she made some spasmodic efforts to gain the good will of the populace by visiting the great manufactories of the capital, such as the Gobelins, and by seeming to take an interest in the labors of the workmen, but the time was gone by for such transparent shamming to succeed. The relentless populace only hated her the more. At last she resolved on flight. Her husband long refused to abandon his country, and she would not go without him. A dim sense of kingly duty and honor was not wanting in Louis, but after the mob stopped his coach in 1791, and would not let him go to St. Cloud, he consented. The flight took place on the night of the 20th of June. Unfortunately the royal fugitives were recognized and captured at Varennes. From this time her

South American republics, and the promulgation of what has since been called the "Monroe doctrine." In 1825 he retired to his seat at Oak Hill, Loudoun county, Va., but he still continued in the public service. After being twice president, he was justice of the peace, a visitor of the university of Virginia, and member of a state convention; but a profuse generosity and hospitality caused him to be overwhelmed with debt, and he found refuge with his relatives in New York, where he died in 1831 — like his predecessors, Adams and Jefferson — on the 4th of July.

Montagu, Lady Mary Wortley, English beauty, wit, and writer, was born at Thoresby, in Nottinghamshire, about 1689, eldest daughter of Evelyn Pierrepont, duke of Kingston. She was carefully educated, and manifested precocious talents. In 1712 she married Edward Wortley Montagu, and in 1716 accompanied him on his embassy to Constantinople. To this journey we are indebted for her admirable *Letters.* After her return to England in 1718, she shone conspicuously in the circles of talent and fashion. Pope was among her friends, but he at length quarreled with and libeled her. In 1739 her declining health induced her to settle on the continent, whence, however, she returned in 1761. She died in the following year. Her collected works have been published in six volumes, and her *Letters* place her at the head of feminine epistolary writers in Great Britain, and leave her few rivals in other countries.

Montaigne (*mŏn-tān′;* Fr. *môɴ′-tȧn′-y′*), **Michel Eyquem de.** See page 39.

Montalembert (*môɴ′-tȧ′-läɴ′-bâr′*), **Charles Forbes, Comte de,** French historian, orator, and publicist, was born in London, 1810. He became a peer of France on the death of his father, his mother being a Scotchwoman. Several times during his career he came into conflict with the authorities for his bold defense of what he deemed to be the rights of his church against the encroachments of the civil power; but his name came most prominently before Europe through his uncompromising opposition to Louis Napoleon, after the *coup d'état* of 1851. In 1858 he published a pamphlet entitled, *Un Débat sur l'Inde,* eulogizing English institutions, and depreciating those then existing in France. For this pamphlet he was summoned before the bar of the correctional police, and was sentenced to imprisonment for six months, and to pay a fine of 3,000 francs; and, though this penalty was immediately remitted by the emperor, Montalembert appealed against the decision of the court, was again condemned, and once more pardoned, very much to his own disgust. Among his other writings are: *History of Saint Elizabeth of Hungary; Life and Times of St. Anselm; The Political Future of England;* and a pamphlet entitled *Pius IX. and France in* 1849 *and* 1859. He died at Paris, 1870.

Montcalm (*mŏnt-käm′*), **Louis Joseph St. Véran, Marquis de,** commander-in-chief of the French troops in Canada, 1756–59, was born near Nîmes, France, 1712. He captured Fort Ontario at Oswego, 1756; Fort William Henry in 1757; repulsed the British under Abercrombie at Ticonderoga in 1758; repelled Wolfe's attack on Quebec, 1759; and was defeated and mortally wounded in the battle of Quebec, September 13th of the same year.

Montesquieu (*mŏn′-tĕs-kū′;* Fr. *môɴ′-tĕs′-kē′-ü′*), **Charles de Secondat, Baron de.** See page 61.

Montfort, Simon de, English general and statesman, was born in France about 1208, son of a French count. He went to England in 1230, where he inherited from his grandmother the earldom of Leicester. He here attached himself to Henry III., married the king's sister, and was sent to govern Gascony in 1248. He returned in 1253, and passed over to the side of the barons, whom he ultimately led in the struggle against the king. After repeated unsuccessful attempts to make Henry observe the provisions of Oxford, Simon took arms against him in 1263. The war was indecisive, and, appeal being made to the arbitration of Louis the Good, Simon, dissatisfied with his award, renewed hostilities, defeated the king at Lewes, and, taking him and his son prisoner, governed England for a year during 1264-65. He sketched a constitution for the country, and summoned the most representative parliament that had yet met, but as he aimed at the welfare not of the barons only, but of the common people as well, the barons began to distrust him. He was slain at Evesham, 1265.

Montgolfier (*môɴ′-gŏl′-fyā′*), **Jacques Étienne and Joseph Michel,** two brothers, distinguished as the inventors of balloons, were the sons of a celebrated paper manufacturer at Annonay, France. The former was born in 1745, and the latter in 1740. Étienne, after a few successful experiments with the balloon, went to Paris; but, though his discovery created a great sensation, and was followed out in practice by many eminent men, he obtained little pecuniary aid in carrying on his experiments, and at length retired to his native town, where he resumed the manufacture of paper, and died at Servières in 1799. Joseph, the sharer of his labors and his glory, was a man of much genius and little education; but the two brothers were fitted to supplement each other's deficiencies, and together they made many discoveries, and were both received as members of the French academy. Joseph invented the hydraulic screw, the calorimeter, etc., and in the latter part of his life filled a post in the department of arts and manufactures. He died at Paris in 1810.

Montgomery, James, British poet, was born in Scotland, 1771. He was intended for a Moravian preacher, but, showing little aptitude, became a shop boy. In 1790 he went to London, where a book-seller refused a volume of poems written by him, but employed him. In 1792 he entered the service of Joseph Gales in Sheffield, and in 1794 started the *Sheffield Iris,* a weekly advocate of peace and reform, which he edited until 1825. He was fined and imprisoned in 1795 and 1796 for seditious publications. In 1797 he published a small volume of poems, *Prison Amusements,* followed by *The Wanderer of Switzerland; The West Indies; The World before the Flood;* and *Greenland.* He was a liberal whig, and an ardent abolitionist. He also published *The Pelican Island, and other Poems; Original Hymns,* and *Lectures on Poetry and General Literature.* Died, 1854.

Montgomery, Richard, American general, was born in Ireland, 1736. In 1772 he resigned his commission in the British service, and settled in Dutchess county, N. Y., representing it in the continental congress, 1775. As brigadier in the colonial army he took Montreal, and was killed in the assault on Quebec, December, 1775.

Moody, Dwight Lyman, American preacher and revivalist, was born in Massachusetts, 1837. He renounced Unitarianism, became a Congregationalist, served during the civil war on the Christian commission, and from 1856 entirely abandoned business and devoted himself to religious work in Chicago and elsewhere. His church and schoolhouse at Chicago having burned down in 1871, he went to England to raise funds for rebuilding them, and was successful in his object. For many years he associated Ira D. Sankey with him in his revival work. He established a school for Christian workers at Northfield, Mass., and a Bible institute at Chicago. Died, 1899.

Moody, William Henry, American lawyer, jurist, former associate justice of United States supreme court, was born in Newbury, Mass., 1853. He was graduated from Harvard university, 1876, was admitted to the Massachusetts bar in 1878, and began practice at Haverhill, Mass. He was district attorney for the eastern district of Massachusetts, 1890–95; member of 54th congress from 6th Massachusetts district to fill vacancy; also member of 55th, 56th, and 57th congresses; secretary of the navy, 1902–04; attorney-general of the United States, 1904–06, and in 1906 associate justice of the United States supreme court, from which he retired, 1910.

Moore, George Foot, American scholar and educator, preacher, 1900–03, professor theology, 1902–04, Frothingham professor, history of religion, since 1904, Harvard; was born at West Chester, Pa., 1851. He was graduated at Yale college, 1872, D.D., 1897; graduated Union theological seminary, 1877; LL. D., Western Reserve, 1903, Harvard, 1906. Ordained to the Presbyterian ministry, 1878. He was minister of the Putnam Presbyterian church, Zanesville, Ohio, 1878–83; professor of Hebrew, Andover theological seminary, 1883–1902. Author: *The Book of Judges in Hebrew; Index to the Journal of the American Oriental Society;* and many articles on biblical and oriental subjects in *Andover Review, Journal of Biblical Literature, Journal of American Oriental Society,* etc. He was appointed Roosevelt lecturer at Berlin university, 1909.

Moore, Sir John, British general, was born in Glasgow, Scotland, 1761. He served in the British army during the American war; became a member of parliament in 1784; served in Corsica, 1793-94; in the attack on St. Lucia, of which he became governor; and subsequently in Ireland, Holland, Egypt, and Sicily. In 1798 he was made major-general. On his return from an expedition in aid of Sweden, he was sent to Portugal to command an army to coöperate with the Spaniards, 1808. He was obliged to retreat from Salamanca to the sea, won the victory of Corunna in 1809, but fell in the battle and died.

Moore, John Bassett, American publicist, was born in Smyrna, Del., 1860. He was graduated at the university of Virginia, 1880; LL. D., Yale, 1901. He studied law at Wilmington, Del., passed the United States civil service examination, 1885, and was appointed law clerk in the state department at $1,200 a year. In 1886 he became third assistant secretary of state. Although a democrat, he was retained in that position by Blaine; resigned, 1891, to become professor of international law and diplomacy at Columbia university; was appointed in April, 1898, assistant secretary of state, resigning in September to become secretary and counsel to the peace commission at Paris. He is an authority on international law. Author: *Report on Extraterritorial Crime; Report on Extradition; Extradition and Interstate Rendition; American Notes on the Conflict of Laws; History and Digest of International Arbitrations* (6 vols.); *American Diplomacy, Its Spirit and Achievements,* etc. He is also one of the editors of the *Political Science Quarterly,* and of the *Journal de Droit International Privée.*

Moore, Thomas, Irish poet, was born in 1779. He was graduated at Trinity college, Dublin, 1798, and in 1799 went to London to study law, taking with him a translation of the odes of Anacreon, which he published in 1800. In 1801 he published *The Poetical Works of the Late Thomas Little, Esq.,* a pseudonym suggested by his diminutive stature. In 1803 he was appointed registrar to the admiralty in Bermuda, but soon returned to England, having first made a rapid tour through a portion of the United States and Canada. In 1813 he settled at Mayfield cottage, near Ashbourne in Derbyshire. Here were written many of the songs known as *Irish Melodies,* which were extended to ten series. These songs have enjoyed a popularity surpassing that of any similar poems in the language. He also published two series of *Sacred Melodies,* six series of *National Airs, Legendary Ballads,* and many miscellaneous pieces. In 1817 he completed *Lalla Rookh,* the most elaborate of his works, followed by *The Fudge Family in Paris; Tom Crib's Memorial to Congress; Rhymes on the Road; Fables for the Holy Alliance; Loves of the Angels; Life of Sheridan;* and *The Epicurean,* a prose fiction. His most important prose work was his *Notices of the Life of Lord Byron.* His remaining works comprise: *The Summer Fête,* a poem; *Memoirs of Lord Fitzgerald; Travels of an Irish Gentleman in Search of a Religion;* and the *History of Ireland,* written for Lardner's *Cabinet Cyclopædia.* Died, 1852.

Moot, Adelbert, American lawyer, was born in Allen, Allegany county, N. Y., 1854. He was educated in the high and state normal schools, and at Albany law school, 1875-76. He has practiced law at Nunda, N. Y., and Buffalo, N. Y., since 1876. He is president of the Unitarian conference for the middle states and Canada; he was a member of the board of commissioners of statutory consolidation that consolidated all general statutes of New York from 1777 to 1909. Elected member New York state board of Regents, 1913.

Moran, Thomas, American artist, was born at Bolton, in Lancashire, England, 1837. His early life was spent at Philadelphia, where he learned engraving. He then studied painting in England, France, and Italy. His large paintings, the "Grand Cañon of the Yellowstone," and the "Chasm of the Colorado," were bought by congress for $20,000. These were the first landscapes ever purchased by the government. His other works are mostly of the same class: "Balboa Discovering the Pacific," "Hiawatha and the Serpents," "The Wilds of Lake Superior," etc.

More, Hannah, English writer, daughter of the village schoolmaster of Stapleton, near Bristol, was born in 1745. She wrote verses at an early age, and in 1762 published *The Search After Happiness,* a pastoral drama. In 1774 she was introduced to the Garricks, Johnson, Burke, Reynolds, and the best literary society of London. During this period she wrote two tales in verse, and two tragedies, *Percy* and *The Fatal Falsehood,* both of which were acted. Led by her religious views to withdraw from society, she retired, on the publication of her *Sacred Dramas,* to Cowslip Green near Bristol, where she did much to improve the condition of the poor, and still helped by her writings to raise the tone of English society. Her essays on *The Manners of the Great* and *The Religion of the Fashionable World,* her novel *Cœlebs in Search of a Wife,* and a tract called *The Shepherd of Salisbury Plain* were her most popular works. In 1828 she settled at Clifton, where she died in 1833.

More, Sir Thomas, English statesman, was born at London, 1478. He was educated at Oxford, and at Lincoln's Inn; rose to eminence as a lawyer, was appointed under-sheriff and judge of the sheriff's court for London and Middlesex, and was elected a burgess of the parliament under Henry VII., where he was often successful in resisting claims of the crown. In 1514 and 1515 he was sent on commercial embassies to the Netherlands, and after his return became a

finally in Cincinnati; attended public schools until her twelfth year, then joined juvenile opera company, which gave *Pinafore, Chimes of Normandy,* and other light operas. She was christened Sarah Frances Frost, but in the juvenile company was called Frances Brough, the latter a family name; later played a child's part in *Rip Van Winkle,* and the next season played small parts in a company which gave classic dramas in the West. She then retired from the stage and studied three years in New York; made her metropolitan début as Parthenia in *Ingomar,* and since 1888 has starred in Shakespearean and other tragic and romantic rôles throughout the United States and Europe. She married Robert Taber, who had been leading man in her company, but afterward secured legal separation. Married E. H. Sothern, 1911.

Marmontel (*mȧr'-môɴ'-tĕl'*), **Jean François,** French writer, was born at Bort, 1723. He was an instructor in philosophy for some time at Toulouse, and about 1745 settled in Paris and devoted himself to literature. He wrote *Les Incas, Bélesaire,* and *Contes Moraux,* and made his way into Parisian society by gentleness, wit, and a dainty and candid literary power. "He became one of the humblest yet most honest, and placid scholars at the court of Louis XV.," according to Carlyle, "and wrote pretty, yet wise, sentimental stories in finished French, the sayings and thoughts in them, in their fine tremulous way, perfect like the blossoming heads of grass in May." He was elected to the French academy in 1763, and was a literary disciple of Voltaire. Died, 1799.

Marot (*mȧ'-rō'*), **Clément,** noted French poet, was born at Cahors about 1495. He entered the service of Princess Margaret, afterward queen of Navarre. He was wounded at the battle of Pavia in 1525, and soon after imprisoned on a charge of heresy, but liberated next spring. He made many enemies by his witty satires, and in 1534 fled first to the court of the queen of Navarre, and later to that of the duchess of Ferrara. He returned to Lyons in 1536, and in 1538 began to translate the psalms, which, in their French dress and sung to secular airs, helped to make the new views fashionable; but, the part published in 1541 having been condemned by the Sorbonne, he had again to flee in 1543. He made his way to Geneva, but, finding Calvin's company uncongenial, went on to Turin, where he died in 1544. His poems consist of elegies, epistles, rondeaus, ballads, sonnets, madrigals, epigrams, nonsense verses, and longer pieces; his special gift lay in badinage and graceful satire.

Marquette (*mär'-kĕt'*), **Jacques,** French Jesuit missionary and American explorer, was born at Laon, France, 1637. He founded Sault Ste. Marie and Kaskaskia missions; accompanied Joliet in his exploration of the Mississippi, and died while attempting to establish a mission among the Illinois Indians, 1675.

Marryat (*măr'-ĭ-ăt*), **Frederick,** English author, was born in Westminster, 1792. He served in the navy for many years, becoming a post captain, and wrote many novels, including: *Frank Mildmay; The King's Own; The Pacha of Many Tales; Midshipman Easy; Japhet in Search of a Father; Peter Simple; Snarleyyow; Jacob Faithful; The Phantom Ship; Masterman Ready; The Settlers in Canada; The Privateersman; Valerie,* etc. He also published a *Code of Signals for Vessels Employed in the Merchant Service,* adopted in England and other countries, and *Diary in America,* in 6 vols. Died, 1848.

Marsh, George Perkins, American diplomat and philologist, was born at Woodstock, Vt., 1801. He studied law, was elected to congress in 1842, was United States minister to Turkey, 1849–53, and to Italy, 1861–82. He was made LL. D. of Harvard in 1859. Author: *Lectures on the English Language; The Origin and History of the English Language; Man and Nature,* and a number of lesser philological works. Died, 1882.

Marshall, Alfred, English economist, was born in London, 1842. He was educated at Merchant Taylors' and St. John's, Cambridge; D. Sc., Oxford and Cambridge; hon. LL. D., Edinburgh; hon. Dr. Jur., Cracow university; fellow of St. John's college, Cambridge, 1865; principal of University college, Bristol, 1877; lecturer at and fellow of Balliol college, Oxford, 1883-84; professor of political economy, Cambridge university, 1885–1908; member of royal commission on labor, 1891; vice-president of the royal economic society; fellow of the British academy, 1902, and membre correspondant de l'Institut de France, 1908. Author: *Economics of Industry,* in conjunction with his wife; *Principles of Economics; Elements of Economics; The New Cambridge Curriculum in Economics,* etc.

Marshall, Henry Rutgers, American architect and author, was born in New York, 1852. He was graduated at Columbia in 1873; L. H. D., Rutgers, 1903; in practice as architect since 1878. Lecturer on æsthetics, Columbia university, 1894–95. Fellow of American institute of architects; member of American association for the advancement of science, and American philosophical society; member of art commission of city of New York, 1902–05. Author: *Pain, Pleasure, and Æsthetics; Æsthetic Principles; Instinct and Reason,* etc. He is a contributor to art, psychological and philosophical journals and literary magazines and reviews.

Marshall, John, American jurist, chief-justice of the United States, was born in Fauquier county, Va., 1755. In 1781 he began to practice law in Fauquier county, Va., and soon rose to the head of the Virginia bar. He was a member of the Virginia house of burgesses, the state legislature, and the state convention that adopted the constitution. He was sent to France with Pinckney and Gerry as an envoy in 1797. In 1799 he was elected to congress, and in 1800 became secretary of state. He was made chief-justice of the United States in 1801 by President John Adams, and held this position until his death, which occurred at Philadelphia, Pa., 1835. His great legal learning and judicial poise dominated the supreme court for thirty-four years, during which his decisions on constitutional questions established precedents in the interpretation of the constitution that have been accepted ever since. He has perhaps never been excelled in power of analysis, lucidity of statement, and in ability to hold a legal proposition before the eyes of others from so many different points of view.

Marshall, Thomas R., was born in Manchester, Indiana, in 1854. He was educated in the common schools, and at Wabash college, A. B., 1873, A. M., 1876, L.L. D., 1909. On his twenty-first birthday he was admitted to the bar at Columbia city, Indiana. He was a member of the firm of Marshall and McNagny, 1876–92; Marshall, McNagny and Clugston, 1892–1909. Governor of Indiana, 1909–13. Elected vice-president of the United States in 1912.

Martel, Charles. See **Charles Martel.**

Martens (*mär'-tĕnz*), **Frederic de,** Russian diplomat and international lawyer, professor of international law, university of St. Petersburg, 1871–1907; was born at Pernau, in the Russian Baltic provinces, 1845. He was graduated at the university of St. Petersburg, 1867; doctor of international law, 1873; LL. D., Edinburgh, Cambridge, and Yale universities; D. C. L., Oxford. He was Russian delegate at the second Russian plenipotentiary at the peace conference at The

Hague, 1899, and president of the second commission; member of the permanent international court of arbitration at The Hague; Russian delegate at the peace negotiations between Russia and Japan in Washington, 1905; plenipotentiary of Russia at the Geneva conference of 1906 for the revision of the Geneva convention of 1867. Author: *La Paix et la Guerre; On Consular Jurisdiction in the East; The International Law of the Civilized Nations; Russia and England in Central Asia; Le conflit entre la Russie et la Chine*, etc. Died, 1909.

Martin (*mär'-tăɴ'*), **Bon Louis Henri,** French historian, was born in 1810, at Saint Quentin. He studied law, but later abandoned it, and, after publishing a series of historical novels, gained celebrity by his *Histoire de France*, in 15 vols., of which he prepared a revised edition in 19 vols., and a third and more elaborate one, embracing the most recent discoveries, 1855–60. His illustrated *Histoire de France populaire*, begun in 1867 and interrupted in 1870, was resumed in 1871. In 1870 he became mayor of Paris, and in 1871, a member of the national assembly. In 1876 he was elected a senator, and in 1878 a member of the French academy. His works also include *Études archéologiques celtiques*, and many other historical and archæological works. Died, 1883.

Martin (*mär'-tĭn*), **Thomas Staples,** lawyer, United States senator, was born in Scottsville, Albemarle county, Va., 1847. He was educated at the Virginia military institute, and at the university of Virginia; studied law, and was admitted to the bar in 1869, since which time he has devoted himself closely to that profession. Until elected to the United States senate he had never held nor been a candidate for any political office, state or national. He was elected United States senator from Virginia, 1893; reëlected in 1899, 1905, and 1911.

Martin, William Alexander Parsons, American missionary and Chinese scholar, was born at Livonia, Ind., 1827. He was graduated at the Indiana university; studied theology at Presbyterian seminary, New Albany, Ind.; D. D., Lafayette, 1860; LL. D., university city of New York, 1870. He was missionary to Ning-po, China, 1850–60; acted as interpreter for William B. Reed, United States minister, in negotiating treaty with China, 1858. Went to Peking, China, and Yeddo, Japan, with John E. Ward, United States minister, 1859. Missionary at Peking, 1863–68; president, and professor of international law, 1868–94, Tung Wen college; first president, 1898–1900, Imperial university of China; was in siege of legation at Peking; president university of Wuchang, 1902–05. Adviser of Chinese authorities on matters of international law in several international disputes with European powers; was made a mandarin of the third class, 1885, and of the second class, 1898. Author: *Lore of Cathay, Siege in Peking; A Cycle of Cathay; Chinese Legends; Awakening of China;* and also works in Chinese on evidences of Christianity, natural philosophy, international law, etc. He edited, in Chinese, *The Peking Scientific Magazine*, 1875–78, and *Science Monthly*, 1897-98.

Martineau (*mär'-tĭ-nō*), **Harriet,** English writer of Huguenot descent, was born at Norwich, in 1802. She visited the United States in 1834, and the East in 1846, publishing descriptive works on her return. She wrote *Deerbrook, The Hour and the Man*, and other novels, and many tales for children. She was also author of a condensation of Comte, and *History of England During the Thirty Years' Peace*. Died, 1876.

Martineau, James, English theologian, brother of the preceding, was born at Norwich, 1805. He was graduated at Manchester college, 1827, and became a Unitarian minister at Dublin and Liverpool. In 1841 he was appointed professor of mental and moral philosophy at Manchester new college. He removed to London when that institution was transferred there in 1857, becoming also a pastor in Little Portland street chapel. He was principal of the college, 1868–85. As one of the profoundest thinkers and most effective writers of his day, he received degrees from Harvard, Leyden, and Edinburgh. His works include: *The Rationale of Religious Inquiry; Hymns for the Christian Church and Home; Endeavors after the Christian Life; Miscellanies; Studies of Christianity; Hymns of Praise and Prayer; Hours of Thought on Sacred Things; A Study of Spinoza; Types of Ethical Theory; A Study of Religion; The Seat of Authority in Religion;* and *Studies, Reviews*, and *Addresses*. He died in 1900.

Marx, Heinrich Karl, German socialist, was born in Trèves, 1818, son of a lawyer. He was educated at Bonn and Berlin, took an active part in the liberal movement of 1840, and, after the supression of the *Rhenish Gazette*, edited by him, he went to Paris. Subsequently he was compelled to leave Paris and go to Brussels on the demand of the Prussian government. Having been expelled from Belgium, he was again invited to Paris, but soon went to Cologne, where he attempted to revive the *Rhenish Gazette*. He then settled in London, where he engaged in literary work, and took an active part in the international working men's association. After the secession of the anarchist section in 1872, he took but little part in affairs, and died at Hampstead ten years later, 1883. His chief work was *Das Kapital*.

Mary, Queen of England, 1553–58, was born at Greenwich, 1516. She was the daughter of Henry VIII. and Catharine of Aragon, and succeeded to the throne on the death of her half-brother, Edward VI., after the deposition of Lady Jane Grey. She began her reign by releasing Gardiner, Bonner, Tunstall, Day, and Heath, who had been confined during the previous reign for their religious opinions, and by imprisoning in their stead Ridley, Latimer, Cranmer, and others. Soon after she beheaded Northumberland, Sir Thomas Palmer, and Sir John Gates, for advocating the cause of Lady Jane Grey; and a few months later she beheaded that unfortunate lady, and her husband, Lord Guildford Dudley. In 1554 she was married to Philip II. of Spain; and in the following year, having already repealed all the laws enacted in favor of Protestantism, and reëstablished Catholicism, she began, probably reluctantly, that series of persecutions of the Protestants which have earned for her the title of "the bloody Mary." During her short reign of four years, no fewer than 284 persons, of all ages and sexes, were put to death. In 1558 Calais, which had been in the possession of the English ever since the time of Edward III., a period of 210 years, was taken by the duke of Guise. This loss to the English nation so distressed Mary, that she said the name of Calais would, after death, be found engraven on her heart. She died in 1558, and was succeeded by her half-sister, Elizabeth.

Mary, Queen of Scots, daughter of James V. and Mary of Lorraine, was born at Linlithgow, Scotland, 1542. She became, by her father's death, queen before she was a week old. Her early childhood was spent on an island in the lake of Menteith; she was sent to France in 1548, brought up at court with the royal princes, and married to the dauphin in 1558, who for a year, 1559-60, was King Francis II. On his death she had to leave France, and returned to assume the government in Scotland, now in the throes of the reformation. Refraining from interference with the Protestant movement, she retained her own Catholic faith, but chose Protestant advisers. Out of many proposed alliances she elected, against all advice, to be married to her cousin, Lord Darnley, in 1565, and easily quelled the insurrection that broke out under Moray. Darnley, granted the title of king, tried to force her to settle the succession, in the event of her dying childless, on him and his heirs, and deeming her favorite, Rizzio, to stand in the way, he plotted with the Protestant lords to have him murdered, and Mary was obliged to agree to his demands. The murder was committed, and the queen was for a time prisoner in Holyrood. She succeeded in detaching Darnley from the conspirators and the scheme fell through. Her only son, afterward James VI., was born three months later, in 1566. Darnley was murdered by Hepburn, earl of Bothwell, almost certainly with Mary's connivance, and her marriage with Bothwell in May alienated the nobles. They rose, took the queen prisoner at Carberry, carried her to Edinburgh, then to Loch Leven, where they forced her to abdicate in July. Next year, escaping, she fled to England, and was there for many years a prisoner. Catholic plots were formed to liberate her and put her in place of Elizabeth on the English throne, by virtue of the fact that she was next in order of succession, being great-granddaughter of Henry VII. At last she was accused of complicity in Babington's conspiracy, tried, found guilty, and executed in Fotheringay castle, 1587. She was faithful to her religion to the end, and was a woman of great beauty and charm, courage and ability, warm affection, and generous temper.

Mason, George, American statesman, was born at Doeg's Neck, Va., 1725. In 1775 the Virginia convention made him a member of the committee of safety which was charged with the government of the colony. The next year he drew up a declaration of rights and a constitution for the new state, which were both adopted without an opposing vote. He also, with the help of Jefferson, had a bill passed making all kinds of worship lawful in Virginia. In 1777 he declined an election to the continental congress. In 1787 he was one of the foremost men in the convention which drew up the constitution of the United States, and took firm ground against making slavery permanent in the country. He stood shoulder to shoulder with Patrick Henry in opposing the ratification of the United States constitution by Virginia, and sought to have about twenty changes made, some of which were afterward adopted by congress. He was chosen Virginia's first United States senator, but refused to serve. Died in Fairfax county, Va., 1792.

Mason, James Murray, American jurist and statesman, was born in Fairfax county, Va., 1798. He was a grandson of George Mason, graduated from the university of Pennsylvania, and was admitted to the Virginia bar when twenty-two years of age. He served many years in the Virginia house of delegates, and in the United States congress, 1837–39. He was elected senator from Virginia in 1847, and retained that place until the breaking out of the civil war, when he withdrew from the senate and cast in his lot with the seceding states. He was captured with John Slidell on the steamer *Trent*, in 1861, when on his way to Europe to represent the confederacy abroad, and was held prisoner by the federal authorities until January 2, 1862, when, upon the demand of the English government, he was released. He died near Alexandria, Va., 1871.

Maspero (*mȧs'-pĕ-rō'*), **Gaston Camille Charles,** French Egyptologist, was born at Paris, 1846, of Italian parents. In 1874 he became professor of Egyptology at the Collège de France, and from 1881 to 1886 keeper of the Bulak museum and director of explorations in Egypt. He made valuable discoveries at Sakkara, Dahshur, Akhmym, and elsewhere. In 1886 he became professor at the institute of Paris; was made an hon. fellow of Queen's college, and hon. D. C. L., Oxford, 1887. In 1899 he returned to Egypt as director of excavations. Author: *Egyptian Archæology; Life in Ancient Egypt and Assyria; Dawn of Civilization; The Struggle of the Nations; The Passing of the Empires*, etc.

Massasoit (*măs'-ȧ-soit'*), chief of the Pokanoket or Wampanoag Indians, ruled over most of south Massachusetts from Cape Cod to Narragansett bay. His tribe, once some 30,000 in number, shortly before the landing of the English had lost all but about 300 by a disease, probably the yellow fever. In 1621, three months after Plymouth had been founded, Massasoit and sixty warriors, armed and painted, came to the settlement and made a treaty of peace. This treaty was kept for fifty years, and Massasoit was always friendly to the settlers. His home was where now stands the town of Warren, R. I., and here he entertained Roger Williams for several weeks, when the latter was on his way to Providence after being banished from Massachusetts. Massasoit was honest, kept his word, and loved peace. He died in 1661. His son Pometacom, on his father's death, went to Plymouth and asked to be given an English name. He was named Philip, and became the leader of King Philip's war.

Masséna (*mȧ'-sā'-nȧ'*), **André,** prince of Essling, and duke of Rivoli, one of the most celebrated of Napoleon's marshals, was born at Nice, 1758. He entered the army in 1775, and retired from it after having served for fourteen years. The revolution, however, again roused his military ardor. His rise was rapid, and he attained the rank of general of division, 1793. In the Italian campaigns from 1794 to 1798 he so distinguished himself on every occasion that he was called the darling child of victory, and in 1799 saved France from invasion by routing the Austrians and Russians in Switzerland. His memorable defense of Genoa in 1800 gave time to Bonaparte to cross the Alps, and crush the Austrian army at Marengo. In the campaigns of 1805, 1807, and 1809, in Italy, Poland, and Germany, he was among the most conspicuously successful of the French leaders. His conduct in the last of these campaigns was rewarded with the title of prince of Essling. In 1810 he was appointed to command the army which invaded Portugal, but was foiled by Wellington, and compelled to abandon the Portuguese territory. After this period Masséna did not again appear in the field. He died in 1817.

Massenet (*mȧ'-s'nĕ'*), **Jules Émile Frédéric,** French composer, was born at Montaud, 1842. He was educated at Lycée, Saint-Louis, and Le Paris conservatoire, under Laurent, Reber, Savard, and Ambroise Thomas. He was professor of composition at the conservatoire, 1878–96. He wrote the following operas: *La Grande Tante; Don César de Bazan; Le Roi de Lahore; Hérodiade; Manon; Le Cid; Esclarmonde; Le Mage; Werther; Thaïs; Le Portrait de Manon; La Navarraise; Sapho; Cendrillon; Grisélidis; Le Jongleur de Notre Dame.* Other works: *Marie Madeleine; Eve; La Vierge;* six orchestral suites, etc. Died, 1912.

Massillon (*mȧ'-sĕ'-yôɴ'*), **Jean Baptiste,** one of the most eloquent of French pulpit orators, was born at Hyères, 1663. He entered at the age of eighteen into the congregation of the Oratory, and became so celebrated as a preacher that he was summoned to court to display his powers. His success there was complete. Louis XIV. complimented him in the strongest terms, but neglected to promote him. It was left to the regent, duke of Orleans, to reward Massillon's merit, and in 1717 he gave him the bishopric of Clermont. Massillon held this see until his death in 1742. His many virtues rendered him universally beloved. His sermons and other theological works form fifteen volumes.

Massinger (*măs′-ĭn-jẽr*), **Philip**, English dramatist, was born at Salisbury, England, 1583. He studied at Oxford, 1602, and in 1606 went to London and is reported to have entered the Roman church. Eighteen of his plays are still extant, the earliest being the *Virgin Martyr*, published about 1622. Notwithstanding his genius and the popularity of his plays, he lived in obscurity; and the course of his life in London is not easily traced. Among his best-known works are: *Duke of Milan*, *Fatal Dowry*, and *A New Way to Pay Old Debts;* the last is still in use upon the stage. Fletcher and Dekker were associated with him in the production of certain of his works. He was found dead in his bed in 1640, and was entered upon the book of the parish church simply as "a stranger."

Mather (*măᴛʜ′-ẽr*), **Cotton,** American colonial divine, was born in Boston, 1663. The phenomenon termed "Salem witchcraft" having appeared in the colony, he investigated it, and published, in 1689, his *Memorable Providences Relating to Witchcraft and Possessions.* He found that devils or possessed persons were familiar with dead and foreign languages, etc., and eagerly advocated the adoption of desperate remedies for the diabolical disease. Despite his bitter bigotry and narrow-mindedness, he was an able man, and, with remarkable industry, wrote 382 works. His *Essays to do Good* were commended by Franklin; and it ought also to be remembered that he helped to introduce into the colonies inoculation for small-pox. Died, 1728.

Mather, Increase, American colonial divine, father of the preceding, and son of an English non-conformist minister who emigrated to Massachusetts in 1635, was born at Dorchester, 1639. He was for about sixty years pastor of the North church, Boston. In 1685 he was also chosen president of Harvard college, for which he obtained the right to confer the degrees of B. D. and D. D. An industrious student, he spent sixteen hours a day in his study, and published upward of a hundred separate works, most of which are now very rare. His influence was so great in the colony that he was sent to England in 1688 to secure a new charter, and had the appointment of all offices under it. Died, 1723.

Mathew, Theobald, "Father Mathew," apostle of temperance, was born at Thomastown in Tipperary, Ireland, 1790. He took priest's orders in the Capuchin order in 1814; and in his ceaseless labors at Cork, seeing how much of the degradation of his people was due to drink, became in 1838 an ardent advocate of total abstinence. His crusade extended to Dublin, to the North, to Liverpool, Manchester, London, Glasgow, and even to the chief centers of the Irish in America. His success was marvelous, and everywhere he roused enthusiasm and secured warm affection. But overwork ruined his health, and he died in 1856.

Matsukata (*măt′-sŏŏ-kä′-tȧ*), **Marquis Masayoshi,** Japanese statesman, was born at Kagoshima, 1835. He received a military and literary education, and naval training from foreigners in Nagasaki. He took part in the political movement which resulted in the overthrow of the Shogunati; was appointed a local governor at the time of the restoration, and since 1870 has been engaged in the financial administration of the central government, and has directed efforts to facilitate and encourage agricultural and industrial enterprises. He visited Europe as president of the Japanese section of the Paris exposition of 1878; was appointed minister of home affairs, 1880; minister of finance, 1881. The redemption of inconvertible notes was the most important work accomplished during his more than ten years' service as minister of finance. He was created count, 1884; premier, 1891–92, and 1896–98; minister of finance in October of the latter year until October, 1900. The adoption of the gold standard, for which the count was mainly responsible, has been the most important incident in the history of Japan in recent years. He visited America and Europe, 1902; received an hon. D. C. L. from Oxford, 1902; has been president of the Japan red cross society since 1906, and was created marquis in recognition of services as financial adviser during the Russo-Japanese war. Author: *Report on the Adjustment of Paper Currency; History of National Debts in Japan; Report on the Adoption of the Gold Standard in Japan; Report on the Post-bellum Financial Administration in Japan,* etc.

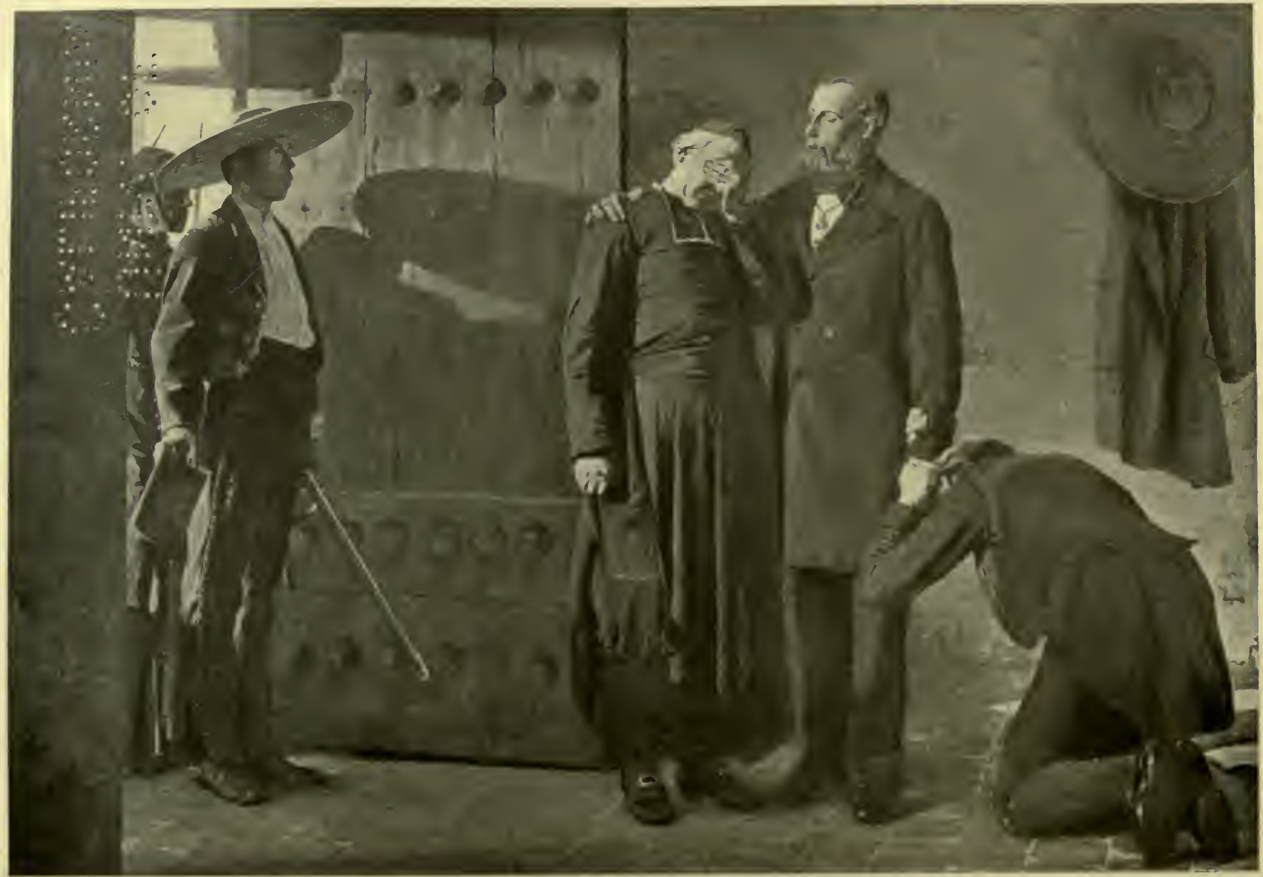
Matthews, James Brander, American author, professor of dramatic literature, Columbia, since 1900, was born at New Orleans, 1852. He was graduated at Columbia college, 1871, LL. B., 1873; D. C. L., university of the South, 1899, Litt. D., Yale, 1901; LL. D., Columbia, 1904. He was admitted to the New York bar, but turned to literature. Author: *The Theaters of Paris; French Dramatists of the Nineteenth Century; Pen and Ink; With My Friends; Americanisms and Briticisms; The Story of a Story; Studies of the Stage; Introduction to the Study of American Literature; Tales of Fantasy and Fact; Aspects of Fiction; Outlines in Local Color; A Confident To-Morrow; The Action and the Word; The Historical Novel; Parts of Speech, Essays in English; Development of the Drama; Recreations of an Anthologist; Inquiries and Opinions,* etc. Decorated with legion of honor, 1907.

Matthews, Franklin, American journalist, editor of the *New York Sun*, 1890–1909; was born at St. Joseph, Mich., 1858. He was graduated at Cornell university, 1883; followed by one year post-graduate work, but not for degree; traveled as lecture agent for J. B. Pond, with Beecher, Mark Twain, Carl Schurz, and others, 1883–86. He was reporter and editor of *Philadelphia Press*, 1886–90. Author: *Philadelphia; Our Navy in Time of War; The New-born Cuba;* and numerous contributions to *The Century; Harper's Magazine; The Atlantic; Chautauquan; St. Nicholas; Harper's Weekly; Harper's Round Table; Leslie's Weekly;* and other publications. Compiler of *Casual Essays* of the *Sun*, 1905.

Matthias (*mȧ-thī′-as*), **Corvinus,** king of Hungary, was born in 1443. He was proclaimed king in 1458, soon after his release from imprisonment at Prague; maintained the throne against the emperor, Frederick III., and, after having engaged in successful wars with the Turks, received the Bohemian crown from the pope on condition of extirpating the Hussites. While thus engaged a revolt took place in Hungary, supported by Poland and other powers, which combination he routed. After this he engaged in two wars with the emperor, and captured Vienna in 1485, living there until his death in 1490.

Maudsley, Henry, English physician and alienist, was born near Giggleswick, Yorkshire, 1835. He was educated there and at University college,

UNIV. OF
CALIFORNIA



MAXIMILIAN BEFORE HIS EXECUTION

From the painting by Laurens

London. He graduated M. D. in 1857, was physician to the Manchester asylum, settled in London in 1862 as a consulting physician, and filled the chair of medical jurisprudence at University college, 1869–79. His works are *Physiology of Mind; Pathology of Mind; Responsibility in Mental Disease; Body and Will; Natural Causes and Supernatural Seemings; Life in Mind and Conduct; Heredity, Variation and Genius*, etc.

Maupertuis (*mō'-pĕr'-twē'*), **Pierre Louis Moreau de,** French geometrician and astronomer, was born at St. Malo, 1698. He studied at the college of La Marche, at Paris, and, after having served for five years in the army, devoted himself to science and literature. He has the merit of having been one of the first in France to prefer Newton to Descartes. He was one of those who were sent, in 1736, to measure a degree of the meridian at the polar circle. In 1740, invited by Frederick the Great, he settled at Berlin, and was made president of the royal academy there. The latter part of his life was embittered by his quarrel with Voltaire, who showered down sarcasm and satire upon him. He died in 1759. His works form four volumes.

Maurice (*mô'-rĭs*), prince of Orange and count of Nassau, one of the most skillful and distinguished generals of his age, was born at Dillenburg, 1567, son of William I. After his father's assassination in 1584, the provinces of Holland and Zealand, and afterward Utrecht, elected him stadtholder. A great portion of the Netherlands was still in the hands of the Spaniards, but, under the leadership of Maurice, the Dutch rapidly wrested cities and fortresses from their enemies. In 1597, with the help of some English auxiliaries, he defeated the Spaniards at Turnhout in Brabant, and in 1600 won a splendid victory at Nieuwport. Finally, in 1609, Spain was compelled to acknowledge the united provinces as a free republic. Died, 1625.

Maxim, Sir Hiram Stevens, American inventor, was born at Sangerville, Me., 1840. He received a common school education, and his scientific knowledge was obtained by study and attending lectures. He was for four years an apprentice to coach-building; worked in various iron works; patented numerous inventions in the United States, and went to England in 1881, where he became a naturalized citizen. He has patented many electrical inventions, including incandescent lamps, self-regulating current machines, etc.; invented the Maxim gun, automatic system of firearms, which makes the recoil of the gun serve as the power for reloading; also other ordnance inventions, cordite, a smokeless powder, and more recently has devoted much time and invention to aerial navigation. He is a director in the firm of Vickers' Sons and Maxim; member of American society of civil engineers, royal society of arts, British association for the advancement of science, and many British engineering and scientific societies; chevalier légion d'honneur, France, and knighted by Queen Victoria in 1901.

Maximilian I., German emperor, was born in 1459, son of Frederick III. In his nineteenth year he married Mary, only child and heiress of Charles the Bold, duke of Burgundy, and was soon involved in a war with Louis XI. of France, who attempted to seize some of her possessions. In 1486 he was elected king of the Romans. On the death of his father, in 1493, he became emperor. Subsequently he married the daughter of the duke of Milan, and, although inclined to peace, he became involved in war with the Swiss, the Venetians, and the French. Died, 1519.

Maximilian, Ferdinand Maximilian Joseph, archduke of Austria and emperor of Mexico, was born in Vienna, 1832. He was the brother of the present emperor of Austria-Hungary. In 1863 Napoleon III. had it in mind to conquer Mexico and set up an empire, and he offered the crown to Maximilian, who went to Mexico in 1864. The country had long been in a state of confusion, and at first the people seemed inclined to welcome him and look for peace under his rule. But he pleased no one, the people rose against him, and in 1866, when the French troops left the country, the empire fell to pieces. Maximilian tried to form a native army for his own defense, but he was captured by the republicans, and, after a trial, shot near Querétaro, in his thirty-fifth year, 1867.

Max O'Rell. See **Blouet, Paul.**

Maxwell, James Clerk-, British physicist, was born at Edinburgh, 1831. He was educated at the university of Edinburgh, and, before he was fifteen, wrote papers of scientific value. In 1856 he became a professor in Marischal college, Aberdeen, in 1860 in King's college, London, and in 1871 professor of experimental physics at Cambridge. In the great work of his life, *Electricity and Magnetism*, 2 vols., he constructed a theory of electricity in which "action at a distance" should have no place. He was the first to make color-sensation the subject of actual measurement. He obtained the Adams prize for his splendid discussion of the dynamical conditions of stability of the ring system of Saturn. But he was best known to the public by his investigations on the kinetic theory of gases. His Bradford *Discourse on Molecules* is a classic. Besides many papers, he published a text-book on the *Theory of Heat* and a little treatise on *Matter and Motion*. In 1879 he edited Cavendish's *Electrical Researches*. Died, 1879.

Maxwell, William Henry, American educator, superintendent of schools of Greater New York since 1898, was born at Stewartstown, Ireland, 1852. He was educated at royal academical institution, Belfast, and Queen's colleges, Galway and Belfast. He was teacher in Victoria college, Belfast, 1872–74; journalist, New York, 1877–80; teacher in the public schools, Brooklyn, N. Y., 1880–82; assistant superintendent of schools, Brooklyn, N. Y., 1882–87, and superintendent, 1887–98. He is author of a series of text-books on English grammar and composition, etc.

May, Sir Thomas Erskine, English jurist and writer, was born in London, 1815. He was educated at Bedford school, became assistant librarian of the house of commons in 1831; was called to the bar in 1838; clerk assistant in 1856, and clerk of the house in 1871. He was created successively C. B. and K. C. B., and was on his retirement, in 1886, created Baron Farnborough. His *Treatise on the Law, Privileges, Proceedings, and Usage of Parliament* has been translated into various languages; his *Constitutional History of England* 1760–1860 is a continuation of Hallam; and his *Democracy in Europe* shows great learning and impartiality. He died in 1886.

Mayer, Henry ("Hy Mayer"), caricaturist, was born at Worms-on-Rhine, 1868. He was educated in England and Germany; was graduated at the gymnasium, Worms, 1885; entered business life in England and came to the United States, 1886. He began his career as an artist in Cincinnati, 1887, and has resided in New York since 1893. He has been illustrator for *Fliegende Blaetter*, Munich; *Figaro Illustré, Le Rire*, Paris; *Black and White, Pick-Me-Up, Pall-Mall Magazine, Punch*, London; *Life, Judge, Truth, Harper's, Century, Collier's, Leslie's, New York Times, Herald*, etc. Author: *Autobiography of a Monkey; In Laughland; Fantasies in Ha-Ha; A Trip to Toyland; Adventures of a Japanese Doll; Alphabet of Little People*, etc.

Mazarin (*mȧ′-zȧ′-răɴ′*), **Jules**, cardinal and chief minister of France during the minority of Louis XIV., was born at Piscina, Italy, 1602. Having accompanied a papal legate to the court of France, he became known to Richelieu about 1628. The latter perceived his great political talents, and engaged him to maintain the French interests in Italy, which he did while still employed by the pope as vice-legate to Avignon, in 1632, and nuncio to the French court. The Spaniards complained of his partiality for France, and the pope was obliged to recall him. In 1639 he openly entered the service of Louis XIII., and was naturalized a Frenchman; and in 1641 received a cardinal's hat through the influence of Richelieu, who when dying recommended him to the king as the only person capable of carrying on his political system. Under him the influence of France among the nations was increased, and in the internal government of the country those principles of despotism were established on which Louis XIV. afterward acted. The administration of justice, however, became very corrupt, and the commerce and finances of the country sank into deep depression. Died, 1661.

Mazzini (*mät-sē′-nē*), **Guiseppe**, Italian patriot and revolutionist, was born at Genoa, 1805. Sentiments of social equality were early engendered in him by parental example. In 1830 his affiliation to the secret society of the Carbonari introduced his practical political career. The organization of a new liberal league, "Young Italy," was Mazzini's next work. He was its animating spirit, and it speedily inclosed all Europe in a network of similar associations, modified to meet the requirements of the various European nationalities. The first fruits of his leagues proved to be the revolutionary expedition of Savoy, organized by Mazzini at Geneva, but which was defeated by the royal troops. Sentence of death *par contumace* was recorded against him in the Sardinian court; but he soon recommenced with increased vigor his revolutionary operations. A new association, entitled "New Europe," and based on principles of European rights and enfranchisement, was inaugurated by the exertions of Mazzini in Switzerland. In 1837 he quitted Switzerland, and finally took up his abode in London. From there his labors in the Italian revolutionary cause were unremitting. He is said to have founded, in 1865, the "universal republican alliance." In 1868 he became dangerously ill, and never fully recovered, though his zeal remained as ardent as ever. After an ineffective scheme for a republican rising, he ventured to enter Italy, and was arrested at Gaeta, where he remained a prisoner until Rome was taken by the Italian army. On his death, 1872, the government honored him with a public funeral.

Mead, Larkin Goldsmith, American sculptor, was born at Chesterfield, N. H., 1835. His early years were spent in Vermont. He studied art at Brooklyn, N. Y., and in Italy. The "Recording Angel," his first work, was modeled in snow and afterward cut in marble. His large pieces were executed for public buildings and monuments; such as the colossal statue of "Vermont" on the dome of the statehouse, and of "Ethan Allen" in the portico of the same building in Vermont, and one of the same hero, given by the state of Vermont to the hall of representatives at Washington; the statue of Lincoln on the monument at Springfield, Ill.; a group representing "Columbus before Queen Isabella," for the state of California; the "Returned Soldier"; the "Return of Proserpine from the Realms of Pluto," which was over the main entrance of the agricultural building at the World's Columbian exposition, Chicago; a large group representing the Stanford family, to be placed in Stanford university, California; also a colossal statue, "The Mississippi River"; high relief portraits in bronze of Henry James, William D. Howells, and John Hay are other specimens of his work. During the civil war he spent six months in camp as artist for *Harper's Weekly*. Died, 1910.

Meade, George Gordon, American general, was born in Cadiz, Spain, where his father was an agent of the United States navy, 1815. He was graduated at West Point, 1835, and, after serving one year in the army, resigned to begin practice as a civil engineer. He was frequently employed by the government, and reëntered its military service in 1842. He served with distinction on the staffs of Taylor and Scott in the Mexican war, and in the engineer corps. At the outbreak of the civil war he was placed in command of a brigade of volunteers, soon rose to the command of a division, and joined his fortunes permanently to those of the army of the Potomac. He led his division through the Seven Days' battle, was severely wounded at Glendale, went through the Antietam campaign, and commanded at Fredericksburg, where he particularly distinguished himself. At Chancellorsville he commanded the fifth corps; and when Hooker resigned the command of the army, and while the army itself was in hasty movement northward to check Lee's invasion of the North in 1863, Meade was appointed to the command. He accepted it with the greatest reluctance, and altogether from a sense of duty. He had inclined to fight on the line of Pipe creek, to the south of Gettysburg; but Reynolds fell into collision with Lee's support, and Gettysburg became historical. When Grant assumed general command in 1864, Meade continued to command the army of the Potomac under him, and mutual good feeling enabled them to maintain this delicate relation without friction, and with the best results. At the close of the war he was made major-general in the regular army, and commanded the military division of the Atlantic at the time of his death at Philadelphia, 1872.

Medici (*mā′-dē-chē*), **Lorenzo de'**, surnamed "the magnificent," was born in 1448. He was a member of an illustrious Florentine family, which for centuries exerted great influence in Italy and in Europe. He was instructed by some of the most learned men of the age in languages and polite literature, succeeded to the wealth and power of his father in 1469, and exerted himself in every way to promote the growth of literature and of the arts. In 1478 a conspiracy was formed against him and his brother Giuliano, by the Pazzi, another distinguished family of Florence, who were instigated by Pope Sixtus IV., and aided by Salviati, archbishop of Pisa. The result was that Giuliano was assassinated and Lorenzo wounded; whereupon Salviati was hung out of his palace window in his archiepiscopal robes, and Giacopo de Pazzi, with one of his nephews, shared the same fate. The pope now excommunicated Lorenzo and the magistrates of Florence, laid an interdict upon the whole territory, and, forming a league with the king of Naples, prepared to invade the Florentine dominions. Hostilities followed, and were carried on with varying success during two campaigns. The remainder of Lorenzo's administration was unmarked by any great public events; but his regard for literature was manifested by the extraordinary attention he paid to the augmentation of the Laurentian library, which had been founded by his grandfather. Died, 1492.

Meissonier (*mĕ′-sō′-nyā′*), **Jean Louis Ernest**, French painter, was born in Lyons, 1815. He was a pupil of Cogniet, and became a member of the Beaux Arts in 1861. He first attracted attention by his "Little Messenger" in 1836, and continued to exhibit at the Paris salon for many years. His best pictures distinguished for minute detail are probably the "Napoleon Cycle," among which the picture called "1814" was sold, in 1887, for the highest price ever obtained during an artist's lifetime, $100,000. He served in the Italian campaign and the early part of the Franco-Prussian war, and was colonel at the siege of Paris. He painted upward of 500 pictures, about one-fifth of which are owned in the United States. Died, 1891.

Melanchthon (*mē-lăngk'-thŭn*), **Philip,** Luther's fellow-laborer in the reformation, was born at Bretten, in the palatinate of the Rhine, 1497. He early decided in favor of the reformation, and brought to the aid of Luther great attainments in learning, great acuteness in dialectics and exegesis, a remarkable power both of clear thinking and of clearly expressing his thoughts; and, along with all, a gentleness and moderation that most advantageously tempered Luther's vehemence. In 1521 he published his *Loci Communes Rerum Theologicarum,* the first great Protestant work on dogmatic theology. In 1530 he made a most important contribution to the cause of Protestantism in the Augsburg confession. After Luther's death he lost, in some measure, the confidence of some of the Protestants, by those concessions to the Roman Catholics which his anxiety for peace led him to make; while the zealous Lutherans were no less displeased because of his approximation to the doctrine of Calvin on the Lord's supper. His consent, conditionally given, to the introduction of the Augsburg interim in Saxony, in 1549, led to painful controversies; and he was involved in various feuds, which filled the latter years of his life with disquietude. He died at Wittenberg, 1560.

Melba, Madame, née Helen Porter Mitchell, operatic vocalist, was born in Melbourne, Australia, 1865. Her father was Scotch and her mother of Spanish descent. At six she sang ballads to her own accompaniment at a charitable concert; subsequently studied under Madame Marchesi in Paris, and made her stage début in 1887 in *Rigoletto,* at the théâtre de la Monnaie, Brussels. Next year she appeared as Lucia at Covent Garden. In 1889 played Ophelia at Paris grand opera. For her Bemberg specially wrote *Elaine,* produced in London in 1892. She has taken a prominent part in recent opera seasons in London and New York, and, in 1908, proved herself equally successful in concert. In 1882 she married Charles, son of Sir Andrew Armstrong. Her stage name is taken from her birth place.

Mellen, Charles Sanger, American railway official, was born in Lowell, Mass., 1851. He has been in the railway service since 1869, beginning as clerk in the cashier's office of the Northern New Hampshire railroad. He was clerk to chief engineer Central Vermont railroad, 1872-73; superintendent's clerk to chief clerk and assistant treasurer of Northern New Hampshire railroad, 1873–80; assistant to manager of Boston and Lowell railroad, 1880-81; auditor, 1881–83, superintendent, 1883-84, general superintendent, 1884–88, Boston and Lowell and Concord railroads; general purchasing agent, 1888, assistant general manager, 1888-89, general traffic manager, 1889–92, Union Pacific system; general manager of New York and New England railroad at Boston, 1892; second vice-president New York, New Haven and Hartford railroad, 1892–96; president of Northern Pacific railway company, 1896–1903, New York, New Haven and Hartford railroad company, since 1903.

Menander (*mĕ-năn'-der*), Greek comic poet, was born at Athens, 342 B. C. His uncle was the comic poet Alexis; he had Theophrastus for his teacher, and Epicurus for a friend; and the influence of all three is discernible in his style of thought and feeling. He was drowned while swimming in the harbor of the Piræus, 291 B. C. He wrote more than 100 comedies, which were held in high repute among his countrymen for their wit and grace. Only a few fragments of them now remain, but in the plays of Terence we have something very like a Latin version of a few of them. At the time when he lived political subjects were forbidden, hence he treated only lighter questions of social life.

Mencius (*mĕn'-shĭ-ŭs*), **Meng-tse,** Chinese sage, was born in Shan-tung, about 371 B. C. He founded a school on the model of that of his great predecessor Confucius. When forty years of age he led forth his disciples and traveled from one princely court to another for more than twenty years, seeking a ruler who would put into practice his system of social and political order. But, finding none, he again withdrew into retirement, and died about 287 B. C. After his death his disciples collected his conversations and exhortations, and published them as the *Book of Meng-tse.* The aim of his teaching was practical: how men, especially rulers, shall best regulate their conduct. The philosophic root of his system is belief in the ethical goodness of man's nature. From this root grew the cardinal virtues of benevolence, righteousness, moral wisdom, and propriety of conduct. It should be the aim of the individual to perfect himself by practicing these virtues in all the relations of his social and political life. In his liberal and enlightened system of political economy, he advocated freedom of trade, the deposition of unworthy rulers, division of labor, inspection of work by government, maintenance of good roads and bridges, poor-laws, education, and the abolition of war. Chinese ethics are based on his writings.

Mendelssohn-Bartholdy (*mĕn'-del-sōn băr'-tōl'-dē'*), **Felix,** German composer, was born at Hamburg, 1809. His father was a convert to Christianity, and young Felix was brought up in the Lutheran faith. Zelter was his instructor in composition, Ludwig Berger on the piano. In his ninth year he gave his first public concert in Berlin, and in the following year played in Paris. From this period he commenced to write compositions of all sorts, some of them of a very difficult character, for the piano, violin, violoncello, etc. In 1824 the first of these — three quartets for the piano — were published. In 1825 he went a second time to Paris and gave concerts there and in Berlin, after which he traveled for three years in England, Scotland, France, and Italy. In 1835 he accepted the directorship of the Leipzig concerts. Here he was in the center of the musical world of Germany, and was stimulated to his highest and most brilliant efforts. His oratorios, *St. Paul* and *Elijah,* are his two greatest works, the latter second only to the greatest works of Handel. His *Songs Without Words* are the most admired of his minor compositions. He died at Leipzig, 1847.

Mengs (*mĕngks*), **Anton Raphael,** modern German artist, was born in Aussig, Bohemia, 1728. He was the son of a Danish artist who had settled in Dresden. From his sixth year he was compelled to exercise himself in drawing daily and hourly, and a few years later was instructed by his father in oil, miniature, and enamel painting. His first great compositions appeared in 1748, and met with universal admiration. A "Holy Family" was particularly admired, and the young peasant girl who served him as a model became his wife. On his return to Dresden the king appointed him principal court painter. In 1761 Charles III. invited him to Spain, where his principal works at this time were an "Assembly of the Gods," and a "Descent from the Cross." Returning to Rome he executed a great allegorical fresco painting for the pope in the Camera de'Papiri, and after three years returned to Madrid. At this time he executed the "Apotheosis of Trajan" in fresco, his finest work. In 1776 he returned once more to Rome where he died in 1779.

Mercator (*mĕr-kā′-tĕr*), **Gerardus,** Flemish geographer of the sixteenth century, was born at Rupelmonde, Flanders, 1512, his real name being Kremer, "merchant," of which Mercator is the Latinized form. He took his degree as bachelor of philosophy at Louvain, but devoted his later years to the study of geography. In 1559 he was appointed cosmographer to the duke of Cleves. He published several important works, including maps and descriptions of France, Germany, and Great Britain. He did a great deal to put geographical science upon a secure footing and to make popular the researches of the learned. Some of his later works were of a religious character and were supposed to favor the reformed doctrines. He died in Prussia, 1594.

Meredith, George, English poet and novelist, a native of Hampshire, was born in 1828. After studying for some time in Germany he commenced his literary career with the publication of a volume of poems. This was followed by the *Shaving of Shagpat*, an Arabian entertainment; *Farina*, a legend of Cologne; *The Ordeal of Richard Feverel; Evan Harrington; Modern Love; Poems of the English Roadside; Emilia in England; Rhoda Fleming; Vittoria; The Adventures of Harry Richmond; Beauchamp's Career; The Egoist; The Tragic Comedians; Poems and Lyrics of the Joy of Earth; Diana of the Crossways; Ballads and Poems of Tragic Life; A Reading of Earth; One of Our Conquerors; Empty Purse; Jump to Glory Jane; Lord Ormont and his Aminta; The Amazing Marriage; The Tale of Chloe; The House on the Beach; The Case of General Ople and Lady Camper; Comedy, and the Uses of the Comic Spirit; Selected Poems*, etc. Died, 1909.

Meredith, Owen. See **Lytton, Edward Robert, Earl of.**

Mergenthaler (*mĕr′-gĕn-tä′-lĕr*), **Ottmar,** inventor of the type-setting machine bearing his name, was born in Württemberg, Germany, 1854. He came to the United States in 1872, and received a government position in Washington, D. C., to care for the mechanism of bells, clocks, and signal service apparatus. He was subsequently connected with a mechanical engineering firm in Baltimore, Md., in 1876, and while still thus engaged began experiments which resulted in the invention of the linotype machine. He died in Baltimore, Md., 1899.

Mérimée (*mā′-rē′-mā′*), **Prosper,** French novelist, historian and archæologist, was born at Paris, 1803. He became a regular contributor to the *Revue de Paris* and the *Revue des Deux Mondes*, and, after several anonymous efforts, wrote *Clara Gazul*, and *La Guzla*, Spanish comedies and Illyrian songs; *La Chronique du Règne de Charles IX.*, his most famous historical novel; *Colomba* and *Carmen*, his two masterpieces of romance. Thereafter he applied himself to historical research. He became a member of the French academy in 1844, was made a senator in 1853, president of the commission for reorganizing the bibliothèque impériale in 1858, and commander of the legion of honor, 1860. Died at Cannes, 1870.

Merivale (*mĕr′-ĭ-văl*), **Charles,** English historian, dean of Ely, was born in London, 1808. He was graduated at Cambridge; was rector of Lawford, Essex, 1848–69; became dean of Ely in 1869; held a succession of appointments as lecturer. He wrote a history of Rome from its foundation in 753 B. C. to the fall of Augustus in 476 A. D., but his chief work is the *History of the Romans under the Empire*, indispensable as an introduction to Gibbon; *Lectures on Early Church History; Contrast between Christian and Pagan Society*, etc. Died, 1893.

Merle d'Aubigné (*mĕrl-dō′-bēn′-yā′*), **Jean Henri,** ecclesiastical historian, was born near Geneva, Switzerland, 1794. He studied at Berlin under Neander, and in 1818 became pastor of the French Protestant church in Hamburg. In 1823 he was appointed court preacher at Brussels; but after the revolution of 1830 he declined the post of tutor to the prince of Orange; returning to Geneva, he took part in the institution of the new Evangelical college, and filled its chair of church history until his sudden death in 1872. His *History of the Reformation in the 16th Century* has enjoyed immense popularity; other works were: *The Protector: a Vindication; Germany, England, and Scotland;* and *History of the Reformation in Europe in the Time of Calvin.*

Merrill, George Perkins, American geologist and educator, was born at Auburn, Me., 1854. He was graduated at the Maine state university, B. S., 1879; Ph. D. He was assistant in geological department of the United States national museum, 1881; head curator, department of geology, United States national museum, since 1897, and professor of geology and mineralogy, George Washington university, since 1893. Author: *Stones for Building and Decoration; Rocks, Rock-weathering and Soils; The Non-Metallic Minerals; The Non-Metallic Minerals — Their Occurrence and Uses*, etc., and many scientific papers dealing more particularly with the subjects on meteorites and petrography.

Merritt, Wesley, American general, was born in New York, 1836. He was graduated from West Point in 1860; was commissioned brigadier-general of the United States volunteers, 1863; major-general of United States volunteers, 1865; and after the civil war regularly promoted from lieutenant-colonel to major-general, United States army. He served in the army of the Potomac until June, 1864; participated in all its battles and earned six successive brevet promotions for gallantry at Gettysburg, Yellow Tavern, Hawes' Shop, Five Forks, etc. He afterward accompanied General Sheridan on a cavalry raid toward Charlottesville; engaged in the battle of Trevilian's Station; commanded cavalry division in Shenandoah campaign, August, 1864, to March, 1865; was engaged in battles of Winchester, Fisher's Hill, etc.; and commanded a corps of cavalry in Appomattox campaign. He was one of three commanders from the Union army to arrange with confederate commanders for surrender of the army of northern Virginia. After the war he served in various departments, participated in several Indian campaigns; was superintendent of United States military academy, 1882–87; commanded department of the Atlantic until assigned, May, 1898, to command of United States forces in the Philippine islands, continuing there until summoned to the aid of the American peace commissioners in session in Paris, December, 1898. He then returned to the United States; was in command of department of the East, Governor's island, until retirement in 1900. Died, 1910.

Merry del Val (*mĕr′-rē dĕl văl′*), **Raphael,** pontifical secretary of state, was born in London of Spanish parents in 1865. He was educated at Ushaw college, Durham, England, where he resided for some length of time at different periods in his career. He was at first attached to the diocese of Westminster, acted for many years as *Camerieri Segreto* to Pope Leo XIII., and was appointed president of the Accademia Pontifica in 1899, and Italian archbishop of Nicosia in 1900. He visited England as papal envoy on the occasions of Queen Victoria's jubilee and King Edward's coronation, and was sent to Canada on an educational mission. In 1903, on the death of Leo XIII., he was nominated consistorial secretary, and in October succeeded Cardinal Rampolla as secretary of state, being afterward created a cardinal.

Mesmer, Friedrich Anton or **Franz,** founder of mesmerism, was born near Constance, Switzerland, 1733. He was intended for the priesthood, but studied medicine at Vienna, and about 1772 took up the opinion that there existed a power of extraordinary medicinal influence on the human body, which he called animal magnetism. In 1778 he went to Paris, where he created a great sensation. He refused an annual pension of 20,000 livres to reveal his secret; but in 1785 a commission of physicians and scientists reported on him unfavorably. He fell into disrepute, and after a visit to England, spent the rest of his life in obscurity at Meersburg in Switzerland. Died, 1815.

Metastasio (*mā′-tās-tā′-zyō*), **Pietro Bonaventura,** Italian poet, whose real name was Trapassi, was born in Rome, 1698. When he was only ten years of age, his talent of extemporizing in verse attracted the notice of Gravina, who took him under his patronage, and fostered his poetical powers, while, at the same time, he initiated him in the profession of the law. The youthful Metastasio also entered into the minor order of priesthood. His tragedy of *Giustino* was produced when he was only fourteen. In 1718 his patron died, and left him the whole of his property. In 1724 he published one of his most celebrated dramas, *La Didone*, which, with *Il Catone* and *Il Siroe*, conferred on the poet a European name. In 1730 he accepted the post of poet laureate to the imperial court of Vienna. During his sojourn in Vienna he composed his *Giuseppe Riconosciuto*, *Il Demofoonte*, and the *Attilio Regolo*, his masterpiece. Died at Vienna, 1782.

Metchnikoff (*mĕch′-nĭ-kōf*), **Iliya,** Russian physiologist and cytologist, was born at Livanovka, Russia, 1845. He studied at Kharkov, and afterward at Giessen and at Munich. He occupied the chair of zoölogy at Odessa, 1870–82, but resigned to devote himself to special research. He became chief assistant to Pasteur in 1892, and, at the latter's death in 1895, succeeded him as director of the Pasteur institute at Paris. He is the author of *The Nature of Man; Immunity in Infective Diseases; The Prolongation of Human Life; Optimistic Essays*, etc.

Metternich (*mĕt′-ĕr-nĭᴋ*), **Clemens Wenzel, Prince von,** Austrian diplomat and statesman, was born in Coblentz, 1773. After a distinguished diplomatic career, he became chief minister of the empire in 1809. This high office he held with consummate ability for a period of thirty years, exercising, almost without control, the highest authority in Austria. The revolution of 1848 sent him into exile, from which he returned three years after. Died, 1859. Prince Metternich was an adroit diplomat and exercised in his day a powerful influence upon the cabinets of Europe.

Meyer, Adolf, pathologist, alienist, was born in Niederweningen, near Zürich, Switzerland, 1866. He was graduated at the gymnasium, Zürich, university of Zürich, M. D., 1892; post-graduate studies in Paris, London, Edinburgh, Zürich, Vienna, and Berlin, 1890–92; LL. D., Glasgow, 1901. He came to the United States in 1892, became a fellow and later docent in neurology, university of Chicago, 1892–95; was pathologist to the Illinois eastern hospital for the insane, Kankakee, Ill., 1893–95; pathologist and later director of clinical and laboratory work, Worcester, Mass., insane hospital, and docent in psychiatry, Clark university, 1895–1902; director of pathological institute, New York state hospitals, 1902–10; professor of psychiatry, Cornell medical college, 1904–09; professor psychiatry, Johns Hopkins university, and director of Henry Phipps psychiatric clinic, Johns Hopkins hospital, since 1910.

Meyer, George von Lengerke, American diplomat, was born in Boston, Mass., 1858. He was graduated at Harvard, 1879, and from 1879 to 1899 engaged in business as merchant and trustee. He was a member of the Boston common council, 1889-90; member of board of aldermen, 1891; member of Massachusetts legislature, 1892–97, and speaker of house, 1894–97; chairman of Massachusetts Paris exposition managers, 1898; director of Amoskeag manufacturing company, the Amory company, Old Colony trust company, National bank of commerce, United Electric securities company, and president of Ames plow company. He was United States ambassador to Italy, 1900–05; ambassador to Russia, 1905–07; postmaster-general, 1907–09; secretary of the navy, 1909–13.

Meyerbeer, Giacomo, German composer, was born in Berlin, 1791. He was a precocious child, and played on the piano spontaneously as early as his fifth year. He began to study dramatic composition under Bernhard Anselm Weber; and in 1806 entered the school of Vogler at Darmstadt, where he formed an intimate friendship with Carl Maria von Weber. While at Darmstadt he wrote a cantata, *Gott und die Natur*. He subsequently composed an opera, *Jepthah's Vow*, produced at Munich in 1813. He was induced by his friend Salieri to visit Italy, where he became an enthusiastic convert to the new Italian school, and began the composition of a series of operas which proved highly popular. His subsequent works include: *Romilda e Constanza; Semiramide; Emma di Resburgo; Margherita d'Anjou; L'Esule di Granata; Il Crociato in Egitto; Robert le Diable; Les Huguenots*, in which he reached the climax of his fame; *Le Prophète; Pierre le Grand; Dinorah;* and *L'Africaine*, produced first in 1865. Died, 1864.

Michaelangelo Buonarroti (*mē′-kĕl-ăn′-jā-lō bwô′-när-rô′-tē*). See page 128.

Michelet (*mēsh′-lĕ′*), **Jules,** French historian, was born in Paris, 1798. He was graduated from the Collège Charlemagne, and was for many years professor of history in the Collège de France. In 1843–46 he became widely known, not only in his own country, but also in England, by his attacks upon the Jesuits in his three works: *The Jesuits; Priests, Women, and Families*, and *The People*. He was the writer of many other works, several of them of considerable interest; but those of most permanent value are his *History of France*, his *History of the French Revolution*, and his *History of the Nineteenth Century*. Died, 1874.

Michelson (*mī′-kĕl-sŭn*), **Albert Abraham,** scientist, educator, was born at Strelno, Germany, 1852. He was graduated at the United States naval academy, 1873; was midshipman of United States navy, 1873; instructor of physics and chemistry, United States naval academy, 1875–79; nautical almanac office, Washington, 1880; student at universities of Berlin, 1880, Heidelberg, 1881, Collège de France and École Polytechnique, 1882; Ph. D., Western Reserve, 1886.

Stevens institute, 1887; Sc. D., university of Cambridge, 1899; LL. D., Yale, 1901, Franklin bicentenary university of Pennsylvania, 1906. He was professor of physics at the Case school, Cleveland, Ohio, 1883–89, Clark university, 1889–92, and has been professor and head of the department of physics, university of Chicago, since 1892. He was Lowell lecturer, 1899; received the Rumford medal, 1889, and the grand prix, Paris exposition, 1900; Copley medal, royal society, London, 1907, and was awarded the Nobel prize for physics, $40,000, by the Swedish academy of sciences, 1907. He is a member of numerous scientific societies, and has been a frequent contributor to the *Philosophical Magazine; Nature; American Journal of Science*, etc., chiefly on researches in light.

Mifflin, Thomas, American general and statesman, was born in Philadelphia, 1744, was originally a merchant of his native city. He was elected to the continental congress of 1774, joined the revolutionary forces, and rose to be major-general in 1777, but was removed for his connection with the Conway cabal, 1778. In 1782 he was sent to the federal congress, and in 1783 became its president. He was speaker of the Pennsylvania state legislature, 1785; member of the constitutional convention of 1787; president of the executive council of Pennsylvania, 1788–90; president of the state convention of 1790, and governor of Pennsylvania, 1790–99. Died, 1800.

Milburn, John George, American lawyer, was born near Sunderland, England, 1851. He was educated in private schools in England; studied law at Batavia, N. Y.; was admitted to the bar, 1874, and practiced in Buffalo as a member of the firm of Rogers, Locke and Milburn. He is now a member of the firm Carter, Ledyard and Milburn, New York. He was president of the Pan-American exposition, 1901; President McKinley was taken to his house after the fatal assault on his life, and died there. He is a trustee of the New York life insurance company; member of the board of commissioners of statutory consolidation, which consolidated all general statutes of New York, from 1777; member of the American bar association, and was a delegate to the universal congress of lawyers and jurists, St. Louis, 1904.

Miles, Nelson Appleton, American general, was born in Westminster, Mass., 1839. At the outbreak of the civil war he was engaged in mercantile pursuits in Boston, Mass.; entered the service as first lieutenant of the 22d Massachusetts regiment in 1861, and distinguished himself at the battles of Fair Oaks, Charles City Cross Roads, and Malvern Hill. In 1862 he was commissioned colonel of the 61st New York regiment, which he led at Fredericksburg and Chancellorsville, where he was severely wounded. He commanded the first brigade, first division, second army corps, in the Richmond campaign, was promoted brigadier-general, 1864, and brevetted major-general for gallantry at Ream's station in August, 1864. At the close of the war he was commissioned colonel of the 40th United States infantry. He was promoted brigadier-general in 1880; major-general in 1890; and succeeded Lieutenant-General John M. Schofield as commander of the army in 1895. He took a prominent part in the wars with the Indians in 1874, and thereafter. In July, 1898, he went to the front and assumed personal command of the army around Santiago, Cuba; and after the surrender of the Spanish army commanded the expedition which left Guantanamo bay, July 21st, landed at Guanica, Porto Rico, July 25th, and was marching on San Juan, the capital, when the armistice stopped hostile operations. On the reorganization of the army in 1901, the grade of lieutenant-general was revived and he was promoted to it. In 1901 he publicly expressed satisfaction with Admiral Dewey's report on Rear-Admiral Schley and was reprimanded therefor. He was retired upon reaching the age limit, 1903.

Mill, James, British historian and political economist, was born near Montrose, Scotland, 1773. He studied at the university of Edinburgh, where he distinguished himself in Greek and in moral and metaphysical philosophy. He became editor of the *Literary Journal*, which after a time was discontinued, and wrote for various periodicals, including the *Eclectic* and the *Edinburgh Review*. He wrote much of standard value, including *History of British India; Liberty of the Press; Law of Nations; Elements of Political Economy;* and *Analysis of the Phenomena of the Human Mind*. He died in London, 1836.

Mill, John Stuart, English philosopher and economist, son of the preceding, was born in 1806. He was educated at home by his father. In 1820 he went to France, where he made himself master of the French language and occasionally attended public lectures on science. He lived for some time at Paris, in the house of the French economist, Jean Baptiste Say, where he made the acquaintance of many men distinguished then, or afterward, in letters and politics. During this stay in France he laid the foundation of his great familiarity with and interest in the politics as well as the literature of the French nation. In 1823 he entered the India house as a clerk in the examiner's office, where his father was assistant examiner. For thirty-three years he continued to occupy the department of the office named the political. His first publication consisted of articles in the *Westminster Review*. He took an active part in the political discussions that followed the revolution of 1830 in France, and the reform bill movement in England; and from 1836 to 1840 was editor, and along with Sir W. Molesworth proprietor, of the *London and Westminster Review*, where many articles of his own appeared. He established his reputation, in 1843, by the publication of *A System of Logic, Ratiocinative and Inductive*, a work the success of which paved the way for *The Principles of Political Economy*. His later works include: *Essay on Liberty; An Examination of Sir William Hamilton's Philosophy; The Subjection of Women*, in which he avows himself a partisan of what has been popularly termed the "woman's rights movement"; *August Comte and Positivism; Nature, the Utility of Religion, and Theism*, etc. He was a member of parliament, 1865–68. He died at Avignon, France, 1873.

Millais (*mĭ-lā'*), **Sir John Everett,** English painter, was born of Jersey parentage, at Southampton, 1829. He studied at the royal academy, and at seventeen exhibited a notable historical work. He then early associated with Rossetti and Holman Hunt, and remained for over twenty years under their influence. To this period belong "The Carpenter's Shop"; "Autumn Leaves"; "The Minuet"; "The Gambler's Wife"; "The Huguenot," etc. His subsequent work, in which technical interest predominates, was chiefly portraiture, including Gladstone and Beaconsfield. He was a profuse illustrator, and executed some etchings. He was made R. A. in 1863, a baronet in 1885, and became president of the royal academy in 1896. Died, 1896.

Miller, Hugh, Scottish geologist, was born at Cromarty, 1802. From sixteen to thirty-one he worked as a common stonemason, devoting the winter months to writing, reading, and natural history. In 1829 he published *Poems*

UNIV. OF CALIFORNIA

JOHN STUART MILL

CALIFORNIA

written in the Leisure Hours of a Journeyman Mason, followed by *Scenes and Legends of the North of Scotland,* in 1835. In 1834–39 he acted as bank accountant; in 1839 was invited to Edinburgh to edit the *Witness;* and in 1840 published in its columns the geological articles afterward collected as *The Old Red Sandstone,* in 1841. His editorial labors during the heat of the religious disruption struggle were immense, and, worn out by overwork, he shot himself in 1856. His other works include: *First Impressions of England; Footprints of the Creator; My Schools and Schoolmasters; Testimony of the Rocks; The Cruise of the Betsey; Sketch Book of Popular Geology; The Headship of Christ; Essays, Historical and Biographical; Tales and Sketches;* and *Edinburgh and its Neighborhood.*

Miller, Joaquin, pen-name of Cincinnatus Heine Miller, American poet. He was born in Indiana, 1841; became a miner in California, fought in the Indian wars, was an express messenger, practiced law in Oregon; edited a paper suppressed for disloyalty; in 1866–70 was a county judge in Oregon; was a Washington journalist, and in 1887 settled in California as a fruit-grower. His works include: *Songs of the Sierras; Songs of the Sunland; Songs of Italy; Songs of the Mexican Seas; In Classic Shade; The Danites in the Sierras; Shadows of Shasta; '49, or the Goldseekers of the Sierras; The Ship of the Desert; Life Among the Modocs; First Families of the Sierras; The One Fair Woman; Memorie and Rime; Baroness of New York; The Destruction of Gotham; The Building of the City Beautiful; Chants for the Boer; True Bear Stories,* etc. He also wrote the plays: *The Danites, The Silent Man,* and '49. Died, 1913.

Millet (*mē′-lĕ′*), **Jean François,** French painter, was born in the village of Gruchy, France, 1814. He first worked as a farm laborer, but his taste for painting was so evident that he was sent to study with Mouchel, a painter in Cherbourg. His master induced the town authorities to grant his pupil an annuity to help him in his studies. He afterward went to Paris and studied with Delaroche. He painted small pictures, portraits, and signboards in his first efforts to support himself. After the revolution of 1848, through which he had struggled practicing his art, and fighting at the barricades, he settled in Barbizon, near the forest of Fontainebleau. He lived here much like the peasants and began his work of painting the peasant life of France. Some of his best known works are: "The Sower"; "Peasants Grafting"; "The Gleaners"; "Waiting"; "The Angelus"; "The Man with the Hoe"; "Wool-Carding"; "Shepherdess and Flock." His most celebrated picture, "The Angelus," sold for over $100,000. He died at Barbizon, which under his influence had become an artist colony, 1875.

Mills, Clark, American sculptor, was born in Onondaga county, New York, 1815. He was for nine years a plasterer in Charleston, S. C. In 1846 he made a bust of John C. Calhoun, which was purchased by the city. In 1850 he completed a model of an equestrian statue of Jackson, for Lafayette square, Washington, which rested on the horse's hind feet alone. Mills had to build a foundry and to learn the practical business of casting, for there was then no establishment in the country capable of casting so large a mass. He produced a perfect cast in 1852, and the statue was set up the following year. He made also the equestrian statue of Washington, dedicated in Washington on February 22, 1860, and the colossal statue of Liberty, from a design by Crawford, which crowns the dome of the capitol, finished in 1863. He died at Washington, D. C., 1883.

Mills, Roger Quarles, American lawyer, United States senator, was born in Todd county, Ky., 1832. He moved to Texas, 1849; studied law, Palestine, Tex., and was admitted to the bar at twenty years of age; began practice at Corsicana, 1852. He was elected to the Texas house of representatives, 1859; was at battle of Wilson's creek, 1861; later colonel of 10th Texas infantry, confederate army, which he commanded in battles of Arkansas Post, 1862, Chickamauga, 1863. After the fall of General James Deshler, he took command of the brigade at the battles of Missionary Ridge, 1863, New Hope church, and Atlanta, 1864, where he was twice wounded. He was a member of congress, 1873–92; United States senator, 1892-93, and 1893–99, and was author of the famous Mills tariff bill. Died, 1911.

Mills, William Lennox, bishop of Ontario since 1901, was born at Woodstock, Ontario, and was graduated at the Western university, London, 1872; B. D., D. D., and D. C. L., Trinity college, Toronto; LL. D., Queen's university, Kingston; D. D., Bishop's college, Lennoxville. He was ordained priest, 1873; was incumbent of Trinity church, Norwich, Ontario, 1872; rector of St. Thomas's church, Seaforth, Ontario, 1874; rector of the crown rectory of St. John's, province of Quebec, 1875; rector of Trinity church, Montreal, 1882; examining chaplain to the bishop of Montreal, and lecturer in ecclesiastical history in the Montreal diocesan theological college, 1883; canon of Christ church cathedral, Montreal, 1884; archdeacon of St. Andrew's, diocese of Montreal, 1896; bishop coadjutor of Ontario, with title of bishop of Kingston, 1900.

Milman, Henry Hart, poet and church historian, was born in London, 1791. He was educated at Greenwich, Eton, and Brasenose college, Oxford, where in 1812 he won the Newdigate prize with his *Belvidere Apollo,* best of Oxford prize poems. In 1818 he became vicar at Reading; in 1821–31 professor of poetry at Oxford, where in 1827 he delivered the Bampton lectures on *The Character of the Apostles as an Evidence of Christianity;* in 1835 rector of St. Margaret's, Westminster, and a canon of Westminster; and in 1849 dean of St. Paul's. His *Poems and Dramatic Works* comprise *Fazio, a Tragedy; Samor; The Fall of Jerusalem; Belshazzar,* etc. To the *Historical Works* belong the *History of the Jews; History of Christianity to the Abolition of Paganism in the Roman Empire;* and — his masterpiece — the *History of Latin Christianity to the Pontificate of Nicholas V.* He also edited Gibbon and Horace, and wrote much for the *Quarterly.* After his death appeared the delightful *Annals of St. Paul's,* and *Savonarola, Erasmus, and other Essays.* He died in 1868.

Miltiades (*mĭl-tī′-ȧ-dēz*), Athenian general, "tyrant of the Chersonese," yet, as Byron sings, "freedom's best and bravest friend," was born about 540 B. C. Forced by Darius to flee from his dominions, he took refuge at Athens, and on the second Persian invasion of Greece, his military talents being of a high order, he was chosen one of the ten generals. He particularly distinguished himself by the great victory which he gained at Marathon with a small body of Athenians and 1,000 Platæans, 490 B. C., over the Persians. He failed in an expedition against Paros, was fined fifty talents, which he was unable to pay, and consequently died in prison, 489 B. C.

Milton, John. See page 53.

Mirabeau (*mē′-rȧ′-bō′*), **Gabriel Honoré Riquetti, Comte de,** French orator, was born at Bignon, near Nemours, 1749. He was endowed with an athletic frame and extraordinary mental abilities, but was of a fiery temper, and disposed to every kind of excess. He wrote many effective political pamphlets, particularly against the financial administration of Calonne, receiving pecuniary assistance, it is said, from some of the great bankers of Paris; and became one of the leaders of the liberal party. When the states-general was convened, he sought to be elected a representative of the nobles of Provence, but was rejected, and left them with the threat that, like Marius, he would overthrow the aristocracy. He purchased a draper's shop, offered himself as a candidate to the third estate, was enthusiastically returned both at Aix and Marseilles, and by his talents and oratorical powers soon acquired great influence in the states-general and national assembly. To suppress insurrection, he effected in 1789 the institution of the national guard. In 1790 he was elected president of the club of the Jacobins, and, in 1791, of the national assembly. Both in the club and in the assembly he displayed great boldness and energy; but soon after his appointment as president of the latter he died, 1791.

Mitchel, Ormsby McKnight, American general and astronomer, was born in Kentucky, 1810. He was professor of mathematics at West Point for two years after his graduation there, in 1829; practiced law and taught in Cincinnati college, and became director of the Cincinnati observatory, which had been built largely through his influence, and also of the Dudley observatory at Albany. In the civil war he entered the army as brigadier-general of volunteers; was promoted to the rank of major-general, and, after various successes, given command of the department of the South. He died of yellow fever at Beaufort, S. C., 1862, before entering on the campaign. He lectured on astronomy, and invented several instruments for astronomical work. His published books are *Planetary and Stellar Worlds*, and *Popular Astronomy.*

Mitchell, Donald Grant, "Ik Marvel," American novelist and essayist, was born at Norwich, Conn., 1822. He was graduated at Yale college, and pursued law studies in New York city. In 1853 he was appointed United States consul at Venice, and in 1868 became editor of the *Atlantic Monthly.* His best known works are: *Dream Life; Reveries of a Bachelor; My Farm at Edgewood; Wet Days at Edgewood; Doctor Johns; English Lands, Letters, and Kings;* and *American Lands and Letters.* Died, 1908.

Mitchell, John, American labor leader, was born at Braidwood, Ill., 1870. He received a common school education, read law one year, and made a special study of economic questions. He began work in coal mines, 1882, and has since, as worker or labor leader, been identified with mines and mining. His official connection with the united mine workers of America began in 1895, and from 1899 to 1908 he served as president of that organization. He directed the strikes of the anthracite miners in 1900 and 1902, and was vice-president of the American federation of labor in 1898, and since 1900. He is the author of a book, *Organized Labor, Its Problems, Purposes, and Ideals.*

Mitchell, Maria, American astronomer, was born at Nantucket, Mass., 1818. She assisted her father, who was a teacher, in his work in astronomy, and soon became fitted to make investigations herself. In 1847 she was awarded a gold medal by the king of Denmark for the discovery of a comet. She was employed in observations connected with the coast survey, and in compiling the nautical almanacs, and was the first woman made a member of the American academy of arts and sciences. In 1865 she became professor of astronomy at Vassar college, and held that position until the year before her death at Lynn, Mass., 1889.

Mitchell, Silas Weir, American physician, poet, and novelist, was born at Philadelphia, Pa., 1829. He studied at the university of Pennsylvania, but was not graduated because of illness during his senior year; was graduated at Jefferson medical college, 1850; LL. D., Harvard, Edinburgh, Princeton; M. D. *hon. causa*, Bologna. He established a practice in Philadelphia, became prominent as a physiologist and especially as neurologist, and stands at the head of the profession in that department of medical science. Author: *Treatise on Neurology; Serpent Poisons; Comparative Physiology;* and about 125 papers on neurological subjects; *Poems; Injuries to Nerves; Clinical Lessons; Doctor and Patient*, essays; *Hephzibah Guinness; In War Time; Roland Blake; Far in the Forest; Characteristics; When All the Woods are Green; Hugh Wynne, Free Quaker; Adventures of François; The Autobiography of a Quack; Dr. North and His Friends; The Wager, and Other Poems; Circumstance; Youth of Washington; Constance Trescot*, etc.

Mitford, Mary Russell, English author, was born at Alresford, Hants, 1787. She was sent to school in Chelsea, and her first volume of poems appeared in 1810, and was followed by two more in 1811-12. Four of her tragedies, *Julian, The Foscari, Rienzi*, and *Charles I.*, were acted, but have not kept the stage. Her charming sketches of country manners, scenery, and character were rejected by several editors, but at length found a place in the *London Magazine*, and were collected as *Our Village* in 5 vols. In 1852 she published *Recollections of a Literary Life*, and in 1854, *Atherton, and Other Tales.* She died in 1855 at Swallowfield, where she had moved in 1851.

Mithridates (*mĭth'-rĭ-dā'-tēz*) **the Great,** king of Pontus, Armenia, and Parthia, countries in Asia Minor, was born about 132 B. C. He became king when about thirteen years old. The first Mithridatic war, as it is called, was against Bithynia, whose king was sustained by the Romans. At first Mithridates conquered the Roman provinces in Asia Minor, and sent large armies to help the Greeks, but finally had to make peace with Sulla, giving up all his Asiatic conquests. In the second war, 83–81 B. C., Mithridates was successful, but was again defeated in the third war, which he carried on against the Romans, from 74 to 65 B. C., Pompey finally driving him to his northern territories. Here he planned revenge, but was prevented from carrying out his purpose by the rebellion of his son, when in desperation he ended his life by suicide, in 63 B. C. He was one of the strong eastern despots, but a friend of culture and the arts.

Modjeska (*mŏ-jĕs'-kȧ*), **Helena** (Mme. Chlapowski, née Opido), actress, was born in Cracow, Poland, 1844. She made her début in Bochnia, Poland, 1861; soon became leading actress in her native country; married G. O. Modjeska in 1860, and, in 1868, Charles Bozenta Chlapowski, compatriot. Her first appearance in English was at San Francisco, 1877, in *Adrienne Lecouvreur*, followed by a starring tour through the United States and England. She returned to America after two London engagements, and played leading Shakespearean parts, Camille, Mary Stuart, etc. She retired from the stage in 1905 and died, 1909.

Mohammed (*mō-hăm'-ĕd*). See page 218.

Molière (*mō'-lyâr'*), **Jean Baptiste Poquelin.** See page 57.

Moltke (*mōlt'-kĕ*), **Hellmuth Karl Bernhard, Count von,** chief marshal of the German empire, was born in Parchim, in Mecklenburg, 1800. He was graduated from the military academy at Copenhagen, 1818, and entered the Prussian service in 1822 as lieutenant in the 8th infantry regiment. In 1835 he undertook a tour in Turkey, remained there several years, and took part in the campaign of the Turks in Syria, against the viceroy of Egypt. He became lieutenant-general of the Prussian army in 1859, and sketched the plans of the campaigns against Denmark, 1864, and Austria, 1866. He was the commander-in-chief in the Franco-German war, 1870-71, and to his brilliant strategy are ascribed the splendid victories of the German arms. He is generally regarded as the first strategist of the day, was created a count in 1870, and chief marshal of the German empire in 1871. He published numerous essays, letters, speeches, a novel, and several military works. Died at Berlin, 1891.

Mommsen (*mŏm′-zĕn*), **Theodor,** German historian, was born at Garding in Schleswig, 1817, son of a pastor. He studied at Kiel; for three years examined Roman inscriptions in France and Italy for the Berlin academy, 1844–47, and in 1848 was appointed to a chair of law at Leipzig, of which two years later he was deprived for the part he took in politics. In 1852 he became professor of Roman law at Zürich, in 1854 at Breslau, and in 1858 of ancient history at Berlin. He edited the monumental *Corpus Inscriptionum Latinarum,* helped to edit the *Monumenta Germaniæ Historica,* and from 1873 to 1895 was secretary of the academy of science. In 1882 he was tried and acquitted on a charge of slandering Bismarck in an election speech. His fine library was burned in 1880. His greatest work remains his *History of Rome,* followed by *The Roman Provinces.* Freeman characterized Mommsen as "the greatest scholar of our times, well-nigh the greatest scholar of all times . . . language, law, mythology, customs, antiquities, coins, inscriptions, every source of knowledge of every kind — he is master of them all." Among his 920 separate publications were works on the Italic dialects, Neapolitan inscriptions, Roman coins, Roman constitutional law, and an edition of the Pandects. He died at Charlottenburg, 1903.

Money, Hernando De Soto, lawyer, United States senator, was born in Holmes county, Miss., 1839. He was educated at the university of Mississippi, Oxford, Miss.; served in the confederate army from the beginning of the war until 1864, when he was forced to retire from service by defective eyesight; was elected to the house of representatives from the forty-fourth to the forty-eighth and from the fifty-third to the fifty-fourth congresses; and in 1897 was appointed to the United States senate to fill a vacancy caused by the death of Hon. J. Z. George. In 1898 he was elected to fill out the unexpired term ending 1899, and was then elected to succeed himself for the terms 1899–1911. Died, 1912.

Monge (*mônzh*), **Gaspard,** French mathematician and physicist, was born at Beaune, 1746. He studied at Lyons and Mézières, in 1780 became a member of the French academy, during the revolution was minister of marine, but soon took charge of the national manufactories of arms and gunpowder. After he had helped to found the École Polytechnique, he was sent by the directory to Italy. Here he formed a close friendship with Bonaparte, followed him to Egypt, and was made successively professor in the École Polytechnique, a senator, and count of Pelusium. He wrote *Traité Elémentaire de Statique, Leçons de Géométrie,* etc., and was the founder of the science of descriptive geometry. He died at Paris, 1818.

Monk, George, duke of Albemarle, English general, was born in County Devon, 1608. After a brief service in Holland he fought at first on the side of Charles I. during the English civil war; then, changing to the other side, he commanded a republican army in Ireland, 1646–50, and in 1651 reduced Scotland to submission to Cromwell. In 1653 he commanded in the sea-fight in which the Dutch were defeated, and their admiral, Tromp, killed. After the death of the protector in 1658, Monk proclaimed the former's son, Richard Cromwell, his successor, and himself retained command of the army in Scotland. With that army, in 1660, he marched upon London, and declared for the restoration of Charles II., which consummation he succeeded in bringing about. His last great victory at sea was over the Dutch in 1666. Monk died in 1670.

Monmouth, James Fitzroy, Duke of, English general, was born at Rotterdam, 1649. He was a natural son of Charles II. and Lucy Walters, and as such was loaded with rank and honors. He had high hopes of succeeding to the English throne, but this his father was unable to secure. Monmouth was sent into Scotland in 1679 to quell a rebellion. In time he became the idol of the English nonconformists. The return of the duke of York was followed by the exile of Monmouth to Holland, where he allied himself with the leaders of the nonconformist party, exiled like himself. When he was allowed to return to London he was received with such demonstrations of joy that he felt he was the people's choice. In 1684 he went to Holland and remained abroad until the death of the king, when he resolved to embark for England. He landed, in 1685, with a small force, at Lyme-Regis, and issued a manifesto declaring James to be a murderer and usurper, charging him with introducing popery and arbitrary power, and asserting his own legitimacy and right by blood to be king of England, hoping that the people, especially in the west and north of England, would flock to his banner. On the fifth day, however, his force consisted only of a rabble of some 2,000 rudely armed peasants and farmers. Contrary to his expectations, the gentry held aloof from him. He was completely defeated at the battle of Sedgemoor, the last great fight on English soil, was taken prisoner, and, on July 15, 1685, was brought to the scaffold and beheaded on Tower hill.

Monroe, James, fifth president of the United States, was born in Westmoreland county, Va., 1758. He was graduated at William and Mary college, served in the revolutionary army, was present at several battles, and in 1783 entered the general congress as a delegate from his native state. In the Virginia convention, 1788, he opposed the adoption of the federal constitution, and allied himself with the republican party, which party elected him a member of the United States senate in 1790. Four years later he proceeded to France as minister-plenipotentiary, from which office he was recalled in 1796. During the years 1799–1802, he filled the office of governor of Virginia. In 1802, as the associate of Livingston, he was dispatched on a special mission to negotiate for the purchase of Louisiana. In 1803, in England, and in 1805, in Spain, he performed special diplomatic services for his country. In 1811 he again accepted the governorship of Virginia, and in the same year became secretary of state under President Madison's administration. In 1816 he was elected president of the United States by the republican (democratic) party, and made himself very popular. The acquisition of Florida from Spain, and the settlement of the vexed question respecting the extension of slavery by the Missouri compromise, by which, after the reception of Missouri as a slave state, the institution was prohibited above the line of latitude 36° 30′, helped to secure his reëlection in 1820. His most popular acts, perhaps, were the recognition of the independence of Mexico and the

South American republics, and the promulgation of what has since been called the "Monroe doctrine." In 1825 he retired to his seat at Oak Hill, Loudoun county, Va., but he still continued in the public service. After being twice president, he was justice of the peace, a visitor of the university of Virginia, and member of a state convention; but a profuse generosity and hospitality caused him to be overwhelmed with debt, and he found refuge with his relatives in New York, where he died in 1831 — like his predecessors, Adams and Jefferson — on the 4th of July.

Montagu, Lady Mary Wortley, English beauty, wit, and writer, was born at Thoresby, in Nottinghamshire, about 1689, eldest daughter of Evelyn Pierrepont, duke of Kingston. She was carefully educated, and manifested precocious talents. In 1712 she married Edward Wortley Montagu, and in 1716 accompanied him on his embassy to Constantinople. To this journey we are indebted for her admirable *Letters*. After her return to England in 1718, she shone conspicuously in the circles of talent and fashion. Pope was among her friends, but he at length quarreled with and libeled her. In 1739 her declining health induced her to settle on the continent, whence, however, she returned in 1761. She died in the following year. Her collected works have been published in six volumes, and her *Letters* place her at the head of feminine epistolary writers in Great Britain, and leave her few rivals in other countries.

Montaigne (*mŏn-tān'; Fr. môɴ'-tȧn'-y'*), **Michel Eyquem de.** See page 39.

Montalembert (*môɴ'-tȧ'-läɴ'-bâr'*), **Charles Forbes, Comte de,** French historian, orator, and publicist, was born in London, 1810. He became a peer of France on the death of his father, his mother being a Scotchwoman. Several times during his career he came into conflict with the authorities for his bold defense of what he deemed to be the rights of his church against the encroachments of the civil power; but his name came most prominently before Europe through his uncompromising opposition to Louis Napoleon, after the *coup d'état* of 1851. In 1858 he published a pamphlet entitled, *Un Débat sur l'Inde*, eulogizing English institutions, and depreciating those then existing in France. For this pamphlet he was summoned before the bar of the correctional police, and was sentenced to imprisonment for six months, and to pay a fine of 3,000 francs; and, though this penalty was immediately remitted by the emperor, Montalembert appealed against the decision of the court, was again condemned, and once more pardoned, very much to his own disgust. Among his other writings are: *History of Saint Elizabeth of Hungary; Life and Times of St. Anselm; The Political Future of England;* and a pamphlet entitled *Pius IX. and France in* 1849 *and* 1859. He died at Paris, 1870.

Montcalm (*mŏnt-käm'*), **Louis Joseph St. Véran, Marquis de,** commander-in-chief of the French troops in Canada, 1756–59, was born near Nîmes, France, 1712. He captured Fort Ontario at Oswego, 1756; Fort William Henry in 1757; repulsed the British under Abercrombie at Ticonderoga in 1758; repelled Wolfe's attack on Quebec, 1759; and was defeated and mortally wounded in the battle of Quebec, September 13th of the same year.

Montesquieu (*mŏn'-tĕs-kū'; Fr. môɴ'-tĕs'-kē'-ü'*), **Charles de Secondat, Baron de.** See page 61.

Montfort, Simon de, English general and statesman, was born in France about 1208, son of a French count. He went to England in 1230, where he inherited from his grandmother the earldom of Leicester. He here attached himself to Henry III., married the king's sister, and was sent to govern Gascony in 1248. He returned in 1253, and passed over to the side of the barons, whom he ultimately led in the struggle against the king. After repeated unsuccessful attempts to make Henry observe the provisions of Oxford, Simon took arms against him in 1263. The war was indecisive, and, appeal being made to the arbitration of Louis the Good, Simon, dissatisfied with his award, renewed hostilities, defeated the king at Lewes, and, taking him and his son prisoner, governed England for a year during 1264-65. He sketched a constitution for the country, and summoned the most representative parliament that had yet met, but as he aimed at the welfare not of the barons only, but of the common people as well, the barons began to distrust him. He was slain at Evesham, 1265.

Montgolfier (*môɴ'-gŏl'-fyā'*), **Jacques Étienne and Joseph Michel,** two brothers, distinguished as the inventors of balloons, were the sons of a celebrated paper manufacturer at Annonay, France. The former was born in 1745, and the latter in 1740. Étienne, after a few successful experiments with the balloon, went to Paris; but, though his discovery created a great sensation, and was followed out in practice by many eminent men, he obtained little pecuniary aid in carrying on his experiments, and at length retired to his native town, where he resumed the manufacture of paper, and died at Servières in 1799. Joseph, the sharer of his labors and his glory, was a man of much genius and little education; but the two brothers were fitted to supplement each other's deficiencies, and together they made many discoveries, and were both received as members of the French academy. Joseph invented the hydraulic screw, the calorimeter, etc., and in the latter part of his life filled a post in the department of arts and manufactures. He died at Paris in 1810.

Montgomery, James, British poet, was born in Scotland, 1771. He was intended for a Moravian preacher, but, showing little aptitude, became a shop boy. In 1790 he went to London, where a book-seller refused a volume of poems written by him, but employed him. In 1792 he entered the service of Joseph Gales in Sheffield, and in 1794 started the *Sheffield Iris*, a weekly advocate of peace and reform, which he edited until 1825. He was fined and imprisoned in 1795 and 1796 for seditious publications. In 1797 he published a small volume of poems, *Prison Amusements*, followed by *The Wanderer of Switzerland; The West Indies; The World before the Flood;* and *Greenland*. He was a liberal whig, and an ardent abolitionist. He also published *The Pelican Island, and other Poems; Original Hymns*, and *Lectures on Poetry and General Literature*. Died, 1854.

Montgomery, Richard, American general, was born in Ireland, 1736. In 1772 he resigned his commission in the British service, and settled in Dutchess county, N. Y., representing it in the continental congress, 1775. As brigadier in the colonial army he took Montreal, and was killed in the assault on Quebec, December, 1775.

Moody, Dwight Lyman, American preacher and revivalist, was born in Massachusetts, 1837. He renounced Unitarianism, became a Congregationalist, served during the civil war on the Christian commission, and from 1856 entirely abandoned business and devoted himself to religious work in Chicago and elsewhere. His church and schoolhouse at Chicago having burned down in 1871, he went to England to raise funds for rebuilding them, and was successful in his object. For many years he associated Ira D. Sankey with him in his revival work. He established a school for Christian workers at Northfield, Mass., and a Bible institute at Chicago. Died, 1899.

Moody, William Henry, American lawyer, jurist, former associate justice of United States supreme court, was born in Newbury, Mass., 1853. He was graduated from Harvard university, 1876, was admitted to the Massachusetts bar in 1878, and began practice at Haverhill, Mass. He was district attorney for the eastern district of Massachusetts, 1890–95; member of 54th congress from 6th Massachusetts district to fill vacancy; also member of 55th, 56th, and 57th congresses; secretary of the navy, 1902–04; attorney-general of the United States, 1904–06, and in 1906 associate justice of the United States supreme court, from which he retired, 1910.

Moore, George Foot, American scholar and educator, preacher, 1900–03, professor theology, 1902–04, Frothingham professor, history of religion, since 1904, Harvard; was born at West Chester, Pa., 1851. He was graduated at Yale college, 1872, D.D., 1897; graduated Union theological seminary, 1877; LL. D., Western Reserve, 1903, Harvard, 1906. Ordained to the Presbyterian ministry, 1878. He was minister of the Putnam Presbyterian church, Zanesville, Ohio, 1878–83; professor of Hebrew, Andover theological seminary, 1883–1902. Author: *The Book of Judges in Hebrew; Index to the Journal of the American Oriental Society;* and many articles on biblical and oriental subjects in *Andover Review, Journal of Biblical Literature, Journal of American Oriental Society,* etc. He was appointed Roosevelt lecturer at Berlin university, 1909.

Moore, Sir John, British general, was born in Glasgow, Scotland, 1761. He served in the British army during the American war; became a member of parliament in 1784; served in Corsica, 1793-94; in the attack on St. Lucia, of which he became governor; and subsequently in Ireland, Holland, Egypt, and Sicily. In 1798 he was made major-general. On his return from an expedition in aid of Sweden, he was sent to Portugal to command an army to coöperate with the Spaniards, 1808. He was obliged to retreat from Salamanca to the sea, won the victory of Corunna in 1809, but fell in the battle and died.

Moore, John Bassett, American publicist, was born in Smyrna, Del., 1860. He was graduated at the university of Virginia, 1880; LL. D., Yale, 1901. He studied law at Wilmington, Del., passed the United States civil service examination, 1885, and was appointed law clerk in the state department at $1,200 a year. In 1886 he became third assistant secretary of state. Although a democrat, he was retained in that position by Blaine; resigned, 1891, to become professor of international law and diplomacy at Columbia university; was appointed in April, 1898, assistant secretary of state, resigning in September to become secretary and counsel to the peace commission at Paris. He is an authority on international law. Author: *Report on Extraterritorial Crime; Report on Extradition; Extradition and Interstate Rendition; American Notes on the Conflict of Laws; History and Digest of International Arbitrations* (6 vols.); *American Diplomacy, Its Spirit and Achievements,* etc. He is also one of the editors of the *Political Science Quarterly,* and of the *Journal de Droit International Privée.*

Moore, Thomas, Irish poet, was born in 1779. He was graduated at Trinity college, Dublin, 1798, and in 1799 went to London to study law, taking with him a translation of the odes of Anacreon, which he published in 1800. In 1801 he published *The Poetical Works of the Late Thomas Little, Esq.,* a pseudonym suggested by his diminutive stature. In 1803 he was appointed registrar to the admiralty in Bermuda, but soon returned to England, having first made a rapid tour through a portion of the United States and Canada. In 1813 he settled at Mayfield cottage, near Ashbourne in Derbyshire. Here were written many of the songs known as *Irish Melodies,* which were extended to ten series. These songs have enjoyed a popularity surpassing that of any similar poems in the language. He also published two series of *Sacred Melodies,* six series of *National Airs, Legendary Ballads,* and many miscellaneous pieces. In 1817 he completed *Lalla Rookh,* the most elaborate of his works, followed by *The Fudge Family in Paris; Tom Crib's Memorial to Congress; Rhymes on the Road; Fables for the Holy Alliance; Loves of the Angels; Life of Sheridan;* and *The Epicurean,* a prose fiction. His most important prose work was his *Notices of the Life of Lord Byron.* His remaining works comprise: *The Summer Fête,* a poem; *Memoirs of Lord Fitzgerald; Travels of an Irish Gentleman in Search of a Religion;* and the *History of Ireland,* written for Lardner's *Cabinet Cyclopædia.* Died, 1852.

Moot, Adelbert, American lawyer, was born in Allen, Allegany county, N. Y., 1854. He was educated in the high and state normal schools, and at Albany law school, 1875-76. He has practiced law at Nunda, N. Y., and Buffalo, N. Y., since 1876. He is president of the Unitarian conference for the middle states and Canada; he was a member of the board of commissioners of statutory consolidation that consolidated all general statutes of New York from 1777 to 1909. Elected member New York state board of Regents, 1913.

Moran, Thomas, American artist, was born at Bolton, in Lancashire, England, 1837. His early life was spent at Philadelphia, where he learned engraving. He then studied painting in England, France, and Italy. His large paintings, the "Grand Cañon of the Yellowstone," and the "Chasm of the Colorado," were bought by congress for $20,000. These were the first landscapes ever purchased by the government. His other works are mostly of the same class: "Balboa Discovering the Pacific," "Hiawatha and the Serpents," "The Wilds of Lake Superior," etc.

More, Hannah, English writer, daughter of the village schoolmaster of Stapleton, near Bristol, was born in 1745. She wrote verses at an early age, and in 1762 published *The Search After Happiness,* a pastoral drama. In 1774 she was introduced to the Garricks, Johnson, Burke, Reynolds, and the best literary society of London. During this period she wrote two tales in verse, and two tragedies, *Percy* and *The Fatal Falsehood,* both of which were acted. Led by her religious views to withdraw from society, she retired, on the publication of her *Sacred Dramas,* to Cowslip Green near Bristol, where she did much to improve the condition of the poor, and still helped by her writings to raise the tone of English society. Her essays on *The Manners of the Great* and *The Religion of the Fashionable World,* her novel *Cœlebs in Search of a Wife,* and a tract called *The Shepherd of Salisbury Plain* were her most popular works. In 1828 she settled at Clifton, where she died in 1833.

More, Sir Thomas, English statesman, was born at London, 1478. He was educated at Oxford, and at Lincoln's Inn; rose to eminence as a lawyer, was appointed under-sheriff and judge of the sheriff's court for London and Middlesex, and was elected a burgess of the parliament under Henry VII., where he was often successful in resisting claims of the crown. In 1514 and 1515 he was sent on commercial embassies to the Netherlands, and after his return became a privy councilor. In 1521 he was knighted and made treasurer of the exchequer; and at various times was employed in France to manage the intrigues of Wolsey with Francis I. In 1523 he was chosen speaker of the house of commons; in 1525 was appointed chancellor of the duchy of Lancaster; in 1527 he accompanied Wolsey on his magnificent embassy to France; and about this time published several learned, witty, and bitter pamphlets against the reformers. He became lord chancellor in 1529, held the great seal for two years and a half, and constantly refused to lend his authority to Henry VIII.'s project of divorce and second marriage. In 1534 he refused to swear allegiance to the act of succession for securing the throne to the offspring of Anne Boleyn, and was committed to the Tower. In July, 1535, he was brought to the bar of the high commission charged with traitorously attempting to deprive the king of his title as supreme head of the church, and was condemned. He was executed July 6th. He wrote *Utopia* and several other works, most of them in Latin.

Moreau (*mō'-rō'*), **Jean Victor,** celebrated French general, was born at Morlaix, 1763, and educated for the bar. The army, however, was the profession of his choice, and he entered before he was eighteen, but was taken from it by his father. The revolution enabled him to gratify his wishes, and he made his first campaign under Dumouriez, 1792. He gained the rank of brigadier-general in 1793, and that of general of division in 1794. In the latter year he commanded the right wing of Pichegru's army, and obtained great successes in the Netherlands. In 1796 he was placed at the head of the army of the Rhine. In that year he distinguished himself by penetrating into Bavaria, and by his masterly retreat before a superior force; in 1797, by his passage of the Rhine; and in 1800, by his campaign in Germany, crowned by the decisive victory of Hohenlinden. Having engaged with Pichegru, Georges, and other royalists, in a plot against the consular government, he was brought to trial, 1804, and sentenced to two years' imprisonment, but was allowed to come to America. Here he remained until 1813, when he was prevailed upon to join the allied sovereigns, and appear in arms against his country. He was, however, mortally wounded at the battle of Dresden, and died 1813.

Morgagni (*mōr-gän'-yē*), **Giovanni Battista,** Italian anatomist, was born at Forli, Italy, 1682. He was professor at Padua from 1715, and is the reputed founder of pathological anatomy, to which his most celebrated works refer. His chief book is *On the Seats and Causes of Diseases Investigated by Anatomy.* Died, 1771.

Morgan, John Pierpont, American banker, financier, and art collector, was born in Hartford, Conn., 1837. He was graduated at English high school, Boston; studied at the university of Göttingen, Germany, and entered the bank of Duncan, Sherman and Company, 1857. He became agent and attorney in the United States, 1860, for George Peabody and Company, bankers, London, in which his father was partner; was a member of Dabney, Morgan and Company, investment securities, 1864–71; and became a member, 1871, of the firm Drexel, Morgan and Company, later J. P. Morgan and Company, leading private bankers of the United States, with important branch houses in London and Paris. He financed the largest reorganizations of railways and consolidation of industrial properties in the United States; floated United States bond issue of $62,000,000 during Cleveland administration; organized and floated securities of United States steel corporation, 1901, with a capital of $1,100,000,000; secured American subscriptions of $50,000,000 to British war loan of 1901; organized existing agreement of anthracite operators of Pennsylvania, and of soft coal interests in Ohio, Indiana, and Pennsylvania; controlled over 50,000 miles of railways and large American and British ocean transportation lines. Gave site, buildings, and funds amounting to about $1,500,000 to lying-in hospital, New York, and large donations to the New York trade schools, the cathedral of St. John the Divine, and many other institutions. He made valuable gifts to the American museum of natural history, Metropolitan museum of art, and New York public library, and owned famous collections of pictures, books, manuscripts, curios, etc. In 1912 he gave to library of congress a complete set of autographs of the signers of the declaration of independence. He was president of the Metropolitan museum of art; was member of many societies, clubs, etc., in the United States and abroad. Died, 1913.

Morgan, John Tyler, American soldier, lawyer, and statesman, was born at Athens, Tenn., 1824. He removed to Alabama in 1833; was admitted to the bar in 1845; became a delegate to the Alabama secession convention, 1861; joined the confederate army in 1861, and, passing through all grades from private upward, was made brigadier-general in 1863, and served to the close of the struggle. After the war he resumed the practice of law at Selma, Ala.; was a presidential elector, 1876; and from 1877 to 1907 was one of the ablest members of the United States senate. He was appointed by President Harrison as arbitrator on Bering sea fisheries, 1892, and was appointed by President McKinley, in 1898, one of the commissioners to organize government in Hawaii, after passage of annexation bill. Died, 1907.

Morley, Rt. Hon. John, British statesman and writer, was born in Blackburn in 1838, and educated at Cheltenham and Oxford. He was called to the bar, but has devoted his time chiefly to writing and public duties. He edited, among other publications, the *Fortnightly Review* from 1867 to 1882, the *Pall Mall Gazette* from 1880 to 1883, and *Macmillan* in 1883–85, and, after two unsuccessful candidatures, in 1869 and 1880, entered parliament in 1883, as member for Newcastle. From the first, he advocated home rule for Ireland, and his articles in favor of it, followed up by speeches in 1885, made him Gladstone's most conspicuous supporter. In 1886 he became chief secretary for Ireland, and again in 1892, and secretary for India in 1905. His best known books are: *Edmund Burke; Critical Miscellanies; Voltaire; On Compromise; Rousseau; Diderot and the Encyclopædists; Richard Cobden; Studies in Literature;* and an authoritative *Life of Gladstone.* Created a viscount, 1908.

Morrill, Justin Smith, American legislator, was born in Strafford, Vt., 1810, and devoted himself to mercantile pursuits until his election to congress. He sat in the house of representatives from 1855 to 1867, and in the senate from 1867 until his death, the longest term of service up to that time. In 1861 he succeeded in securing President Lincoln's approval of a bill, previously vetoed by Buchanan, for the reëstablishment through public land grants of state colleges for the teaching especially of agriculture and the mechanic arts. By virtue of this bill there had been established in 1899 in the various states sixty-four institutions giving instruction to 36,000 students. Senator Morrill was also the author of the famous Morrill tariff bill of 1861. He died in 1898.

Morris, Clara, American actress, was born in Toronto, Canada, 1849. She was taken to Cleveland when a child, and grew up there; became a member of the ballet in academy of music, Cleveland, 1861, and rapidly advanced to leading lady. In 1869 she became leading lady at Wood's theater, Cincinnati; became member of Daly's Fifth avenue company, New York, 1870; soon became prominent in emotional rôles and appeared as a star in the principal American theaters. Leading rôles: Camille, Alixe, Miss Multon, Mercy Merrick in *The New Magdalene*, Cora in *L'Article* 47, etc. She married Frederick C. Harriott in 1874. She has been a contributor to *St. Nicholas*, *Century Magazine*, *Pearson's*, *Ladies' Home Journal*, etc. Author: *A Silent Singer; My Little Jim Crow; Life on the Stage; A Paste-board Crown*, a novel; *Stage Confidences; The Trouble Woman; Life of a Star; Dressing Room Receptions*, etc.

Morris, George Pope, American journalist and poet, was born in Philadelphia, 1802. He was associated with N. P. Willis in the publication of the *New York Mirror*, established in 1823, the *New Mirror*, 1843, the *Evening Mirror*, 1844, and the *Home Journal*, 1846, founded by Morris alone as the *National Press*, 1845. He edited *American Melodies*, and, with N. P. Willis, *The Prose and Poetry of America*. His best known poem is *Woodman, Spare That Tree*. Various editions of his poems have been published. In 1825 he produced a drama entitled *Briarcliff*, which ran forty nights. He also published a volume of prose sketches entitled *The Little Frenchman and His Water Lots*. Died, 1864.

Morris, Gouverneur, American statesman, was born in 1752. He became a member of the provincial congress of New York, and was one of those who drew up the state constitution in 1776. He was also a prominent member of the continental congress in 1777–80, the colleague of Robert Morris as superintendent of finance, and the organization of the bank of North America was largely due to him. In 1787 he was one of the committee to draft the federal constitution; was minister to France during the revolution, and became United States senator on his return. He wrote *Observations on the American Revolution*, and his *Correspondence* throws much light on the French revolution. Died, 1816.

Morris, Robert, American financier, was born in Liverpool, England, 1734. He came to America at an early age and settled in Philadelphia, becoming a partner in the counting-house of C. Willing. He opposed the stamp act; signed the non-importation agreement in 1765; was a member of the continental congress; signed the declaration of independence, and greatly helped the American cause from his own purse, both during the revolution and afterward. He founded the bank of North America, was superintendent of finance from 1781 to 1784, but declined the secretaryship of the treasury. He was finally ruined by his speculations and imprisoned for debt. He died in 1806.

Morris, William, English poet and artist, was born near London, 1834. He was educated at Marlborough school and at Oxford, and, in 1863, established the business in stained glass and decoration with which his name has since been associated. In an artistic capacity he did much to elevate the taste of the public in domestic decoration, designing wall-papers, fabrics, and furniture. He published *The Earthly Paradise* and many other works, and rendered into English the Anglo-Saxon *Beowulf*, the *Odyssey*, *Æneid*, etc. He also carried on for a time the *Kelmscott Press*, which reprinted various choice works. In his latter years he published *Socialism* and became known as one of the leaders of the socialist movement in England. His works include, besides the above: *Defense of Guenevere and Other Poems; The Life and Death of Jason; Love is Enough; Hopes and Fears for Art; News from Nowhere*, etc. He died at London, 1896.

Morse, Samuel Finley Breese. See page 397.

Morton, Levi Parsons, American banker and statesman, was born in Shoreham, Vt., 1824. He was graduated from Shoreham academy; LL. D., Dartmouth college, 1881, Middlebury college, 1882. He founded the banking houses of L. P. Morton and Company, and Morton, Bliss and Company, New York, Morton, Rose and Company, Morton, Chaplin and Company, London, and Morton trust company, New York; was a member of congress from New York, 1879–81; United States minister to France, 1881–85; vice-president of the United States, 1889–93; governor of New York, 1895-96. He was president of the Morton trust company, Fifth Avenue trust company; director of Equitable life assurance society of the United States, Home insurance company, National bank of commerce, Guaranty trust company, Industrial trust company, Newport trust company.

Morton, Oliver Perry, American statesman and jurist, was born in Wayne county, Ind., 1823. He was graduated at Miami university in 1843; was admitted to the bar in 1847, and began practice at Centerville, Ind. He was circuit judge of Indiana in 1852; governor, 1861–67; United States senator from Indiana, 1867–77. He declined the post of United States minister to England in 1870. During the civil war he won great applause throughout the North for his promptitude and energy in supporting the national government. In 1877 he was a member of the United States electoral commission, and died the same year.

Moscheles (*mōsh'-ĕ-lās*), **Ignaz,** German pianist and composer for the piano, was born at Prague, 1794, of Jewish parents. He made frequent tours throughout Europe from 1815; from 1825 he taught at the London academy of music, and directed at the Philharmonic concerts; from 1846 he was a professor at the Leipzig conservatory until his death, 1870. He edited in English Schindler's *Life of Beethoven*, and wrote numerous concertos, sonatas, and studies for the piano.

Moses. See page 189.

Motley, John Lothrop, American historian and diplomat, was born in Massachusetts, 1814. He was graduated at Harvard college in 1831, and studied at Göttingen and Berlin; D. C. L., Oxford, 1858. After traveling for some years in Europe he returned to the United States, studied law and was admitted to the bar. In 1841 he became secretary of legation at St. Petersburg; was minister-plenipotentiary at Vienna from 1861 until 1867; in 1869 was appointed American minister to the court of St. James, a post from which he was removed in 1870. The three great works upon which Motley has built up one of the foremost literary reputations of the age are: *The Rise of the Dutch Republic—a History;* its sequel, *The History of the United Netherlands from the Death of William the Silent to the Synod of Dort; John of Barneveld.* All have been translated into the French, Dutch, and German languages. Died in England, 1877.

Mott, Lucretia, née Coffin, Quaker philanthropist and reformer, was born in Nantucket, 1793. She was a delegate to the world's anti-slavery convention in London, 1840, but was not allowed to take a seat as delegate because of her sex. She did much for the cause, and was also early and always identified with the movement for the larger emancipation of women. She was a woman of great simplicity and purity of character, and her discourses and sermons were frequently printed in the newspapers. She published a *Sermon to Medical Students* in pamphlet form, and also a *Discourse on Women*, delivered in Philadelphia, 1849. Died at Philadelphia, 1880.

Moulton, Ellen Louise Chandler, American novelist and poet, was born in Pomfret, Conn., 1835, daughter of Lucius L. Chandler. She married William U. Moulton in 1855. Author: *This, That, and the Other; Juno Clifford; My Third Book; Bed-Time Stories; More Bed-Time Stories; Some Women's Hearts; Swallow Flights; Poems; New Bed-Time Stories; Random Rambles; Firelight Stories; Ourselves and Our Neighbors; Miss Eyre from Boston, and Other Stories; In the Garden of Dreams; Stories Told at Twilight; Lazy Tours in Spain and Elsewhere; In Childhood's Country; At the Wind's Will*, etc. Edited: *Garden Secrets; A Last Harvest*, by Philip Bourke Marston; *Collected Poems of Philip Bourke Marston, Selections from Poems of Arthur O'Shaughnessy*, etc. Died, 1908.

Moulton, Richard Green, educator, author, was born in Preston, England, 1849. He was graduated from London university, 1869; Cambridge, 1874; Ph. D., university of Pennsylvania, 1891. He has been university extension lecturer with English and American universities; he is professor of literary theory and interpretation, university of Chicago. Author: *Shakespeare as a Dramatic Artist: a Study of Inductive Literary Criticism; The Ancient Classical Drama: a Study of Literary Evolution; Four Years of Novel Reading — Account of an Experiment in the Study of Fiction; The Literary Study of the Bible; A Short Introduction to the Literature of the Bible; The Moral System of Shakespeare*, etc. Editor: *The Modern Reader's Bible*, in 21 vols.

Moultrie, William, American revolutionary general, was born in South Carolina, 1731. He repulsed an attack on Sullivan's island, Charleston harbor, where Fort Moultrie now stands, in 1776, for which he received the thanks of congress; defended Charleston in 1779. In 1785 and again in 1794 he became governor of his native state, and died in 1805.

Moxom (*mŏk'-sŭm*), **Philip Stafford,** American clergyman, was born in Markham, Canada, 1848. He was ordained to the ministry, 1871. He was pastor of the First Baptist church, Cleveland, Ohio, 1879–85, First Baptist church, Boston, 1885–93, South Congregational church, Springfield, Mass., since 1894. Author: *The Aim of Life; From Jerusalem to Nicœa; The Church in the First Three Centuries; The Religion of Hope;* and numerous articles in religious and secular periodicals.

Mozart (*mō'-tsärt*), **Johann Wolfgang Amadeus.** See page 169.

Mühlenberg (*mū'-len-bĕrk*), **Heinrich Melchior,** American clergyman, and founder of the German Lutheran church in America, was born at Eimbeck, Germany, 1711. He studied at Göttingen and Halle; was pastor of a Lutheran church in Lusatia, 1739–41, and settled in Pennsylvania, 1742, as a missionary. In 1748 he was instrumental in forming the first American Lutheran synod. In 1762, while he resided in Philadelphia, he formulated the constitution for the Lutheran congregation there, which was subsequently adopted by many others. He died in 1787.

Muhlenberg (*mū'-len-bûrg*), **John Peter Gabriel,** American general, son of the preceding, was born in Pennsylvania, 1746. He was pastor at Woodstock, Va., and formed a regiment among his parishioners. He was made brigadier-general in 1777, and major-general at the close of the revolution. In 1785 he became vice-president of Pennsylvania, and was a member of congress, 1789–91, 1793–95, and 1799–1801. Died, 1807.

Muir, John, geologist, naturalist, born in Scotland, 1838; educated in Scotland and at University of Wisconsin. Discovered Muir glacier, Alaska; visited the arctic regions on the United States steamer Corwin in search of the DeLong expedition; has devoted many years to cause of forest preservation. Member of many learned societies. Traveled in Asia, Australasia, South America and Africa. Author: *The Mountains of California; Our National Parks; Stickeen, the Story of a Dog; My First Summer in the Sierra*, and many scientific articles.

Müller (*mül'-ĕr*), **Friedrich Max,** British philologist and orientalist, was born in Dessau, 1823, son of a German poet, Wilhelm Müller. He was educated at Leipzig; studied at Paris, and settled in England in 1846. He was appointed Taylorian professor at Oxford in 1854, and 1868–75 was professor of comparative philology there, a science to which he had made large contributions. Besides editing the *Rig-Veda*, he has published *Lectures on the Science of Language*, and *Chips from a German Workshop*, dealing not merely with the origin of languages, but with the early religious and social systems of the East; *The Origin and Growth of Religion; Comparative Mythology; Lectures on the Science of Language; Biographical Essays*, etc. He was chief editor of the very important series of works entitled *The Sacred Books of the East*. He was a member of the British privy council. Died, 1900.

Mulock (*mū'-lŏk*), **Dinah Maria** (Mrs. Craik), English author, was born at Stoke-upon-Trent, 1826. Settling in London at twenty, she published *The Ogilvies; Olive; The Head of the Family*, and *Agatha's Husband*. She never surpassed or even equaled her *John Halifax, Gentleman*, published in 1857, which has been translated into French, German, Italian, Greek, and Russian. In 1865 she married George Lillie Craik, and spent a period of quiet happiness and literary industry at Corner House, Shortlands, Kent, where she died, 1887. Much of her verse is collected in *Thirty Years' Poems*.

Mulock, Sir William, Canadian jurist, chief-justice of the exchequer division of the high court of justice for the province of Ontario since 1905, was born at Bond Head, Canada, 1843. He was graduated at the university of Toronto, 1863; barrister, 1868, and Q. C., 1888. He was first elected to the parliament of Canada, 1882; reëlected 1887, 1891, 1896, 1900, and 1904; was postmaster-general of Canada, 1896–1905, and minister of labor, 1900–05. On his motion, the inter-imperial postal conference adopted penny postage within the empire, 1898. He also introduced and carried through the house of commons a bill establishing the Canadian department of labor, 1900. For some years he was lecturer on equity and law examiner for the law society of upper Canada. He represented the Dominion of Canada at proceedings connected with inauguration of federal parliament of Australia.

Münchhausen (*müngk'-hou-zen*), **Hieronymus Karl Friedrich, Baron von,** member of an ancient and noble German family, who attained a remarkable celebrity by false and ridiculously exaggerated tales of his exploits and adventures, so that his name has become proverbial; was born in Hanover, Germany, 1720. He served as cavalry officer in Russian campaign against Turks, 1737–39. The title of the tales ascribed to him is *Baron Münchhausen's Narrative of His Marvelous Travels and Campaigns in Russia*. Died, 1797.

Munroe, Charles Edward, American chemist, educator, was born at Cambridge, Mass., 1849. He was graduated at Harvard, S. B., 1871; Ph. D., Columbian, 1894; was assistant in chemistry, Harvard university, 1871–74; professor of chemistry at United States naval academy, 1874–86; chemist to torpedo corps, United States naval torpedo station and war college, 1886–92; head professor of chemistry since 1892, and dean of faculty of graduate studies, George Washington university; expert special agent in charge of chemical industries of the United States for censuses of 1900, 1905, and 1910. He is the inventor of smokeless powder and an authority on explosives; author of over 100 books and papers on chemistry and explosives. President of American chemical society, 1898–99; fellow of London and Berlin chemical societies, etc.

Munsey, Frank Andrew, American publisher, was born in Mercer, Me., 1854. He was educated in the public schools of Maine, and started his business career in a country store. He became manager of the Western Union telegraph office, Augusta, Me.; went to New York, 1882, and started *The Golden Argosy,* a juvenile weekly, now the adult monthly, *The Argosy;* in 1889 he launched *Munsey's Weekly,* converted in 1891 into *Munsey's Magazine;* now also owns *The All-Story Magazine,* and other papers. Author: *Afloat in a Great City; The Boy Broker; A Tragedy of Errors; Under Fire; Derringforth,* etc.

Münsterberg (*mün′-stẽr-bĕrᴋ*), **Hugo,** German-American psychologist, educator, and author, was born at Danzig, Germany, 1863. He was graduated at Danzig gymnasium, 1882; pursued post-graduate studies in philosophy, natural sciences, and medicine in Leipzig and Heidelberg, 1882–87; Ph. D., Leipzig, 1885, M. D., Heidelberg, 1887; A. M., Harvard, 1901; LL. D., Washington university, 1904. He was instructor in the university of Freiburg, Germany, 1887; assistant professor in same, 1891; professor of psychology since 1892, and director of psychological laboratory, Harvard. Author: *Psychology and Life; Gründzüge der Psychologie;* and other works in German; *American Traits; The Americans; Principles of Art Education; Eternal Life; Science and Idealism; Eternal Values,* etc., and has been a frequent contributor to magazines, educational and psychological publications, etc. Editor of *Harvard Psychological Studies* since 1903.

Murat (*mü′-rä′*), **Joachim,** celebrated French marshal, was born at La Bastide, near Cahors, France, 1771. He was one of the best generals of Napoleon I., and one of his most devoted adherents. Originally the son of an innkeeper, he rose by his bravery and by his services to the emperor, until at last, having married Napoleon's sister Caroline, he was made, in 1808, king of Naples, under the style of Joachim I. Napoleon. In 1812 he accompanied the great army to Moscow, in command of the cavalry, and again commanded the cavalry at the battle of Leipzig, in the following year. After the return of Napoleon from Elba, he led an army against the Austrians, whom he encountered at Tolentino, in upper Italy, but was signally defeated, losing at once his army and his throne. Subsequently he landed with a few followers on the coast of Calabria, but was again defeated, captured, and, after trial by court-martial, shot at Pizzo, dying with the same bravery he had exhibited during life, 1815.

Murfree, Mary Noailles (Charles Egbert Craddock), author, was born in Murfreesboro, Tenn., 1850, daughter of William L. Murfree. For years she concealed her identity and sex under her pen-name. Author: *In the Tennessee Mountains; Where the Battle was Fought; Down the Ravine; The Prophet of the Great Smoky Mountain; In the Clouds; The Story of Keedon Bluffs; The Despot of Broomsedge Cove; In the "Stranger-People's" Country; His Vanished Star; The Phantoms of the Footbridge; The Mystery of Witchface Mountain; The Juggler; The Young Mountaineers; The Story of Old Fort Loudon; The Bushwhackers and Other Stories; The Champion; A Spectre of Power; Storm Centre; The Frontiersman; The Windfall,* etc.

Murillo (*mo͞o-rēl′-yō*), **Bartolomé Estéban,** Spanish painter, was born in Seville, Spain, 1617. In 1646 he finished painting the little cloister of St. Francis; and the manner in which he executed it produced the greatest astonishment among his countrymen. His picture of the "Death of Santa Clara" and that of "St. James Distributing Alms" crowned his reputation. In the first he showed himself a colorist equal to Van Dyck, and in the second a rival of Velasquez. They obtained him a multitude of commissions, which procured him an independent fortune. He enriched the churches and convents of Seville and other cities with numerous works. His greatest picture is probably that of the "Immaculate Conception." Having been invited to Cadiz to paint the grand altar of the Capuchins, he there executed his celebrated picture of the "Marriage of St. Catharine." As he was about to finish it he injured himself severely by a fall from the scaffolding, and died soon after from the effects of the accident, in Seville, 1682.

Murray, Sir James Augustus Henry, British philologist, was born at Denholm, 1837. He was graduated from the London university; was a schoolmaster at Hawick, foreign correspondent in the Oriental bank at London, and then master at Mill Hill school. His *Dialect of the Southern Counties of Scotland* established his reputation as a philologist. The great work of his life, the editing of the philological society's *New English Dictionary,* was begun at Mill Hill, 1879, and has been continued at Oxford. This dictionary is designed to be the most complete and exhaustive in the English language. He was knighted in 1908.

Murray, John Clark, Canadian educator and writer, professor of moral philosophy, McGill university, Montreal, since 1872, was born in 1836. He was educated at the universities of Glasgow, Edinburgh, Heidelberg, and Göttingen, and was appointed to the professorship of philosophy in Queen's university, Kingston, Canada, 1862. Author: *Outline of Sir W. Hamilton's Philosophy; The Ballads and Songs of Scotland in View of Their Influence on the Character of the People; A Handbook of Psychology; An Introduction to Ethics; An Introduction to Psychology;. A Handbook of Christian Ethics;* and numerous articles in periodicals.

Murray, Lindley, American grammarian, was born at Swatara, Pa., 1745. He was educated at a Quaker school at Philadelphia. At first in a New York counting-house, he studied law, and was admitted to the bar; but during the revolutionary war he amassed a fortune in commerce. In 1784, his health failing, he went to England and purchased an estate near York. From 1785 he was crippled by a fever. In 1787 he published his *Power of Religion on the Mind.* His *English Grammar,* long a standard, was followed by *English Exercises,* an *English Reader,* etc., besides *A Compendium of Faith and Practice, The Duty and Benefit of a Daily Perusal of the Scriptures,* and an autobiography. Died, 1826.

Musset (*mü′-sĕ′*), **Louis Charles Alfred de,** French poet, was born in 1810. In 1828 he received a prize for a Latin dissertation. His first work was *Les contes d'Espagne et d'Italie;* his next, *Le spectacle dans un fauteuil.* His morbid and skeptical views of life mar to some extent the beauty of his exquisite poem, *Rolla,* and of his *Confession d'un enfant du siècle.* His *Poésies nouvelles* contain his *Strophes à la Malibran,* and his *Nuits,* which are regarded as his finest lyrics. In 1841 he answered Becker's German war song, *Sie sollen ihn nicht haben, den freien Deutschen Rhein,* with a poem entitled *Nous l'avons eu,* *votre Rhin allemand.* He was librarian in the ministry of the interior for several years before 1848, and was restored to his office in 1852, with the title of reader to the empress. He wrote also several dramas, but they were less successful than his poems. His complete works appeared in ten volumes in 1865-66. Died, 1857.

Mutsuhito (*mŏŏt'-sŏŏ-hē'-tō*), emperor of Japan, was born in 1852, ascended the throne in 1867, and married Princess Haruko in 1869. His reign has been marked by great reforms; and the feudal system, which had impeded the general progress of the country, was abolished in 1871. Under the rule of the present emperor, Japan has entered upon an unprecedented era of prosperity. Civilization has made rapid progress, and the introduction of western arts and ideas has secured for Japan the foremost place among Asiatic nations. He has given the Japanese a parliamentary constitution based on European principles. Died, 1912.

Myers, Philip Van Ness, author, historian, was born at Tribes' Hill, N. Y., 1846. He was graduated at Williams college, 1871; LL. B., Yale, 1890; L. H. D., Miami university, 1891. He was president of the Farmers' college, Ohio, 1879–90; professor of history and political economy, university of Cincinnati, 1890–1900; dean academic faculty, university of Cincinnati, 1895–97. Author: *Life and Nature Under the Tropics; Remains of Lost Empires; Ancient History; Mediæval and Modern History; General History; Eastern Nations and Greece; History of Rome; History of Greece; Rome, Its Rise and Fall; The Middle Ages; The Modern Age,* etc.

Myrick, Herbert, publisher, editor, author, was born at Arlington, Mass., 1860. He was graduated at the Massachusetts agricultural college, Amherst, Mass., 1882. He was a writer for the *New England Homestead,* of which he became agricultural editor, upon graduation, also agricultural editor, 1884, *Farm and Home.* He is now president and editor of Phelps publishing company; for several years director of *Good Housekeeping*; was vice-president of the Orange Judd company and managing editor of *American Agriculturist* at New York, 1888, and *Orange Judd Farmer* at Chicago, 1894; president, editor, and manager of Orange Judd company, New York, since 1891. Author: *How to Coöperate; Turkeys, How to Grow Them; Mortgage Lifters; Tobacco Leaf; Key to Profitable Stock Feeding; The American Sugar Industry; The Hop; The Crisis in Agriculture; The Book of Corn; A Swim for Life; Cache la Pandre,* etc.

Nadir Shah (*nä'-dĕr shä*), Persian ruler, belonging to the Afshars, a Turkish tribe, was born near Kelat, in Khorassan, Persia, 1688. Having been degraded and punished for some real or supposed offense, he betook himself to a lawless life, and for several years was the daring leader of a band of 3,000 robbers, who levied contributions from almost the whole of Khorassan. He was sent against the Turks in 1731, and defeated them at Hamadan, regaining the Armenian provinces which had been seized by the Turks in the preceding reign; but his sovereign having, in his absence, engaged unsuccessfully the same enemy, Nadir caused him to be put in prison, and elevated his infant son, Abbas III. to the throne in 1732. The death of this puppet, in 1736, opened the way for the elevation of Nadir himself, who was crowned as Nadir Shah, 1736. He invaded India, took Delhi in 1739, and seized the Koh-i-noor diamond and the peacock throne. His last years were marked by rapacity and oppression, and he fell at last under the hand of an assassin, 1747. He is still reckoned by the Persians, however, as one of their great national heroes.

Nagel, Charles, lawyer, secretary of commerce and labor, 1909–13; was born in Colorado county, Texas, 1849. He left his home in 1863 as a result of the civil war, accompanying his father to old Mexico, and from there, by way of New York, to St. Louis. He was graduated from the St. Louis law school in 1872; attended the university of Berlin, 1873, and was admitted to the bar the same year. He was a member of the Missouri legislature from 1881 to 1883; president of the St Louis city council from 1893 to 1897; lecturer, St. Louis law school, 1885-1909. He has taken an active part in politics for the last twenty years, and has delivered addresses before bar associations and similar organizations upon various topics of public interest.

Nansen (*năn'-sĕn*), **Fridtjof,** arctic explorer, was born in Norway, 1861, and was graduated from the university of Christiania, Ph. D., 1888. He started on his first arctic expedition in 1882, and in May, 1888, undertook his celebrated journey across Greenland, which he accomplished in forty-six days. The highest altitude registered was over 10,000 feet with a temperature of from 80° to 90° below zero. In 1893 the Norwegian Storthing voted $50,000, and the king of Norway and Sweden gave $50,000 more for a new expedition in search of the north pole. In 1893 Nansen sailed in the *Fram* to make an examination of the entire polar regions, and penetrated farther north than any of his predecessors. He then became professor of zoölogy at Christiania university; took an active part in the separation of Norway and Sweden in 1905, was minister for Norway at the court of St. James, 1906–08; professor of oceanography, Christiania university, since 1908. Author: *Across Greenland; Eskimo Life; Farthest North; The Norwegian North Polar Expedition; Scientific Results; Norway and the Union with Sweden;* also various scientific works.

Napier (*năp'-yĕr; nă-pēr'*), **Sir Charles,** British admiral, was born at Merchiston hall near Falkirk, 1786, cousin to the hero of Sind. At thirteen he went to sea; in 1808 received the command of the *Recruit,* and for his share in capturing a French line-of-battle ship received a post-captaincy. He served as a volunteer in the peninsular army. Commanding the *Thames* in 1811, he inflicted great damage upon the enemy in the Mediterranean. In 1814 he led the way in the ascent of the Potomac, and took part in the operations against Baltimore. In command of the fleet of the young queen of Portugal, he defeated the Miguelite fleet and placed Donna Maria on the throne. In the war between the porte and Mehemet Ali he stormed Sidon, defeated Ibrahim Pasha in Lebanon, attacked Acre, blockaded Alexandria, and concluded a convention with Mehemet Ali. He also commanded the Baltic fleet in the Russian war; but the capture of Bomarsund failed to realize expectations, and he was superseded. He twice sat in the British parliament, and, until his death at his Hampshire seat, Merchiston hall, in 1860, he labored to reform the naval administration.

Napier, Sir Charles James, British general, the conqueror of Sind, was born at London, 1782. He served during the Irish rebellion, and at the battle of Corunna was five times wounded and taken prisoner. He then returned to England and gave himself to literary work, but in 1811 went to the Iberian peninsula, where he took part at Coa, Busaco, where his jaw was broken and eye injured by a shot, Fuentes d'Oñoro, and Badajoz. He also took part in the Anglo-American war of 1812. From 1822–30 he was governor of Cephalonia; in 1838, a K. C. B., and in 1841 was sent to India to command the army of Bombay against the ameers of Sind. Here he destroyed the fortification of Emaun Ghur, 1843, followed by the battle of Meanee (Miani), where, with 2,800 English and Sepoys, he defeated 22,000 Baluchs. After the annexation he was appointed governor of Sind, but differences with the authorities caused him to return to England in 1847. He died near Portsmouth, 1853.

Napier (*nā′-pĕr*). **John,** Scottish mathematician, inventor of logarithms, was born at Merchiston castle, Edinburgh, in 1550. He matriculated at St. Andrews in 1563, traveled on the continent, and settled down to a life of literary and scientific study. In 1593 he published his *Plain Discovery of the Whole Revelation of Saint John,* which was translated into Dutch, French, and German. He made a contract with Logan of Restalrig for the discovery of treasure in Fast castle, in 1594, devised warlike machines for defense against Philip of Spain, and recommended salt as a fertilizer of land. He described his famous invention of logarithms in *Mirifici Logarithmorum Canonis Descriptio,* in 1614, and the calculating apparatus called "Napier's bones" in *Rabdologiæ seu Numerationis per Virgulas libri duo,* 1617. Died at Merchiston, 1617.

Napier of Magdala, Robert Cornelis Napier, Lord, British general, was born at Colombo, Ceylon, 1810. He was educated at Addiscombe, entered the Bengal engineers in 1826, served in the Sutlej campaign, was wounded at Multan, and fought in the battle of Gujrat. As chief engineer of the Punjab he greatly developed the resources of the country. During the Indian mutiny he was chief engineer in Sir Colin Campbell's army, distinguished himself at the siege of Lucknow, and was made K. C. B. He received the thanks of parliament for his services in the Chinese war of 1858. For his brilliant conduct of the expedition in Abyssinia in 1868 he received the thanks of parliament and an annuity of 2,000 pounds, and was made G. C. B. and Baron Napier of Magdala. In 1870 he became commander-in-chief in India and a member of the Indian council, and was subsequently governor of Gibraltar, field-marshal, and constable of the Tower. He died in 1890, and was buried in St. Paul's.

Napier, Sir William Francis Patrick, brother of Sir Charles, was born near Dublin, 1785. He served in the peninsular campaign and retired as a lieutenant-general. He wrote a famous *History of the War in the Peninsula, The Conquest of Scinde,* and the *Life of Sir Charles Napier.* He died at Clapham, London, 1860.

Napoleon I. See page 485.

Napoleon III., or Charles Louis Napoleon Bonaparte, emperor of the French, was born in the palace of the Tuileries, Paris, 1808. He was the third son of Louis Napoleon Bonaparte, king of Holland, and of Hortense Beauharnais, daughter of Empress Josephine. His youth was spent chiefly in Switzerland, and devoted to military studies, and to the preparation of political treatises. In 1830, however, he took part in a revolutionary movement in Italy, and in 1836 entered France; but, seeking to arouse the soldiery at Strassburg in his favor, he was taken prisoner and transported to the United States. He returned in the following year to Switzerland; but France demanded his extradition, and he speedily sought refuge in England, where he remained for three years. In 1840 he landed at Boulogne, again hoping to arouse the French soldiery in his favor; for this second attempt he was tried for high treason before the chamber of peers, and received a sentence of perpetual imprisonment in the castle of Ham. In 1846 he escaped from Ham in the disguise of a workman, and once more took up his residence in London. In 1848, on the abdication of Louis Philippe, the provisional government permitted his return to France. In June of that year he was elected to the national assembly for the department of Seine and for three other departments; and in the following December he was elected by an immense majority president of the newly-constituted republic. In December, 1851, the famous *coup d'état* took place, and Louis Napoleon secured his election as president for ten years; but a year later he again appealed to the people, and obtained an almost unanimous vote for the restoration of the empire. In 1854 he joined England and Turkey in the war against Russia. In 1859 he entered upon the war with Austria on behalf of Italy, which ended in the treaty of Villafranca, 1859. This was followed by the annexation of Savoy and Nice to France, 1860. He occupied Mexico in 1863, but the sad issue of that occupation was the execution of the emperor Maximilian in 1867. In 1870 the Franco-Prussian war broke out, which led to the surrender of the emperor and his army at Sedan, and to the ultimate reëstablishment of the republic. He died at Chiselhurst, England, 1873.

Narses (*năr′-sēz*), Byzantine statesman and general, was born toward the last quarter of the fifth century. From a menial office in the imperial household at Constantinople he rose by successive steps to the post of private chamberlain to the emperor Justinian, and ultimately to that of keeper of the privy purse. In the difficult art of courtiership Narses long maintained preëminence. In 538 he was sent to Italy in command of a body of troops, professedly to act in concert with Belisarius; but in reality, it is conjectured, with a secret commission to observe and control that general. After some successes Narses, having disputed with Belisarius, assumed an independent authority; but his separate command was unfortunate, and he was recalled to Constantinople in 539. After some years, however, Belisarius was recalled, and Narses was appointed to the chief command in Italy. Narses took possession of Rome, and after a series of successes, both in southern and northern Italy, completely extinguished the Gothic power in that peninsula. Justinian appointed Narses exarch of Italy in 554, and he resided at Ravenna until his death in 568.

Navarro (*nä-vär′-rō*), **Mary Anderson de,** American actress, was born in Sacramento, Cal., 1859. Her mother was of German descent and her father was a confederate officer who fell in the civil war. She was reared at Louisville, Ky., educated in Ursuline convent and Presentation academy there. She made her début as Juliet at McAuley's theater, Louisville, 1875. She had great success in leading legitimate rôles in the United States and England until 1889, when she married Antonio de Navarro, and retired from the stage. She has since lived in England. Author: *A Few Memories.*

Neander (*nā-ăn′-dĕr*), **Johann August Wilhelm,** noted German ecclesiastical historian, was born at Göttingen, 1789, of Jewish parents, named Mendel. He received his early education at the Johanneum in Hamburg, and had for companions Varnhagen von Ense, Chamisso the poet, Wilhelm Neumann, Noodt, and Sieveking. In 1806 he publicly renounced Judaism, and was baptized, adopting, in allusion to the religious change which he had experienced, the name of Neander. In 1811 he took up his residence at Heidelberg university as a privat docent; in 1812 he was appointed professor of theology; and the following year was called to the newly established university of Berlin as professor of church history. Here he remained until his death in 1850.

He enjoyed immense celebrity as a lecturer. As a Christian scholar and church historian he ranks among the first of the nineteenth century. The most important work of his life was his *Universal History of the Christian Religion and Church*, in 6 vols. His *Life of Jesus Christ in Its Historical Relations* was an able refutation of the well-known work of Strauss. He was also the author of *The Emperor Julian and His Times*, and *Memorable Occurrences from the History of Christianity and Christian Life.*

Nearchus (*nē-är'-kŭs*), Macedonian naval commander, was a native of Crete, who settled in Amphipolis during the reign of Philip, and became the companion of the young Alexander the Great. In 330 B. C. he was governor of Lycia; in 329 he joined Alexander in Bactria with a body of Greek mercenaries, and took part in the Indian campaigns. Having built a fleet on the Hydaspes, Alexander gave Nearchus the command. He left the Indus in November, 325, and, skirting the coast, reached Susa in 324. His narrative is preserved in the *Indica* of Arrian.

Nebuchadnezzar (*nĕb'-ū-kăd-nĕz'-ăr*), king of ancient Babylon, was born about 645 B. C. He was the son of Nabopolassar, and, being sent by him against Necho, king of Egypt, he defeated Necho and conquered Palestine. In 604 B. C. he became king, took Jerusalem about 606, and made Zedekiah king as his vassal. Zedekiah soon rebelled, and Nebuchadnezzar again took Jerusalem, after a terrible siege, destroyed the temple, threw down the walls of the city, and carried the people captives to Babylon. He took Tyre after a siege of thirteen years, overran Egypt, and became one of the most powerful sovereigns of his time. Among the captives whom he carried to Babylon was the Hebrew prophet Daniel, who tells much about him in the book of *Daniel*. He died about 561 B. C.

Necker (*nĕ'-kâr'*), **Jacques**, French financier and statesman, was born at Geneva, 1732, and was for many years a banker at Paris. His *Eulogy on Colbert*, his *Treatise on the Corn Laws and Trade*, and some *Essays on the Resources of France* inspired such an estimate of his talents for finance, that, in 1776, he was appointed director of the treasury, and, shortly after, comptroller-general of France. Before his resignation in 1781, he published a statement of his operations, addressed to the king; and while in retirement produced a work on the administration of the finances, and another on the importance of religious opinions. He was reinstated in the comptrollership in 1788, and advised the convocation of the states-general; was abruptly dismissed, and ordered to quit the kingdom in 1789; but was almost instantly recalled, in consequence of the ferment which his departure excited in the public mind. Necker, however, soon became as much an object of antipathy to the people as he had been of their idolatry, and in 1790 he left France forever. He died at Coppet, in Switzerland, 1804. The whole of his works form fifteen volumes.

Needham, Charles Willis, American lawyer and educator, was born in Castile, N. Y., 1848. He received an academic education, and was graduated at the Albany law school, 1869; LL. D., university of Rochester, Georgetown college, Kentucky. He practiced law in Chicago, 1874–90, and at Washington, 1890–97. He assisted in organizing Chicago university, and was one of the board of trustees; was elected professor of law, 1897, at the Columbian university, Washington, D. C.; organized, and was elected dean of the school of comparative jurisprudence and diplomacy, 1898; became professor of transportation and interstate commerce in school of comparative jurisprudence and diplomacy, and was president of the George Washington university (formerly Columbian), 1902–10; lecturer upon legal ethics, trusts, and trades unions. He is a member of the American economic association, and many other learned and educational societies. Delegate to Congrès International de Droit Comparé, 1900; delegate to Congrès International des Chemins de Fer; delegate to Congrès International d'assistance publique et de Bienfaisance Privée, Paris; speaker upon jurisprudence, congress of arts and sciences, St. Louis exposition, 1904. Author of several pamphlets on education, law, and jurisprudence, a contributor to periodicals, and author of numerous legal and educational addresses.

Nehemiah, Jewish reformer, was a Jew of the captivity, of royal degree and in high favor, and was the king's cup-bearer at the court of Artaxerxes, the Persian king. He received a commission from the king to repair to Jerusalem and restore the Jewish worship, and ruled over it for twelve years, until he saw the walls of the city, amid much opposition, restored. He subsequently returned to superintend the reform of the worship, of which the book of the old testament, named after him, relates the story.

Neill, Charles P., American economist and educator, was born at Rock Island, Ill., 1865. He was educated at the university of Notre Dame, Ind., 1885–88, university of Texas, 1888–89, and was graduated from Georgetown university, D. C., 1891; attended Johns Hopkins university, 1894–97, Ph.D., 1897. He was instructor in the university of Notre Dame, 1891–94; instructor and associate professor and professor of political economy, Catholic university, Washington, 1897–1905, and United States commissioner of labor, 1905–13. Vice-president board of charities, D. C., 1900–08. Assistant recorder of anthracite strike commission, 1902; recorder of arbitration board, Birmingham, 1903, and member of the United States immigration commission, 1907–10.

Neilson (*nēl'-sŭn*), **Lillian Adelaide**, English actress, was born in Leeds, Yorkshire, England, 1848. Her real name was Elizabeth Ann Brown, though she was sometimes called Bland, that being the name of her step-father. She made her début as Juliet when only seventeen years old; appeared as Amy Robsart in 1870, in London, with immense success, and by 1878 stood at the head of her profession. In 1872 she came to the United States, playing in Booth's theater, New York, and in Boston, where she was equally successful. She made four visits to the United States, her last one being in 1880. She died in Paris, France, 1880.

Nelson, Horatio, Viscount, famous English admiral, was born at Burnham-Thorpe, Norfolk, 1758. He entered the navy as a midshipman in 1770, and after voyages to the West Indies, the Arctic regions, and the East Indies, was promoted to a lieutenancy in 1777. Three years later he headed the expedition against San Juan, was invalided home, and in 1782 acted under Lord Hood in American waters. While in command of the *Boreas* on the Leeward islands station, he involved himself in trouble through his severe and arbitrary enforcement of the navigation act against American traders. He then returned home and lived for five years in retirement, but on the eve of the French revolutionary war he was again summoned to active service; in command of the *Agamemnon*, he advanced his reputation by gallant conduct in the Mediterranean operations by Lord Hood, losing his right eye during the storming of Calvi, in Corsica. His conspicuous bravery at the engagement with the Spaniards off Cape St. Vincent in 1797 brought him to the rank of rear-admiral. In the same year he lost his right arm at Santa Cruz, and in the following year, with an inferior force, annihilated the French fleet in the bay of Aboukir, for which he was raised to the peerage as Baron Nelson, and created duke of Bronte by the king of Naples. In 1800 he returned home, his never robust strength considerably impaired. As vice-admiral, nominally under Sir Hyde Parker, he, in 1801, sailed for the Baltic and Copenhagen. For this he was made viscount and commander-in-chief. During the scare of a Napoleonic invasion he kept a vigilant watch in the channel, and, on the resumption of war, he in 1805 crowned his great career by a memorable victory off Trafalgar over the French fleet commanded by Villeneuve, but was himself mortally wounded at the very height of the battle, dying in 1805.

Nelson, Knute, lawyer, United States senator, was born in Norway, 1843. He came to the United States in 1849, and resided in Chicago, Ill., until the fall of 1850; removed to the state of Wisconsin, and from there to Minnesota, 1871. He was a private and noncommissioned officer in the 4th Wisconsin regiment during the war of the rebellion, and was wounded and taken prisoner at Port Hudson, La., 1863. He was admitted to the bar in the spring of 1867; was a member of the assembly in the Wisconsin legislature, 1868 and 1869; county attorney of Douglas county, Minn., 1872, 1873, and 1874; state senator, 1875, 1876, 1877, and 1878; presidential elector, 1880; member of board of regents of the state university, 1882–93; member of the forty-eighth, forty-ninth, and fiftieth congresses for the 5th district of Minnesota; elected governor of Minnesota in the fall of 1892 and reëlected in the fall of 1894; elected United States senator for Minnesota, 1895, and reëlected in 1901, 1907, and 1913.

Nepos (*nĕ'-pŏs*), **Cornelius,** Roman historian, was born probably at Verona, Italy, and flourished during the time of Julius Cæsar and the first six years of the reign of Augustus. He enjoyed the friendship of Cicero, and his only extant work, *Vitæ Excellentium Imperatorum,* is held in high esteem as an educational classbook.

Nernst (*nĕrnst*), **Walther,** German chemist and physicist, was born at Briesen, Prussia, 1864. He was educated at Zürich, Berlin, and Würzburg; was assistant to Professor Ostwald at Leipzig, 1887; appointed professor of physics at Göttingen in 1891, where in 1895 he organized the institute for physical and electro-chemistry, of which he became director in 1905. His work in electricity and chemistry is of a high order, and his treatise on *Theoretical Chemistry* has been translated into a number of languages. He is the inventor of the Nernst electric lamp.

Nero, Claudius Cæsar Drusus Germanicus, Roman emperor, was born at Antium, in Latium, A. D. 37. His original name was Lucius Domitius. His father was Domitius Ahenobarbus, a Roman consul, and his mother was Agrippina, daughter of the emperor Germanicus. He was adopted by the emperor Claudius, who married Agrippina, A. D. 50, and four years later he succeeded Claudius on the throne, which he occupied for fourteen years. His whole reign was characterized by licentiousness, brutality, and cruelty. He put his mother to death in order to please one of his mistresses, on the plea that she had plotted against him; and he afterward murdered his wife, Octavia, in order that he might marry the same mistress. The great fire in Rome happened in Nero's reign, and it is asserted by some writers that the city was set on fire by the order of Nero, who attributed the fire to the Christians, and persecuted them with the most unrelenting cruelty. He afterward kicked Poppæa Sabina (the mistress whom he had married) to death; murdered Antonia, the daughter of Claudius, because she refused to marry him; and finally married Statilia Messalina, whose husband he had killed. The philosopher Seneca, who had been his tutor, and the poet Lucan were also put to death by his order. At length a formidable conspiracy was raised against him, and he fled to a house about four miles from Rome, where he put an end to his own life on hearing the trampling of the horses on which his pursuers were mounted, 68 A. D.

Nesselrode (*nĕs'-ĕl-rō'-dyĕ*), **Karl Robert, Count,** Russian diplomat, was born at Lisbon, Spain, 1780, son of the Russian ambassador. He gained the confidence of Emperor Alexander, took a principal part in the negotiations which ended in the peace of Paris, and in the congress of Vienna, and was one of the most active diplomats of the holy alliance. He dealt a deadly blow to the revolutionary cause in Hungary in 1849; exerted himself to preserve peace with the western powers, and in 1854 strove for the reëstablishment of peace. Died, 1862.

Nestorius (*nĕs-tō'-rĭ-ŭs*), celebrated heresiarch, was born in Syria. He was made patriarch of Constantinople in 428, deposed for heresy by the council of Ephesus, 431, and banished to the Lybian desert, where he died after 439. The heresy he taught, called after him Nestorianism, was that the two natures, the divine and the human, coexist in Christ, but are not united, and he would not allow to the Virgin Mary the title that had been given to her as the "mother of God." The orthodoxy of the church as against the doctrine was championed by Cyril of Alexandria.

Nethersole (*nĕTH'-ẽr-sōl*), **Olga,** English actress, was born in London, 1870, daughter of Henry Nethersole. She was educated privately in London, Holland, and Germany, and made her professional début at the Theater Royal, Brighton, in Henry Hamilton's drama, *Harvest,* 1887. She then joined the Garrick theater under John Hare's management in 1889; visited Australia on starring tour, 1890; was lessee and manager of the Court theater, London, 1894; several times visited the United States on starring tours, and as manager of her own company; was manager of Her Majesty's theater, London, 1898, when she produced *The Termagant,* and was manager of the Adelphi theater, London, during 1902, where she produced *Sapho,* and also of the Shaftesbury theater, 1904.

Nevada (*nĕ-vă'-dȧ*), **Emma,** née Emma Wixon, prima donna, was born at Austin, Nev., 1861. She studied under Mme. Marchesi, Paris, and made her début at Her Majesty's theater, London, 1880, as Amina in *La Sonnambula.* She sang in Italy in 1883, appearing as Mysole in *La Perle de Bresil,* and afterward as Mignon; sang at Norwich festival, 1884, and in 1885 made a tour of the United States. She subsequently sang in America and in Europe. In 1885 she married Dr. Raymond Palmer, and now lives in Paris.

Nevin, Ethelbert, American composer, was born at Edgeworth, Pa., 1862. As a child he was a remarkable pianist; later he studied in Europe under Van Böhme, Von Bülow, and Klindworth, exhibiting a rare gift for composition. From 1887 to 1893 he taught in Boston, then went to southern Europe to study until 1900 when he returned and associated himself with H. W. Parker at Yale. His compositions, all cast in miniature form, are characterized by dainty originality and exquisite melody. *Narcissus,* among a group entitled *Water Scenes,* and a song, "The Rosary," are perhaps the most popular. He died in 1901 at New Haven.

Newcomb (*nū'-kŭm*), **Simon,** American astronomer and mathematician, was born in Wallace, N. S.,

1835. He came to the United States in 1853; was graduated at Lawrence scientific school, Harvard, 1858, and was appointed, 1861, professor of mathematics, United States navy; LL. D., Columbian, Yale, Harvard, Columbia, Edinburgh, Glasgow, Princeton, Cracow, Johns Hopkins, Toronto; Sc. D., Heidelberg, Padua, Dublin, Cambridge; doctor of mathematics, Christiania; D. C. L., Oxford; master of mathematics and doctor of natural philosophy, Leyden. He was assigned to duty at United States naval observatory; professor of mathematics and astronomy, Johns Hopkins, 1884–94, and editor of *American Journal Mathematics.* In 1874 he was made correspondent, and after 1893 was one of the eight foreign associates of the institute of France; made officer of legion of honor of France, 1893. Author: *Secular Variations and Mutual Relations of the Orbits of the Asteroids; Investigation of the Orbit of Neptune; Researches on the Motion of the Moon; Popular Astronomy; Calculus; A Plain Man's Talk on the Labor Question; Principles of Political Economy; Elements of Astronomy; His Wisdom the Defender; The Stars; Astronomy for Everybody; Reminiscences of an Astronomer; Spherical Astronomy; Side Lights on Astronomy;* and various other books on astronomical and economical topics, magazine articles, etc. He also published the tables of the motions of the stars, the planets, and the moon now used by astronomers in their computations and as the basis of the navigation of the vessels of the world. Died, 1909.

Newlands, Francis Griffith, lawyer, United States senator, was born in Natchez, Miss., 1848. He entered the class of 1867 at Yale college and remained until the middle of his junior year; attended Columbian law school, Washington, and was admitted to the bar by the supreme court of the District of Columbia and went to San Francisco, where he entered upon the practice of law and continued in the active practice of his profession until 1888, when he became a citizen of the state of Nevada. He was elected to the fifty-third, fifty-fourth, fifty-fifth, fifty-sixth, and fifty-seventh congresses, and to the United States senate in 1903 and 1908.

Newman, John Henry, English prelate and author, was born at London, 1801, son of a London banker. He was graduated from Trinity college, Oxford, 1820, and took orders in 1824, when he became vice-principal of St. Alban's hall, and in 1828 became vicar of St. Mary's. He took a leading part in the tractarian movement, and in 1841 wrote *Tract XC.*, which was severely condemned. After living at Littlemore for some years in seclusion, he was received into the Roman Catholic church, 1845; founded the Brompton oratory in 1850, and directed the Edgbaston oratory for the greater part of his remaining years. He took part in controversies with Kingsley in 1864, and Gladstone in 1874, and accepted the infallibility dogma with some reservations. He was created cardinal in 1879. Chief among his works are *Apologia pro Vitâ Suâ; An Essay in Aid of a Grammar of Assent;* and *The Dream of Gerontius.* Died, 1890.

Newton, Sir Isaac. See page 360.

Ney (*nā*), **Michel,** French marshal, was born in Saarlouis, now in Prussia, 1769, the son of a cooper. He entered the army as a private hussar in 1788; became a general of brigade in 1796, and distinguished himself by his bravery in the wars of the revolution and the empire. He earned for himself from the army under Napoleon, and from Napoleon himself, the title of the "brave of the braves." When Napoleon abdicated in 1814 he attached himself to Louis XVIII., but on the former's return from Elba he joined his old master, and stood by him during the hundred days. He was defeated by Wellington at Quatre-Bras, in 1815, and commanded the Old Guard at Waterloo on June 18th. On the second restoration he was arrested, tried by his peers, and shot, December 7, 1815.

Nicholas I., emperor of Russia, third son of Paul I., was born at St. Petersburg, 1796. He was carefully educated, and later devoted himself to military studies and political economy. He traveled over Europe, and after marrying the eldest daughter of Frederick Wilhelm III. of Prussia, and upon the resignation of his elder brother, Constantine, he ascended the throne in 1825. In 1826 the war with Persia began, and on its close occurred the war with Turkey. This was followed by the rising of Poland, which he subdued, and reduced the kingdom to a mere province. His rule now became despotic and fierce. He remained inactive until the Austro-Hungarian rebellion in 1848–49, when he was called in to aid Austria. This strengthened him with the European powers and he began to think of absorbing Turkey. The opposition of the western powers led to the Crimean war, during which he died at St. Petersburg, 1855.

Nicholas II., czar of Russia, was born in St. Petersburg, 1868, son of Alexander III., whom he succeeded in 1894. His education under his father was conducted expressly with a view to what might be required of him on his accession to the throne. During the famine of 1891, he was, at his own request, made president of the committee of succor, and worked hard in the organization of relief. As czarevitch he held several military commands in his own country — in the famous Préobrajensky regiment among others — and in England he had conferred upon him, in 1893, the order of the garter. He married Princess Alix of Hesse-Darmstadt in 1894. Four daughters came first, but a son was born in 1904, and was named Alexis. The coronation of the czar took place with impressive ceremonial at Moscow in May, 1896, and in August of the same year he commenced a tour which included visits to the emperor of Austria and Germany, to the king of Denmark, to Queen Victoria, and to the president of France. The famous peace proposals, which he made to the powers during 1898, led to the first peace conference at The Hague in 1899, the establishment of the permanent court of arbitration there, and indirectly to the second conference in 1907. He is gifted with the linguistic facility of most of his countrymen, and speaks fluently French, German, Italian, and especially English. The czar must belong to the orthodox Greek church, and his consent is necessary to the marriage of any prince or princess of the imperial family. His reign has been marked by the construction of the trans-Siberian railroad to the Pacific coast, by the Russo-Japanese war, by adroit diplomacy with China, by a strong and conservative attitude toward Turkey, as well as toward the European powers, and by the granting of a constitution in 1905.

Nicholas V., pope, Tommaso Parentucelli, was born near Pisa, Italy, 1398. He was educated at Bologna and Florence, went to Rome in 1426, and entered the ecclesiastical service. In 1444 he became bishop of Bologna, and showed such astuteness during the councils of Basel and Florence that he was chosen pope in 1447. He prevailed on the antipope, Felix V., to abdicate, and thus restored the peace of the church in 1449. A liberal patron of scholars, he despatched agents east and west to purchase or to copy important Greek and Latin manuscripts, and may almost be said to have founded the vatican library. He vainly endeavored to arouse Europe to the duty of succoring the Greek empire. Died, 1455.

Nichols, Edward Leamington, American physicist, professor of physics, Cornell, since 1887, was born of American parentage, at Leamington, England, 1854. He was graduated at Cornell in 1875; studied at the universities of Leipzig, Berlin, and Göttingen; Ph. D., 1879; fellow of Johns Hopkins, 1879–80. He was with Edison at Menlo Park, N. J., 1880–81; professor of physics and chemistry, Central university, Ky., 1881–83; and professor of physics and astronomy, university of Kansas, 1883–87. He is editor-in-chief of the *Physical Review*, and author of *The Galvanometer; A Laboratory Manual of Physics and Applied Electricity* (2 vols.); *The Elements of Physics* (3 vols.), with Professor W. S. Franklin; *Outlines of Physics;* and numerous papers in scientific journals on experimental physics.

Nicias (*nĭsh′-ĭ-as*), Athenian statesman and general of the Peloponnesian war, was the son of the wealthy Niceratus. After the death of Pericles, he was the political opponent of Cleon, and later of Alcibiades. In 427 B. C. he defeated the Spartans and Corinthians, and ravaged Minoa, Melos, and Locris. In 424 he ravaged Cythera and part of Laconia. In 415 he was appointed one of the commanders against Sicily, and in the autumn laid siege to Syracuse. At first successful, later his fleet was destroyed, his army began a retreat, and he was captured and put to death in 413 B. C.

Nicoll (*nĭk′-ŭl*), **De Lancey,** American lawyer, was born at Bayside, L. I., N. Y., 1854. He was graduated at Princeton, 1874; Columbia law school, 1876; was admitted to the bar, and has since practiced law in New York city. He was nominated by the Tammany organization for district attorney, 1890; was elected and served three years. He was a member of the constitutional convention, 1894; is now a member of the law firm of Nicoll, Anable and Lindsay, and has appeared in numerous corporation cases.

Niebuhr (*nē′-bo͝or*), **Barthold Georg,** German historian and critic, was born in Copenhagen, 1776, where his parents then resided. He was educated at Kiel and Edinburgh, held several appointments under the Danish government, and entered the Prussian civil service in 1806. At the opening of the university of Berlin, in 1810, he became connected with that institution, and was for many years lecturer on Roman history and antiquities. In 1816 he was appointed Prussian ambassador at Rome. In 1823 he took up his residence at Bonn, where he delivered lectures on history and archæology. His great work is his *History of Rome*, upon which he was engaged for many years. His *Lectures on Roman History*, and several other works, were published after his death by Dr. Schmitz and others, from notes of Niebuhr's *viva voce* lectures. The value of his labors in the field of Roman history is undoubted, but many of his theories, though they obtained wide acceptance for a time, are now held to be untenable. His death was hastened by excitement caused by apprehension as to the political results of the French revolution of 1830. He died at Bonn, 1831.

Niehaus (*nē′-hous*), **Charles Henry,** American sculptor, was born at Cincinnati, Ohio, 1855. He was educated in the Cincinnati schools, and at the royal academy, Munich, Germany. He won numerous prizes and medals for art work and executed the Garfield statue, Cincinnati; Ingalls, Allen, Garfield, and Morton, in rotunda of capitol, at Washington; statues of Gibbon and Moses, Congressional library; Hahnemann at Scott circle, Washington; Astor historical doors, Trinity church, New York; pediment to appellate court house, New York; statues of Hooker and Davenport, Connecticut state house; statue to Drake, erected by Standard oil company, at Titusville, Pa.; two large groups, "Mineral Wealth," Pan-American exposition; "Apotheosis of St. Louis" for St. Louis exposition; statues of Lincoln, Farragut, and McKinley, Muskegon, Mich.; equestrian statue of General Forrest, Memphis. Tenn.; statue of McKinley and lunette for tomb at Canton, Ohio; Benjamin Harrison monument, Indianapolis; pediment state capitol, Frankfort, Ky.; John Paul Jones monument, Washington, etc.

Nielsen (*nēl′-sen*), **Alice,** American opera singer, was born at Nashville, Tenn. She received her musical education in San Francisco, under Mlle. Ida Valerga, and made her first stage appearance with an opera company at Oakland, Cal., 1893, as Yum Yum in *Mikado.* She then joined the Bostonians, 1896, and took the rôle of Annabel in *Robin Hood;* the following season played leading part of Maid Marion, and the principal soprano rôle in *The Serenade.* She made her stellar début at the Grand opera house, Toronto, 1898, in *The Fortune Teller;* later starred in *The Singing Girl*, and played in *The Fortune Teller*, London, 1902. She studied grand opera in Rome, and made her first appearance in grand opera at Bellini theater, Naples, Italy, as Marguerite in *Faust;* appeared at San Carlo opera house, Naples, in *La Traviata*, and at Covent Garden, London, in *Don Giovanni, The Marriage of Figaro, La Bohême*, and *Rigoletto.* She toured the United States in grand opera, 1906–08; with Boston opera company, 1910–11; with Metropolitan opera company since 1910.

Nightingale, Florence, a famous philanthropic nurse, was born at Florence, Italy, 1820, of wealthy English parentage. At the age of twenty-two she entered the institution of Protestant deaconesses at Kaiserswerth to be trained as a nurse, and afterward studied the methods of nursing and hospital management with the sisters of St. Vincent de Paul, Paris. In 1854 she volunteered to organize a staff of nurses during the Crimean war, and, during the terrible winter of 1854-55, she ministered with unwearied devotion to the suffering soldiers. On her return in 1856 she, with public support, established a training college for nurses at St. Thomas's and at King's college hospital. She wrote *Notes on Nursing, Notes on Hospitals*, etc. Died, 1910.

Nikisch (*nĭk′-ĭsh*), **Arthur,** noted Hungarian orchestral conductor, was born in Lébény Szent-Miklós, 1855, and at an early age disclosed extraordinary musical talent. In his eighth year he played the violin in public, and was but eleven when he entered the royal conservatory of music in Vienna. He remained at the conservatory for eight years; was appointed first violinist at the royal opera; and, in 1878, went with Neumann to Leipzig, where he was made assistant conductor and conductor in the Old opera house. In 1889 he succeeded Herr Gericke as conductor of the Boston symphony orchestra, and in 1893 accepted the post of director of the royal opera at Budapest. In 1895 he became conductor of the Leipzig Gewandhaus on the retirement of Reinicke. He is also conductor of the Berlin Philharmonic orchestra, with which he has appeared throughout Europe. He is conceded to be one of the greatest conductors of our time.

Nilsson (*nĭl′-sun*), **Christine** (Comtesse de Miranda), Swedish operatic singer, was born near Wexiö, Sweden, 1843, daughter of a peasant. Her singing at a fair in 1857 so impressed a magistrate of Ljungby that he sent her for a musical education to Stockholm and Paris. She made her début at Paris in 1864, in London, 1867. She soon became one of the foremost soprano singers, and was distinguished for her dramatic talent as well. She repeatedly visited the United States.

In 1872 she married M. Rouzaud, who died in 1882; and in 1887, at Paris, she became the wife of the Count de Miranda, and retired. Her chief successes were in *The Magic Flute*, *Martha*, *Don Juan*, *Faust*, and *Robert the Devil*.

Nixon, George S., banker, United States senator, was born in Placer county, Cal., 1860. He was educated in the public schools of that state; worked on his father's farm until nineteen years of age, when he entered the employ of a railroad company and studied telegraphy. In 1881 he was transferred to Nevada, where he served three years as a telegraph operator, and in 1884 accepted a clerical position in a bank at Reno. He was a member of the Nevada legislature, 1890, and was elected to the United States senate for the terms 1905-11, 1911-17. Died, 1912.

Nixon, Lewis, shipbuilder, was born in Leesburg, Va., 1861. He was graduated at the United States naval academy, 1882. He was sent to the royal naval college, Greenwich, England, by navy department, and transferred to construction corps of navy, 1884. In 1890 he designed the battle-ships *Oregon*, *Indiana*, and *Massachusetts*, and then resigned from navy to become superintending constructor of the Cramp shipyard, Philadelphia, Pa., and in 1895 founded the Crescent shipyard, Elizabeth, N. J., where he has built 100 vessels in six years, among others the sub-marine torpedo-boat, *Holland*, monitor *Florida*, torpedo-boat *O'Brien*, and cruiser *Chattanooga*. He was appointed by Mayor Van Wyck president of East river bridge commission, 1898; appointed, 1902, New York commissioner to Louisiana Purchase exposition, St. Louis; and is a trustee of Webb's academy and home for shipbuilders. He succeeded Richard Croker as leader of Tammany Hall, 1901-02. He is now president of the Standard motor construction company, proprietor of Lewis Nixon's shipyard, etc.

Nobel (*nō-bĕl'*), **Alfred Bernhard**, Swedish chemist and engineer, was born at Stockholm, 1833. His father, a mechanician, resided, 1837–59, in St. Petersburg, and in 1862 began to manufacture nitroglycerine. In 1867 Alfred, who assisted him, discovered through the accidental escape of some nitroglycerine from a cask into the siliceous sand of the packing, how to make a safe and manageable explosive — dynamite. He also invented blasting-jelly and several kinds of smokeless powder. Ultimately he had manufactories at Brefors in Sweden, and experimented on mild steel for armor plates, etc. At his death at San Remo, Italy, in 1896, he left a fortune of over 2,000,000 pounds, most of which he destined to go for annual prizes for those making the most important discoveries in physics, chemistry, physiology, writing the best literature, and accomplishing the most for humanity and peace.

Nodzu (*nō'-dzŏŏ*), **Michitsura, Count**, Japanese general, was born in Satsuma, 1840. He fought on the side of the mikado in the war of restoration, and with imperialists in the Satsuma rebellion. During the war with China he captured Ping-yang; was placed in command of the 5th division; later on appointed commander-in-chief of the first army, and, during the Japanese and Russian war, commander-in-chief of the fourth army. Created a count, 1895. Died, 1908.

Nogi (*nō'-gē*), **Kiten, Count**, Japanese general, was born in Choshu, Japan, 1849. He served in the Satsuma rebellion of 1877, and was twice severely wounded. In the Chinese-Japanese war of 1894-95 he commanded a brigade at the battles of Kin-Chow and Port Arthur, and at its conclusion was promoted lieutenant-general. He commanded the third army in the Russo-Japanese war, and captured Port Arthur, 1905. He was the only Choshu general in command during the Russo-Japanese war. Created baron, 1895, count, 1906. Died, 1912.

Nordau (*nôr'-dou*), **Max Simon**, German physician and writer, of Jewish descent, was born at Budapest, 1849, but is a Prussian subject and a citizen of the German empire. He received his university education at Budapest, Berlin, and Paris, obtained the degree of M. D., traveled over Europe, and has lived in Paris since 1880. He was co-founder and for many years vice-president of the association Litteraire et Artistique Internationale, Paris; a member of the Hellenic national academy, Athens; and first vice-president of the Zionist congresses at Bâle, 1897, 1898, 1899, 1901, 1903, and London 1900. His first book on Paris appeared in 1878; others, more especially two in English translation, *Conventional Lies of the Children of Culture*, and *Degeneration*, were much criticised and led to considerable discussions. They were followed by *The Drones Must Die*. He has also published books in Italian and French, and is one of the greatest of living Jews.

Nordenskjöld (*nô'-ren-shŭl'*), **Nils Adolf Erik, Baron**, Swedish explorer, geologist, was born at Helsingfors, Finland, 1832. He studied at the university of Borgo, and was graduated in 1853 at the university of Helsingfors. He was soon appointed director of the faculty of mathematics and physics, but in 1855 was cashiered for political reasons, and thereupon left the country. In 1858 he was appointed state mineralogist at Stockholm, having obtained letters of naturalization as a Swedish subject. He was a member of the chamber of nobles during the last two assemblies of the Swedish states, and from 1869 to 1871 was a liberal member for Stockholm. After several successive voyages and explorations in the Arctic sea, in which he paid frequent visits to Spitzbergen, where he measured an arc of the meridian, he in 1878-79 discovered the northeast passage by traversing, along the northern shores of Europe and Asia, the whole Arctic sea from the Atlantic to the Pacific. He was created baron in 1880, and is the author of a number of scientific works. Died, 1901.

Nordhoff (*nôrd'-hŏf*), **Charles**, American author, was born at Erwitte, Prussia, 1830. He came to the United States with his parents when a child of five years, and was educated at Cincinnati. He entered the United States navy in 1844, and during a service of three years made a voyage around the world. He afterward joined the commercial marine, remaining at sea most of the time until 1853, when he became a journalist, first at Philadelphia and later at Indianapolis. From 1861 to 1871 he was editorial writer for the *New York Evening Post*. The next two years he spent in travel through California and the Hawaiian islands. He then became Washington correspondent for the *New York Herald*. His principal works are: *A Man-of-War-Life; The Merchant Vessel; Whaling and Fishing; Stories of the Island World; Cape Cod and All Along Shore; California; Politics for Young Americans; The Communistic Societies of the United States*, etc. Died, 1901.

Nordica (*nôr'-dĭ-ka*), **Lillian**, née Lillian Norton, stage name of Mrs. George W. Young, American prima donna, was born at Farmington, Me., 1859. Her earlier musical education was pursued at the New England conservatory, Boston, and her later studies at Milan, Italy. She made her début as an opera singer at Brescia, Italy, in *La Traviata*. In 1887 she appeared in London with marked success, following up her triumphs in Paris, in St. Petersburg, and various European capitals. She has sung leading soprano parts in forty operas and in all the standard oratorios, but she is best known in Wagnerian parts. She has appeared in grand opera in the United States several seasons. She was married first to Frederick A. Gower, second to Herr Döme, third to George W. Young.

Norman, Sir Henry, English journalist, author, and traveler, was born at Leicester, England, 1858. He was graduated from Harvard college in 1881; studied at Leipzig, Germany, and then accepted a position on the *Pall Mall Gazette*, London, and later became associate editor of the London *Daily Chronicle*. He was several times sent abroad upon important missions on account of his proficiency in modern languages. Having inherited a moderate fortune in 1888, he spent the following years in travels throughout the least-known parts of Asia. He published works upon China, Corea, Japan, Siberia, and the Balkans. In 1895 he was sent to Constantinople to report upon the Armenian massacres; and from there proceeded to Washington, D. C., to write for the London *Daily Chronicle* the status of the Monroe doctrine. He was elected to parliament in 1900; founded *The World's Work* in 1902, and has published in recent years *The Real Japan; The Peoples and Politics of the Far East; The Near East; All the Russias; Thoughts I Met on the Highway; Motors and Men,* etc. He was knighted in 1906.

North, Frederick, eighth Lord North, second earl of Guilford, English statesman, was born, 1732, and educated at Oxford. He entered the house of commons at the age of twenty-two, and was made junior lord of the treasury in 1759. In 1767 he was appointed chancellor of the exchequer and leader of the house of commons, being there opposed to Fox and Burke. In 1770 he became prime minister, and his course, to a large extent, caused England to lose America. He resigned, 1782, and became blind five years before his death, which occurred in 1792.

North, Simon Newton Dexter, journalist, statistician, was born in Clinton, N. Y., 1849, and was graduated at Hamilton college, 1869. He was managing editor of the *Utica Morning Herald*, 1869–86; president of New York state associated press, 1885–86; editor and joint proprietor of *Albany Express*, 1886–88, and secretary of the national association of wool manufacturers, 1888–1903. Appointed member of United States industrial commission by President McKinley, 1898; he resigned in 1899 to accept position of chief statistician for manufactures, twelfth census; appointed, 1903, director of United States census; resigned in 1909. Author: *An American Textile Glossary; A History of the American Wool Manufacture; Old Greek, An Old-Time Professor in an Old-Fashioned College;* and numerous pamphlets and lectures on economical, industrial, and educational subjects.

Northrop, Cyrus, American educator, president of university of Minnesota, 1884–1911, was born at Ridgefield, Conn., 1834. He was graduated at Yale, 1857, Yale law school, 1859; LL. D., Yale, 1886, university of Wisconsin, 1904, Illinois college, 1904, South Carolina college, 1905. He was admitted to the Connecticut bar in 1860; was clerk of the Connecticut house of representatives, 1861, and of the Connecticut state senate in 1862; was editor of the *New Haven Palladium*, 1863, and professor of rhetoric and English literature, Yale, 1863–84.

Norton, Charles Eliot, American educator, critic, and scholar, professor of art at Harvard, 1874–98, was born at Cambridge, Mass., 1827. He was graduated at Harvard, 1846; Litt. D., Cambridge, England, 1884; L. H. D., Columbia, 1885; LL. D., Harvard, 1887, Yale, 1901; hon. D. C. L., Oxford university, England, 1900. He entered a counting house in Boston, 1846; went as supercargo on East Indian voyage, 1849, later made several trips to Europe, and became known as a Dante scholar and an authority on art. In 1864–68 he was joint editor with Lowell of the *North American Review*. In 1874 he was appointed professor of the history of art at Harvard, and in 1879 became president of the archæological institute of America, holding that office for eleven years. Author: *Considerations on Some Recent Social Theories; Historical Studies of Church Building in the Middle Ages; Notes of Travel and Study in Italy.* Editor: *Letters of James Russell Lowell; Writings of George William Curtis; Correspondence of Carlyle and Emerson; Correspondence of Goethe and Carlyle; Reminiscences and Letters of Thomas Carlyle; Letters of John Ruskin;* and translator of Dante's *Vita Nuova* and *Divina Commedia*. Died, 1908.

Novalis (*nō-vä'-lis*), German lyric poet and philosopher, was born in Saxony, 1772. His real name was Friedrich von Hardenberg. He was a son of Baron von Hardenberg, and studied at Jena, Leipzig, and Wittenberg. His principal works are *Lehrlinge zu Sais, Hymnen an die Nacht*, and an unfinished art romance entitled *Heinrich von Ofterdingen*. A remarkably interesting account of the life and work of Novalis is to be found in the *Miscellaneous Essays* of Carlyle, by whom he is called "the German Pascal." He died of consumption, 1801.

Noyes, Frank Brett, American journalist, was born at Washington, D. C., 1863. He was educated in the public and high schools of Washington, and at Columbian university, D. C. He was manager of the *Washington Star*, 1881–1901; president of the associated press, New York, since 1900; editor of *Chicago Record-Herald*, 1902–09; since 1910 president *Evening Star* newspaper company, Washington; director in a number of financial institutions.

Noyes, George Rapall, American biblical scholar, was born in Massachusetts, 1798. He was graduated at Harvard college, 1818, and studied theology at Cambridge divinity school. He was licensed to preach in 1822, and held pastorates at Brookfield and at Petersham, Mass. In 1840 he was made professor of Hebrew and oriental languages and Dexter lecturer on biblical literature at Harvard university. Besides many reviews and sermons, he published new translations, with notes, of several books on the old testament. Died, 1868.

Nye, Edgar Wilson, American writer and humorist, who wrote largely under the pseudonym of "Bill Nye," was born at Shirley, Me., 1850. He was but two years old when his parents moved to St. Croix county, Wisconsin. Afterward he removed to Wyoming, where he studied law, was admitted to the bar, and elected to the legislature. He also acted as postmaster and newspaper correspondent. On account of ill health he returned to the East and settled in New York, having already achieved wide popularity through his humorous contributions to the press. His first book, published in Chicago in 1881, was entitled *Bill Nye and the Boomerang*. In connection with James Whitcomb Riley he made frequent tours of the country, giving entertainments consisting of lectures and readings. In 1891 he wrote a play called *The Cadi*, which appeared at Union Square theater, New York. Died, 1896.

Oberlin (*ō'-bĕr-lin*), **Jean Frédéric,** German clergyman and philanthropist, was born in Strassburg, 1740. He was educated at Strassburg university, studied theology, became a German Lutheran clergyman, and was celebrated for his philanthropy, and for his services to the population of Ban-de-la-Roche, among whom he labored for fifty-nine years. He made roads, improved the system of agriculture, promoted education, and introduced infant schools, of which institution he was the founder. At the time of the French revolution, Ban-de-la-Roche was not only secured from molestation by the reputation of the people and their pastor, but Oberlin was even able to afford an asylum to several proscribed persons. His name was celebrated throughout Europe, and Louis XVIII. presented him with the decoration of the legion of honor. Oberlin college, Ohio, is named after him. Died at Waldbach, 1826.

O'Brien, Morgan Joseph, American lawyer and jurist, judge of the New York supreme court, 1887–1901 and 1901–15; was born in New York, 1852. He was graduated at St. John's college, New York; studied at St. Francis Xavier, New York, and at the Columbia law school; LL. B., Columbia; A. M., Francis Xavier; LL. D., St. John's. He was a trustee of the New York public schools and New York public library many years; was corporation counsel before election to the supreme bench; trustee of Equitable life assurance society of the United States since 1905.

O'Brien, Thomas J., American lawyer and diplomat, was born at Jackson, Mich., 1842. He was graduated from the law department, university of Michigan, 1865, and was admitted to the bar, 1864. He was assistant general counsel of the Grand Rapids and Indiana railway, 1871–83, general counsel, 1883–1905; candidate for judge of the supreme court of Michigan, 1883; E. E. and M. P. to Denmark, 1905–07; American ambassador to Japan, 1907–11, to Italy since 1911.

Occam (*ŏk'-am*), or **Ockham, William of,** English scholastic, was born at Ockham in Surrey, between 1270 and 1280. He entered the Franciscan order, studied at Oxford and Paris, and headed the Franciscans' revolt against Pope John XXII.'s denunciation of evangelical poverty. After four months' imprisonment at Avignon he fled to Munich, and found there a defender in Emperor Louis of Bavaria, whom he in his turn defended stoutly against the temporal pretensions of the pope. In 1342 he seems to have become general of the Franciscans. Besides insisting on the independent divine right of temporal rulers, Occam won fame as the reviver of nominalism, for which he won a final victory over the rival realism. He seems to have died at Munich in 1349. His views on civil government are expounded in his *Dialogues;* his philosophical views in *Summa Logices,* in his commentaries on Porphyry and Aristotle, and the commentary on the *Sententiae* of Peter the Lombard; and his theological views in this last and the *Tractatus de Sacramento Altaris.*

Ochs (*ŏks*), **Adolph S.,** newspaper publisher, was born in Cincinnati, Ohio, 1858. He received a common school education at Knoxville, Tenn.; was a carrier and newsboy at Knoxville, 1869-70; clerk in grocery store, Providence, where he attended night school, 1871; druggist apprentice, Knoxville, 1872; printer, 1873; publisher of the *Chattanooga Times,* 1878, of which he is still proprietor; established *The Tradesman,* 1879, of which he is still principal owner. He became publisher and principal owner of the *New York Times,* 1896; publisher and proprietor of the *Philadelphia Times,* 1901; publisher and principal owner *Philadelphia Public Ledger,* 1902, which he sold, 1912.

Ochs, George Washington, journalist, was born at Cincinnati, Ohio, 1861. He was educated at the university of Tennessee, Knoxville; was twice mayor of Chattanooga, Tenn., refusing nomination for third term; president of board of education of Chattanooga, 1897–1900; president of Chattanooga chamber of commerce, 1899–1900; publisher of Paris edition *New York Times* at Paris exposition, 1900, and was decorated chevalier of legion of honor by French government in recognition of service. Became general manager of *Philadelphia Times,* 1901; in 1902 the *Public Ledger* and the *Philadelphia Times* consolidated under the name of *Public Ledger,* and he became its publisher and general manager.

O'Connell, Daniel, Irish orator and "liberator," was born in County Kerry, Ireland, 1775. He studied at the college of Douai, France, and was admitted to the Irish bar in 1798. His large practice, worth, he said, $35,000 a year, was sacrificed for his country, when he took a leading part in Irish politics. He was head of the Catholic party and contended for the admission of Catholics to parliament, and himself entered parliament in 1829. He believed that Ireland would never have her rights until the act of union with Great Britain should be repealed; but in all his efforts to accomplish it, and to arouse the Irish nation, he was careful not to use force, or allow anything criminal. One of the greatest of orators, his remarkable speeches in parliament, one of which lasted for seven hours, were equaled only by his popular addresses throughout Ireland. In 1840 he founded his famous repeal association, the members of which paid from fifty dollars to twenty-five cents annual fees, and which in 1843 had an income of over $200,000. In 1844 he, with his son and five others, was tried for sedition and sentenced to imprisonment for one year, and a fine of $10,000, and, though the house of lords soon set aside the verdict, the fourteen weeks he was in prison brought on the ailment of which he died. Worn out with the struggle, he left Ireland for Rome, but only reached Genoa, where he died in 1847.

O'Connell, Dennis J., American educator, was born at Charleston, S. C. He was educated at St. Charles's seminary and St. Mary's college, Charleston; S. T. D., Propaganda, Rome, 1877. He was for some time secretary to Cardinal Gibbons; was head of the American college in Rome several years, and rector of the Catholic university of America, 1903–09. Consecrated auxiliary bishop of San Francisco, 1909. He is a well-known student of Dante, and president of the Catholic educational association.

O'Connor, Thomas Power, journalist and parliamentary leader, popularly known as "Tay Pay," was born at Athlone, Ireland, 1848. He was educated at the college of the Immaculate Conception, Athlone, and graduated at Queen's college, Galway, 1866. He took up journalism in Dublin the next year, and went to London three years later, where he was appointed a sub-editor on the *Daily Telegraph.* He was afterward employed in the London office of the *New York Herald,* and entered parliament as member for Galway, 1880. He was returned for both Galway and Liverpool, 1885; chose the latter, and was again returned in 1886, 1892, 1895, 1900. He founded and was first editor of the *Star,* the *Sun,* the *Weekly Sun,* and *T. P.'s Weekly.* Author: *Lord Beaconsfield, a Biography; The Parnell Movement; Gladstone's House of Commons; Some Old Love Stories; Napoleon; The Phantom Millions;* and a large number of articles and essays.

O'Conor, Charles, American lawyer, was born in New York city, 1804. At the age of twenty he was admitted to the bar of New York, and soon gained high rank in the profession. He was counsel in many important cases; was prosecuting lawyer in the "Tweed ring" cases; in 1872 was nominated in the face of his absolute refusal for the presidency by labor reform party, and by a convention of democrats dissatisfied with nomination of Horace Greeley. Died at Nantucket, Mass., 1884.

Octavia (*ŏk-tā'-vĭ-ȧ*), sister of the Roman emperor Augustus, and wife of Mark Antony, was born about 70 B. C. Her first husband was C. Marcellus, to whom she was married, 50 B. C. He died in 41 B. C., shortly after which she consented to marry Antony, to make secure the reconciliation between him and her brother. In a few years Antony became tired of his gentle and virtuous wife, and forsook her for Cleopatra. In 35 B. C. Octavia made an effort to rescue him from a degradation that was indifferent even to the honor of the Roman arms, and sailed from Italy with reënforcements; but a message reached her at Athens ordering her to return home. In 32 B. C. war, long inevitable, broke out between Antony and Octavian, and the former crowned his insults by sending Octavia a bill of divorcement. But no injury was too great to be forgiven by this "patient Grizzel" of the ancient world, and after her husband's death she brought up with maternal care not only her own children, but Cleopatra's also. Her death took place 11 B. C.

Odell, Benjamin Barker, Jr., American politician, ex-governor of New York, was born at Newburgh, N. Y., 1854. He was educated in the public schools of Newburgh, at Bethany college, W. Va., 1873, and at Columbia university, 1873–75. He subsequently engaged in banking, electric lighting and commercial enterprises at Newburgh with his father; was a member of the republican state committee, 1884–96; chairman of the republican state executive committee, 1898–1900; member of congress, 17th New York district, 1895–99, and declined renomination. He was governor of New York, 1901–05.

Odoacer (*ō′-dō-ā′-sẽr*), king of the Germanic tribe of the Heruli, ruler of Italy from 476 to 493, was the son of Ædico, a secretary of Attila, and one of his ambassadors to the court of Constantinople. He entered the military service of the western Roman empire, rapidly rose to eminence, and took part in the revolution by which Orestes, in 475, drove the emperor Julius Nepos from the throne, and showed himself to be a wise and politic ruler, quite unlike our general notion of a barbarian. He fixed his residence at Ravenna, reëstablished the consulate, which was held by eleven of the most illustrious senators in succession, maintained peace throughout the peninsula, overawed the Gauls and Germans, and reconquered Dalmatia and Noricum. The valor, wisdom, and success of Odoacer appear to have excited the jealousy and alarm of Zeno, who encouraged Theodoric, king of the Ostrogoths, to undertake an expedition against Italy. The first battle was fought on the banks of the Isontius, 489. Another great battle took place on the banks of the Adda, when Odoacer was completely vanquished. He shut himself up in Ravenna, where Theodoric besieged him for three years, then capitulated, on condition that the kingdom of Italy should be shared between him and Theodoric. This agreement was solemnly sworn to, 493; but on March 5th Odoacer was assassinated at a feast, either by Theodoric himself or by his command.

Œhlenschläger (*û′-len-shlâ′-gẽr*), **Adam Gottlob,** Danish poet and dramatist, was born near Copenhagen, 1779. In 1803 appeared his first collection of poems, including one longer dramatic piece, *The Play of St. John's Eve*, which attracted favorable notice for the lively fancy with which national habits and local characteristics were portrayed. His *Poetical Writings*, published in 1805, and his *Aladdin or the Wonderful Lamp* completed his success and raised him to the rank of the first of living Danish poets. He subsequently traveled and lived in Germany, France, and Italy, during which time he commenced a famous series of tragedies on northern subjects, which include: *Hakon Jarl, Correggio, Palnatoke,* etc. His poetical works comprise over thirty volumes. He ranks among the Danes as Goethe among the Germans, and his death in 1850 was felt by the whole nation.

Oersted (*ûr′-stĕ*ᴛʜ), **Hans Christian,** Danish physicist, was born at Rudkjöbing, in the island of Langeland, 1777. He studied at the university of Copenhagen and received the degree of Ph. D. there in 1799. He then traveled in Holland, Germany, and France, and in 1806 was appointed professor of natural philosophy in the university of Copenhagen. In 1820 he published his famous essay entitled *Experiments on the Effect of Opposing Electricity Upon the Magnetic Needle*, in which he showed the identity of the forces of magnetism, electricity, and galvanism, and thus opened the way for the wonderful development of knowledge in respect to those forces, which was one of the chief scientific glories of the nineteenth century. Oersted had the special faculty of rendering science popular, and he wrote numerous works which had that object in view. His labors received honorable recognition from most of the scientific societies of Europe; and at his death he was honored with a public funeral. Died at Copenhagen, 1851.

Offenbach (*ŏf′-en-bä*ᴋ), **Jacques,** French composer of comic operas, was born in Cologne, 1819, of German-Jewish parents. In 1835–37 he studied at the Paris conservatory; in 1847 he became leader of the orchestra at the Théâtre Française; and in 1855 opened the Bouffes Parisiens on the Champs Elysées, and the same year transferred his company to the Théâtre de Comte, in the passage Choiseul. For eight years he was its manager, and during that period supplied it with almost all its attractions, chief of which were: *Les Deux Aveugles; Une Nuit Blanche; Ba-ta-Clan; Le Violoneux; Tromb-al-cazar; La Rose de St. Fleur; Le Marriage aux Lanternes; Croquefer; Les Petite Prodiges*, etc. His *Orphée aux Enfers, Barbe Bleu, La Grande Duchesse, La Perichole, Geneviève de Brabant*, and *Les Brigands* mark a new era in his compositions, in which he discarded the one-act comedietta and turned to downright opera bouffe. He was installed manager of the Gaîté theater in 1873, and sank some millions of francs in the experiment. He afterward visited the United States. Died at Paris, 1880.

Ogden, Robert Curtis, retail merchant and philanthropist, was born at Philadelphia, Pa., 1836 He was educated in select schools at Philadelphia; M. A., Yale, 1902; LL. D., Tulane university, 1903. He was a member of the firm of John Wanamaker, 1885–1907, and retired in the latter year. He was president of the board of trustees of Hampton institute, Hampton, Va.; director of Union theological seminary, New York; trustee of Tuskegee institute, Alabama; president of Southern education board, conference for education in the South, and trustee of general education board. Author: *Samuel Chapman Armstrong*, Founder's day address, Hampton, Va.; *Pew Rents and the New Testament, Can They be Reconciled? Sunday School Teaching.* He died in 1909.

Oglethorpe (*ō′-g'l-thôrp*), **James Edward,** English general and founder of Georgia, was born at London, 1696. He served in the British army, and was thirty years in parliament. He planned a colony in America, as a refuge for debtors, who were then imprisoned in English jails, and also for persecuted German Protestants. George II. gave the land, which was named Georgia after him, and parliament contributed $50,000. He took out 130 persons, and founded the city of Savannah, in 1733. Another party, including the two Wesleys, went out in 1735, and in 1738 Oglethorpe returned to Georgia with a regiment of 600 men, in anticipation of a war with Spain. He invaded Florida, was unsuccessful in an attack on St. Augustine, but repulsed a Spanish invasion of Georgia. He left the colony in 1743, and surrendered the charter to the British government in 1752. Died in England, 1785.

Ohm (*ōm*), **Georg Simon,** German physicist, was born at Erlangen, Bavaria, 1787. He was educated at the university of Erlangen, held the chair of physics at Cologne from 1817 to 1826, was director of the Nuremberg polytechnic school, 1833–49, and became in the latter year professor at Munich. "Ohm's law" was a result of his researches in electricity, and the measure of resistance, called the *ohm*, was so named in honor of his achievements by the Paris congress of physicists in 1881. He died at Munich, 1854.

Ohnet (*ō′-nĕ′*), **Georges,** French novelist of great popularity, was born in Paris, 1848. He was educated at Sainte Barbe, and at the Lycée Bonaparte. Under the general title of *Les Batailles de la Vie* he published a series of novels, some of which have reached a hundredth edition. Chief of these are: *Serge Panine; Le Maître de Forges; La Comtesse Sarah; Lise Fleuron; La grande Marnière; Dette de Haine; Dernier Amour; Nemrod et Cie; La Dame en Gris; Le Curé de Favières; Roi de Paris; La Marche à l'Amour; La Dixième Muse,* etc. He also wrote the plays: *Regina Sarpi; Marthe; Le Colonel Roquebrune; Les Rouges et les Blancs;* and has dramatized several of his novels with great success. He was elected in 1902 président de la société des auteurs dramatiques.

Oken (*ō′-ken*), **Lorenz,** German naturalist, was born at Bohlsbach, Swabia, 1779. He became professor of medicine at Jena in 1807, and in 1816 issued a journal called *Isis*, which led to government interference and his resignation. In 1828 he obtained a professorship at Munich, and in 1832 at Zürich. His system was a transcendental nature-philosophy, fertile in ideas. He developed the theory, now exploded, that the skull is a modified vertebra. Died at Zürich, 1851.

Oku (*ō′-kŏŏ*), **General Hokyo, Count,** Japanese soldier, a Samurai of Ko-Kura, was born in 1845. He entered the army in 1871; was major in the imperial forces during the Satsuma rebellion of 1877, being besieged in Kumamoto castle for four months. He commanded the 5th division during the China-Japan war, 1895, and was rewarded with the title of baron for distinguished service. He was commander of the second army during the Russo-Japanese war, 1904-05, which landed on the east coast of the Liao-tung peninsula in May, 1904, won the brilliant victory at Kinchau, and did splendid service in the subsequent fighting in Manchuria. He was chief of general staff, 1906-12; made count, 1906.

Okuma (*ō′-kŏŏ-mȧ*), **Count Shigenobu,** Japanese statesman, was born at Saga, Hizen, 1838. He was a retainer of Lord Nabeshima; was one of the founders of the new government; finance minister, 1869–81; foreign minister, 1888-89; minister of agriculture and commerce, 1896-97; prime minister and foreign minister, 1898; founder and ex-leader of the progressive party; founder and president of the Waseda university, Tokyo, and founder of the Japanese Women's university.

Olaf (*ō′-läf*), **Saint,** king of Norway, was born in 995, and, having made his name a terror on the coasts of Normandy and England, succeeded, in 1015, in securing the throne of Norway. The severity with which he sought to exterminate paganism alienated his subjects, who adhered to Canute of Denmark. Olaf fled to his brother-in-law, Jaroslav of Russia, who gave him 4,000 men, with whom, in 1030, he gave Canute battle at Stiklestad, where Olaf was defeated and slain. His body, laid in the cathedral of Trondhjem, was said to have wrought many miracles, and Olaf was proclaimed patron saint of Norway.

Olcott, Chauncey, otherwise Chancellor John Olcott, singer and actor, was born in Buffalo, N. Y., 1860. He was educated in the Buffalo public schools; was brought out as singer by R. M. Hooley, 1880. He was with Hooley's company for two years, then consecutively with Haverly's company, Carncross minstrels, Denman Thompson, Duff's opera company for several seasons; sang two years in England in comic opera, then succeeded W. J. Scanlan as star in Irish musical dramas. He has since appeared in various leading rôles in the United States and England.

Oliphant, Laurence, English traveler, diplomat, and writer, was born at Cape Town in 1829. He was called to the Scottish bar; later to the English bar. He became private secretary to the earl of Elgin, then governor-general of Canada, whom later he accompanied to China, thus finding material for his books *Minnesota and the Far West*, and *The Earl of Elgin's Mission to China and Japan.* In 1861, while acting as *chargé d'affaires* in Japan, he was severely wounded by assassins, and from 1865 to 1868 he represented Stirling in parliament. He published *Piccadilly* in 1870; joined the religious community of T. L. Harris in the United States, and finally settled at Haifa in Palestine. He died at Twickenham, 1888. His later mystical views he published in *Sympneumata* and *Scientific Religion*, as well as in his novel *Masollam.* Other books were: *The Transcaucasian Campaign under Omar Pasha; Patriots and Filibusters; The Land of Gilead; Traits and Travesties; The Land of Khemi; Haifa;* and *Episodes in a Life of Adventure.*

Oliphant, Margaret (née Wilson), British novelist and biographical writer, was born at Wallyford, Midlothian, 1828. In 1849 she published her first work, *Passages in the Life of Mrs. Margaret Maitland of Sunnyside*, which instantly won attention and approval. It is, however, on the *Chronicles of Carlingford* that her reputation as a novelist most securely rests. Besides many other works, she published a *Life of Edward Irving; St. Francis of Assisi; Memoir of the Comte de Montalembert; The Makers of Florence; Literary History of England; The Makers of Venice,* etc. In 1852 she married Francis Oliphant. She died in London, 1897.

Oliver, George Tener, manufacturer, newspaper publisher, United States senator, was born in County Tyrone, Ireland, 1848, while his parents were visiting in that country, they at the time being residents of Allegheny city, Pa. He was graduated at Bethany college, West Virginia, 1868; studied law and was admitted to the bar of Allegheny county, 1871. After an active practice of ten years he retired in 1881 and engaged in iron and steel manufacturing, and was actively engaged in this business until 1901, when he disposed of his interest in several large concerns. He was president of the Youngstown car manufacturing company, at Youngstown, Ohio, director of several financial and industrial corporations in Pittsburgh, and president of the Duquesne club. In 1900 he purchased the *Pittsburgh Gazette*, and acquired the controlling interest in the *Pittsburgh Chronicle-Telegraph*, and in 1906 merged the former with the *Pittsburgh Times* under the name of the *Gazette-Times*, of which he is the principal owner. He was elected in 1909 to the United States senate to fill out the unexpired term of Hon. P. C. Knox, who resigned to accept the office of secretary of state in President Taft's cabinet, and was reëlected, 1911.

Olmsted (*ŏm′-stĕd*), **Frederick Law,** American landscape-gardener, was born at Hartford, Conn.,

1822. He studied engineering at Yale, became interested in landscape-gardening, traveled on foot through England in 1850, and in 1855 through France, Italy, and Germany, to study the parks and ornamental grounds of those countries He published *Walks and Talks of an American Farmer in England; A Journey in the Seaboard Slave States; A Journey Through Texas;* and *A Journey in the Back Country;* after a tour through the South and West. He is best known as the superintendent, with Vaux, of the laying out of Central park, New York, and also of the grounds around the capitol at Washington. He also designed parks and public works at Chicago, Buffalo, Brooklyn, Boston, Milwaukee, and Montreal, and acted as commissioner of the national park of the Yosemite He was appointed by Lincoln on the commission to inquire into the sanitary condition of the United States army, serving on it from 1861 to 1864. Died at Waverly, Mass., 1903.

Olney, Richard, American lawyer and statesman, was born at Oxford, Mass., 1835. He was graduated at Brown, 1856, and at Harvard law school, 1858; LL. D., Harvard, 1893, Brown, 1894, Yale, 1901. He was admitted to the bar in 1859; practiced law at Boston; served in the Massachusetts legislature, 1874; was appointed United States attorney-general by President Cleveland, and served from 1893 to 1895, and during 1895–97 as secretary of state. He then resumed the practice of law in Boston. He was a regent of the Smithsonian institution, Washington, 1900–08; member of American philosophical society, etc. While in public office he evinced great ability, and his state papers are among the most vigorous documents of those offices.

Oman, Charles William Chadwick, British historian, Chichele professor of modern history at Oxford since 1905, was born at Mozufferpore, India, 1860. He was graduated at Oxford, has been a fellow of All Souls college since 1883, and is author of the following works: *A History of Greece; Warwick the King-maker; Short History of the Byzantine Empire; A History of Europe; A Short History of England; A History of the Art of War in the Middle Ages; A History of the Peninsular War,* 1807–10; *Seven Roman Statesmen; The Great Revolt of* 1381, etc.

Omar (*ō'-mȧr*), **Abu-Hafsa-ibn-al-Khattab,** second caliph of the Moslems, was born about 581. His early history is little known, but previous to his conversion he was an ardent persecutor of Mohammed and his followers. After Mohammed's death he caused Abu-Bekr to be proclaimed caliph, and was himself appointed prime minister. Though of a fiery and enthusiastic temperament, he proved a sagacious adviser, and it was at his suggestion that the caliph put down with an iron hand the many dissensions which had arisen among the Arabs after the prophet's death, and resolved to strengthen and consolidate their new-born national spirit, as well as propagate the doctrines of Islam, by engaging them in continual aggressive wars. On the death of Abu-Bekr, Omar succeeded as caliph, and pushed on the wars of conquest with increased vigor. He was summoned to Jerusalem, in 637, to receive the keys of that city, and before leaving gave orders to build a mosque, now called by his name, on the site of the temple of Solomon. He instituted the practice of dating from the hegira. He died in 644.

Omar Khayyám (*ō'-mȧr ᴋī-yäm'*), astronomer-poet of Persia, was born at Nishapur about 1017, and is said to have died there in 1123 or 1124. Summoned to Merv by the sultan, he reformed the Moslem calendar. Of his Arabic mathematical treatises, one on algebra was edited and translated by Wœpke in 1851; and it was as a mathematician that he was known to the western world, until in 1859 Edward FitzGerald published his translation of one hundred of his *Rubáiyát* or quatrains. Omar was the poet of agnosticism, though some see nothing in his poetry save the wine cup and roses, and others read into it that Sufi mysticism with which it was largely adulterated long after Omar's death. He was a true poet; yet FitzGerald's translation is far finer than the original.

Omer Pasha (*ō'-mẽr pȧ-shä'*), Turkish general, was born at Plaski, in Croatia, a province of Austria, 1806. His real name was Michael Lattas. He fled, in fear of punishment, from the Austrian army to Bosnia. Here he became a Mohammedan, and was made writing-master to Abdul Medjid, then heir to the Turkish throne. When Medjid became sultan, he made Omer Pasha governor of Lebanon. When the Russians invaded the European dominions of Turkey, he was sent with an army of 60,000 men against them, and successfully withstood them at Kalafat, and, after their withdrawal from the country, entered Bucharest in triumph, August, 1854. He embarked for the Crimea in 1855, and defeated 40,000 Russians at Eupatoria. He was sent to Bosnia and Herzegovina when in insurrection, September, 1861, and, after settling their difficulties, he attacked Montenegro, capturing the city Cetinjé; and in 1867 he led a command against the insurgents in Crete. He was governor-general of Bagdad, and also minister of war at different periods. He died at Constantinople, 1871.

Ontario, Bishop of. See **Mills, William Lennox.**

Oppenheim, Nathan, American physician, medical author, was born at Albany, N. Y., 1865. He was graduated at Harvard, 1888, and from the college of physicians and surgeons, New York, 1891. He is attending physician, children's department, New York Red Cross hospital, and New York city children's hospital and schools, and has made a specialty in diseases of children. Author: *The Development of the Child; The Medical Diseases of Childhood; The Care of the Child in Health; Mental Growth and Control;* and various scientific essays.

Opper, Frederick Burr, American artist, was born at Madison, Ohio, 1857. He left school at fourteen; worked a year or more in the village newspaper office; went to New York and worked in a store for a short time, and then, having sold some humorous sketches to *Wild Oats* and other comic papers, began drawing as a profession. He was on the art staff of *Frank Leslie's* three years; an artist on *Puck* for eighteen years, and severed his connection with *Puck* to accept an offer from Hearst's *New York Journal,* 1899. He was illustrator for Bill Nye, Mark Twain, F. P. Dunne, etc. Author: *The Folks in Funnyville,* with his own verses and pictures; *Our Antediluvian Ancestors; Happy Hooligan; Alphonse and Gaston; John Bull; Happy Hooligan Home Again; Maud the Matchless,* etc.

Optic, Oliver, American writer of books for young folks, was born in Medway, Mass., 1822. His real name was William T. Adams, and he was for several years a public school teacher in Boston. He wrote a large number of books which are published in several series, called "Army and Navy Stories." "Boat Club Series," "Great Western Series," "Lake Shore Series," "Onward and Upward Series," "Riverdale Story Books," "Sailor Boy Series," "Soldier Boy Series," "Starry Flag Series," "Woodville Stories," "Yacht Club Series," and "Young America Abroad Series." Each of these is composed of several books, making more than one hundred volumes in all. *Oliver Optic's Magazine for Boys and Girls* was edited by him for many years, but it was discontinued in 1875. He died at Boston, 1897.

Orange, Prince of. See **William I., the Silent; William III.,** king of England.

Orcagna (*ōr-kän′-yä*), **Andrea di Cione,** Italian painter, sculptor, architect, and poet, was born at Florence, about 1316, his father being a sculptor and worker in silver and his elder brother a painter. He was appointed architect of the church of Or San Michele at Florence, 1355, and his greatest work is the marble tabernacle of this church, which is considered one of the most beautiful art creations of Italy. He was also chief architect of the cathedral at Orvieto. The frescoes of the "Last Judgment" and "Christ and the Virgin," in the church of Santa Maria at Florence, still survive as examples of his painting. His work was studied by succeeding painters, especially by Michaelangelo and Raphael. He died about 1376.

O'Reilly, John Boyle, Irish-American poet, was born at Dowth Castle, County Meath, Ireland, 1844. He passed through the various stages of journalism from type-setting to the writing of editorials. Although a Fenian, he enlisted in the Irish hussars with the intention of exciting a revolt. Being discovered, he was tried for treason, convicted, and banished to Australia in 1866. Escaping from that country, he reached the United States in 1869, and became the editor of the *Boston Pilot*. Some of his poems were of high merit and attained deserved popularity. His chief books were: *Songs from the Southern Seas; Songs, Legends, and Ballads; The Statues in the Block*, etc. Died at Hull, Mass., 1890.

Origen (*ŏr′-ĭ-jĕn*), Greek church father, was born at Alexandria, about 185. Much of his life was spent in Alexandria, in which city he obtained great reputation as a teacher, but which he was compelled, by persecution, to leave finally in 231. From Alexandria he retired to Cæsarea, and afterward to Tyre. In the persecution under Decius in 250, he was cast into prison at Tyre, and subjected to protracted torture. His writings are said to have amounted to six thousand, but by far the greater number are lost. Of his *Hexapla*, which occupied him for twenty-eight years, only fragments remain. The same is to be said of his numerous *Commentaries*. A treatise on *Prayer*, an *Exhortation to Martyrdom*, and an apologetic pamphlet *Against Celsus* are the most important of his works which are left to us. As to the learning of Origen and his ability as a teacher, we possess the most ample testimony; but some of his opinions were, after his death and for long afterward, the subject of violent controversy in the church. He died at Tyre, 254.

Osler (*ŏs′-lẽr*), **William,** Canadian physician, educator, and author, was born at Tecumseh, Ontario, 1849. He was graduated at McGill university, Montreal, 1872; LL. D., McGill, Toronto, university of Edinburgh, university of Aberdeen, Harvard, Yale, Johns Hopkins; D. Sc., Oxford, D. C. L., Trinity university, Toronto. He was professor of the institutes of medicine, McGill university, 1874–84; professor of clinical medicine, university of Pennsylvania, 1884–89, and at Johns Hopkins university, 1889–1905; has been regius professor of medicine, Oxford university, since 1905. Author: *The Cerebral Palsies of Children; Chorea and Choreiform Affections; Lectures on Abdominal Tumors; Angina Pectoris and Allied States; The Principles and Practice of Medicine; Cancer of the Stomach; Science and Immortality*, Ingersoll lecture, Harvard university; *Æquanimitas, and Other Addresses; Counsels and Ideals*, etc. He is also the editor of *System of Medicine*.

Osman I. (*ŏs′-män*) or **Othman** (*ōth′-män*), surnamed "the conqueror," was born in Bithynia, 1259. When the Mongols overthrew the sultanate of Iconium, 1299, he seized a portion of Bithynia. Then forcing the passes of Olympus, he took possession of the territory of Nicæa, and gradually subdued a large part of Asia Minor, and thus became the founder of the present empire of Turkey, called from him the Ottoman empire. From his name the terms Ottoman and Osmanli are derived. He died in 1326.

Ossian (*ŏsh′-an*), Celtic bard, supposed to have lived in Scotland or Ireland about fifteen hundred years ago. He was the son of Fingal, king of Morven, a famous hero, and was blind. His poems are remarkable for their grandeur and wild beauty, and are very different from all other poetry. They have been published in nearly all European languages.

Ossoli (*ŏs′-ō-lē*), **Marchioness.** See **Fuller, Sarah Margaret.**

Otho I., the Great, emperor of the West, son of the emperor Henry I., of Germany, was born in 912. In 936 he was formally crowned king of the Germans and in 962 holy Roman emperor. His reign was one succession of eventful and generally triumphant wars, in the course of which he brought many turbulent tribes under subjection, acquired and maintained almost supreme power in Italy, where he imposed laws with equal success on the kings of Lombardy and the popes at Rome; consolidated the disjointed power of the German emperors, and established Christianity at many different points in the Scandinavian and Slavonic lands which lay beyond the circuit of his own jurisdiction. Died, 973.

Otis, James, American patriot and orator, was born at West Barnstable, Mass., 1725, and became a leader of the Boston bar. He was advocate-general in 1760, when the revenue officers demanded his assistance in obtaining from the superior court general search-warrants allowing them to enter any man's house in quest of smuggled goods. Otis refused, resigned, and appeared in defense of popular rights. In 1761, elected to the Massachusetts assembly, he was prominent in resistance to the revenue acts. In 1769 he was savagely beaten by revenue officers and others, and lost his reason. In 1783 he was killed by lightning. His fame chiefly rests on *The Rights of the British Colonies Asserted and Proved*, published by him in 1764.

Ottawa, Bishop of. See **Hamilton, Charles.**

Otter, William Dillon, Canadian general, chief of the general staff, Canada, 1908–10; was born in 1843. He was educated at Upper Canada college, Toronto; served for twenty-two years in active militia; since 1883 in the permanent militia, and saw active service during Fenian raids of 1866 and 1870, Northwest rebellion of 1885, and during the Boer war of 1899-1900. During the latter he was in command of the first contingent from Canada. He was adjutant and commandant, Canadian teams of 1873 and 1883, to Wimbledon; command of royal school of infantry, 1883–99; command of M. D. No. 2, 1886–1905, and of western Ontario, 1905–08. He is the author of *The Guide, a Manual of Interior Economy, etc., for Canadian Infantry.*

Oudinot (*ōō′-dē′-nō′*), **Charles Nicolas,** duke of Reggio, French marshal, was born at Bar-le-Duc, 1767. He served in the revolutionary wars, and in 1805 obtained the grand cross of the legion of honor and the command of ten reserve battalions, the "grenadiers Oudinot." He fought at Austerlitz and Jena, gained the battle of Ostrolenka in 1807, and helped at Friedland. Conspicuous in the Austrian campaign of 1809, he was created marshal of France and duke of Reggio. In 1810 he was charged with the occupation of Holland; he took part in the Russian campaign and in the battles of 1813 with Russians and Austrians.

He was one of the last to abandon Napoleon. At the second restoration he became a minister of state, commander-in-chief of the royal and national guards, and a peer of France. In 1823 he commanded in Spain; became grand chancellor of the legion of honor in 1839, and succeeded Marshal Moncey as governor of the Invalides, 1842. He died at Paris, 1847.

Ouida (*wē'-da*). See **De la Ramée, Louise.**

Overbeck, Johann Friedrich, German painter, was born at Lübeck, 1789. He studied art at Vienna, 1806–10, and settled in Rome, where he allied himself with the like-minded Cornelius, Schadow, Schnorr, and Veit, who, from the stress they laid on religion and moral significance, were scoffed at as church-romanticists, pre-Raphaelites, etc. A madonna, in 1811, brought Overbeck into notice; and Bartholdy, the Prussian consul, employed him to adorn his house with scripture subjects. He next painted in fresco, in the villa of the Marchese Massimo, five compositions from Tasso's *Jerusalem Delivered.* His oil-pictures are inferior to his frescoes. Among his famous pictures are a fresco at Assisi, "The Vision of St. Francis"; "Christ's Entry into Jerusalem"; "Christ's Agony in the Garden"; "Lo Sposalizio"; "The Triumph of Religion in the Arts"; and "Incredulity of St. Thomas." He died in 1869.

Overman, Lee Slater, lawyer, United States senator, was born in Salisbury, N. C., 1854. He was graduated at Trinity college, N. C., 1874; taught school, 1875-76; was private secretary to Governor Vance, 1877-78, to Governor Jarvis, 1879; admitted to the bar, 1878; member of North Carolina legislature, 1883, 1885, 1887, 1893, 1899, and speaker, 1893. He was president of the North Carolina railroad, 1894; was president of the Salisbury savings bank, and trustee of the state university. He was elected United States senator, 1903, and reëlected for the term 1909–15.

Ovid (*ŏv'-ĭd*), or **Publius Ovidius Naso,** Roman poet and writer, was born at Sulmo, Italy, 43 B. C. He belonged to a noble family, and was brought up to the law; but his love for poetry and his natural indolence led him to desert the practice of the law, though he occupied one or two judicial positions. He died in banishment at Tomi, 18 A. D. Besides the *Metamorphoses,* consisting of all the transformations recorded in legend from the creation of the world to the time of Julius Cæsar, he was the author of a poem called *Ars Amatoria,* or the "Art of Love"; *Fasti,* a sort of poetical Roman calendar; *Tristia* and *Epistolae ex Ponto,* elegies written during his banishment, and other works. His poetical genius has always been admired. A masterly facility of composition, a fancy vigorous and rarely at fault, a fine eye for color, and a versification very musical in its flow are the merits which have made him a favorite of poets from Milton downward, in spite of his occasional slovenliness and falsity of thought.

Owen, Sir Richard, British naturalist, was born at Lancaster, England, 1804. He studied medicine at Edinburgh and London, but soon began his work in zoölogy and comparative anatomy, by preparing catalogues of the collections in the museum of the royal college of surgeons, and lecturing on comparative anatomy. In 1856 he became superintendent of the natural history department of the British museum, a position favorable for his studies on living and fossil animals. He visited Paris and made the acquaintance of Cuvier, with whose name his will always be connected in the science of zoölogy. Owen's researches in zoölogy number nearly 400; they are largely devoted to structure, and embrace every class of animals from a sponge to man. He produced monographs on the pearly nautilus, the Venus flower-basket, king crab, the mud-fish, anthropoid apes, and many extinct birds and reptiles. Among his voluminous writings are: *Comparative Anatomy of Invertebrates; Comparative Anatomy and Physiology of Vertebrates; The Skeleton and the Teeth; History of British Fossils; Reptiles, Birds, Mammals.* Died, 1892.

Owen, Robert, English social reformer, was born in Wales, 1771. In 1799 he married the daughter of David Dale, from whom, with others, he bought the village and cotton mills of New Lanark, Scotland. Here he introduced a system of reform which proved for a time highly successful. In 1812 he published *A New View of Society,* and subsequently a *Book of the New Moral World,* and various other works, in which he maintained a theory of modified communism. He came to the United States in 1824, and tried to found a communist society at New Harmony, Ind.; but the scheme failed, and in 1827 he returned to Great Britain, where experiments of a similar nature, attended by a similar result, were made at Orbiston in Lanarkshire, and at Tytherley in Hampshire. In 1828 he went to Mexico on the invitation of the government to carry out his experiment there, but effected nothing. He revisited America several times. His ideas are clearly developed in his *Lectures on a New State of Society; Essays on the Formation of Human Character; Outline of the Rational System;* and especially in his *Book of the New Moral World,* in which he came forward as the founder of a system of religion and society according to reason. He finally became a spiritualist. Died, 1858.

Owen, Robert Latham, lawyer, United States senator, was born at Lynchburg, Va., 1856. He was graduated at Washington and Lee university; was principal teacher in the Cherokee orphan asylum, 1879-80; began practice of law, 1880; was secretary of board of education, Cherokee nation, 1881–84; editor and owner *Indian Chieftain,* Vinita, 1884; United States Indian agent for the five civilized tribes, 1885–89; organizer of the First national bank of Muskogee and its president, 1890–1900. He is the owner of extensive banking, real estate, farming, and cattle interests. As attorney for Choctaws, Chickasaws, and Cherokees he recovered from the United States government, in money, nearly $9,000,000, drew up the act of congress of 1891, giving United States citizenship to every Indian in Indian territory. Elected United States senator from Oklahoma for terms, 1907–13, 1913–19.

Oxenstjerna (*ŏk'-sen-shĕr'-nȧ*), **Axel, Count,** Swedish statesman, was born at Fanö, in Upland, 1583. He was originally educated for the church, and studied theology as well as jurisprudence at Rostock, Jena, and Wittenberg, in the last of which universities he took his degrees. Although he afterward devoted himself to public affairs, he continued all his life to take a deep personal interest in religious questions, and labored zealously for the extension of the Protestant doctrines. He was made chancellor by Gustavus Adolphus in 1611; succeeded him as leader of the Protestant party in Germany, 1632–35; acted as regent throughout the minority of Christina, and became her chief minister when she assumed the government in 1644. Died, 1654.

Oyama (*ō'-yȧ-mȧ*), **Iwao, Prince,** Japanese field-marshal, was born in Kagoshima, 1842. He entered the Japanese army, was appointed colonel in 1871, promoted major-general in the same year, lieutenant-general in 1878, general in 1891, and in 1898 was raised to the rank of field-marshal. Having served as military attaché during the Franco-Prussian war, upon his return to Japan he entered the ministry of war, and assisted in the work of reorganizing the army. In the Satsuma rebellion of 1877 he took command of a brigade, and played a conspicuous part in subduing the revolt. He was afterward appointed under-secretary, and subsequently minister of war. During the war between Japan and China he was minister of war, but took the field as commander of the second army, and captured Kinchow, Talienwan, Port Arthur, and Wei-hai-wei. In 1904 he was chief of the general staff, and when war broke out with Russia he was appointed commander-in-chief in Manchuria, defeating the Russians at the three great battles of Liao-Yang, the Shaho, and Mukden. He received the order of merit, 1906, and resigned his post as chief of the general staff in April. He was created prince in 1907.

Packard, Alpheus Spring, American naturalist, was born at Brunswick, Maine, 1839, was graduated from Bowdoin in 1861, and became assistant to Agassiz at Cambridge. After taking part in several scientific expeditions, he became state entomologist of Massachusetts and professor of zoölogy and geology at Brown university. He is widely known as an entomologist and zoölogist. Besides many technical papers, his publications include, *Guide to the Study of Insects; Our Common Insects; Zoölogy; Entomology for Beginners; Text-Book of Entomology*, etc. Died, 1905.

Paderewski (*pȧ'-dĕ-rĕf'-skē*), **Ignace Jan,** Polish pianist and composer, was born in Podolia, Russian Poland, 1860. He began to play the piano at three, and at seven was placed by his father under the care of a local teacher, Pierre Lowinski, and with him remained for four years. In 1872 he went to Warsaw, studied under Roguski, and subsequently pursued his studies under the late Frederick Kiel of Berlin. In 1884 he resolved to adopt the career of a virtuoso, removed to Vienna, placed himself under his fellow-countryman, Theador Leschetizky, and at the expiration of three years' hard study made his début. Afterward he visited Germany, and in the autumn of 1889 made his first appearance before a Parisian audience. His first appearance in England took place at St. James's hall, London, 1890, and he has paid four visits to America. He has written *Manru*, an opera, *Suite for Orchestra in G*, etc.

Paganini (*pä'-gä-nē'-nē*), **Nicolò,** Italian violinist, son of a commission broker at Genoa, was born in 1784. His musical talent showed itself in his childhood; in his ninth year he had instructions from Costa at Genoa, and afterward from Rolla at Parma, and from Ghiretti. In 1805 he began a professional tour of Italy; he created subsequently a great sensation on appearing in the principal towns of Germany. In 1831 his violin playing created an equal furor in Paris and London. His mastery of the violin has never been excelled. He died at Nice, 1840.

Page, Carroll Smalley, banker, United States senator, was born at Westfield, Vt., 1843. He received an academic education; LL. D., Norwich university; is president of the Lamoille County savings bank and trust company and of the Lamoille County national bank, both of Hyde Park, Vt.; is a director of the Swanton savings bank and trust company, of Swanton, Vt. Extensive dealer in raw calfskins. He represented Hyde Park in the house of representatives, 1869–72, and Lamoille county in the state senate, 1874–76; was savings bank examiner, 1884–88; governor of Vermont, 1890–92; and elected to the United States senate, 1908, to fill the vacancy caused by the death of Redfield Proctor. Unanimously reëlected, 1910.

Page, Thomas Nelson, American author, was born on Oakland plantation, Hanover county, Virginia, 1853. He was educated at Washington and Lee university; LL. B., university of Virginia, 1874; Litt. D., Washington and Lee, 1887, Yale, 1901; LL. D., Tulane university, 1899. He practiced law at Richmond, Va., 1875–93, but subsequently turned to literature and lecturing. Author: *In Ole Virginia; Two Little Confederates; On Newfound River; The Old South; Among the Camps; Elsket and Other Stories; Befo' de War* (with Armistead C. Gordon); *Pastime Stories; The Burial of the Guns; Unc' Edinburg Meh Lady; Marse Chan; Polly; Social Life in Old Virginia; The Old Gentleman of the Black Stock; Two Prisoners; Red Rock; Santa Claus's Partner; A Captured Santa Claus; Gordon Keith; The Negro — The Southerner's Problem; Bred in the Bone; The Coast of Bohemia*, poems; *Under the Crust*, etc.

Page, Walter Hines, American journalist and writer, editor of *The World's Work* since 1900, was born at Cary, N. C., 1855. He was educated at Randolph-Macon college, Virginia, and Johns Hopkins university; LL. D., Randolph-Macon, and Tulane. He was editor of *The Forum*, 1890–95; literary adviser to Houghton, Mifflin and Company, 1895–99; editor of *The Atlantic Monthly*, 1896–99; and is a member of the firm of Doubleday, Page and Company, publishers, New York. Author: *The Rebuilding of Old Commonwealths*, etc.

Paget (*păj'-ĕt*), **Sir James,** English surgeon, was born at Yarmouth, England, in 1814. He entered the royal college of surgeons in 1836, became member of the council in 1865, president in 1875, and Bradshawe lecturer in 1882. He was surgeon to Queen Victoria, and to the then prince of Wales, and consulting surgeon to St. Bartholomew's hospital. He was made a baronet in 1871, and also an LL. D. by the university of Edinburgh. His works are *Lectures on Surgical Pathology, Clinical Lectures*, etc. Died at London, 1899.

Paine, John Knowles, American composer and organist, professor of music, Harvard, 1876–1906, was born in Portland, Maine, 1839. He studied music under Hermann Kotzschmar there; made his first appearance as organist, 1857; studied in Germany under Haupt and others, 1858–61; and made an artistic tour there, 1866–67. He was instructor in music, Harvard, in 1862, and became full professor there in 1876; A. M., Mus. D. He composed the music for the *Œdipus Tyrannus* of Sophocles performed in Greek at Cambridge, 1881; a number of symphonies and symphonic poems; overture to *As You Like It;* cantatas, *Nativity* and *Song of Promise;* choruses to *Birds* of Aristophanes, etc.; opera of *Azara; Centennial Hymn* to Whittier's words, sung at opening of Philadelphia exposition, 1876; Columbus march and hymn for World's Columbian exposition, 1893; *Hymn of the West*, words by Stedman, sung at the opening of the St. Louis exposition, 1904; the oratorio, *St. Peter;* cantatas, *Realm of Fancy, Phœbus Arise*, etc. Died, 1906.

Paine, Thomas, Anglo-American writer, was born, 1737, at Thetford, England. He was trained to the business of his father, who was a staymaker, but afterward obtained a situation in the customs, and the management of a tobacco manufactory. His income, however, was small, and he fell into debt, and was dismissed in 1774, after which he came to America, was favorably received by a bookseller in Philadelphia, and in 1776 published a pamphlet entitled *Common Sense*, in which he maintained the cause of the colonies against the mother country. The success and influence of this publication were extraordinary, and it won him the friendship of Washington, Franklin, and other distinguished American leaders. He was appointed by congress secretary to the committee of foreign affairs; visited France in the summer of 1787, where he made the acquaintance of Buffon, Malesherbes, La Rochefoucauld, and other eminent men; and in the autumn following went to England, where, in 1791–92, he published *The Rights of Man*, the most famous of all the replies to Burke's *Reflections upon the French Revolution.* In 1792 the department of Pas-de-Calais elected him a deputy to the national convention, where he usually voted with the Girondists. At the trial of Louis XVI. he proposed that the king should be spared and afforded an opportunity of seeking an asylum in America. In 1793 Robespierre caused him to be ejected from the convention on the ground of his being a foreigner, and thrown into prison. While he was in France, appeared *The Age of Reason*, against atheism and against Christianity, and in favor of deism. In 1802 he returned to the United States, and died, 1809.

Palestrina (*pä'-lās-trē'-nä*), **Giovanni Pierluigi da,** distinguished Italian composer, was born near Rome about 1514. In 1551 he was made master of the Julian chapel, Rome, and in 1554 published a collection of masses, so highly approved by Pope Julius III., to whom they were dedicated, that he appointed their author one of the singers of the pontifical chapel. During the remaining years of his life the number and the quality of the works of Palestrina were remarkable. His published works consist of thirteen books of *Masses;* six books of *Motets;* one book of *Lamentations;* one book of *Hymns;* one book of *Offertories;* one book of *Magnificats;* one book of *Litanies;* and four books of *Madrigals.* These works mark an epoch in the annals of music. He died in 1594.

Paley (*pā'-lĭ*), **William,** English divine and writer, was born at Peterborough in 1743. He was educated at Christ's college, Cambridge, of which he became a fellow in 1766, and for ten subsequent years he resided at the university. In 1776 he obtained the vicarages of Dalston, in Cumberland, and Appleby, in Westmoreland. Within the next nine years he became a prebendary, archdeacon, and chancellor of Carlisle. In 1785 he at once attained high reputation by his *Principles of Moral and Political Philosophy.* In this work he propounds his ethical theory, which is commonly called utilitarianism. In 1790 appeared his most original and valuable work — the *Horæ Paulinæ;* then followed *A View of the Evidences of Christianity* and *Natural Theology.* The latter, however, is based on, and, to a large extent, is borrowed from the *Religious Philosopher*, a work by a Dutch philosopher named Nieuwentyt. He was successively made vicar of Stanwix, a prebendary of St. Paul's, subdean of Lincoln, a doctor of divinity, and rector of Bishop's Wearmouth. Died, 1805.

Palissy (*pȧ'-lē'-sē'*), **Bernard de.** See page 342.

Palladio (*päl-lä'-dyō*), **Andrea,** famous Italian architect, was born at Vicenza, 1518. After having studied with the greatest care the writings of Vitruvius and the monuments of antiquity at Rome, he settled in his native city, and first acquired a reputation by his restoration of the basilica of Vicenza. His style, known as the Palladian, is a composite, and is characterized by great splendor of execution and justness of proportion, and it exercised an immense influence on the architecture of northern Italy. He died at Vicenza, 1580. He wrote a work on architecture which is highly prized.

Palma (*päl'-mä*), **Tomas Estrada,** Cuban patriot, was born about 1836 in Bayamo, Cuba; studied law at university of Seville, but never practiced; and took part in the Cuban revolution of 1868–78, in the early part of which his mother had been captured and starved to death by the Spaniards. Her death made him heir to a vast estate, which the Spaniards confiscated. He became president of the Cuban republic, but was captured, 1877, and imprisoned until hostilities ceased, 1878. He then went to Honduras; became a teacher and later postmaster-general; married a daughter of President Guardiola; came to the United States, and settled in Central Valley, Orange county, N. Y. During the last Cuban revolution he was delegate-at-large and minister plenipotentiary for Cuban republic, and subsequently president of Cuba, 1902–06. He died, 1908.

Palmer, Alice Freeman, American educator, was born at Colesville, N. Y., 1855. She graduated at the university of Michigan, 1876; was professor of history at Wellesley college, 1879–81; president, 1882–87; and non-resident dean of the woman's department, university of Chicago, 1892–95. She married George Herbert Palmer, professor of philosophy in Harvard university, in 1887. She was one of the most forceful and cultured of American educators. Died, 1902.

Palmer, Edward Henry, English explorer and orientalist, was born, 1840, at Cambridge. He graduated from Cambridge in 1867; devoted himself to oriental studies; and during 1868–70 was engaged for the Palestine exploration fund in the survey of Sinai and the desert. In 1871 he was appointed Lord Almoner's professor of Arabic at Cambridge, and in 1874 was admitted to the English bar. In 1881 he turned journalist, writing principally for the *Standard.* In 1882, on the eve of Arabi's Egyptian rebellion, sent by government to win over the Sinai tribes, he, Captain Gill, and Lieutenant Charrington were on August 11th murdered in the ravine of Wady Sudr. Among Palmer's works are the *Desert of the Exodus; Arabic Grammar; Song of the Reed; Poems of Behà ed Din Zoheir; Persian Dictionary; Haroun Alraschid;* and a translation of the Koran.

Palmer, Erastus Dow, American sculptor, was born at Pompey, N. Y., 1817. He was a joiner by trade, and made carvings first of animals and leaves in wood. Seeing a cameo head, he cut on a shell a portrait of his wife, and his success induced him to try working in marble. The bas-reliefs, "Morning and Evening," "The Sleeping Peri," "The Angel at the Sepulchre," in the cemetery at Albany; "Immortality," "Faith," and "Sappho," are some of his best known works. He executed busts of Alexander Hamilton, Washington Irving, Commodore Perry, and others, and a statue of Robert Livingstone, for the state of New York, cast in bronze. "The Landing of the Pilgrims," in the capitol at Washington, is one of his largest works. He died, 1904.

Palmer, George Herbert, American educator and scholar, Alford professor of natural religion, moral philosophy, and civil polity, Harvard, since 1889, was born in Boston, 1842. He graduated at Harvard, 1864; studied at the university of Tübingen, 1867–69; graduated Andover theological seminary, 1870; LL. D., university of Michigan, 1894, Union, 1895, Harvard, 1906; Litt. D., Western Reserve, 1897. He was tutor in Greek at Harvard, 1870-72, assistant professor, 1873–83, and professor of philosophy, 1883–89. Author: *The Odyssey*, an English translation in rythmic prose; *The New Education; The Glory of the Imperfect; Self Cultivation in English; The Antigone of Sophocles*, a translation; *The Field of Ethics; The Nature of Goodness; The Life and Works of George Herbert;* and *Life of Alice Freeman Palmer*, etc.

Palmerston (*päm'-ĕr-stun*), **Henry John Temple, Viscount,** British statesman, was born at Broadlands, in Hampshire, 1784. He entered parliament as member for Newport in 1807, and in 1811 became member for the university of Cambridge, which constituency he represented until 1831. He afterward became member for Bletchingly and for South Hampshire successively, and from 1835 to his death represented Tiverton. Lord Palmerston was engaged in official life during nearly the whole of his career. In 1807 he became a junior lord of the admiralty under the duke of Portland, and from 1809 to 1828 was secretary for war. In the administrations of Earl Grey, Viscount Melbourne, and Lord John Russell, he held the post of foreign secretary, resigning that office in 1851 because of a difference between himself and his colleagues arising out of his too ready acknowledgment of the *coup d'état* effected by Louis Napoleon. In 1852 he became home secretary under the earl of Aberdeen, whom he succeeded as first lord of the treasury in 1855. In 1858 he was defeated and compelled to resign office owing to a conspiracy bill arising out of Orsini's attempt to assassinate Napoleon III.; but in the following year he returned to power, and remained prime minister until his death. He was a statesman of unerring tact and deep sagacity in relation to questions of foreign policy, of which he was an acknowledged master. Died, 1865.

Paoli (*pă'-ō-lē*), **Pasquale**, famous Corsican patriot, was born in 1725 at Morosaglia, in Corsica. In 1755 he was elected captain-general of the island. He actively applied himself to the reformation of the barbarous laws and customs of the island, and at the same time to the expulsion of the Genoese. In 1789 he entered into the schemes of the revolutionary party; but during the anarchy of France in 1792-93 he conceived a scheme for making Corsica an independent republic. He allied himself with Britain, favored the landing of 2,000 British troops in the island in 1794, and joined them in driving out the French. He then surrendered the island to George III., but, becoming dissatisfied with the government, he quarreled with the British viceroy. He therefore retired from the island in 1796, and spent the remainder of his life in the neighborhood of London. He died, 1807.

Pape, Eric, American artist, illustrator, was born in San Francisco, 1870. He received his art education in Paris under Boulanger, Lefebvre, Constant, Doucet, Blanc, and Delance and at École des Beaux Arts under Gérôme and Laurens, and has lived in France, Germany, and Egypt. Instructor in the Cowles art school, Boston, 1897; founded, 1898, and has since been director and head instructor of the Eric Pape school of art. He exhibited at Paris salon, 1890–1900, World's Columbian exposition, 1893, Munich Kunst Austellung, 1897, Omaha exposition, 1899, Paris exposition, 1900, Pan-American exposition, 1901, St. Louis exposition, 1904, and at various art museums and exhibitions in the United States and abroad, and has illustrated many important works.

Papin (*pȧ'-păɴ'*), **Denis**, French physicist, was born at Blois, 1647. He studied medicine in Paris, where, after receiving his degree, he practiced for some time as a physician. To Papin undoubtedly belongs the high honor of having first applied steam to produce motion by raising a piston; he combined with this the simplest means of producing a vacuum beneath the raised piston — viz., by condensation of aqueous vapor; he is also the inventor of the "safety valve," an essential part of his "digester." By this latter machine Papin showed that liquids in a vacuum can be made to boil at a much lower temperature than when freely exposed to the air. Papin's sagacity led him to many other discoveries, among which was the principle of action of the siphon. He improved the pneumatic machine of Otto de Guericke, and took part against Leibnitz in the discussion concerning "living" and "dead" forces. Died at Marburg, Germany, 1712.

Papinianus (*pa-pĭn-ĭ-ā'-nŭs*), **Æmilius**, Roman jurist, was born about 146. He held offices at Rome under Septimius Severus, but was put to death by Caracalla in 212. He was remarkable for his juridical genius, the lucidity of his decisions and his high sense of right and morality. Nearly 600 excerpts from his legal works were incorporated in Justinian's *Pandects*.

Pappenheim (*păp'-en-hĭm*), **Gottfried Heinrich, Count von**, a great imperialist general in the thirty years' war, was born, 1594, at Pappenheim, Bavaria, of an old and distinguished Swabian family. He studied at Altdorf and Tübingen, and at the age of twenty went over to the Catholic church. He served under the king of Poland against the Russians and the Turks, and then joined the Catholic league, defeating the Bohemians at Prague in 1620. Again, in 1626, in the Austrian service, he suppressed the peasant revolt, in which 40,000 peasants died, and then fought against the Danes, Swedes, and Saxons of the Protestant league. At Lützen, in 1632, he arrived in time to save Wallenstein from defeat by the Swedes, but was mortally wounded in the second charge and died at Leipzig, 1632.

Paracelsus (*păr-ȧ-sĕl'-sŭs*), otherwise **Theophrastus Bombastus von Hohenheim**, German-Swiss physician and alchemist, was born in Switzerland in 1493. He entered Basel university at sixteen, studied alchemy and chemistry with Trithemius bishop of Würzburg, and next at the mines in Tyrol learned the properties of metals and minerals. In subsequent wanderings he amassed a vast store of facts, learned the actual practice of medicine, but lost all faith in scholastic disquisitions and disputations. He acquired fame as a medical practitioner, was made town physician at Basel, and lectured on medicine at the university, but flouted at Galen and Avicenna, and justified the furious enmities that pursued him by his own vanity, arrogance, aggressiveness, and intemperate habits. A dispute with the magistrates in 1528 drove him from Basel; he wandered for a dozen years, and settled in 1541 at Salzburg, but died in the same year, having been thrown out of a window by some of his excited opponents. Of some 250 works attributed to him, the critics admit only from ten to twenty-four as genuine, the others being by his followers the "Paracelsists." In spite of his attraction to alchemy and mysticism, he made new chemical compounds, and improved pharmacy and therapeutics, encouraged research and experiment, and, in an empirical fashion, revolutionized hide-bound medical methods.

Paris (*pȧ'-rē'*), **Comte de, Louis Philippe Albert d'Orléans**, grandson of King Louis Philippe, was born in Paris, 1838. He was educated in England; accompanied his uncle, the Prince de Joinville, to the United States, 1861, where he served for ten months on the staff of Generals McClellan and Porter. He afterward returned to France, entered the national assembly in 1871, but was expelled in 1886, and went to England where he occupied himself in writing a *History of the American Civil War*. He was the head of the Orleans family, and a claimant to the French throne. Died, 1894.

Park, Mungo, eminent African explorer, was born near Selkirk, Scotland, in 1771, and educated at Edinburgh university. In 1795 he set out for Africa to find the source and course of the Niger river, in which he succeeded the following year. He returned to Great Britain and published his *Travels in the Interior of Africa*. In 1805 he headed a large expedition in search of the mouth of the Niger. Most of the party died, and finally Park and his three remaining companions were drowned in the rapids near Boussa, 1806. The details of the expedition were made known through his journal and the discoveries of later explorers.

Park, Roswell, American physician, was born at Pomfret, Conn., 1852. He was graduated from Racine college; A. M., Harvard; M. D., medical department of Northwestern university, 1876; hon. M. D., Lake Forest university; LL. D., Yale, 1902. He was instructor in anatomy, Woman's medical college, Chicago, 1877–79; adjunct professor of anatomy, medical department, Northwestern university, 1879–82; lecturer on surgery, Rush medical college, Chicago, 1882; and since 1883 professor of surgery, medical department, university of Buffalo, and surgeon to Buffalo general hospital. He is a member of all national and several foreign surgical societies. He attended President McKinley after he was shot, 1901. Author: *Lectures on Surgical Pathology; History of Medicine; Text-Book of Surgery* (2 vols.); *The Principles and Practice of Modern Surgery,* etc.

Parker, Alton Brooks, American lawyer, jurist, was born in Cortland, N. Y., 1852. He was educated at the Cortland academy, Cortland normal school, and graduated at the Albany law school; LL. D., Union university. After admission to the bar he practiced in Kingston, N. Y.; was surrogate of Ulster county, 1877–85; delegate to democratic national convention, 1884; tendered office of first assistant postmaster-general, 1885; chairman of democratic state committee, 1885; appointed justice of supreme court of New York, 1885, elected, 1886; justice court of appeals, second division, 1889–92; member of general term, 1893–96, of appellate division, 1896-97; and chief-justice of court of appeals, 1898–1904. He resigned to accept democratic nomination for the presidency made on first ballot, July 9, 1904. He was president of the American bar association, 1906-07, and is now practicing law as a member of the firm of Parker, Hatch and Sheehan.

Parker, Sir Horatio Gilbert, Anglo-Canadian novelist, was born in Canada, 1862. He was educated at Trinity college, Toronto; D. C. L., Toronto. He was trained to journalism in Australia, and there first began his literary and dramatic work; traveled among South Sea islands, and extensively in the East, in Europe, Egypt, and northern Canada; initiated and organized the first imperial universities conference in London, 1903. He is the author of *A Lover's Diary,* poems; *The Vendetta; No Defence; Round the Compass in Australia; Pierre and His People; Mrs. Falchion; The Trespasser; The Translation of a Savage; The Trail of the Sword; When Valmond Came to Pontiac; An Adventurer of the North; The Seats of the Mighty; The Pomp of the Lavillettes; The Battle of the Strong; The Lane That Had No Turning; The Right of Way; Donovan Pasha; History of Old Quebec; A Ladder of Swords; The Weavers; Northern Lights,* etc. He was returned to parliament for Gravesend as a Unionist in 1900, and was knighted in 1902.

Parker, Horatio William, American composer and organist, professor of the theory of music, Yale, since 1894, was born at Auburndale, Mass., 1863. He was educated at Auburndale and in Europe; graduated at Royal Conservatoire, Munich, 1885; M. A., Yale, 1892; Mus. D., Cambridge university, England, 1902. He was professor of music, cathedral school of St. Paul, Garden City, L. I., 1885–87; organist, Holy Trinity church, New York, 1888–93, and at Trinity church, Boston, 1893–1901. His *Hora Novissima* was performed at the Chester (England) festival, July, 1899, and, in September, 1899, at festival of the three choirs, Worcester, England. He is author of the cantatas, *King Trojan* and *The Kobolds;* the oratorios, *Hora Novissima* and *St. Christopher,* and much other music, sacred and secular. Awarded the Metropolitan opera prize of $10,000 for the opera *Mona,* 1911.

Parker, Joseph, English preacher and author, the son of a stonecutter, was born at Hexham, 1830. He studied at University college, London, and became pastor of Congregational chapels at Banbury, Manchester, and, in 1869, of that now represented by the City temple in London. Among his books are: *Helps to Truth-seekers; Ecce Deus,* a reply to *Ecce Homo; Ad Clerum; City Temple Sermons; Inner Life of Christ; Apostolic Life; People's Prayer-book; People's Bible; Tyne Chylde: My Life and Teaching,* etc. Died, 1902.

Parker, Matthew, second Protestant archbishop of Canterbury, was born at Norwich, England, 1504. He studied at Corpus Christi college, Cambridge, and was ordained a priest in 1527. In 1535 he was appointed chaplain to Queen Anne Boleyn, who, not long before her death, exhorted her daughter Elizabeth to avail herself of Parker's wise and pious counsel. In 1552 he was presented by King Edward VI. to the canonry and prebend of Covingham, in the church of Lincoln. On the accession of Queen Mary he refused to conform to the reëstablished order of things, and was deprived of his preferments, and even obliged to conceal himself. The death of Mary, and the accession of Elizabeth, called him from his compulsory retirement, when he was appointed by the queen archbishop of Canterbury. "The subsequent history of Archbishop Parker," it has been justly remarked, "is that of the church of England." It is to Parker we owe the "Bishops' Bible," undertaken at his request, carried on under his inspection, and published at his expense in 1572. He had also the principal share in drawing up the *Book of Common Prayer.* It was under his presidency, too, that the thirty-nine articles were finally reviewed and subscribed to by the clergy, 1562. He died, 1575.

Parker, Theodore, American clergyman and scholar, was born at Lexington, Mass., 1810. He entered Harvard college in 1830, and during his collegiate course supported himself by teaching private classes and schools, and studied metaphysics, theology, Anglo-Saxon, Syriac, Arabic, Danish, Swedish, German, French, Spanish, and modern Greek. He then graduated from Harvard divinity school in 1836, and the next year became a Unitarian minister at West Roxbury. He was somewhat separated from the conservative Unitarians, as shown by his sermon, *The Transient and Permanent in Christianity,* and his *Discourse on Matters pertaining to Religion,* followed by *Sermons of the Times,* all of which attracted widespread notice and comment. His complete works, in twelve volumes, edited by F. P. Cobbe, were published in 1863–65. After a trip to Europe for his health, he returned in 1844 and for years preached to immense congregations at Melodeon and Music halls, Boston. He also lectured throughout the country and became an ardent anti-slavery agitator. His health compelled him to go to Mexico, thence to Italy, where he died at Florence, 1860.

Parkhurst, Charles Henry, American Presbyterian clergyman, was born in Framingham, Mass., 1842. He graduated from Amherst, 1866; studied theology at Halle, 1869-70, and Leipzig, 1872-73; D. D., LL. D., Amherst. He taught in Williston seminary, Easthampton, Mass., 1870-71; was pastor of the Congregational church, Lenox, Mass., 1874–80; and since 1880 pastor of Madison Square Presbyterian church, New York. He became president in 1891 of the society for prevention of crime, and his assertion of partnership of police with criminals led to an investigation of the New York police by the New York legislature. Author: *Forms of the Latin Verb Illustrated by the Sanskrit; The Blind Man's Creed; The Pattern on the Mount; Three Gates on a Side; What Would the World Be Without Religion? The Swiss Guide; Our Fight with Tammany; The Sunny Side of Christianity; A Little Lower than the Angels*, etc.

Parkman, Francis, American historical writer, was born in Boston in 1823; graduated at Harvard, 1844. He began the study of law, but abandoned it to devote himself to historical literature. He lived some time among the Indians of the Rocky mountains, and wrote *The Conspiracy of Pontiac; The Old Régime in Canada; Count Frontenac and New France under Louis XIV.; Montcalm and Wolfe; A Half Century of Conflict; The California and the Oregon Trail*, etc. He died at Jamaica Plain, Mass., 1893.

Parmenides (*pär-mĕn'-ĭ-dēz*), Greek philosopher, and greatest member of the Eleatic school, was born at Elea, and flourished about the fifth century B. C. In his didactic poem *On Nature* he sought to demonstrate the reality of absolute being. The fragments were rendered into English hexameters by Thomas Davidson, and paraphrased in English prose by W. L. Courtney, in 1882.

Parnell (*pär'-nĕl*), **Charles Stewart**, Irish statesman, was born in 1846, in Avondale, Ireland, and was educated at Cambridge. He entered public life as member for Meath in 1875, and two years later became conspicuous for his opposition to the prisons bill. He gradually ousted Mr. Butt from the leadership of the home rule party, and, in 1880, became leader of the Irish party and entered upon the land agitation. At the general election he was elected for three constituencies, but chose Cork, and as the head of the land league was prosecuted in 1880, by the Gladstone government, the result being a disagreement of the jury. In the following session, with the majority of his followers, he was removed from the house of commons by the sergeant-at-arms for obstructing business, and in October was imprisoned in Kilmainham under the coercion act. He was released in April, 1882, but the "no rent" manifesto had meanwhile been issued, and in 1883 the national league took the place of the suppressed land league. At the general election of 1885, he nominated every home rule candidate, and subsequently entered into an alliance with the followers of Gladstone. In the next parliament he proposed a bill to suspend evictions and reduce rent, after the rejection of which the agitation continued. In 1888 a special commission was appointed to examine the charges made against Parnell and others by the *London Times*, the result being his acquittal. He then brought suit for libel against the *Times* and recovered £5,000 damages. In consequence of the result of the O'Shea divorce case in 1890, he was deposed by the majority of his party, but continued to lead the minority and to carry on an active campaign until his death in 1891.

Parrhasius (*pă-rā'-shĭ-ŭs*), celebrated Greek painter, was the son of Evenor, also an artist, and was born at Ephesus in the fifth century B. C. He practiced his profession at Athens, the inhabitants of which held him in high estimation, and conferred on him the rights of citizenship. According to Pliny he was the first who established a true proportion between the different parts of a picture, and delineated with elegance and precision all the minutiæ of the features, even to those evanescent motions that betray the most delicate sentiments of the soul. Quintilian called him the legislator of his art, because his canon of proportion for gods and heroes was followed by all contemporary and subsequent painters. Among his works were an apparently symbolical picture of the "Athenian Demos"; "Theseus"; "Naval Commander in Full Armor"; "Ulysses Feigning Madness."

Parrott, Robert Parker, American inventor, was born in New Hampshire in 1804, graduated at West Point in 1824, and was assistant professor there of mathematics and of natural and experimental philosophy until 1829. He became captain in the ordnance corps in 1836, and soon afterward superintendent of the West Point iron and cannon foundry, at Cold Springs, N. Y., where he was first judge of the court of common pleas, 1844–47. Here he invented the Parrott system of rifled guns and projectiles, which were first introduced into actual use at the battle of Bull Run, 1861. Died, 1877.

Parsons, Alfred William, English landscape painter, was born at Beckington, Somersetshire, 1847. He was educated in private schools; was a clerk in the savings bank department of a London post office, 1865–67, since which he has devoted himself to painting. He was an exhibitor at the royal academy, Grosvenor, New gallery, etc. His picture, "When Nature Painted All Things Gay," was bought by the Chantrey fund, 1887. He has executed illustrations for *Harper's Magazine* and other publications; with E. A. Abbey, illustrations for *Herrick's Poems; She Stoops to Conquer; Old Songs; The Quiet Life; Alone, for Wordsworth's Sonnets; The Warwickshire Avon; Notes in Japan*, the last written by him; *The Danube, from the Black Forest to the Black Sea*, with F. D. Millet, etc.

Parsons, Herbert, ex-congressman, lawyer, was born in New York, 1869. He was graduated at Yale, 1890; university of Berlin, 1890-91; Harvard law school, 1891–93, Metropolis law school, 1893-94; admitted to bar, 1895. He is now a member of the law firm of Parsons, Closson & McIlvaine. Was alderman of New York, 1900-03, two terms; candidate for congress, 1900, 12th New York district; and member of congress, 13th New York district, 1905–11. He is a member of the board of managers of the New York association for improving condition of the poor, society for reformation of juvenile delinquents, Manhattan eye and ear hospital, etc.

Parsons, William Barclay, American engineer, was born in New York, 1859. He was graduated at Columbia university, 1879, C. E., 1882. He made surveys for the Canton-Hankow railway, China, 1,000 miles, 1898-99; as chief engineer of the New York rapid transit commission, designed and constructed underground railway system in New York; was a member of the isthmian canal commission and of the advisory board to the royal commission of London traffic, 1904. He is a member of the American society of civil engineers, etc. Author: *Turnouts; Track; An American Engineer in China*, and various monographs.

Parton, James, American author, was born at Canterbury, England, 1822, and was brought to New York when five years old. He began literary work on the *Home Journal* of New York, and published lives of Horace Greeley, Franklin, Jefferson, and Burr; *Famous Americans of Recent Times; Triumphs of Enterprise; Captains of Industry; Noted Women of Europe and America;* and a collection of the *Humorous Poetry of the English Language.* He died at Newburyport, Mass., 1891.

Partridge, William Ordway, American sculptor, author, was born at Paris, France, 1861. He

UNIV. OF

PASTEUR IN HIS LABORATORY
From a painting by Edlefelt

studied at Columbia college, and received his art education in Rome, Florence, and Paris. His works include statue of Shakespeare, Lincoln park, Chicago; bronze statue Alexander Hamilton, Brooklyn; Kauffmann memorial, Washington; bust of Edward E. Hale, Union League club, Chicago; Whittier, Boston public library; equestrian statue General Grant for Union League club, Brooklyn; Schermerhorn memorial, Columbia university; baptismal font, St. Peter and St. Paul cathedral, Washington; group, "Christ and St. John," Brooklyn museum of fine arts; statue, "Pocahontas," Jamestown exposition, 1907, etc. He has been an exhibitor at the salon, Paris, royal academy, London and Berlin. Author: *Art for America; The Song Life of a Sculptor; The Technique of Sculpture; The Angel of Clay*, a novel; *Nathan Hale, the Ideal Patriot; The Czar's Gift*, a novel.

Pascal (*päs'-käl'*), **Blaise**, French philosopher and scholar, was born at Clermont, in Auvergne, 1623. From his childhood he gave evidence of remarkable capacity. His gift for mathematics was extraordinary, and he contributed largely to the development of that science. But, when he was in his thirty-fourth year, he renounced the study of mathematics and natural philosophy, as well as of all human learning, and devoted himself wholly to religious meditation, mortification, and prayer. The last five years of his life were spent in retirement at Port Royal, near Paris. But his retirement did not prevent his noticing what was passing in the world; and he took an interest in the controversy between the Jesuits and the Jansenists, which led to the publication of the *Provincial Letters*, in favor of the latter. The wit and genius of his *Provincial Letters* have always been acknowledged, though their fairness has been questioned. His *Thoughts on Religion* has been translated into most European languages, and has been many times republished. Died at Paris, 1662.

Pasteur (*päs'-tûr'*), **Louis**, distinguished French chemist and bacteriologist, born in 1822 at Dôle. He received the degree of doctor of science in 1847; in 1848 became professor of physical science at Dijon, and in 1849 of chemistry at Strassburg. In 1854 he became dean of the faculty of science at Lille; in 1857 director of the École Normale Supérieure, Paris; in 1863 professor of geology, physics, and chemistry at the school of fine arts; and 1867–75 professor of chemistry at the Sorbonne, Paris. From 1886 on, his researches were made in connection with the Pasteur institute. At a very early date he became celebrated for researches on isomeric crystals and their behavior in polarized light, which obtained for him the London royal society's Rumford medal in 1856. In the years 1854–57 he made researches on ferments and fermentation, which also created an epoch, and led directly to his further studies in specific germs. He subsequently spent four years in studying and successfully combating the contagious silkworm disease; then the diseases of fowl-cholera and anthrax, which he successfully treated by vaccine of diluted virus. In 1882 he was elected to the French academy. His latest work was connected with a vaccine treatment for hydrophobia; but concerning this much doubt has been expressed of late years. Pasteur must, however, be regarded as the parent of the whole modern science of bacteriology, which has already attained such momentous results. Died, 1895.

Pater (*pā'-tẽr*), **Walter Horatio**, English essayist and critic, was born in London, 1839, educated at Oxford, and became a fellow at Brasenose college. Except for short visits to the continent, he spent practically all of his life in quiet study at Oxford. He came early under the influence of Keble, Jowett, and Ruskin, and succeeded the latter as the high priest of æsthetic thought. His *Studies in the History of the Renaissance* in 1873 revealed him as a penetrating critic with a beautiful prose style. Among his other works are: *Marius the Epicurean; Imaginary Portraits; Plato and Platonism; The Child in the House;* and *Greek Studies*. He died in 1894.

Paton (*pā'-tun*), **Sir Joseph Noel**, British painter, was born at Dunfermline, Scotland, 1821. He studied art at the royal academy, London. His pictures of "Christ Bearing the Cross," and "Reconciliation of Oberon and Titania," together gained a prize of $1,500. Scenes from fairyland and legend and religious allegory have made his work familiar and have often been engraved. Among his works are: "Home from the Crimea"; "Luther at Erfurt"; "The Fairy Raid"; "Gethsemane"; "Christ and Mary at the Sepulchre"; "The Man of Sorrows"; and "Thy Will Be Done." He is known also by his illustrations of the *Lays of the Scottish Cavaliers* and *The Ancient Mariner*. Died, 1901.

Patten (*păt'-'n*), **Simon Nelson**, American economist and writer, professor of political economy, university of Pennsylvania, since 1888, was born at Sandwich, Ill., 1852. He graduated at Halle, Germany, 1878, with the degree of Ph. D. Author: *Premises of Political Economy; Economic Basis of Protection; Theory of Dynamic Economics; Theory of Social Forces; Development of English Thought; Theory of Prosperity; Heredity and Social Progress; The New Basis of Civilization*, etc.

Patterson, Thomas Macdonald, lawyer, journalist, ex-United States senator, was born in Ireland, 1840. He was brought to the United States in childhood, and received his education at Asbury (now De Pauw) university, and Wabash college; was admitted to the bar, and has practiced at Denver, Colorado. He was city attorney, Denver, 1874; delegate in congress, Colorado territory, 1875–77; elected first member of congress, Colorado, for term of 1877–79; purchased *Rocky Mountain News*, 1890, and has edited it ever since. He was elected United States senator from Colorado, 1901–07.

Patti (*păt'-ē*), **Adelina Maria Clorinda** (now Baroness Rolf Cederström), noted operatic singer, was born at Madrid, Spain, 1843, daughter of Salvatore Patti of Catania, Sicily, and Caterina Chiesa, a well-known opera singer. She studied under Ettore Barili, and made her début at the Academy of Music, New York, 1859; Italian opera house, Covent Garden, in *La Sonnambula*, 1861. Her voice was a high soprano, of rich bell-like quality and remarkable evenness of tone; to these qualities she added purity of style and high artistic finish. She won golden opinions on the continent wherever she appeared, and received, in 1870, the order of merit from the emperor of Russia. Her greatest success is generally considered to have been in the part of Marguerite in Gounod's *Faust*. In 1868 she was married to the Marquis de Caux, from whom she was divorced in 1885. She then married M. Nicolini, in 1886, who died in 1898, and finally Baron Cederström, in 1899. She has appeared in the United States, South America, and Mexico at various times

Pattison, Mark, English writer and scholar, was born at Hornby, in Yorkshire, England, in 1813. He studied at Oxford and became a fellow of Lincoln college in 1839. His life was that of a scholar, and his standard was so high that his work largely suggests his power as a writer. He contributed articles to the *Quarterly*, the *Westminster*, and the *Saturday Review*, and wrote biographies of Isaac Casaubon and Milton, the latter one of the best lives in the *English Men of Letters* series. He also edited Pope's *Essay on Man*, his *Satires and Epistles*, and the *Sonnets of Milton*. In 1861 he was made rector of Lincoln college. He died at Harrowgate, 1884.

Patton, Francis Landey, American educator, theologian, was born in Warwick parish, Bermuda, 1843. He was educated at Knox college, Toronto, and university of Toronto; graduated from Princeton theological seminary, 1865; LL. D., Wooster university, 1878, Harvard, 1889, Toronto, 1894, Yale, 1901, Johns Hopkins, 1902. He was ordained to Presbyterian ministry, 1865; was pastor of 84th street Presbyterian church, New York, 1865–67, Presbyterian church, Nyack, 1867–70, and South church, Brooklyn, 1871. He was professor in McCormick theological seminary, Chicago, 1872–81; pastor of Jefferson Park Presbyterian church, Chicago, 1874–81; was moderator of the general assembly, 1878; professor of relations of philosophy and science to the Christian religion, Princeton theological seminary, 1881–88, and since 1886 professor of ethics, Princeton university. He was president of Princeton university, 1888–1902, and resigned to accept the presidency of Princeton theological seminary. Author: *The Inspiration of the Scriptures; Summary of Christian Doctrine*, etc.

Paul St. See page 206.

Paul III. (Alessandro Farnese), pope from 1534 to 1549, was born in Tuscany in 1468. Though ambitious to advance his family, making cardinals of two grandsons while they were yet boys, he was, however, a wise ruler and surrounded himself with good cardinals. His bull, or decree of excommunication against Henry VIII. of England, issued in 1538, and the one forming the order of the Jesuits, 1540, are the most important edicts of his reign. He supported Charles V. in his struggles against the Protestant league in Germany. He died suddenly, 1549.

Paulding, James Kirke, American author, was born at Pleasant Valley, N. Y., 1779. He was self-educated, early developed a tendency to literature, was a friend of Washington Irving, and wrote a portion of *Salmagundi*. During the war of 1812 he published *The Diverting History of John Bull and Brother Jonathan;* in 1813 a parody on the *Lay of the Last Minstrel*, entitled *A Lay of the Scottish Fiddle;* and in 1814 a more serious work, *The United States and England*, a defense against articles in the *Quarterly Review*. He held at one period the post of navy agent at New York, and was appointed by President Van Buren secretary of the navy. At the close of Van Buren's presidency, in 1841, Paulding retired to a country residence at Hyde Park, N. Y., where he wrote *The Old Continental*, a novel; *The Puritan and His Daughter;* and, with his son, a volume of plays and fairy tales. Died, 1860.

Paur (*pour*), **Emil**, German musical director, director of New York philharmonic society, and conductor of Paur orchestra, 1899-1900; was born in Austria, 1855. He was a pupil of his father, of Hellmesberger for violin, and of Dessoff for composition, and also graduated at the Vienna conservatory. He was appointed first violin of Vienna imperial opera house; court conductor at Cassel, Hanover, 1876–80; first conductor and director of opera and Abonnements-Konzerte, Mannheim, 1880–88; conductor of opera, Leipzig, 1888–93; conductor of Boston symphony, 1893–98. He has also appeared with leading concert organizations, and as solo pianist, and has been conductor of the Pittsburgh orchestra since 1904.

Paxton, Sir Joseph, English architect, was born in Bedfordshire, England, 1801. He began life as a gardener in the service of the duke of Devonshire. His care of the great glass conservatories of the duke of Chatsworth suggested to him the use of glass and iron for the building, in Hyde Park, London, of the great exhibition of 1851. Paxton was knighted for his successful design. He afterward designed the Crystal Palace at Sydenham, and superintended its building, laid out the terraces, and planned the gardens. He published the *Cottage Calendar*, which was very popular· *Paxton's Flower Garden;* edited the *Botanical Magazine*, and a *Botanical Pocket Dictionary* He sat in parliament for nine years, and died at Sydenham, near London, 1865.

Payne, John Howard, American dramatist, was born at New York, 1792. His first appearance as an actor was in that city in 1809. He was a successful actor for thirty years, and also wrote several plays, of which the best known are *Brutus, Charles II.*, and *Clari*. The song, "Home, Sweet Home," for which he is remembered, is in *Clari*, which was produced as an opera. The author of "Home, Sweet Home" had no home for the last forty years of his life, and died during his incumbency as American consul at Tunis, 1852. His remains were brought to America, and buried at Washington in 1883.

Payne, Sereno Elisha, lawyer, congressman, was born at Hamilton, N. Y., 1843. He graduated at the university of Rochester, 1864; LL. D., Colgate, 1902, university of Rochester, 1903. He was admitted to the bar, 1866, and has since been in practice at Auburn, N. Y. He was district attorney of Cayuga county, 1873–79; president of board of education, 1879–82, Auburn, N. Y.; member of congress for 26th district, 1883–85, 27th district, 1885–87, 31st district, 1889–1913, and 36th district, 1913–15, New York. He is chairman of the committee on ways and means; he was active in framing the McKinley, Dingley, and Payne-Aldrich tariff laws. He was a member of the high joint commission to negotiate treaty with Canada, 1898.

Paynter, Thomas H., lawyer, ex-United States senator, was born in Lewis county, Ky., 1851. He was educated at Rand's academy, and at Center college, Danville, Ky.; studied law, and was admitted to the bar in 1872. Appointed attorney for Greenup county, Ky., 1876, elected to that office, 1878, and held it until 1882; elected to the fifty-first, fifty-second, and fifty-third congresses; elected judge of the court of appeals of Kentucky in 1894, for an eight-year term, and to accept which he resigned, in 1895, as a member of the fifty-third congress; was reëlected judge of the court of appeals in 1902, and served until 1906, when he resigned; was elected to the United States senate for the term 1907–13.

Peabody, Elizabeth Palmer, American educator, was born at Billerica, Mass., 1804. She was a sister of Mrs. Nathaniel Hawthorne and Mrs. Horace Mann. She taught in the celebrated school of Bronson Alcott, and was one of the first to introduce the methods of Froebel into American schools and to use object lessons in teaching. She was the first to establish a kindergarten in America. She published many works of an educational character, especially upon her favorite theme. Among her best known works are: *The Kindergarten in Italy; Letters to Kindergartners; Guide to the Kindergarten*, etc. She died at Jamaica Plain, Mass., 1894.

Peabody, Francis Greenwood, American clergyman and educator, Plummer professor of Christian morals, Harvard, 1886-1912; was born at Boston, 1847. He graduated at Harvard, 1869, Harvard divinity school, 1872; D. D., Yale and Harvard; LL. D., Western Reserve. He was pastor of First Parish church, Cambridge, 1874–80; and Parkman professor of theology, Harvard divinity school, 1881–86. Author: *Mornings in the College Chapel; Short Addresses to Young Men on Personal Religion: Founder's Day at Hampton; Afternoons in the College Chapel; Jesus Christ and the Social Question; Happiness; Religion of an Educated Man; Jesus Christ and the Christian Character*; etc.

Peabody, George, American merchant and philanthropist, was born at South Danvers, Mass., 1795. At the age of eleven he was placed with a grocer, and at fifteen in a haberdasher's shop in Newburyport. When twenty-two years old he was a partner with Elisha Riggs in Baltimore. In 1827 he first visited England, where he settled permanently ten years later. Withdrawing from the Baltimore firm in 1843, he established himself in London as a merchant and broker, and accumulated a large fortune. In 1851 he supplied the sum required to fit up the American department at the great exhibition in London. In the following year he sent a large donation, afterward increased to $270,000, to found an educational institute, etc., in his native town of South Danvers (which is now called Peabody). He contributed $1,400,000 to the city of Baltimore for an institute of science, literature, and the fine arts; and $8,000,000 for the promotion of education, endowment of libraries, etc., in the United States. From 1862 to 1868 he gave £350,000 for the benefit of the London poor, and in his will he left £150,000 for the same purpose. He died in London, 1869.

Peabody, George Foster, American banker, was born at Columbus, Ga., 1852. He was educated in private schools there, and subsequently engaged in banking in New York. He was vice-president and director of the Mexican Northern railway company, Potosi and Rio Verde railway company, Mexican coal and coke company, Alvarez land and timber company, Compania Metallurgica Mexicana, Montezuma lead company; director of Mexican mineral railway company, Conquista coal railway company, Southern improvement company of New York; director of general education board, southern education board; was member of board of managers of American Bible society; trustee of Hampton normal and agricultural institute, Colorado college; general vice-president of American civic federation, 1905, etc.

Peale, Charles Willson, American portrait-painter, was born at Chestertown, Maryland, 1741. He received his art education from Copley and Benjamin West. His paintings are chiefly portraits, for which he was celebrated, among them being several of Washington. In 1785 he formed a collection of natural curiosities, and founded Peale's museum at Philadelphia. During the revolutionary war, he commanded a company of soldiers at Trenton and at Germantown. He died at Philadelphia, 1827.

Peale, Rembrandt, American painter, the son of Charles W. Peale, was born in Pennsylvania, 1778. He resided for some time at Charleston, S. C., and then went to England and France to study his art. Besides his many portraits, he painted several historical pictures, among them the well-known "Roman Daughter," and "The Court of Death." He published *Notes on Italy.* and *Portfolio of Art and Artists.* He died at Philadelphia, 1860.

Pearsons, Daniel Kimball, American philanthropist, was born at Bradford, Vt., 1820. He graduated in medicine at Woodstock, Vt., and practiced in Chickopee, Mass., until 1857. He then became a farmer in Ogle county, Illinois, in 1857, but in 1860 he removed to Chicago, where he rapidly accumulated a large fortune in real estate. For some years he served the city as alderman and assisted in managing its financial budgets. He is best known through his large gifts to educational and eleemosynary institutions, the Presbyterian hospital of Chicago, and the Chicago theological seminary being especially favored. There are few of the smaller colleges to which he did not give from $25,000 to $250,000, and his gifts run well up into the millions. Died, 1912.

Peary (*pē'-rĭ*), **Josephine Diebitsch,** arctic traveler, author, was born and educated in Washington, D. C. She married Lieutenant Robert Edwin Peary, of the United States navy, explorer, 1888; accompanied him on his 1891-92 and 1893-94 expeditions as far as winter quarters in Greenland; was the first white woman to winter with an arctic expedition, and her daughter, Marie Ahnighito, is the most northerly born white child in the world. She accompanied her husband on his arctic trip in 1897; went North to meet him in 1900; the ship was caught in the ice and she wintered with her little daughter at Cape Saline in 78° 42′ north latitude. She went North again in 1902, returning with her husband. Author: *My Arctic Journal*, and *The Snow Baby.*

Peary, Robert Edwin, arctic explorer, officer of United States navy, was born at Cresson, Pa., 1856. He graduated at Bowdoin, 1877; entered United States navy as civil engineer, 1881; was assistant engineer Nicaragua ship canal under government orders, 1884-85; engineer in charge of Nicaragua canal surveys, 1887-88; invented rolling-lock gates for canal; made reconnoissance, 1886, of the Greenland inland ice-cap, east of Disco bay; was chief of arctic expedition of academy of natural sciences of Philadelphia, 1891-92, to northeast angle of Greenland; discovered and named Melville Land and Heilprin Land, lying beyond Greenland; made another arctic voyage, 1893–95; failed to reach the northern end of Greenland on third trip. Fitted out another ship, and sailed on another polar expedition in 1905. He was commander of arctic expedition under auspices of Peary arctic club of New York city, 1898–1902, and attained a latitude of 84° 17′ north. In 1908-09 he made a fourth expedition, and claims to have reached the pole in April, 1909. Author: *Northward Over the Great Ice.*

Peck, Harry Thurston, American educator, scholar and writer, professor of Latin, Columbia university, 1888–1910; was born at Stamford, Conn., 1856. He graduated at Columbia, 1881; Ph. D.; L. H. D.; LL. D.; and studied in Berlin, Paris, and Rome. He was literary editor of *The Commercial Advertiser*, 1897–1901, and editor of *The Bookman*, 1895–1907. Author: *The Personal Equation; The Semitic Theory of Creation; Latin Pronunciation; The Adventures of Mabel; What is Good English? Greystone and Porphyry*, poems; *Twenty Years of the Republic; The Life of Prescott; Hilda and Her Wishes; Studies in Several Literatures; Literature; The New Baedeker; A History of Classical Philology.* Editor of *Harper's Classical Dictionary; The International Cyclopædia; The New International Encyclopædia; American Atlas of the World; The Library of the World's Literature; Masterpieces of Literature.* Consulting editor *International Year Book*, and translator of *Trimalchio's Dinner*, etc.

Peckham, Rufus Wheeler, American jurist, was born at Albany, N. Y., 1838. He was educated at the Albany academy and in Philadelphia; studied law, and was admitted to the bar, 1859; LL. D., Union college, 1894, Yale, 1896, Columbia, 1901. He was district attorney of Albany county, 1868; corporation counsel, city of Albany, 1880-81; justice of supreme court of New York, 1883-86; associate justice of court of appeals, New York, 1886–95; and associate justice of United States supreme court from 1895 until his death in 1909.

Pedro I. (*pā'-drō*), emperor of Brazil, was the second son of John VI. of Portugal, and was born in 1798. He fled to Brazil with his parents on Napoleon's invasion, and became prince-regent of Brazil on his father's return to Portugal, 1821. He declared for Brazilian independence in 1822, and was crowned as Pedro I. The new empire did not prove successful under his rule, and Pedro in 1831 abdicated, withdrew to Portugal, where, after securing the throne for his daughter, he died, 1834.

Pedro II., son of the preceding, was born, 1825, became emperor of Brazil on his father's abdication, and, distinguished by his love of learning and scholarly tastes, reigned in peace until the revolution of 1889 drove him to Europe. He died at Paris, 1891.

Peel, Sir Robert, English statesman, was born near Bury, Lancashire, 1788. He graduated at Oxford in 1808, and next year entered parliament as tory member for Cashel; afterward sat for Oxford university, and after 1832 for Tamworth. He was appointed under-secretary for the colonies in 1811, and from 1812 until 1818 was secretary for Ireland. In 1822 he became home secretary, but seceded from the government when Canning became premier in 1827. The question at issue was Catholic emancipation, and it was characteristic of Peel that in the government which succeeded Canning's he had the courage, having changed his opinions, to introduce the measure which removed the disabilities. Opposed to reform he became leader of the conservative opposition in the parliament of 1833, and was called to the premiership in 1834. He could not maintain his administration, however, and it was not until 1841 that the victory of protection over the free-trade agitation gave him a stable majority in the house of commons. His first measure was a modification of the corn laws on protectionist principles, 1842; then followed the income-tax and general tariff revision. In 1845 the agitation for free-trade in corn was brought to a crisis by the Irish potato famine. Peel yielded, and next year carried the final repeal of the import duties on food stuffs. His "conversion" split the tory party and he retired from office, becoming a supporter of the whig ministry in its economical and ecclesiastical policy. He was a master of finance, an easy speaker, slow to form but conscientious to act upon his convictions, and a man of the highest character. His death, in 1850, was the result of a fall from horseback.

Peelle, Stanton Judkins, American jurist, was born in Wayne county, Indiana, 1843. He was educated in public schools and seminary in Indiana; served in the civil war; studied law, and practiced at Winchester, Ind., until 1868, and afterward at Indianapolis. He was a member of the Indiana legislature, 1877–79; member of congress, 1881–83; judge, 1892–1905, chief-justice, 1906–13, United States court of claims. He was professor of the law of partnership, and bailment in the law department of George Washington university, 1901–11; trustee of Howard university and Garfield hospital.

Peirce, Benjamin, American mathematician, was born at Salem, Mass., 1809. He graduated at Harvard in 1829; in 1833 became professor at Harvard; in 1849 astronomer to the American *Nautical Almanac;* and in 1867–74 was superintendent of the United States coast survey. In 1836–46 he issued a series of mathematical textbooks. His papers on the discovery of Neptune, in 1848, and on Saturn's rings brought him membership in many learned societies in Europe and America. He died at Cambridge, Mass., 1880.

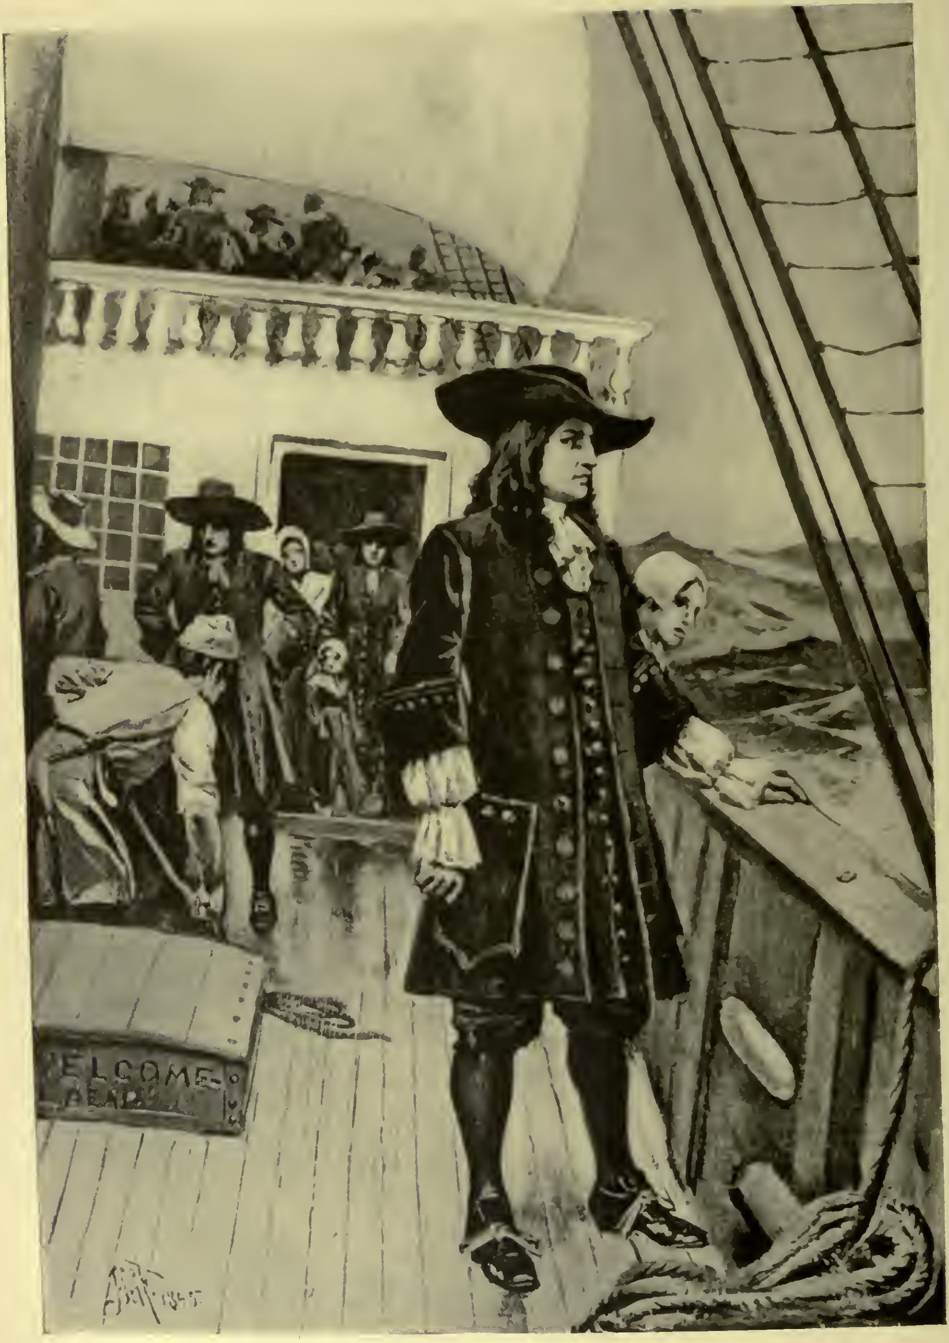
Pelagius (*pē-lā'-jĭ-ŭs*), author or systematizer of the doctrine known as Pelagianism, was born about the middle of the fourth century, in Britain, or, according to some authorities, in Bretagne. His name is supposed to be a Greek rendering of the Celtic appellative *Morgan*, or sea-born. He settled in Rome; at the end of the fourth century had already acquired a considerable reputation for sanctity and for knowledge of the scriptures and the spiritual life. He then made a pilgrimage to Jerusalem, and in 415 was accused of heresy before the synod of Jerusalem, by a Spaniard named Orosius. The impeachment failed, but the synod of Carthage, in 416, condemned him. He was then banished from Rome in 418 by the emperor Honorius. From this date Pelagius disappears. Of his after life nothing is known in detail. The controversy, considered as an exercise of intellectual energy, is the most remarkable in the ancient history of the church. But the most important of the writings on the Pelagian side have been lost.

Pélissier (*pā'-lĕ'-syā'*), **Aimable Jean Jacques**, a marshal of France, was born at Maromme near Rouen, 1794. He entered the French army at the age of twenty; and after thirty-six years' service attained the rank of general in 1850. In the Crimean war, in 1855, he was placed in command of the first corps, and soon succeeded Marshal Canrobert in the chief command before Sebastopol. On the 8th of September he stormed the Malakoff, for which he was rewarded with a marshal's baton, and after the fall of Sebastopol he was also created Duc de Malakoff, and rewarded with a grant of $20,000. He became governor-general of Algiers in 1860 and died there in 1864.

Pellico (*pĕl'-lē-kō*), **Silvio**, Italian patriot and poet, was born at Saluzzo, in Piedmont, 1788. In 1819 he became connected with a liberal periodical which was published in Milan under the title of *Il Conciliatore*, "The Conciliator," and also joined the revolutionary society of the Carbonari. Arrested in the following year on a charge of conspiracy against the Austrian government, he was imprisoned from 1822 to 1830 in the subterranean dungeons of the fortress of Spielberg, near Brünn, being at last liberated by the command of the emperor. His account of his imprisonment, published in 1833 under the title of *Le mie Prigioni*, "My Prisons," has been translated into most of the European languages. He also wrote the tragedies, *Francesca da Rimini* and *Laodamia*. He died at Turin, 1854.

Pelopidas (*pē-lŏp'-ĭ-das*), Theban general of noble descent, was noted among his fellow citizens for his disinterested patriotism. The inviolable friendship between himself — one of the richest men in Thebes — and Epaminondas — one of the poorest — is among the most beautiful things recorded in Greek history. In 382 B. C. he was driven from Thebes by the oligarchic party, who were supported by the Spartans, and forced to seek refuge at Athens, whence he returned secretly with a few associates, 379 B. C., and recovered possession of the Kadmeia, or citadel, slaying the Spartan leader, Leontiades, with his own hand. His "sacred band" of Theban youth largely contributed to the victory of Epaminondas at Leuctra, in 371 B. C., but failed on a subsequent attack on Sparta itself. In the expedition of the Thebans against the tyrant, Alexander of Pherae, 368 B. C., he was, after several important successes, treacherously taken prisoner. In 364 B. C. he won the battle of Cynoscephalae, but was himself killed.

Pelz, Paul Johannes, German-American architect, was born in Seitendorf, Germany, 1841. He was educated at the college of St. Elizabeth and college of the Holy Spirit, Breslau. He left,



WILLIAM PENN
From a painting by J. L. G. Ferris

however, at sixteen to join his father, who settled in the United States for political reasons. He then studied architecture, 1859–66, in New York, under Detlef Lienau; was connected with United States lighthouse board as architect and civil engineer, during which service he designed many lighthouses. He was one of the architects of the Congressional library building, Washington, D. C.; architect of Georgetown college academic building; Carnegie library, and music hall building, Allegheny, Pa.; United States government army and navy hospital, Hot Springs, Ark.; Chamberlain hotel, Old Point Comfort, Va.; clinic hospital, university of Virginia; Aula Christi, Chautauqua, N. Y.; machinery hall, Louisiana Purchase exposition, and many others.

Penn, William, celebrated Quaker, and the founder of Pennsylvania, was born in London, 1644. He studied at Oxford, early gave evidence of strong religious impulses, and adopted the new doctrines of the so-called society of Friends. This step on his part caused his expulsion from the university and consequent estrangement from his father. In 1667 he was arrested and imprisoned, and in 1669 commenced preaching in London, for which offense he was tried before the court of common pleas, and heavily fined. He remained in prison for some time on his refusal to pay the fine, which his father ultimately paid for him. In 1681, Penn, who had inherited from his father a claim against the government of £16,000, obtained from the king in satisfaction therefor a grant of an extensive tract of country lying west of the Delaware river and north of Maryland, in the American plantations, and which in the royal patent was called *Pennsylvania* (Penn's wooded country), in honor of the late admiral, the father of the grantee. This territory Penn resolved to form into a commonwealth based upon perfect religious toleration, and accordingly set sail thither, arriving in Delaware bay on the 27th of October, 1682. In November he entered into a league with the Indians, and next founded the city of Philadelphia. In 1684 he returned to England, where he enjoyed the confidence of James II., who had been his father's friend. After the accession of the prince of Orange as William III., Penn was twice accused of treason, and was arrested in 1690 on a charge of conspiracy, but was finally and honorably acquitted in 1693. In 1699 he paid a second visit to Pennsylvania, and his stay, which lasted two years, was marked by many useful measures, and by efforts to ameliorate the condition both of the Indians and the negroes. In 1701 he returned to England, and died, 1718.

Pennell (*pĕn′-ĕl*), **Joseph,** American artist, illustrator, author, was born in Philadelphia, 1860. He was a pupil of the Pennsylvania academy of fine arts and Pennsylvania school of industrial art. His works are represented in the national collections of France, at Dresden, Budapest, Melbourne, Perth, Adelaide, and in many state and municipal collections in Europe and America. He was chairman of the international jury of awards, St. Louis exposition, 1904. Author: *A Canterbury Pilgrimage; An Italian Pilgrimage; Two Pilgrims' Progress; Our Sentimental Journey Through France and Italy; Pen Drawing and Pen Draughtsmen; Our Journey to the Hebrides; The Stream of Pleasure; The Jew at Home; Play in Provence; To Gypsyland; Modern Illustration; The Illustration of Books; The Alhambra; The Work of Charles Keene; Lithography and Lithographers; The Life of James McNeill Whistler* (with Mrs. Pennell), etc. He has also illustrated a large number of books.

Penrose, Boies, politician, United States senator, was born in Philadelphia, 1860. He graduated from Harvard college in 1881, and was admitted to the bar in 1883. He practiced his profession in Philadelphia for several years; was elected to the Pennsylvania house of representatives in 1884, to the Pennsylvania state senate in 1886, 1890, and 1894; was elected a member of the national republican committee from Pennsylvania in 1904, and to the United States senate, 1897. Reëlected in 1903 and 1909.

Pepin le Bref (*pă′-păɴ′ lĕ brĕf′*), king of the Franks and father of Charlemagne, was born in 714, the younger son of Charles Martel. On the death of his father in 741, he received Neustria and Burgundy; deposed Childeric III., and founded the Carlovingian dynasty in 751. He was the first Frankish monarch whose election received the sanction of the pope, and who was consecrated to his high dignity. These solemn ceremonies put the crown, to a great extent, at the mercy of the clergy, who from this time took a political rank in the state, and from which dates the temporal power of the popes. He died, 768.

Pepper, Charles M., American journalist, was born in Ohio, 1859. He graduated at Wooster university, 1881. Appointed by President Roosevelt a delegate to the Pan-American congress at the city of Mexico, 1901; was exposition commissioner to Cuba, 1902; appointed by secretary of state special Pan-American railway commissioner, 1903; and foreign trade commissioner, department of commerce and labor, 1906-09. He was Washington correspondent *Chicago Tribune*, 1886–95; staff correspondent *New York Herald*, 1896-97; from Cuba to leading American papers, 1897–1901. Author: *Tomorrow in Cuba; Panama to Patagonia*, etc.

Pepper, William, American physician, educator, author, and benefactor, was born at Philadelphia, 1843, and educated at the university of Pennsylvania, from which he took both his classical and his medical diplomas. Within four years after receiving his degree as a physician, he was appointed lecturer in his alma mater, and was connected with it up to the time of his death. He was elected provost of the university in 1881; and during his incumbency of thirteen years it became a new institution, one of the foremost in the states. So great was his devotion to the university that he not only gave his services free, but contributed many thousands of dollars out of his own private fortune toward its various endowments. His health suffered from too constant application, and in 1894 he retired, and removed to California, where he died, 1898. His most important literary work was *Pepper's System of Medicine by American Authors*, which he edited.

Pepperell, Sir William, American general, was born in Maine in 1696. He was a member of the British council for the province of Massachusetts for thirty-two years from 1727, and in 1730 was appointed chief-justice of the court of common pleas. He commanded the successful expedition against Louisburg in 1745, and was made a baronet. He was acting governor of Massachusetts, 1756–58, and in 1759 was made lieutenant-general. He published an account of a *Conference with the Penobscot Tribe.* Died, 1759.

Pepys (*pēps, pĕp′-ĭs, pĕps*), **Samuel,** English politician and diarist, officer of the English admiralty during the reigns of Charles II. and James II., was born, 1633. He was committed to the Tower on an unfounded and absurd charge of aiding in a design to dethrone the king and extirpate the Protestant religion. Having been discharged without a trial, Pepys was replaced at his post in the admiralty, which he retained until the abdication of James II. For two years he was president of the royal society. He wrote

Memoirs of the Royal Navy, 1690; left to Magdalen college, Cambridge, his large collection of books, MSS., and prints, including about 2,000 ancient English ballads, forming five folio volumes; but his reputation is founded on his *Diary* from 1659 to 1669, which affords a curious insight into the manners and court life of his day. Died, 1703.

Pericles (*pĕr'-ĭ-klēz*), greatest of Athenian statesmen, and a general and orator, was born at Athens, 495 B. C. He was the son of Xanthippus and Agariste, both of whom belonged to the noblest families of Athens; received a careful education, and began to take part in public affairs when about twenty-six years of age. He soon gained the position of head of the more democratic party in the state, in opposition to Cimon, the son of Miltiades, who was at the head of the aristocratic party. In 461 B. C. Cimon was ostracized, and gradually Pericles was left without a rival. He led the Athenians against Samos in 440 B. C., and was their principal adviser and commander during the first two years of the Peloponnesian war. Then a plague broke out in Athens, Pericles lost his popularity, and many of his friends. His only surviving legitimate son died of the epidemic; and at length he himself, worn out by public and private troubles, succumbed to the same disorder. Phidias was the friend of Pericles, and the public buildings erected by him during the administration of Pericles made Athens the admiration of Greece. To Pericles Athens was indebted for the Parthenon. He died, 429 B. C.

Perkins, George Clement, United States senator, was born at Kennebunkport, Maine, 1839. He went to sea at thirteen, and was cabin boy and sailor until 1855, when he shipped before the mast on a sailing vessel bound for San Francisco, and on arrival there went to Oroville. He subsequently carried on a successful mercantile business at San Francisco; later engaged in banking, milling, mining, and the steamship business; was member of Goodall, Perkins and Company, owners of the Pacific steamship company; and first to introduce steam whalers for Arctic ocean, and operated numerous ships on Pacific ocean from Alaska to Mexico. He was state senator, 1869–76; governor of California, 1879–83; appointed United States senator, 1893, to fill vacancy caused by death of Leland Stanford and elected, 1893, for remainder of same term; reëlected, 1895, 1903, and 1909.

Perkins, George Walbridge, financier, was born at Chicago, 1862. He received a common school education, and started business career in the Chicago office of the New York life insurance company, 1877. Here he became successively bookkeeper, cashier, 1881; inspector of agencies, 1885; superintendent of western department, 1889; third vice-president, 1892, in charge of agency force, with headquarters at home office; second vice-president, 1898; chairman of the finance committee, New York Life, 1900; and vice-president, 1903. He became partner in the banking firm of J. Pierpont Morgan and Company, 1901; financially interested in many large corporations.

Perry, Bliss, editor, author, educator, editor of the *Atlantic Monthly*, 1899-1909, was born in Williamstown, Mass., 1860. He graduated at Williams, 1881; studied at Berlin and Strassburg universities; L. H. D., Princeton, 1900; Williams, 1902; Litt. D., Bowdoin, 1904; LL.D., Wake Forest, 1906. He was professor of English at Williams, 1886–93; at Princeton, 1893–1900; and is now professor of English literature at Harvard. Editor: *Selections from Burke; Scott's Woodstock* and *Ivanhoe;* and *Little Masterpieces;* general editor of Cambridge editions of the poets. Author: *The Broughton House; Salem Kittredge, and Other Stories; The Plated City; The Powers at Play; A Study of Prose Fiction; The Amateur Spirit; Walt Whitman; Whittier,* etc.

Perry, Oliver Hazard, American naval commander, was born in South Kingston, Rhode Island, 1785. During the war of 1812 he was chosen to fit out a fleet at Presque Isle (now Erie) on Lake Erie. After equipping nine vessels, he sailed against the British fleet, comprising six ships, but larger and stronger than those of the Americans. The English attacked the *Lawrence*, Perry's flag ship, so hotly that out of 101 men on it only eighteen were uninjured. In this strait Perry left the *Lawrence* in a small boat, was rowed to the *Niagara*, and escaped unharmed from the cannon balls that splashed around him. After that transfer he gained a splendid victory, taking all the English ships. For this service congress gave Perry a gold medal and promoted him to captain. In 1819 he commanded a fleet which sailed to Colombia and ascended the Orinoco river. While returning he died of yellow fever at the Port of Spain, Trinidad, when thirty-four years old, 1819. In 1860 a marble statue of him was erected at Cleveland, Ohio.

Pestalozzi (*pĕs'-tȧ-lŏt'-sē*), **Johann Heinrich,** Swiss educationist, was born at Zürich, 1746. He studied at Zürich, subsequently turned his attention to agriculture, became extremely interested in the problems of education, and, in 1775, established on his estate, Neuhof, a school which was intended to draw its support from popular subscription. This he gave up in 1780, and, with government support, in 1798 founded a school for poor children at Stanz. He then conducted schools at Burgdorf and Yverdon, expended a considerable fortune in benevolent enterprises, mainly in aid of orphans and poor children, and died at last in comparative poverty. The great idea which lay at the basis of his method of intellectual instruction — known as the Pestalozzian system — was that nothing should be treated except in a concrete way. Objects themselves became, in his hands, the subject of lessons tending to the development of the observing and reasoning powers — not lessons about objects. In arithmetic he began with the concrete and proceeded to the abstract; and into the teaching of writing he for the first time introduced graduation. His special attention, however, was directed to the moral and religious *training* of children as distinct from their mere *instruction*. Almost all Pestalozzi's methods are now substantially adopted by the instructors of elementary teachers in the schools of Europe and America, and to no other man has primary instruction been so largely indebted. His chief works were *How Gertrude Instructs Her Children* and his *Leonard and Gertrude*. During the last two years of his life he wrote also his autobiography in two works — *The Song of the Dying Swan*, and *The Fortunes of My Life* — both of which are full of interest. He died at Brugg, Switzerland, 1827.

Peter, St., one of the foremost of the twelve apostles, originally called Simon, was the son of Jona, and a resident at Bethsaida. His brother Andrew, being a disciple of John the Baptist, was by John directed to Jesus, and speedily prevailed on Simon to accompany him to one who he felt convinced was the predicted Messiah. Our Lord kindly received the newcomer, and gave him the name of Cephas, the Aramaic equivalent to the Greek Peter. Peter was a man of ardent temperament, affectionate and generous. He was favored with special manifestations of his Master's confidence, and performed a more prominent part in the sacred history than any other of the

twelve disciples. He was crucified with his head downward in the persecution under Nero, about A. D. 64.

Peter the Great. See page 454.

Peter the Hermit, French monk and preacher, was born at Amiens, about the middle of the eleventh century. He made a pilgrimage to the holy land about 1093, and having witnessed the cruelties there inflicted upon the Christians by the Mohammedans, communicated on his return with Pope Urban II., by whom he was authorized to preach the first crusade for the recovery of Jerusalem from the hands of the Turks. He aroused western Europe by his enthusiasm to undertake several expeditions, all of which, except the last, were unfortunate; but at length, in 1099, he had the satisfaction of seeing Jerusalem throw open its gates to the victorious crusaders under Godfrey de Bouillon, though he himself had little share in the glory of the victory. His last years were spent in obscurity, in a monastery which he had founded at Huy. Died, 1115.

Peters, John Punnett, American clergyman and orientalist, was born in New York, 1852. He graduated from Yale, 1873; studied philology and theology, Yale, Ph. D., 1876, D. D., 1895; Sc. D., university of Pennsylvania, 1895; studied in Berlin and Leipzig, 1879–83. He was professor of old testament languages and literature, Protestant Episcopal divinity school, Philadelphia, 1884–91; professor of Hebrew, university of Pennsylvania, 1885–93; in charge of expedition of university of Pennsylvania to Babylonia, conducting excavations at Nippur, 1888–95; rector of St. Michael's church, New York, since 1893; canon residentiary, cathedral of St. John the Divine, 1904–10. Author: *Scriptures, Hebrew and Christian; The Bible as Literature* (part author); *In Lauda Zion; Nippur, or Explorations and Adventures on the Euphrates; The Old Testament and the New Scholarship*, etc. Translator of *Political History of Recent Times*, and editor of *Diary of David McClure; Early Hebrew Story; Some Tombs in the Necropolis of Marissa*, etc.

Peters, Madison Clinton, clergyman, was born in Lehigh county, Pennsylvania, 1859. He was educated at Muhlenburg, and Franklin and Marshall colleges; graduated at Heidelberg theological seminary, Tiffin, Ohio; D. D., Heidelberg university and Ursinus college. He was ordained to the ministry of the Reformed church, 1880; for eleven years was pastor of the Bloomingdale church, New York; resigned to become Baptist; was pastor of Sumner Avenue Baptist church, Brooklyn, and Immanuel Baptist church, Baltimore; and of the Baptist church of the Epiphany, New York, until 1907. Preached as an independent in the Majestic theater, New York. Author: *Justice to the Jew; The Wit and Wisdom of the Talmud; The Jew as a Patriot; The Great Hereafter; The Panacea for Poverty; Empty Pews; Sanctified Spice; The Birds of the Bible; Why I Became a Baptist; Will Our Republic Live? The Man Who Wins; The Jews in America; Will the Coming Man Marry? The Love Affairs of Great Poets; The True St. Patrick; Does Death End All?* etc.

Peterson, William, Canadian educator, principal of McGill university since 1895, was born in Edinburgh, 1856. He was educated at the university, Edinburgh, university of Göttingen, and Oxford university; M. A., Edinburgh and Oxford; hon. LL. D., St. Andrews; Princeton, New Jersey; university of New Brunswick; Yale; Johns Hopkins; Pennsylvania. He was assistant professor of humanity in the university of Edinburgh, 1879–82; principal of University college, Dundee, 1882–95. Author: *Quintilian's Institutes of Oratory; The Dialogues of Tacitus; The Speech of Cicero for Cluentius; The Relations of the English-speaking Peoples; The Cluni MS. of Cicero*, etc.

Petrarch (*pē′-trärk*), **Francis,** great Italian poet, was born in 1304 at Arezzo in Tuscany. The dissensions which distracted that country induced his father to remove to Avignon; and he was educated there and at Montpellier and Bologna. His whole soul, however, was devoted to literature; but it was not until he was in his twentieth year that the death of his father allowed him to indulge his inclination. Having settled at Avignon, he became deeply attached, in 1327, to the beautiful Laura de Noves, in whose honor were written those sonnets and odes which have rendered his name immortal. After having vainly traveled to forget or moderate his love, he settled at Vaucluse, a romantic spot, where he wrote some of his finest works. His literary reputation attracted the regard of princes; he was invited to Naples, to Paris, and to Rome; and received the laureate crown in the capitol of the latter city. Among his warmest friends and patrons was the Colonna family. In 1348 his feelings were deeply grieved by the death of Laura. He survived her, however, nearly thirty years, during which period he was admired and honored by his own countrymen, and by foreign princes. He died, 1374.

Petrie (*pē′-trĭ*), **William Matthew Flinders,** English Egyptologist, was born at Charlton, 1853. He was educated privately, and his earliest explorations bore fruit in his *Stonehenge*, 1880. He next turned his attention to the pyramids and temples of Gizeh, and subsequently, with the aid of the Egypt exploration fund, to the mounds of Said and Naucratis, and founded the Egyptian research account, 1894, enlarged as the British school of archæology in Egypt, 1905. Author: *Pyramids and Temples of Gizeh; Racial Portraits; Ten Years' Digging; History of Egypt; Egyptian Tales; Six Temples at Thebes; Religion and Conscience in Ancient Egypt; Syria and Egypt; Royal Tombs of the First Dynasty; Royal Tombs of the Earliest Dynasties; Religion of Ancient Egypt; Gizeh and Rifeh*, etc.

Pfleiderer (*pflī′-der-er*), **Otto,** German theologian, was born at Stetten in Würtemberg, 1839. He studied at Tübingen, 1857–61, became pastor at Heilbronn in 1868, in 1870 professor of theology at Jena, and in 1875 at Berlin. In new testament criticism Pfleiderer belongs to the younger critical school which has grown out of the impulse given by Baur. He is an independent thinker, acute, suggestive, and profoundly learned, and has made his name as well known in England and America as in Germany. His chief works are *The Influence of the Apostle Paul on Christianity; The Development of Theology Since Kant; The Philosophy and Development of Religion; Evolution and Theology*, etc. Died, 1908.

Phelps, Edward J., American jurist and diplomat, was born at Middlebury, Vt., 1822. He studied at Middlebury college, graduated in law at Yale in 1843, and was admitted to the bar in the same year. In 1851 he was appointed second comptroller of the United States treasury; was a delegate to the constitutional convention of Vermont in 1870; president of the American bar association in 1880; and democratic candidate for governor of the state in that year. He became a professor in the law school of Yale in 1881, where he served until appointed minister to Great Britain in 1885. Phelps remained at the court of St. James until 1889. He was appointed in 1893 one of the counsel in the court of arbitration in the Bering sea controversy, to represent the United States. He died at New Haven, Conn., 1900.

Phelps-Ward, Elizabeth Stuart, American author, was born at Andover, Mass., in 1844. Besides lecturing, writing for magazines, and engaging in various kinds of work for the advancement of women, she wrote: *Gates Ajar; Hedged In; The Silent Partner; Poetic Studies; The Gypsy Books; An Old Maid's Paradise; Sealed Orders; Doctor Zay; Beyond the Gates; The Madonna of the Tubs; Struggle for Immortality; Fourteen to One; A Singular Life; The Story of Jesus Christ; The Man in the Case*, etc. In 1888, she married Rev. Herbert D. Ward. She died, 1911.

Phidias (*fĭd'-ĭ-as*). See page 121.

Philip II., king of Macedon, father of Alexander the Great, was born in 382 B. C., and came to the throne in 359 B. C. He first undertook the thorough union of his kingdom, and then speedily entered upon a policy of aggression, his object being to reduce all the Grecian states to his supremacy. The Greek towns on the coast of Macedonia were the first objects of attack. In Thrace, he captured the small town of Crenides, which, under its new name of Philippi, soon acquired great wealth and fame. After a few years of comparative leisure, he advanced into Thessaly, and ultimately to the strait of Thermopylae, which he did not attempt to force, as it was strongly guarded by Athenians. After capturing all the towns of Chalcidice, the last of which was the city of Olynthus, he made peace with the Thracians, and the next year with the Athenians. It was during this siege of Olynthus that Demosthenes delivered his famous oration on the crown, in which he sought in vain to arouse his countrymen to a sense of their danger, and cause them to resist the aggressions of the powerful and energetic Macedonian. Philip was now requested by the Thebans to interfere in their behalf in the Sacred war, which was raging between them and the Phocians. He marched into Phocis, destroyed its cities, and sent many of its inhabitants as colonists to Thrace. In 339 B. C., the Amphictyonic council, composed of several Grecian states, declared war against the Locrians, and the next year appointed Philip commander-in-chief of all their forces. The Athenians were at last alarmed at his approach into Greece in this capacity, and formed a league with the Thebans against him; but their united forces were utterly defeated at the battle of Chaeronea, 338 B. C.; and Philip was now master of all Greece. Deputies from the different states met in congress at Corinth, and, after resolving to make war on the Persian king, chose Philip as leader of their armies. Philip was busily engaged in preparations for this great enterprise, when he was assassinated by Pausanias, at a festival to celebrate the marriage of his daughter with Alexander of Epirus, 336 B. C., and was succeeded by his son, Alexander the Great. Philip was faithless in the observance of treaty obligations, and utterly unscrupulous as to the means by which he gained his end; but his great ability both as a king and a soldier is conceded by all historians.

Philip II., of France, called Philip Augustus, on account of his great abilities and successful administration, was born, 1165. He was crowned joint king with his father, Louis VII., in 1179, and on the death of the latter, in the year following, he came into full possession of the kingdom. He was one of the greatest monarchs of the Capet dynasty, while he confirmed his power by marrying Isabella of Hainault, the last direct descendant of the Carlovingians. On the accession of Richard the Lion-hearted to the throne of England, in 1189, Philip and he set out together on the third crusade. After staying three months in the holy land, Philip returned home, and waged war with Richard. He conquered Normandy, Anjou, Maine, Poitou, and Touraine, and was one of the chief consolidators of the French monarchy. The crusade against the Albigenses occurred in his reign, and he granted the first charter to the university of Paris. He died at Nantes, 1223.

Philip II., king of Spain, only son of the emperor Charles V., was born in 1527 at Valladolid. His first wife was Mary of Portugal; he then married Mary Tudor in 1554; spent over a year in England, and in 1555 succeeded his father in the sovereignty of Spain, Sicily, Milan, the Netherlands, Franche Comté, Mexico, and Peru. A league between Henry II. of France and the pope was overthrown, and on the death of Mary he married the French princess Isabella, and retired to live in Spain, 1559. In 1570 he married his fourth wife, Anne of Austria, his niece. Wedding himself now to the cause of the church, he encouraged the inquisition in Spain, and introduced it to the Netherlands. The latter revolted, and the seven united provinces achieved their independence after a long struggle in 1579. His great effort to overthrow Protestant England ended in the disaster of the Armada, 1588. His last years were embittered by the failure of his intrigues against Navarre, raids of English seamen on his American provinces, and by loathsome disease. He fatally injured Spain by crushing her chivalrous spirit, by persecuting the industrious Moors, and by destroying her commerce by heavy taxation. He died, 1598.

Philip IV., "the fair," king of France, was born at Fontainebleau in 1268. He succeeded to the throne in 1285, and by his marriage with Queen Joanna of Navarre obtained Navarre, Champagne, and Brie. The chief feature of his reign was his contest with Pope Boniface VIII., which grew out of his attempt to levy taxes upon the clergy, which the pope directed them not to pay. In 1301 Philip threw the papal legate into prison and summoned the three estates of France — clergy, nobles, and burghers — to which Boniface replied with the bull, *Unam Sanctam*. Philip caused the bull to be publicly burned, and confiscated the property of the prelates who had sided with the pope. Boniface then excommunicated him, but Philip sent William de Nogaret to Rome, who, with the aid of the Colonnas, seized and imprisoned the pope. Though released after a few days by a popular rising, Boniface soon afterward died. In 1302 Philip's army was defeated by the revolted Flemings at Courtrai, and he was forced to recognize their independence in 1305. In 1305 Philip obtained the elevation of one of his own creatures to the papal chair as Clement V., and seated him at Avignon, which place was the residence of the head of the church for seventy years thereafter. This period of papal history is often called "the seventy years' captivity." He suppressed the order of the Templars, and confiscated their lands. He died, 1314.

Philip VI., of Valois, king of France, was born, 1293, and succeeded Charles IV., in 1328. Edward III. of England contested his claim, contending that the Salic law, though it excluded females, did not exclude their male heirs. Edward was son of a daughter, Philip son of a brother, of Philip IV.; thus began the Hundred Years' war between France and England, 1337. The French fleet was defeated off Sluys in 1340, and the army at Crécy in 1346; a truce was made, when the war was followed by the "black death." The king afterward purchased Majorca. Died, 1350.

Philip, King, sachem of the Wampanoag tribe of Indians, was the second son of Massasoit, who for nearly thirty years had been the stanch ally of the pilgrim settlers. In 1662 Philip succeeded his elder brother and kept the treaties of his father for several years. But, at length, goaded by the encroachments of the whites, he formed a confederation of tribes, amounting to nearly 10,000 warriors, and in 1675 the war known as "King Philip's war," broke out. The Indians surprised and murdered a great many colonists, but were eventually overcome, and in 1676 Philip himself was captured and slain in Rhode Island.

Phillips, Andrew Wheeler, American educator, emeritus professor of mathematics and dean of the graduate school of Yale university, was born at Griswold, Conn., 1844. He graduated at Yale, 1873, Ph. D., 1877; A. M., Trinity college, Hartford, 1875. He was instructor and professor, 1877–1911, and dean of the graduate school, 1895–1911, Yale. Joint author: *Transcendental Curves; Graphic Algebra; The Elements of Geometry; Trigonometry and Tables; The Orbit of Swift's Comet*, etc.; and editor of *The Connecticut Almanac*, 1882–93. He is president of the board of trustees of Hotchkiss school, Lakeville, Conn., and trustee of Hopkins grammar school, New Haven, Conn.

Phillips, David Graham, American author, was born at Madison, Ind., 1867. He graduated at Princeton, 1887, and adopted literature as a profession immediately after graduation. Author: *The Great God Success; Her Serene Highness; A Woman Ventures; Golden Fleece; The Master Rogue; The Cost; The Plum Tree; The Social Secretary; The Deluge; The Reign of Gilt; The Fortune Hunter; The Second Generation; Light-Fingered Gentry*, etc. Died, 1911.

Phillips, Stephen, English poet, was born at Somertown, near Oxford, 1868; studied for the civil service, but abandoned this and went on the stage, playing various parts with Frank Benson's company. He then became army tutor at Messrs. Wolffram and Needham's, and afterward adopted literature as a profession. Author: *Marpessa; Eremus; Christ in Hades; Poems; Paolo and Francesca; Herod; Ulysses; The Sin of David; Nero; The Last Heir*, a drama, etc.

Phillips, Wendell, American orator and abolitionist, was born in Boston, Mass., 1811. He was graduated at Harvard in 1831, studied law there, and was admitted to the bar in 1834; but before clients came he had been drawn away from his profession to the real work of his life. A timely speech in Faneuil hall in 1837 made him at once the principal orator of the anti-slavery party; and henceforth, until President Lincoln's proclamation of January 1, 1863, he was William Lloyd Garrison's loyal and valued ally in the struggle for abolition. He also championed the cause of temperance, woman's rights, and advocated the rights of the Indians. In 1870 he was nominated for governor of Massachusetts by the prohibitionists and the labor party. His speeches and letters were collected and published in 1863, and frequently since. He died in Boston, Mass., 1884.

Phillpotts (*fĭl'-pŏts*), **Eden,** English novelist, was born at Mount Aboo, India, 1862. He was educated at Plymouth, England; was a clerk in the Sun fire insurance office, 1880–90; went to London and studied for the stage, but abandoned it on finding his ability did not justify perseverance, and adopted literature. Author: *Some Everyday Folk; Down Dartmoor Way; Lying Prophets; Children of the Mist; The Human Boy; Sons of the Morning; The Striking Hours; The River; My Devon Year; The American Prisoner; The Secret Woman; Knock at a Venture; The Portreeve; The Whirlwind; The Folk Afield; The Virgin in Judgment; The Three Brothers*, etc.

Philo Judaeus (*fī'-lō jōō-dē'-ŭs*), philosopher of the first century, born in Alexandria; studied the Greek philosophy, and found in it, particularly in the teaching of Plato, the rationalist explanation of the religion of Moses, which he regarded as the revelation to which philosophy was but the key. He was a man of great learning and great influence among his people, and was in his old age one of an embassy sent by the Jews of Alexandria in A. D. 40, to Rome, to protest against the imperial edict requiring the payment of divine honors to the emperor. He identified the *logos* of the Platonists with the *Word* in the new testament. He died about 54 A. D.

Phipps, Henry, American manufacturer and philanthropist, was born in Philadelphia, 1839. He worked in stores in Pittsburgh, 1852–56; was office boy and bookkeeper for Dilworth and Bidwell, spike manufacturers, 1856–61; partner in Bidwell and Phipps, agents for Dupont powder company, 1861; also partner in small iron mill, Kloman and Phipps; later associated with Thomas M. and Andrew Carnegie in iron and steel manufacture, building up large fortune, and having, next to Carnegie, largest interest in United States steel corporation. He is a director of United States steel corporation, Carnegie company, Van Norden trust company, Mellon national bank, Philadelphia rapid transit company, and is well known for his many philanthropies in improving workingmen's homes, contributing to hospitals, and to educational institutions. He gave $1,000,000 to the Johns Hopkins university endowment fund in 1909.

Phocion (*fō'-shĭ-on*), an Athenian general and statesman, born about 402 B. C., studied under Plato and Xenocrates. As a soldier he was several times sent against Philip of Macedon, though in politics he sided with him against Demosthenes. Forty-five times he was elected strategus. After the victory at Chaeronea he advised submission to the Macedonian rule. Implicated in a plot to hand over the Piraeus to the enemy, he was sentenced to death by the Athenians, 317 B. C. A revulsion of feeling later led to the erection of a statue in his honor. He was neither a great statesman nor a brilliant general, but was incorruptibly honest and possessed of sound common sense.

Piccolomini (*pēk'-kō-lō'-mē-nē*), **Octavio,** German general, was born in Italy, 1599, died in Vienna in 1656. He served in the armies of the German emperor, and became one of the distinguished generals in the Thirty Years' war. He was a favorite of Wallenstein, who intrusted him with a knowledge of his projects, when he purposed to attack the emperor. In spite of this he made himself the chief instrument of Wallenstein's overthrow, and, after the latter's assassination in 1634, was rewarded with a portion of his estates. He was defeated by Torstenson at Leipzig in 1642. Died, 1656.

Pickering, Edward Charles, American astronomer, was born at Boston, 1846. He graduated at the Lawrence scientific school, Harvard, 1865; LL. D., universities of California, 1886, Michigan, 1887, Chicago, 1901, Harvard, 1903, Pennsylvania, 1906; Ph. D., Heidelberg, 1903; D. Sc., Victoria university, England, 1900. He was instructor in mathematics, Lawrence scientific school, 1865–67; Thayer professor of physics, Massachusetts institute of technology, 1867–76; and professor of astronomy and director of the Harvard college observatory, since 1876. He established the first physical laboratory in the United States, and under his administration the work of the observatory has been devoted mostly to the new fields of photometry and photography as applied to astronomical observation. In the latter field especially the observatory has taken 200,000 photographs, and it promises to complete a survey of the whole heavens. He accompanied the *Nautical Almanac* expedition to observe total eclipse of sun, 1869; was a member of the United States coast survey expedition to Xeres, Spain, 1870; and was awarded the Henry Draper medal for work on astronomical physics. Author: *Elements of Physical Manipulation*, and various volumes of annals and other publications of Harvard college observatory.

Pickering, Timothy, American statesman, was born in Massachusetts, 1745. He served as colonel in the American revolution, became Washington's adjutant-general in 1777, and was a delegate to the Pennsylvania constitutional convention of 1787 and 1789. He also negotiated seven treaties with the Indians; was postmaster-general from 1791–95; secretary of war, 1795; secretary of state, 1795–1800; was judge of common pleas, Massachusetts, 1802; United States senator, 1803–11; was one of the war board of Massachusetts, 1812–15; and member of congress, 1815–17. He was the author of several political pamphlets, and paid much attention to agriculture. He died in 1829.

Pickett, George Edward, American soldier, was born at Richmond, Va., 1825. He graduated at West Point in 1846, and entered the army as second-lieutenant during the war with Mexico. He was brevetted first lieutenant, and afterward captain, for conspicuous bravery in Mexico. He served for the most part on the frontier between 1848 and 1861. At the outbreak of the civil war, he resigned his commission as captain in the army of the United States and entered the confederate service as a colonel. He was engaged in several desperate battles under Lee, but won special distinction as the leader of the assaulting column, at Gettysburg, July 3, 1863, upon which the fate of the confederacy hung. The point reached by his troops in this charge, and from which they were at last driven back, is marked upon the field of Gettysburg to-day by a granite monument. In the campaign of 1864-65, he made the final stand at Five Forks, and he prevented the capture of Petersburg by General Butler. At the close of the war he returned to Richmond and engaged in life insurance business. He died at Norfolk, Va., 1875.

Pierce, Franklin, fourteenth president of the United States, was born in Hillsborough, N. H., 1804. His father, General Benjamin Pierce, was a soldier of the war of independence and governor of New Hampshire. Franklin Pierce was educated at Bowdoin college, Maine, and was an officer in the college military company, in which his biographer, Nathaniel Hawthorne, was a private. In 1837 he was elected to the United States senate, of which he was the youngest member. He declined the office of attorney-general, offered him by President Polk, and refused the nomination for governor of New Hampshire; and at the commencement of the Mexican war volunteered as a private, but was appointed brigadier-general, and led his brigade in the battles of Contreras and Cherubusco. In 1852, in consequence of the conflicting claims of the leaders of the democratic party at the Baltimore convention, he was nominated as a compromise candidate for the presidency against General Scott, the whig nominee, and received the votes of all but four states. He appointed an able cabinet, including Jefferson Davis as secretary of war. During his administration the Missouri compromise was repealed, the treaty for reciprocity of trade with the British American colonies was made, and a treaty with Japan. He died in 1869.

Piles, Samuel Henry, lawyer, ex-United States senator, was born in Livingston county, Kentucky, 1858. He was educated at private schools, Smithland, Ky., was admitted to the bar, and began the practice of law at Snohomish city, Washington, 1883. He removed to Seattle, 1886; was general counsel for the Pacific Coast company, 1895–1905; city attorney of Seattle, 1887–89; assistant district attorney for counties of King, Kitsap, and Snohomish, Washington territory, in the '80's; and has been active in politics for twenty years. He was elected United States senator for the term 1905–11.

Pillow, Gideon Johnson, American soldier, was born in Williamson county, Tennessee, 1806. He graduated at the university of Nashville in 1827, was admitted to the bar, and served as a delegate to the democratic convention which nominated James K. Polk to the presidency. During the Mexican war he was appointed a brigadier-general of volunteers, and commanded the right wing at the battle of Cerro Gordo, where he was wounded. Promoted for gallantry, he took part in the battles of Molino del Rey and Chapultepec, where he was again and more severely wounded. He practiced law in his own state until the beginning of the civil war, to avert which he had proposed various compromises. But having entered the confederate service in 1861, he was rapidly advanced to the command of a brigade, and took part in the battles of Belmont and Fort Donnelson. He was second in command when the latter was taken by the federal troops. He afterward served under General Beauregard in the Southwest. He died in Lee county, Arkansas, 1878.

Pinchot (*pĭn'-shō*), **Gifford**, American forester, professor of forestry, Yale, since 1903; was born in Simsbury, Conn., 1865. He graduated from Yale, 1889; M. A., Yale, 1901, Princeton, 1904; LL. D., McGill, 1909; studied forestry in France, Germany, Switzerland, and Austria; and began his first systematic forest work in United States at Biltmore, N. C., 1892. He was chief of division, afterward of the bureau of forestry, and of forest service, United States department of agriculture, 1898–1910. He became a member of committee on organization of government scientific work and commission on public lands in 1903; has been very active in a policy to protect the natural resources of the United States.

Pinckney (*pĭngk'-nĭ*), **Charles Cotesworth**, American statesman, was born in South Carolina, 1746. He fought during the revolution; assisted in framing the constitution of the United States; was special envoy to France, 1796–97; and unsuccessful federalist candidate for vice-president of the United States in 1800, and for president in 1804 and 1808. He was a lawyer of eminence, and author of the famous sentiment, "Millions for defense, but not one cent for tribute." He died, 1825.

Pindar (*pĭn'-dȧr*), greatest Greek lyric poet, was born at Cynoscephalae, a village in the territory of Thebes, about 522 B. C. He commenced his career as a poet at an early age, and was employed for many years in various courts and by many of the princes of Greece to compose for them choral songs for special occasions. For the praises which he lavished upon Alexander, king of Macedonia, in one of these compositions, his house at Thebes is said to have been spared when the rest of the city was destroyed by Alexander the Great, more than a century after his death. Of his many works — which consisted of hymns, poems, odes, songs, dirges, and encomiums on princes — only his *Epinicia*, or *Odes*, have come down to us entire. These were composed in commemoration of victories in the public games. Died at Thebes, 443 B. C.

Pinero (*pĭ-nĕr'-ō*), **Sir Arthur Wing**, English dramatist, was born in London, 1855. He was educated in private schools; was an actor from 1874–81; and from that time until the present, a dramatic author. Author: *The Magistrate; The School-mistress; Dandy Dick; The Hobby Horse; Sweet Lavender; The Profligate; The Weaker Sex; The Cabinet Minister; The Times; Lady Bountiful; The Amazons; The Second Mrs. Tanqueray; The Notorious Mrs. Ebbsmith; The Benefit of the Doubt; The Princess and the Butterfly; Trelawny of the Wells; The Gay Lord Quex; Iris; Letty; A Wife Without a Smile; His House in Order; The Thunderbolt;* and many other plays.

Pinkerton, Allan, Scottish-American detective, was born in Glasgow, 1819, and emigrated to America in 1842. He located in Illinois, where he captured a gang of counterfeiters and became a deputy sheriff four years later. In 1850 he opened a detective agency in Chicago; recovered $40,000 for the Adams express company, and, discovering a plot to murder Abraham Lincoln on his inaugural journey to Washington was authorized to protect the president-elect. He then organized the United States secret service, of which he became the head, and conducted it until the close of the war. Later his recovery of $700,000 for the Adams express company, the arrest of some noted English bank forgers, and the breaking up of the notorious "Molly Maguire" murderers in the coal districts gained him an international reputation. He wrote several books connected with his work before his death in 1884.

Pinkney, William, American lawyer and diplomat, was born at Annapolis, Maryland, 1764. He was admitted to the bar in 1786; was a member of the Maryland convention called in 1788 to ratify the United States constitution; served in the state council, house of delegates, and senate, and in 1796 went to England as commissioner under the Jay treaty. He returned in 1804, and the next year was made attorney-general of Maryland. In 1806 he was again sent to England as minister extraordinary, and remained as minister resident, 1807–11. He was attorney-general of the United States 1811–18; served in the war of 1812 as commander of a volunteer corps, receiving a dangerous wound at Bladensburg; was elected to congress in 1815, and appointed minister to Russia the next year; was a member of the United States senate, 1820–22. He died, 1822.

Pisistratus (*pi-sis'-tra-tŭs*), tyrant or ruler of Athens, was born about 612 B. C., the son of Hippocrates, who left him a large fortune. He was brave, ambitious, and eloquent, and by his kindness and generosity won the love of the poorer classes. He usurped the throne in 560 B. C., and although he was twice expelled, he regained it and ruled with mildness and justice. He enforced the laws of Solon, who was his friend and relative; founded the first public library at Athens, and collected and arranged the poems of Homer. He died about 527 B. C.

Pitman, Benn, Anglo-American stenographer, was born at Trowbridge, Wilts, England, 1822. He was educated in academy of his brother, Sir Isaac Pitman, original inventor of phonography, and promulgated the art in Great Britain, by lectures and teaching, for ten years. He settled in the United States, 1853, and founded the phonographic institute, Cincinnati. He was inventor of the electro-process of relief engraving, 1856; military recorder of state trials during the civil war; and lecturer on art and teacher of artistic wood-carving, etc., in Cincinnati art academy, 1873–92. Author: *The Reporter's Companion; Manual of Phonography; Phonographic Teacher; History of Shorthand; A Plea for American Decorative Art; Phonographic Dictionary* (with Jerome B. Howard); *Life of Sir Isaac Pitman; A Plea for Alphabetic Reform,* etc. Died, 1910.

Pitman, Sir Isaac, a British educator and stenographer, was born at Trowbridge, Wiltshire, England, 1813. He became master of a school at Barton-on-Humber in 1832, and published his first studies of the art which was to make him famous, in 1837, in a volume entitled, *Stenographic Sound-hand.* A few years later he issued a second volume, which he called *Phonography, or Writing by Sound.* In 1843 he founded the phonetic society, and soon after began the publication of the weekly *Phonetic Journal.* He issued many text-books upon phonography, and his system was introduced into the United States in 1847. He was knighted in 1894, and died, 1897.

Pitt, William, first earl of Chatham, a famous English statesman, often referred to as the elder Pitt, was born in Westminster, 1708. Educated at Oxford, he entered parliament in 1735. From the beginning his oratory made him a leader and he contributed greatly to Walpole's downfall. He later became a member of the privy council, and was called upon to form a new cabinet in 1756, of which the duke of Devonshire was prime minister. Pitt's vigorous war policy brought England successfully through the struggle with France and earned for Pitt the title of the "great commoner." He resigned in 1761, but five years later was called upon to form a new cabinet, upon which he became Viscount Pitt and earl of Chatham. Ill health forced his retirement in 1768, but he kept up an active interest in public affairs, opposed Lord North's policy of taxing the colonies, and, upon the alliance of the colonies and France, protested, in a last great effort, against the proposal to make peace. At the close of his speech, he fell into the arms of his friends, and died a few days later, 1778.

Pitt, William, British statesman, son of the preceding, was born at Hayes, England, 1759. He was educated at Cambridge, studied for the bar at Lincoln's Inn, and entered parliament in 1781. He made his first speech in parliament the same year, in favor of Burke's plan of economical reform. At the age of twenty-three he became chancellor of the exchequer, and at twenty-five was regarded as one of England's most powerful ministers. He ruled absolutely over the cabinet, and was at once the favorite of the sovereign, of the parliament, and of the nation; and from this date the life of Pitt becomes the history of England. For seventeen years he held his great position without a break. In 1784 he established a new constitution for the East India company. In 1786 he carried through a commercial treaty with France on liberal principles. In the same year he established a new sinking fund, a scheme which was long viewed with favor by the nation. To the exertions which were now begun for the abolition of the slave-trade he gave the help of his eloquence and power. In 1788-89 he maintained against Fox the right of parliament to supply the temporary defect of royal authority occasioned by the incapacity of the king. The year 1793 saw the beginning of the Anglo-French war. Authorities differ as to the cause, but it is certain, however, that Pitt's military administration was eminently unsuccessful. Until 1801 he continued to hold the reins of government, during one of the most stormy periods of British history; and his admirers have conferred on him the title of "the pilot that weathered the storm." In 1799 he effected the union with Ireland. It was part of his scheme to relieve the Roman Catholic laity from civil disabilities, and to grant a public maintenance to their clergy; but the obstinacy of the king frustrated his design. Chagrined by this failure, Pitt resigned office in 1801. In 1804 he returned again to the head of the treasury, which position he continued to hold until his death in 1806. England has had few statesmen equal to him in the handling of financial and commercial problems, and few orators more fluent and persuasive.

Pius VI., Giovanni Angelo Braschi, pope, 1775–99, was born at Cesena, Italy, 1717. He was elected pope in succession to Clement XIV. To him Rome owes the drainage of the Pontine marsh, the improvement of the port of Ancona, the completion of St. Peter's, the foundation of the new museum of the vatican, and the embellishment of the city. The pope repaired to Vienna, but failed to restrain the reforming emperor Joseph from further curtailing his privileges. Soon after came the French revolution and the confiscation of church property in France. The pope launched his thunders in vain, and ere long the murder of the French agent at Rome, in 1793, gave the directory an excuse for an attack. Bonaparte took possession of the legations, and afterward of the march of Ancona, and extorted in 1797 the surrender of these provinces from Pius. The murder of a member of the French embassy was avenged by Berthier taking possession of Rome. Pius was called on to renounce his temporal sovereignty, and on his refusal was seized, carried to Siena, and later to Certosa, Grenoble, and finally Valence, where he died, 1799.

Pius IX., Giovanni Mastai Ferretti, pope, 1846–78, was born near Ancona, Italy, 1792. He was elected in 1846, and his pontificate covers one of the most eventful periods of the papacy. He granted a constitution to the Italian states shortly after his accession, but refused to declare war against Austria. After the insurrection at Rome, 1848, he fled to Gæta, but was restored by French aid two years later. The same year he established a Catholic hierarchy in England, and in 1854 defined the doctrine of the immaculate conception. In 1859-60 he lost the greater part of his dominions, but was maintained in Rome by a French garrison. In 1870 the infallibility dogma was promulgated by the ecumenical council held at Rome. In that year, when the French left the city, it was declared the capital of Italy, occupied by the troops of Victor Emmanuel, and the pope was practically held a captive in the vatican until his death in 1878.

Pius X., 253rd Roman pontiff, was born in 1835 at Riese, near Treviso, Italy. His name is Giuseppe Sarto, and he is the son of a minor municipal official. His relatives are still shopkeepers and people of humble position. He was educated at Castelfranco and the diocesan seminary of Padua, and ordained priest, 1858. He officiated nine years as curate at Tombolo, nine years as parish priest of Salzano; he was made canon and chancellor of the diocese of Treviso in 1875. In 1884 he was appointed bishop of Mantua, and Leo XIII. made him a cardinal and patriarch of Venice in 1893. His charity and tact brought him unbounded popularity, and he was more than once instrumental in settling serious strikes and labor disputes. He came into direct personal contact with the king and queen of Italy while he was cardinal, but is credited with an inflexible resolve to maintain the rights and liberty of the church. On the death of Leo XIII., 1903, the conclave met, and, at the seventh scrutiny, elected him pope, and he chose to be known as Pope Pius X. As priest and bishop his life was spent in the pastoral and episcopal service of the church rather than in the paths of diplomatic and official service. He has always displayed deep interest in social questions and in bettering the life of the poor, to whom his charity at Venice was proverbial. He has shown himself zealous in the reform of church music and in other matters of ecclesiastical discipline. In 1907 he issued a decree intrusting the revision of the vulgate to the Benedictine order, and in September issued an encyclical against the modernist movement in the church.

Pizarro (*pē-thär′-rō*), **Francisco,** Spanish conqueror of Peru, was born at Trujillo, Spain, about 1470. He received little education, was of an adventurous spirit, entered the army, and embarked with other adventurers for America. Having distinguished himself in Panama, he set out by way of the Pacific on a voyage of discovery along with another soldier named Almagro; landed on the island of Gallo, on the coast of Peru, and afterward returned with his companion to Spain for authority to conquer the country. In 1529 he obtained the royal sanction, and set sail from Spain with three ships in 1531. On his arrival at Peru he found a civil war raging between the two sons of the emperor, who had just died. Pizarro saw his opportunity; approached Atahualpa, the victorious one, who had now become the reigning Inca, with overtures of peace, and was admitted into the interior of the country. He then invited Atahualpa to a banquet, had him imprisoned, and commenced a wholesale butchery of his subjects, upon which he forced Atahualpa to disclose his treasures, and then put him perfidiously to death. His power, by virtue of the mere terror he inspired, was now established, and he might have continued to maintain it, but a contest arose between him and his old comrade Almagro, whom he put to death. Finally the sons and friends of the latter rose against Pizarro, seized him in his palace at Lima, and executed him, 1541.

Plato. See page 261.

Platt, Thomas Collier, American politician, was born in Owego, N. Y., 1833. He was a member of class of 1853, Yale, but was compelled to give up his course because of ill health; M. A., 1876. He then entered mercantile life; was president of Tioga national bank at its organization; became largely interested in lumbering in Michigan; was clerk of Tioga county, New York, 1859–61; member of congress, 1873–77; elected United States senator, 1881, and resigned, May 16th, same year, with Roscoe Conkling. He was secretary and director of United States express company, 1879, and its president, 1880–1910. President of board of quarantine commissioners, New York, 1880–88; was president of Southern Central railroad and of Addison and Northern Pennsylvania railroad; and was the recognized leader in New York republican politics for years. He was again United States senator from 1897 to 1909. Died, 1910.

Plautus (*plô′-tŭs*), **Titus Maccius,** the greatest comic poet of ancient Rome, was born about 254 B. C. at Sarsina in Umbria. He early associated himself with actors, and, while engaged in the humble work of turning a hand-mill for a baker, wrote three plays. The proceeds enabled him to leave his work and turn to the more congenial career of a playwright. Of the twenty-one comedies legitimately assigned him, twenty are still extant. They present great vivacity, well-constructed plots, and humorous, life-like characters and situations. His Latin is particularly pure and vigorous. He has found noteworthy imitators in Shakespeare, Molière, Dryden, Addison, and Lessing. His literary career continued uninterrupted until his death in 184 B. C.

Pliny (*plĭn′-ĭ*), the name of two famous Romans, usually distinguished as Pliny the Elder and Pliny the Younger. Pliny the Elder, Caius Plinius Secundus, was born probably at Como, Italy, A. D. 23, and was a famous naturalist. Of his many works, his *Historia Naturalis* is the only one that has come down to us. He perished in the great eruption of Vesuvius, which overwhelmed Herculaneum and Pompeii, 79 A.D.

Pliny the Younger, Caius Plinius Cæcilius Secundus, was born at Como, A. D. 62, was the nephew of the elder Pliny, and is celebrated chiefly for his *Letters*, of which ten books are extant. In A. D. 100 he was appointed consul, and he then composed his *Panegyricus*, a fulsome eulogium on the emperor Trajan, which is also extant. In 103 he was appointed governor of the provinces known as Bithynia and Pontus; and in this capacity he wrote his well-known letter to the emperor Trajan respecting the Christians in his province, which called forth the emperor's equally well-known reply. The *Letters* of Pliny are remarkable, not only for their elegance, but for the light they throw upon the history of the period in which they were written. He died about 116 A. D.

Plutarch (*plōō'-tärk*). See page 30.

Pobyedonostsev (*pȧ-byĕ'-dȧ-nôs'-tsĕf*), **Konstantin Petrovich,** Russian jurist and statesman, was born at Moscow, 1827. He studied at St. Petersburg, became an official of the senate in Moscow, and later a professor of civil law there, in 1858. In 1872 he was made a member of the council of the empire, and as procurator of the holy synod, from 1880 to 1905, was the most uncompromising champion of the autocracy and of the supremacy of the orthodox Greek church. He died in 1907.

Pocahontas (*pō'-ka-hŏn'-tas*), the legendary "Princess Pocahontas," of American colonial history, was born about 1595, the daughter of Powhatan, an Indian chief of Virginia. She was betrayed by her uncle Patowomek (Potomak?) to Captain Argall, the unscrupulous deputy-governor of Virginia, and held by him as a hostage for the purpose of extorting from her father such terms as he required. In 1613 she married John Rolfe, one of the settlers of Jamestown, afterward secretary and recorder-general of Virginia. She died in England in 1617, leaving a son, Thomas Rolfe. Her descendants include some of the leading families of Virginia, the celebrated John Randolph being one of them.

Poe, Edgar Allan, famous American poet and romancer, was born in Boston, Mass., 1809. He was adopted by John Allan of Richmond; entered the university of Virginia in 1826, but left after a term and spent two years as a private in the regular army. In 1829 Poe published a volume of poems, his first attempt in literature, under the title of *Al Aaraaf, Tamerlane,* and other poems. He expressed a wish to remain in the army, and Mr. Allan secured him a cadetship in the military academy at West Point. Here he neglected his studies, and was cashiered in 1831. Thrown now upon his own resources, he devoted himself to literature as a profession. In 1833, the publisher of a Baltimore magazine having offered prizes for the best prose story and the best poem, Poe competed and won both prizes. This led to his friendship with John P. Kennedy, one of the prize committee, who procured for him literary employment in connection with *The Southern Literary Messenger*. In 1835 he married Virginia Clemm. In 1837 he removed to New York, where he lived by contributing to the *New York Quarterly Review* and other periodicals, and where in 1838 he published *The Narrative of Arthur Gordon Pym*. In 1839 he became the editor of *The Gentleman's Magazine* at Philadelphia, and published a collection of his best stories, with the title *Tales of the Arabesque and Grotesque*. The year 1845 was marked by the appearance of his famous poem, *The Raven*. In 1847, after the death of his wife, he began to deteriorate, and died at Baltimore, Md., in 1849. His poems and tales are marked by marvelous flights of fancy and exquisite felicity of language. His was perhaps the loftiest and most original poetical genius which America has produced.

Polk (*pōk*), **James Knox,** eleventh president of the United States, was born in North Carolina, 1795. He was educated at the university of North Carolina, and was admitted to the bar at Columbia, Tenn., in 1820. He was a democratic member of congress from Tennessee, 1825–39; was speaker of the house of representatives, 1835–39; governor of Tennessee, 1839–41; and was elected as a democrat to the presidency in 1844. The principal feature of Polk's administration, which extended from 1845 to 1849, was the Mexican war, by which the United States acquired the great states of Texas and California and the territory of New Mexico. Texas was annexed by congress just before Polk's inauguration. During his administration, by a compromise treaty with England, the northern boundary line of Oregon territory — now the state of Washington — was fixed at 49° north latitude. The low tariff act of 1846 was a favorite measure of Polk's, being passed in the senate by the vote of Vice-president Dallas. Other features of his administration were the admission of Wisconsin into the Union as a state in 1848; the adoption of the sub-treasury system, by which some portion of the funds of the government is kept in vaults in Washington instead of being deposited in banks; and the creation of the interior department, its secretary being added to the cabinet of the president. On the expiration of Polk's term he retired to his home at Nashville, Tenn., where he died a few months afterward, 1849.

Polk, Leonidas, general in the confederate army, and bishop of the Protestant Episcopal church, was born at Raleigh, N. C., 1806. He graduated at West Point in 1827, and received a commission in the artillery, but resigned and studied for the ministry. In 1838 he was consecrated bishop of Arkansas and Indian territory, with charge of the dioceses of Alabama, Mississippi, and Louisiana; but in 1841 he resigned all these except the bishopric of Louisiana, which he held until his death, even when commanding a corps in the confederate army. Soon after the outbreak of the civil war, Bishop Polk tendered his services to the confederate government, and was appointed major-general by Jefferson Davis. He commanded an army corps at the battle of Shiloh, and in October following was made lieutenant-general. At the battle of Chickamauga he commanded the right wing of Bragg's army, and served under General Joseph E. Johnston in Sherman's Atlanta campaign. He was killed by a cannon-shot while reconnoitering on Pine mountain, 1864.

Pollock, Sir Frederick, English legal writer and educator, was born in London, 1845. He was graduated at Trinity college, Cambridge, and was admitted to the bar in 1871. LL. D., Cambridge; D. C. L., Oxford. He was professor of jurisprudence, University college, London, 1882–83; professor of common law in the Inns of Court, 1884–90; member of the royal labor commission, 1891–94; Corpus professor of jurisprudence, university of Oxford, 1883–1903; and hon. fellow of Corpus Christi college, Oxford, 1906. Author: *Principles of Contract; The Law of Torts; The Land Laws; Essays in Jurisprudence and Ethics; Introduction to the History of the Science of Politics; Indian Contract Act* (assisted by D. F. Mulla); *History of English Law* (with Prof. F. W. Maitland); *A First Book of Jurisprudence; The Expansion of the Common Law; Spinoza, Life and Philosophy,* etc.

Pollok, Robert, Scottish poet, was born at Muirhouse, Scotland, 1798. He studied at Glasgow for the church, and in 1824-25 wrote *Tales of the Covenanters*, and, in 1827, *The Course of Time*, a poetical description of the spiritual life of man. Meantime, seized with consumption, he set out for Italy, but died near Southampton, England, 1827.

Polo (*pō'-lō*), **Marco,** Italian traveler, was born in Venice, of a noble family, about 1255. In 1271 he accompanied his father and uncle, while a mere youth, to the court of the Tartar emperor of China, by whom he was received with favor and employed on several embassies. Unwilling to part with him, the emperor allowed him, together with his father and uncle, to escort a young princess who was going to be married to a Persian prince, on the promise that they would return. But the prince having died before their arrival, and deeming themselves absolved from their promise by his death, they proceeded to Venice, where they arrived in 1295, laden with rich presents which had been given them. He was then captured by the Genoese, put in prison, and dictated to another captive, Rusticiano, the story of his adventures, which proved to be the first account that opened up to wondering Europe the magnificence of the eastern world. He died about 1323.

Polybius (*pō-lĭb'-ĭ-ŭs*), Greek historian, was born at Megalopolis, in Arcadia, about 204 B. C. He was educated and trained for a public career, was one of the thousand distinguished Achaeans who were carried as prisoners to Rome, 168 B. C., and was an exile in Italy for about seventeen years. After his return to Greece, he undertook numerous journeys into foreign countries, and wrote his celebrated *History*, which seems to have occupied him for the remainder of his life. Of this work, only the first five books out of forty and some fragments are left; but it was closely followed both by Livy and by Cicero. His death was caused by a fall from his horse, about 122 B. C.

Polycarp (*pŏl'-ĭ-kärp*), bishop of Smyrna, and Christian martyr, was born about 69 A. D. He was brought up at Smyrna, was taught the doctrine of Christianity by the apostles, particularly by John, with whom he had "familiar intercourse." His martyrdom is related at great length by Eusebius, and took place probably in 155 A. D., during the persecution under the emperors Marcus Aurelius and Lucius Verus. When asked, or rather entreated, "to revile Christ," Polycarp replied: "Eighty and six years have I served him and he never did me wrong, and how can I now blaspheme my King that has saved me?" He was burned alive. Polycarp wrote several *Epistolae*, of which only one has been preserved, the *Epistola ad Philippenses*, valuable for its numerous quotations from the new testament — especially from the writings of Paul and Peter.

Polygnotus (*pŏl'-ĭg-nō'-tŭs*), early Greek painter, was born in Thasos, and settled in Athens 463 B. C. He is considered the founder of historical painting, and is praised especially by Aristotle, who pays a high tribute to him. He was the first to attempt portrait-painting and to exhibit character by his art. He was identified with Cimon in the reconstruction of Athens, and his school did much to adorn its famous temples.

Pombal (*pōm-bäl'*), **Marquis of, Dom Sebastião José de Carvalho,** one of the greatest of Portuguese statesmen, and one of the ablest men of his time, was born in 1699. He was prime minister of Joseph I.; set himself to fortify the royal power, to check that of the aristocracy, and to enlighten the people. He was the pronounced enemy of the Jesuits, reformed the university of Coimbra, purified the administration, directed the rebuilding of Lisbon after the earthquake, and encouraged commerce and industry, whereby he earned for himself at the hands of the people the name of the "great marquis." On the accession of Maria, Joseph's daughter and successor, he was, under Jesuit influence, dispossessed of power, and died in poverty, 1782.

Pompey, Cneius Pompeius Magnus, called the Great, famous Roman general, was born, 106 B. C. He was the son of Cneius Pompeius Strabo, under whom he served in the Italian campaigns. The most important of his military successes were his campaign against Mithridates, which made Pontus a Roman province, and his capture of Jerusalem, which added Syria to the empire. After these exploits he entered Rome in triumph, at the end of a procession which lasted two days. Shortly after this he joined the party of Cæsar, and formed with him and Crassus the first triumvirate. But he was ambitious to be the first citizen in Rome, and could not endure being second to Cæsar, so he determined on war. The great struggle took place at Pharsalus, B. C. 48, when Pompey was defeated and fled to Egypt for protection. Ptolemy, the king of Egypt, had ordered that he should be murdered immediately on his arrival. His body was left on the sands and his head taken to Cæsar, who wept at the sight of it. He died when fifty-eight years old, A. D. 48.

Ponce de León (*pōn'-thā dā lā-ōn'*), **Juan,** Spanish explorer, was born in Leon, Spain, 1460. He distinguished himself against the Moors; accompanied Columbus on his second voyage; became commander of the east province of Hispaniola; and governed the island of Porto Rico with severity. Having heard of the existence of a fountain that could restore youth and beauty, he set out in search of it in 1512, and discovered and named Florida on Easter Sunday. At the end of a subsequent voyage he died, 1521.

Poniatowski (*pō'-nyä-tŏf'-skē*), **Stanislas Augustus,** last king of Poland, was born at Wolczyn, Lithuania, 1732. He was elected king in 1764, though illy fitted to rule the country at such a crisis. Frederick the Great, who had gained the consent of Austria to a partition of Poland, made a like proposal to Russia, and the first partition was effected in 1772. He tried, too late, to introduce reforms. The intrigues of discontented nobles led again to Russian and Prussian intervention, and a second fruitless resistance was followed in 1793 by a second partition. The Poles now became desperate; a general rising took place, 1794, the Prussians were driven out, and the Russians were several times routed. But Austria now appeared on the scene, Kosciusko was defeated, Warsaw was taken, and the Polish monarchy was at an end. King Stanislas resigned his crown, and died at St. Petersburg, 1798.

Poniatowski, Joseph Antony, born at Warsaw, 1762, was trained in the Austrian army. In 1789 the Polish assembly appointed him commander of the army of the South, with which he gained brilliant victories over the Russians, in 1792; and he commanded under Kosciusko, 1794. When the duchy of Warsaw was constituted, in 1807, he was appointed minister of war and commander-in-chief. In 1809, during the war between Austria and France, he invaded Galicia. Three years later, with a large body of Poles, he joined Napoleon in his invasion of Russia, and distinguished himself at Smolensk, at Borodino, and at Leipzig, where, in covering the French retreat, he was drowned in the Elster, 1813.

Pontiac (*pŏn'-tĭ-ăk*), chief of the Ottawa Indians, was born about 1720. In 1746 he defended Detroit, which was then a French settlement, against the attacks of certain hostile tribes, and he is also said to have led his warriors at Braddock's defeat in 1755. After the French had surrendered Canada, his hatred of the English prompted him to organize a combined attack upon all the English garrisons and settlements with a view to the extermination of what he called "those dogs dressed in red." The 7th of May, 1763, was selected as the day for the attack, which in most places was successful; but at Detroit, where Pontiac commanded in person, the commander was forewarned, and a five months' siege ensued. Pontiac resorted to every means familiar to savages to reduce the place, but was unsuccessful. Peace was finally made in 1766, Pontiac being forced to submit to British rule. He was killed at Cahokia, Illinois, by a drunken Indian in 1769.

Poole, William Frederick, American bibliographer and librarian, compiler of the *Index to Periodical Literature,* was born at Salem, Mass., 1821, and graduated at Yale college in 1849. While at college he was librarian of a literary society, and prepared the first edition of his *Index,* subsequent editions appearing in 1853 and 1882. A supplement by Poole and W. I. Fletcher was issued in 1888. He was for many years librarian of the Chicago city library, and later was librarian of the Newberry library in that city. He died at Chicago, 1894.

Pope, Alexander, celebrated English poet, was born, 1688, in Lombard street, London. His father was a linen draper, in which trade he amassed a considerable fortune, retired from business, and settled at Binfield, in Berkshire, soon after the birth of his son. Pope was born deformed, small in size, and delicate in constitution. The groundwork of learning he acquired at two private schools, and from two priests, who were employed as his tutors; for the rest he was indebted to his own persevering studies. Before he was twelve years old he wrote a play from *Homer,* which was acted by his schoolfellows. He was a poet almost from infancy. His pastorals and some translations appeared in Tonson's *Miscellany* in 1709, but were written three or four years earlier. These were followed by the *Essay on Criticism,* 1711, and *Rape of the Lock,* 1712–17. From 1715–26 Pope was chiefly engaged on his translations of the *Iliad* and the *Odyssey.* In 1728-29 he published his greatest satire, the *Dunciad,* an attack on all poetasters and pretended wits. Of all his delightful productions, the most celebrated is the *Essay on Man.* Died, 1744.

Pope, John, American general, was born at Louisville, Ky., 1822. He graduated at West Point in 1842, entered the engineer corps of the United States army, served in the Florida war of 1842–44, and afterward in the Mexican war, winning the rank of captain for his conduct at the battles of Monterey and Buena Vista. During the civil war he was appointed brigadier-general of volunteers, and in 1862 highly distinguished himself by the capture of New Madrid, Mo., and "Island No. 10," in the Mississippi river. On account of these signal successes he was transferred to the East and placed in command of the forces formerly under Generals Fremont, McDowell, and Banks, each of whom had been outgeneraled and beaten by "Stonewall" Jackson. He conducted a very active and vigorous campaign against Lee and Jackson, but was defeated at the second battle of Bull Run, August 29-30, 1862. In 1882 Pope was made a major-general in the regular army, and retired in 1886. He died at Sandusky, Ohio, 1892.

Porson (*pŏr′-s'n*), **Richard,** eminent English Greek scholar, was born in Norfolk, England, 1759. He was graduated at Cambridge, held a professorship of Greek there, and proved to be a prodigy of learning and critical acumen. He edited the plays of Æschylus and four of Euripides, but achieved little of original value in certification to posterity of his ability and attainments. After his death, several of his works left in manuscript were published. Died, 1808.

Porter, David D., American admiral, was born at Chester, Pa., 1813; entered the navy as midshipman in 1829; was employed from 1836 to 1841 in the coast survey of the United States; in 1841 appointed as lieutenant to the frigate *Congress,* and employed four years on the Mediterranean and Brazil stations; in 1845 was transferred to the national observatory at Washington, and during the Mexican war to the naval rendezvous at New Orleans; again to the coast survey, and from 1849 to 1853 engaged in command of the California mail steamers. At the commencement of the civil war he was appointed, with the rank of commander, to the steam sloop-of-war *Powhatan;* distinguished himself in the capture of New Orleans, and commanded the gunboat and mortar flotilla which coöperated with the squadron of Admiral Farragut in the first attack on Vicksburg. In the fall of 1862 he was placed in command of all the naval forces on the rivers above New Orleans, with the rank of rear-admiral, when his ability as a commander was demonstrated in many ways. At the termination of the war he was appointed superintendent and president *ex officio* of the United States naval academy, Annapolis. He was made vice-admiral in 1866, and in 1870 became admiral. Died, 1891.

Porter, Gene Stratton (Mrs.), author, illustrator; born on a farm in Indiana, 1868; married Charles Darwin Porter, 1886. Editor camera department, *Recreation,* two years; was on natural history staff of *Outing* two years; specialist in natural history photography on *Photographic Times Annual Almanac* four years. Author and illustrator: *The Song of the Cardinal; Freckles; What I Have Done With Birds; At the Foot of the Rainbow; A Girl of the Limberlost; Birds of the Bible; Music of the Wild; The Harvester.*

Porter, Horace, American diplomat and soldier, was born at Huntingdon, Pa., 1837. He graduated at West Point, 1860; LL. D., Union, 1894, Princeton, 1906. He served in the civil war; was lieutenant colonel and aide-de-camp to General Grant, 1864; colonel of staff and aide-de-camp to the general-in-chief of United States army, 1866. He was assistant secretary of war, 1866, and executive secretary to President Grant, 1869–73. He became vice-president of the Pullman palace car company, 1873; was president of New York, West Shore and Buffalo railroad, St. Louis and Santa Fe railway company; United States ambassador to France, 1897–1905; has been an orator on many noted occasions. Author: *West Point Life; Campaigning with Grant,* etc.

Porter, Noah, American educator and philosophical writer, was born at Farmington, Conn., 1811. He graduated at Yale college in 1831, and, after teaching for a number of years, studied theology and became pastor of a Congregational church at New Milford, Conn., and afterward at Springfield, Mass. He was professor of metaphysics and moral philosophy at Yale college, 1846–71; president of Yale, 1871–86; and died at New Haven, Conn., 1892. Among Dr. Porter's numerous works are: *The Human Intellect; Books and Reading; Elements of Intellectual Science; Elements of Moral Science;* and an edition of *Kant's Ethics.* He was the editor of Webster's *Unabridged,* and of the *International Dictionary,* and was widely known as a scholar and thinker.

Porus (*pō′-rŭs*), the Greek name of a king of India who lived in the time of Alexander the Great. He ruled the country east of the river Hydaspes, and, when Alexander attempted to cross the river, Porus met him with a large army and more than two hundred trained war elephants. He was defeated after a bloody battle, in which two of his sons were killed and he himself was captured. Alexander treated him humanely, made him his ally, and enlarged his kingdom by giving him others which were conquered by the Greeks. When Alexander departed from India, he left his army in charge of Eudemus, who put Porus to death, about 317 B. C.

Post, Louis Freeland, American journalist and socialist, editor of *The Public*, Chicago, was born at Vienna, N. J., 1849. He received a public school education; learned the printers' trade; and was admitted to the New York bar, 1870. He was assistant United States attorney, New York, 1874-75; editorial writer on *New York Daily Truth*, 1879–82; returned to law practice, 1883, and abandoned it, 1890. He became interested in Henry George and his teachings, 1881, and has since advocated single tax and allied economic reforms. In 1891-92 he was editor of the *New York Standard;* was editor of the *Cleveland Recorder*, 1896-97; and founded *The Public*, 1898. Author: *The Single Tax; Success in Life; Ethics of Democracy; The Prophet of San Francisco; Ethical Principles of Marriage and Divorce*, etc.

Potter, Cora Urquhart (Mrs. James Brown Potter), American actress, was born in New Orleans, daughter of Colonel David Urquhart. She married J. B. Potter, United States army, of New York, from whom she was divorced in 1900. She first gained fame as an amateur in New York, and made her professional début at the Haymarket theater, London, as Anne Sylvester in *Man and Wife*, 1887; appeared at the Fifth avenue theater, New York, in *Mlle. de Bremier*, 1887; and since then has appeared in varied repertory and played during three tours around the world. She was instrumental in obtaining many thousands of pounds for the various funds in aid of the British troops in South Africa; and was also one of prominent ladies on committee of the *Maine* hospital ship presented by America to the British government. For a number of years she has appeared continually in London in various theaters, and recited the "Antigone" at Bristol (England) musical festival, 1902. Author: *My Recitations*, and a number of magazine articles.

Potter, Henry Codman, American Protestant Episcopal prelate, was born at Schenectady, N. Y., 1835. He was graduated at the theological seminary, Virginia, 1857; D. D., 1865; LL. D., Union, 1878; Yale, 1901; D. D., Harvard, Trinity, Oxford, and Cambridge. He was pastor of Christ church, Greensburg, Pa., 1857-58; St. John's, Troy, 1859–66; was rector of Grace church, New York, until his death, and from 1887 to 1908 was bishop of New York. Author: *Thirty Years Reviewed; Our Threefold Victory; The Church and Her Children; The Religion for To-day; The Gates of the East; Sermons of the City; Waymarks; The Scholar and the State; The East of To-day and To-morrow; The Industrial Situation; Law and Loyalty*, etc. Died, 1908.

Potter, Paul, celebrated Dutch animal-painter, was born, a painter's son, at Enkhuizen in 1625. He left Amsterdam and established himself at The Hague at an early age, where he studied painting under Jacob de Weth. Here he resided until 1653, when he returned to Amsterdam. His best pictures are pastoral scenes with animal figures, the life-size "Young Bull" being especially celebrated. His "Dairy Farm" was sold in London in 1890 for £6,090. The Rijks museum at Amsterdam possesses the "Bear-hunt" and seven other pictures, and England is rich in his works. He was also an excellent etcher. He died, 1654.

Poussin (*po͞o′-săɴ′*), **Nicholas,** French painter, was born in Normandy in 1594. He was a pupil of Varin, Lallemont, and others, and in 1624 went to Rome where he studied with Dufresnoy, the sculptor. He returned to Paris in 1640, was patronized by Louis XIII., and finally settled in Rome in 1642. His reputation mainly rests on his success in the classic style. Upward of two hundred prints have been engraved from his works. The national gallery in London has several of Poussin's pictures, two of which are particularly praised, "A Bacchanalian Dance" and "A Bacchanalian Festival." The Louvre contains "The Deluge," "Moses," "Triumph of Truth," etc. He died in 1665.

Powell, Edward Payson, American journalist and author, was born at Clinton, N. Y., 1833. He graduated at Hamilton college, 1853, and from the Union theological seminary, 1858. He was pastor of the Congregational church, Adrian, Mich., 1861–71; Third Congregational church, St. Louis, 1871–73; and of the Third Unitarian church, Chicago, 1874–77. He was editorial writer on the *St. Louis Globe-Democrat* for several years; and is now editorial writer of *The Independent*, New York, and *Christian Register*, Boston; and associate editor of *Unity*, Chicago, and of *Arena*, Boston. Author: *Our Heredity from God; Liberty and Life; Nullification and Secession in the United States; Windbreaks, Hedges and Shelters; The Country Home; In the Orchard and Fruit Garden*. He is a regular contributor to reviews and magazines.

Powers, Hiram, American sculptor, was born at Woodstock, Vt., 1805. While still a boy he went to Cincinnati, Ohio, where he became an apprentice to a clockmaker, and about the same time formed the acquaintance of a German sculptor, who taught him to model in plaster. Subsequently he was employed for several years making wax figures and fitting them with machinery for the Cincinnati museum, where his "Infernal Regions" horrified thousands of visitors. In 1835 he went to Washington, where he executed the busts of the most distinguished persons of the day. In 1837 he went to Italy to study his art, and resided in Florence until his death. In 1838 he produced his statue of "Eve," which excited the admiration of Thorwaldsen, and in 1839 the still more popular "Greek Slave," of which six copies in marble, with many cast copies, were produced. He also produced "The Fisher Boy," "Proserpine," and "The Indian Girl." Died, 1873.

Poynter, Sir Edward John, English painter, was born of Huguenot ancestry in Paris, 1836. He was the son of an architect; was educated at Westminster and Ipswich; studied, 1853-54, at Rome and, 1856–60, in Paris and elsewhere. He made designs for stained glass, and drawings on wood for *Once a Week* and other periodicals, and for Dalziel's projected illustrated Bible. This led to studies in Egyptian art, which resulted in his "Israel in Egypt" in 1867. His water colors are numerous, and he was elected to the royal water color society in 1883; was R. A. from 1876. In 1871 he became Slade professor of art, university of London; in 1876–81 was director of art at South Kensington; from 1894 to 1905 was director of the national gallery, London; and since 1896 has been president of the royal academy. Among his works are: "The Catapult"; "The Golden Age"; "Zenobia"; "A Visit to Æsculapius"; "The Ides of March";

"A Corner in the Villa"; "The Visit of the Queen of Sheba to Solomon"; "The Ionian Dance"; "Skirt Dance"; "Perseus and Andromeda"; "Dragon of Wantley"; "Atalanta's Race"; "Nausicaa and Her Maidens"; "The Cave of the Storm Nymphs," etc. In 1869-70 he designed the cartoons for a mosaic of St. George in the British house of parliament. He was knighted, 1897, and created a baronet in 1902.

Praxiteles (*prăk-sĭt'-ē-lēz*), famous Grecian sculptor, is believed to have been a native of Athens, to have flourished early in the fourth century B. C., and to have died at the age of eighty. Pliny gives the date 364 B. C. apparently as that in which Praxiteles began to flourish. He executed statues in both bronze and marble, and was unrivaled in the exhibition of the softer beauties of the human form, especially the female figure, his most celebrated being the marble one of Aphrodite at Cnidus. He also executed statues of Eros, Apollo, and Hermes as well, but they have all perished.

Prentice, George D., American journalist, was born at Preston, Conn., 1802, and graduated at Brown university in 1823. After studying law, he edited the *New England Review* for two years, and in 1831 became editor of the *Louisville Journal,* which position he continued to hold until his death in 1870. The *Journal* became famous under his editorship as an organ of the whig party; and during the civil war it gave an unflinching support to the cause of the Union. Prentice's short, witty paragraphs also constituted a new feature much noted and admired. He also achieved considerable reputation as a public lecturer, and was the author of a number of poems. After his death, the *Louisville Journal* was consolidated with the *Courier* of the same city, under the name of the *Courier-Journal.*

Prescott, William Hickling, American historian, was born at Salem, Mass., 1796. During his college course he lost the sight of an eye by a piece of bread playfully thrown by a fellow student, and his studies so affected the other that he became nearly blind. He was then sent abroad for his health, and traveled in England, France, and Italy. On his return to America he turned his attention to literature, and, in 1825, selected materials for his *History of Ferdinand and Isabella,* which appeared in 1837. He next devoted six years to the *History of the Conquest of Mexico,* and four years to the *Conquest of Peru.* He was chosen corresponding member of the French institute, and on his visit to Europe, in 1850, was received with the highest distinction. From 1855 to 1858 he published three volumes of his *History of Philip II.,* but left it unfinished. No American historian has ever excelled him in the power of vivid description, and his works are regarded as the best extant histories of the periods with which they deal. He was made D. C. L. at Oxford in 1850. Died, 1859.

Price, Sterling, American general, was born in Virginia, 1809. He was a democratic member of congress, 1845-46; was made brigadier-general in the Mexican war; was governor of Missouri, 1853–57; became a noted leader of the secession party; was appointed major-general in the confederate service in 1862, and rendered distinguished service to the confederacy throughout the civil war, in the Southwest. He entered into a combination with Vallandigham and others, and founded the Knights of the Golden Circle, a secret political society, of which he was grand commander, composed, it is said, of nearly 25,000 Missourians. Died, 1867.

Priestley, Joseph, eminent English clergyman and experimental philosopher, was born in 1733, at Fieldhead, in Yorkshire, England. He was educated at Daventry, and was subsequently tutor at Warrington, pastor to various congregations, and acquired a high reputation in physics and chemistry. In 1774 he announced his discovery of oxygen. In 1772 he had become companion to the earl of Shelburne, and, at the end of a seven years' residence with that nobleman, he received a pension, and settled, in 1780, at Birmingham. There he proceeded actively with his philosophical and theological researches, became the associate of Boulton, Watt, and Dr. Darwin, grandfather of Charles Darwin, and was also appointed pastor of a Unitarian congregation. In 1791, however, the scene changed. His religious principles and his avowed partiality to the French revolution excited the hatred of the high church and tory party, and, in the riots which took place in July, his house, library, manuscripts, and apparatus were committed to the flames by the infuriated mob, and he was exposed to great personal danger. Quitting Birmingham, he succeeded Dr. Price at Hackney; but, in 1794, conceiving himself to be insecure from popular rage, he embarked for America. He settled at Northumberland, Pennsylvania, at which place he died, 1804. His works include between seventy and eighty volumes. Among them are: *Lectures on General History; Theory and History of Language; Principles of Oratory and Criticism; Charts of Biography and History; Disquisitions Relating to Matter and Spirit; Hartleian Theory of the Human Mind; History of the Corruptions of Christianity; Letters to a Philosophical Unbeliever; Institutes of Natural and Revealed Religion; History of Electricity; History of Vision, Light, and Colors;* and *Experiments and Observations on Different Kinds of Air.*

Prim (*prēm*), **Juan,** Spanish general and statesman, was born, 1814. He entered the Spanish army when but a mere boy; became a colonel in 1837; aided Narvaez, 1843, in the overthrow of Espartero, and assisted in effecting the return of Queen Maria Christina, who rewarded him by bestowing various honors on him, and making him governor of Madrid. In 1844 he was imprisoned on an accusation of treason, but was soon pardoned, and was appointed governor of Porto Rico. He was subsequently commander-in-chief of the army against Morocco, and was made marquis; in 1861 commanded the Spanish contingent in the allied intervention of France and Spain in Mexico; visited the army of the Potomac on his way back to Spain; was banished from Madrid in 1864, but on the overthrow of Isabella, in which he aided, was welcomed back to Spain with open arms, and filled the highest posts in the realm. He is said to have furnished the pretext for the Franco-Prussian war by his offer of the Spanish crown to Prince Leopold. He was assassinated in 1870 in the streets of Madrid for having procured in the Cortes the election of Amadeus to the Spanish throne.

Pritchett, Henry Smith, American educator, was born at Fayette, Mo., 1857. He graduated at Pritchett college, Glasgow, Mo., 1875; Ph. D., Munich, 1894; LL. D., Hamilton, 1900, Pennsylvania, Harvard, and Yale, 1901, Johns Hopkins, 1902, Williams, Michigan, 1905; Sc. D., Tufts, 1905. He was a student assistant in the United States naval observatory, 1876; assistant astronomer of same, 1878; astronomer of Morrison observatory, Glasgow, Mo., 1880; astronomer Transit of Venus expedition to New Zealand, 1882; professor of astronomy and director of observatory, Washington university, St. Louis, 1883–97; superintendent of United States coast and geodetic survey, 1897–1900; president of the Massachusetts institute of technology, 1900–06; and president of the Carnegie foundation for advancement of teaching since 1906. He is the author of various scientific papers.

Procter, Bryan Waller ("Barry Cornwall"), English poet, was born at Leeds, 1787. Educated at Harrow with Byron and Peel for schoolfellows, settled in London when about twenty years of age, and soon began to contribute poetry to the *Literary Gazette.* A few years later he published four volumes of poems, and produced a tragedy at Covent Garden theater, whose success was largely due to the acting of Macready and Kemble. He was a metropolitan commissioner of lunacy from 1832 to 1861. His works, issued under his pseudonym, comprise: *Dramatic Scenes; A Sicilian Story; Marcian Colonna; The Flood of Thessaly; English Songs;* besides his memoirs of Kean and of Charles Lamb. He wrote "The Lost Chord." Died in 1874.

Proctor, Redfield, American statesman, was born at Proctorsville, Vt., 1831. He served in the civil war as colonel of the 15th Vermont volunteers, was governor of that state in 1878, 1879, and 1880. He engaged in farming on a large scale, living at Proctor, a town founded by him, and situated a few miles from Rutland, and was in practical control of the whole output of the Vermont marble quarries. He was secretary of war, United States, 1889–91; United States senator, Vermont, 1891–1908; visited Cuba, 1898, and his speech on Cuban reconcentrados in the United States senate after his return attracted wide attention. He died in 1908.

Proctor, Richard Anthony, English astronomer and mathematician, was born at Chelsea, England, 1837. He was a graduate of St. John's college, Cambridge, in 1860. Besides his fame as an author, he was well known as a popular lecturer in England, the United States, and Australia. About 1885 he settled in St. Louis, and later moved to Florida, leaving there just before he was seized with his fatal illness in New York. His principal popular books were: *Saturn and Its System; Gnomonic Star Atlas; Half-hours with the Telescope; Half-hours with Stars; Other Worlds Than Ours; Light Science for Leisure Hours; Elementary Astronomy; Border Land of Science; Transits of Venus, Past, Present, and Future; The Expanse of Heaven; Myths and Marvels of Astronomy; Chance and Luck; First Steps in Geometry; Easy Lessons in Differential Calculus;* and *Old and New Astronomy,* on which he was at work at the time of his death. He was at this time also editor of *Knowledge,* a monthly journal of popular science. Died, 1888.

Protagoras (*prō-tăg'-ō-ras*), the first of the Greek sophists, was born about 480 B. C., and died about 411 B. C. A native of Abdera, he settled in Athens, and gained a reputation as a paid teacher of philosophy. His doctrine was a form of agnosticism; his favorite saying was that "Man is the measure of all things." He was finally banished from the city. He devoted considerable attention to grammar, and the distinction of moods and genders is sometimes attributed to him.

Proudhon (*prōō'-dôɴ'*), **Pierre Joseph,** French socialist, was born at Besançon, 1809. By his vigorous advocacy of extreme and democratic opinions he became one of the leading figures of his day. As the editor of three daily journals in succession he did much to form the public opinion on political questions. His economic views are expounded in his *Qu'est-ce que la propriété?* and his *Système des contradictions économiques.* Although he framed no complete system of his own, his destructive criticism was of great value, and he ranks high in the history of French economic thought. He died at Passy, 1865.

Ptolemy I. (*tŏl'-ĕ-mĭ*), king of Egypt, known by his surname Soter, or "the preserver," was born, 367 B. C. He was believed by some to be the son of Philip of Macedon, because his mother, Arsinoë, had been a concubine of that king. Ptolemy acted as one of Alexander's generals in his Eastern campaigns; and, when the possessions of the latter were divided, after his death at Babylon, 323 B. C., Egypt fell to him. Troubles soon followed such an acquisition; but Ptolemy was a man of energy and valor, and not only warded off danger from his own realm, but also extended his dominions by the addition of Phœnicia, Coele-Syria, and Jerusalem. Two years before his death, which occurred in 283 B. C., he abdicated in favor of his son, Ptolemy Philadelphus. His reign extended from 323 to 285 B. C.

Ptolemy II., surnamed Philadelphus, son of Ptolemy I., was born, 309 B. C., in the island of Cos. His reign is remarkable for the successful cultivation of the arts of peace rather than the practice of war. He enriched the library of Alexandria with all the literary treasures of his own and of earlier times, and the museum was crowded with the learned from all countries. Tradition alleges that it was by his orders that the Hebrew scriptures were translated into Greek, and the version called the septuagint thus formed. He induced Manetho to write, in Greek, a political history of Egypt, and an account of the religious tenets of the Egyptians. He encouraged the study of natural history, and to facilitate the pursuit of those who devoted themselves to it he formed a collection of rare and curious animals in the preserves, which may be called the royal zoölogical gardens of Egypt. He also expended large amounts on public works; was the builder of the famous lighthouse on the island of Pharos; and constructed a royal mausoleum, to which he removed the remains of Alexander from Memphis. Altogether, under Ptolemy Philadelphus Egypt rose to a high rank among the nations in power and wealth. He reigned from 285 to 247 B. C.

Ptolemy, celebrated astronomer and geographer, whose proper name is Claudius Ptolemaeus, was a native of Egypt, though it is uncertain whether he was born at Pelusium or at Ptolemais in the Thebaid; flourished 139–161. His writings are *Megale Syntaxis tes Astronomais* and *Tetrabiblos Syntaxis.* Ptolemy, both as an astronomer and geographer, held supreme sway over the minds of almost all the scientific men from his own time down until about the fifteenth century; and in astronomy especially he seems to have been not so much an independent investigator as a corrector and improver of the work of his predecessors. The *Almagest* and the *Geography* were the standard text-books to succeeding ages; the first until the time of Copernicus, the second until the great maritime discoveries of the fifteenth century showed its deficiencies.

Pugin (*pū'-jĭn*), **Augustus Welby,** English architect, was born in London, 1812, the son of a French architect, Augustin Pugin, in whose office he was trained, chiefly by making drawings for his father's books on Gothic buildings. He was associated with Sir Charles Barry, architect of the British houses of parliament, and designed and modeled a large part of the decorations and sculpture for those structures. He became a convert to Catholicism, designed Killarney cathedral, Adare hall, a chapel at Douai, and many other churches and buildings for that communion. He died at Ramsgate, 1852. He wrote *Contrasts between the Architecture of the 15th and 19th Centuries; Chancel Screens;* and *True Principles of Christian Architecture.*

Pulaski (*pŏŏ-lăs'-kē*), **Casimir,** Polish count and general, who fell in the American revolutionary war, was born in Podolia, 1748. On account of the active part he took in the Polish war against Russia, he was stripped of his estates and outlawed in the partition of Poland in 1772. In 1777 he offered his services to the American colonies in their contest against England, and for his gallant conduct at the battle of Brandywine was given a brigade of cavalry, which he commanded until March, 1778. In May, 1779, he entered Charleston at the head of "Pulaski's legion," a corps of lancers and light infantry which he had organized, and held it until the place was relieved; he afterward followed and harassed the British until they left South Carolina. At the siege of Savannah, in October, 1779, he fell in an assault at the head of the cavalry, and died on board the brig *Wasp* two days later.

Pulitzer (*pū′-lĭt-sẽr*), **Joseph,** American journalist, proprietor of *New York World,* 1883–1911; was born at Budapest, Hungary, 1847. He was educated by private tutor; came to United States, 1864; served until end of civil war in a cavalry regiment; went to St. Louis, became reporter on the *Westliche Post,* a German newspaper, 1868, and later became its managing editor and part proprietor. In 1878 he bought the *St. Louis Dispatch* and united it with *The Evening Post,* as the *Post-Dispatch.* He was a member of the Missouri legislature, 1869; Missouri state constitutional convention, 1874; was elected to congress in New York for term 1885–87, but resigned after a few months' service; was a delegate to the Cincinnati liberal republican convention, which nominated Horace Greeley for president; and advocated the gold-standard democratic ticket, 1896. In 1903 he endowed with $1,000,000 Columbia university school of journalism, with agreement to give an additional $1,000,000 when the school should be in successful operation. Died, 1911.

Pullman, George M., American inventor and business man, was born at Brocton, Chautauqua county, N. Y., 1831. At the age of twenty-two he engaged in moving buildings out of the way of the Erie canal, then in process of widening. He made his home in Chicago in 1859, and in the same year prepared models of sleeping cars, which became the foundation of his fortune. He made a success of raising buildings to the new level of the city by means of a great many jackscrews, operated simultaneously. In 1863 he began building the coaches that are called by his name the world over. A few years later he organized the Pullman palace car company which was to build them. In 1880 he founded the town of Pullman, near Chicago, where the coaches were built. In 1887 he added the vestibule to his cars, which greatly increased their comfort. He died in 1897, having amassed a large fortune from his inventions and his various business enterprises.

Pupin (*pū-pēn′*), **Michael Idvorsky,** physicist, electrician, professor of electro-mechanics, Columbia, since 1901, was born in Idvor, Banat, Hungary, 1858. He graduated at Columbia university, 1883; studied physics and mathematics under Helmholtz, at the university of Berlin; Ph. D., Berlin. His researches in electrical resonance and wave propagation have made possible long-distance telephony and multiplex telegraphy. Wrote: *Osmotic Pressure and Free Energy; Electrical Oscillation of Low Frequency and Their Resonance; Resonance Analysis of Alternating Currents; Electro-magnetic Theory; Propagation of Long Electrical Waves; Wave Propagation Over Non-uniform Conductors,* etc.

Purcell (*pûr′-sĕl*), **Henry,** noted English composer, was born at Westminster in 1658, and in 1664 became a chorister in the Chapel Royal. His compositions at an early age gave evidence of talent; and in 1680 he was appointed organist of Westminster abbey, in 1682 of the Chapel Royal. He wrote many anthems and other church music, and many dramatic and chamber compositions. Among them are his opera *Dido and Æneas,* written at seventeen, his music to the *Tempest,* his songs in Dryden's *King Arthur,* his music to Howard's and Dryden's *Indian Queen,* to D'Urfey's *Don Quixote,* etc. His greatest work is the *Te Deum* and *Jubilate.* In 1683 he composed twelve sonatas for two violins and a bass. In originality and vigor, in richness of harmony and variety of expression, he far surpassed his predecessors and contemporaries. His church music was edited from the original MSS. by Vincent Novello in 1829–32, with an essay on his life and works; and a complete edition of his works was undertaken by the Purcell society, instituted in 1876. Purcell died, 1695, and was buried in Westminster abbey.

Pusey (*pū′-zĭ*), **Edward Bouverie,** English divine, was born at Pusey, in Berkshire, in 1800, and graduated at Oxford in 1822. In 1828 he was appointed professor of Hebrew at Oxford, a position he held until his death. In connection with Keble and Newman, Pusey took a very active part in the "Tractarian movement"; and, in 1843, was suspended from preaching at Oxford for three years on account of a sermon on the holy eucharist. But he remained in the Anglican communion, and exerted all his talents and learning to sustain evangelical doctrines and standards. In private life, Pusey was a man of warm affection, and was widely known for his gentleness, sincerity, and humility. His charity was limited only by his income; besides abundant gifts to the poor, he spent large sums in helping to provide churches in East London, and in founding and supporting sisterhoods. He died at Oxford, 1882.

Pushkin (*pŏŏsh′-kĭn*), **Alexander Sergeyevitch,** Russian poet, was born in 1799. He was the son of a nobleman, and when quite young became a government clerk, but, having written an *Ode to Liberty* which offended the emperor, lost the office. In 1825 Emperor Nicholas reinstated him and appointed him to write a history of Peter the Great. His greatest work, *Eugene Onegin,* is a romance in verse. Among his other writings are the poems: *The Gypsies; Poltava; Dubrovski;* and *The Captain's Daughter,* a novel. Pushkin was killed in a duel at St. Petersburg when thirty-seven years old, 1837.

Putnam, George Haven, publisher, head of G. P. Putnam's Sons, was born in London, England, 1844. He was educated at the Sorbonne, Paris, and university of Göttingen; A. M., Bowdoin college; Litt. D., Western Pennsylvania. He left Göttingen without graduating to enter 176th New York volunteers, 1862; served from private to major, until 1865. He was a prisoner at Libby and Danville, Va., in the winter of 1864-65. He received the cross of the legion of honor from France, 1891. Author: *Authors and Their Public in Ancient Times; The Artificial Mother; Books and Their Makers in the Middle Ages; The Censorship of the Church of Rome and its Influence upon the Production and the Distribution of Literature,* etc.

Putnam, Herbert, librarian of congress since 1899, was born at New York, 1861. He graduated at Harvard, 1883; Litt. D., Bowdoin, 1898; LL. D., Columbian, 1903, Illinois, 1903, Wisconsin, 1904, Yale, 1907. He took a partial course at Columbia law school, and was admitted to the Minnesota bar, 1886; to the bar of Suffolk county, Mass., 1892; and practiced law, Boston, 1892–95. He was librarian at Minneapolis Athenaeum, 1884–87, Minneapolis public library, 1887–91, and Boston public library, 1895–99. He was president of the American library association, 1898, 1904, and overseer of Harvard, 1902–06. He has published numerous articles in reviews and professional journals.

Putnam, Israel, American general, born at Danvers, Mass., 1718. In 1755 he helped as a captain to repel a French invasion of New York, and was present at the battle of Lake George. In 1758 he was captured by the savages, tortured, and about to be burned when a French officer rescued him. In 1759 he received a regiment, in 1762 went on the West India campaign, and in 1764 helped to relieve Detroit, then besieged by Pontiac. In 1775, after the battle of Concord, he was given command of the forces of Connecticut, was at Bunker Hill, held the command at New York, and in August, 1776, at Brooklyn Heights, where he was defeated by Howe. In 1777 he was appointed to the defense of the Highlands of the Hudson. He died, 1790.

Pyle, Howard, American artist, author, was born at Wilmington, Del., 1853. He was educated in private schools and at the art students' league, New York. Author and illustrator: *The Merry Adventures of Robin Hood; Pepper and Salt, or Seasoning for Young Folks; Within the Capes; The Wonder Clock; The Rose of Paradise; Otto of the Silver Hand; A Modern Aladdin; Men of Iron; Jack Ballister's Fortunes; Twilight Land; The Garden Behind the Moon; Semper Idem; Rejected of Men; The Story of King Arthur and His Knights; The Story of the Champions of the Round Table; The Story of Sir Launcelot and His Companions; Stolen Treasure;* and many magazine stories and articles. Died, 1911.

Pym (*pĭm*), **John,** English orator and statesman, was born at Brymore, in Somersetshire, in 1584. He was for many years member of parliament for Tavistock, having been in the previous reign member for Calne, and was one of those who, in 1626, conducted the impeachment of the duke of Buckingham. Fifteen years afterward he led the impeachment of the earl of Strafford; and in the following year, 1642, he was one of the "five members" — Hollis, Haselrig, Hampden, Strode, and Pym — the attempt to seize whom, on the part of Charles I., immediately preceded the English civil war. The title of "King Pym," which was given to him in ridicule, sufficiently indicates the power he wielded in the long parliament. Scarcely had the great conflict begun, however, when toil and anxiety brought his career to a close. He died at Derby House, 1643, and was buried in state in Westminster abbey.

Pyrrhus (*pĭr'-ŭs*), Greek general, king of Epirus, was born about 318 B. C., came to the throne in 306 B. C. He was expelled a few years later, but restored by the help of Ptolemy Soter in 295 B. C.; held the kingdom of Macedonia for a short time, and, in 281 B. C., went to Italy to help Tarentum against the Romans. He was at first successful, through his elephants and the phalanx, but was finally defeated in 275 B. C. After this he again mastered Macedonia, but was killed in a night attack on Argos in 272 B. C.

Pythagoras (*pĭ-thăg'-ō-ras*), celebrated Greek philosopher, the founder of the Pythagorean school also called the Italic, was born about 582 B. C., at Samos, or, according to some, at Sidon. He began to travel at the age of eighteen; visited Phœnicia and Asia Minor, and, it is said, Persia and India, and resided for twenty-five years in Egypt. On his return he taught geometry at Samos, after which he settled at Crotona, in Magna Graecia, and established a school of philosophy, which became famous. Persecution at length drove him thence, and he took refuge in the temple of the Muses at Metapontum, where he is said to have been starved to death, about 500 B. C. Besides being an illustrious metaphysical philosopher, Pythagoras was a great geometrician and astronomer, discovered the numerical relations in music and propounded the theory of the "harmony of the spheres." He left no writings, and we know of his philosophy chiefly from the philosophy of his disciples.

Quackenbos, John Duncan, physician, author, was born in New York, 1848. He was graduated at Columbia university, 1868, college of physicians and surgeons, 1871; has since practiced in New York, latterly making a specialty of mental and moral diseases. He was adjunct professor of the English language and literature, Columbia, 1884–91, professor of rhetoric at same, 1891–94; also professor of rhetoric at Barnard college for women, 1891–93. Author: *History of the World; History of Ancient Literature; History of the English Language; Physical Geography; Text-Book on Physics; Practical Rhetoric; Typhoid Fever; Causes and Recent Treatment of Neurasthenia; Tuberculosis; Hypnotic Suggestion in the Treatment of Sexual Perversions; Hypnotism in Mental and Moral Culture; Enemies and Evidences of Christianity,* etc.

Quatrefages de Bréau (*kȧ'-tr'-fȧzh' dẽ brā'-ō'*), **Jean Louis Armand de,** French naturalist, was born at Berthezème, France, 1810. In 1850 he was elected professor in the *Lycée Napoléon* and in 1855 at the natural history museum, Paris. His chief works are: *Souvenirs d'un Naturaliste; Unité de l'Espèce Humaine; L'Espèce Humaine; Crania Ethnica; Les Pygmées; Darwin et ses Précurseurs Français;* and *Théories Transformistes.* He died in 1892.

Quay, Matthew Stanley, United States senator and republican politician, was born at Dillsburg, Pa., 1833. He was graduated at Jefferson college in 1850, and four years later admitted to the bar. In the civil war he served as colonel of one of the Pennsylvania volunteer regiments, was military state agent at Washington, and military secretary to the governor of Pennsylvania. He entered the state legislature in 1865, was twice state secretary, state treasurer, and chairman of the republican national committee during the Harrison campaign of 1888. In 1887 he was made United States senator for Pennsylvania, reëlected in 1893, and two years later was tried for alleged misappropriation of public funds, but was acquitted. He was again elected in 1901, but died in 1904.

Quesnay (*kĕ'-nĕ'*), **François,** French economist and physician, was born at Méré, France, 1694. He studied medicine at Paris, and at his death was first physician to the king. But the fame of the "European Confucius" depends on his essays in political economy. Around him and his friend, M. de Gournay, gathered the famous group of the economists, called the physiocratic school. His views were set forth in *Tableau Economiques.* Quesnay's principles are also well known from his contributions to the *Encyclopédie,* and from his *Maximes du Gouvernement Economique, Le Droit Naturel,* etc. He died in 1774. Although he wrote in the infancy of science, and many of his opinions are not now maintained, his system is described by Adam Smith as being, "with all its imperfections, the nearest approximation to the truth that has yet been published on the subject of political economy."

Quesnel (*kĕ'-nĕl'*), **Pasquier,** French Roman Catholic theologian, was born in Paris, 1634. He studied at the Sorbonne, became in 1662 director of the Paris oratory, and here wrote *Réflexions Morales sur le Nouveau Testament.* In 1675 he published the works of Leo the Great, which, for Gallicanism in the notes, was placed on the *Index.* Having refused to condemn Jansenism in 1684, he fled to Brussels, where his *Réflexions* were published, 1687–94. The Jesuits were unceasing in their hostility, and Quesnel was flung into prison in 1703, but escaped to Amsterdam. His book was condemned in the bull *Unigenitus* in 1713. He spent his last years at Amsterdam, and died there in 1719.

Quigley, James Edward, Roman Catholic archbishop of Chicago since 1903, was born at Oshawa, Canada, 1854, and moved with his parents to Lima, N. Y. He was educated at St. Joseph's college, Buffalo, N. Y., and at the university of Innspruck and the college Propaganda, Rome. He was priest at St. Vincent's church, Attica, N. Y., 1879–84; St. Joseph's cathedral, Buffalo, 1884–96; St. Bridget's church, 1896-97; bishop of Buffalo, 1897–1903, when he was installed in Chicago.

Quiller-Couch, Arthur Thomas, British novelist and essayist, was born at Cornwall, 1863. He was graduated at Trinity college, Oxford; was lecturer there in classics, 1886-87; removed to London; was connected with the *Speaker* from its commencement until autumn of 1899, though in 1891 he left London for his native county, where he has since resided. Author: *Dead Man's Rock; The Blue Pavilions; The Warwickshire Avon; The Delectable Duchy; Verses and Parodies; Wandering Heath; The Golden Pomp; Adventures in Criticism; Poems and Ballads; The Ship of Stars; Old Fires and Profitable Ghosts; The Oxford Book of English Verse; The White Wolf; Two Sides of the Face; Shakespeare's Christmas; From a Cornish Window,* etc. In 1897 he was commissioned to finish R. L. Stevenson's uncompleted novel, *St. Ives.*

Quincy, Josiah, American statesman, was born in Boston, Mass., 1772. He was graduated at Harvard, 1790, and adopted the law as a profession. In 1805–13 he was a member of congress. He opposed the war of 1812, and was one of the first, if not the first, among northern men to denounce the slaveholding interest as a rising and dangerous tyranny. In 1813 he was elected to the Massachusetts state senate, and joined in the protest of the legislature against the war and the admission of Louisiana. He remained in the senate until the close of 1820, when he was elected to the state house of representatives, of which he was chosen speaker. In 1822 he became judge of the municipal court of Boston. He was mayor of Boston, 1823–28, and president of Harvard, 1829–45. He published *History of Harvard University; The Municipal History of the Town and City of Boston During Two Centuries; The Life of John Quincy Adams;* and other works. Died, 1864.

Quinet (*kē'-nĕ'*), **Edgar,** French philosopher and author, was born at Bourg, France, 1803, and first studied at Lyons and at Paris. He then studied at Heidelberg, and on his return to France published a translation of Herder's *Ideen zur Philosophie der Geschichte der Menschheit.* From this early period he formed an intimate friendship with Michelet. He was a member of the scientific commission sent to the Morea in 1828, and while there gathered materials for his *Grèce Moderne et ses Rapports avec l'Antiquité.* He then became a contributor to the *Revue des Deux Mondes,* in which *Ahasverus,* perhaps his finest work, first appeared. From 1839 to 1842 he held the chair of foreign literature at Lyons, where his lectures on the ancient civilizations excited a profound interest. From here he passed to a chair at the Collège de France, and assailed the Jesuits with a keen, earnest, epigrammatic eloquence that startled the chiefs of that body. He threw himself eagerly into the reform agitation that brought about the revolution of 1848, and was elected a member of the constitution and legislative assemblies, but was expelled from France. On the fall of the empire he returned to France, and was reinstalled in his chair at the Collège de France, 1870. In 1871 he was elected a member of the assembly, and died in 1875.

Quintilian (*kwĭn-tĭl'-ĭ-an*), or **Marcus Fabius Quintilianus,** Latin rhetorician, was born at Calagurris, now Calahorra, in Spain, about 35 A. D. He went to Rome in the train of Galba, and began to practice at the bar, but achieved his fame more as teacher in rhetoric than a practitioner at the bar, a function he discharged with brilliant success for twenty years under the patronage and favor of the emperor Vespasian. The work by which he is known is entitled *De Institutione Oratoria,* or sometimes *Institutiones Oratoriae,* and is comprised in twelve books. This work, which contains all that Quintilian considered most valuable in the earlier treatises, both Greek and Latin, on the subject, was discovered by Poggio Bracciolini in the monastery of St. Gall in 1417. Quintilian died probably in Rome about 95 A. D.

Rabelais (*rȧ'-b'-lĕ'*), **François,** the great French humorist, was born at Chinon, in Touraine, about 1490. In 1530 he settled at Montpellier, and, taking a medical degree at the university, was appointed lecturer. In 1532 he went as hospital physician to Lyons, where he published several works on medical science, besides other miscellaneous matter bearing on archæology, jurisprudence, etc. His romance, in which are narrated the wonderful adventures of Gargantua and Pantagruel, continues to take rank as one of the world's masterpieces of humor and grotesque invention. Gargantua is supposed to stand for Francis I., Pantagruel for Henry II., Grandejument de Gargantua for Diana of Poiters, Panurge for the Cardinal de Lorraine, and other characters for various celebrated persons. Lord Bacon called Rabelais "the great jester of France"; others have called him a "comic Homer." His work abounds with good sense and folly, delicate thoughts and gross obscenities; but it was entirely in accordance with the prevailing taste, and had a prodigious success. Died in Paris, 1553.

Rachel (*rȧ'-shĕl'*), or **Élisa Rachel Félix,** celebrated actress, was born at Munf, in the canton of Aargau, Switzerland, 1821, daughter of poor parents, of the Jewish race. She began her career by singing in the streets of Lyons, and subsequently of Paris. In the latter city her singing attracted attention, and she was enabled to obtain some musical education, which she used to such advantage that she secured, when little more than seventeen years of age, an appointment in the Théâtre Français of Paris, and instantly became famous. Although her life was spent chiefly in Paris, she visited London, St. Petersburg, Amsterdam, and many other European cities, and in all of them her genius for tragedy was recognized as of the highest order. During a visit to America in 1855 she developed consumption, of which she ultimately died, near Toulon, France, 1858.

Racine (*rȧ'-sēn'*), **Jean Baptiste,** distinguished French dramatist, was born at La Ferté Milon, 1639, and completed his education at the seminary of Port Royal. He commenced his poetical career by an ode on the king's marriage, for which he was magnificently rewarded. A second ode obtained for him a fresh recompense, and the friendship of Boileau. His first dramatic efforts, *The Thebaid,* and *Alexander the Great,* gave but faint indications of superior talent, but his tragedy of *Andromache* placed him far above all his contemporaries except Corneille. He increased his fame by the production of *Britannicus*, *Berenice*, *Iphigenia*, and other tragedies, and by his comedy, *The Pleaders;* but a base cabal which was formed against his *Phaedra* induced him to desist from writing for the stage. After a lapse of twelve years, he wrote, by desire of Madame de Maintenon and Louis XIV., the dramas of *Esther* and *Athalie,* to be performed at the seminary of St. Cyr. The last of these pieces was cried down by his enemies, and Racine relinquished his pen in disgust. The latter is now considered, very generally, to be his finest play. He died in 1699. A commentator upon Racine, says Voltaire, "has only to write at the bottom of every page, beautiful, pathetic, harmonious, admirable, sublime!"

Radcliffe, Ann (née Ward), noted English novelist, was born in London, 1764. In her twenty-third year she married William Radcliffe, a student of law, but who became proprietor and editor of a weekly newspaper, the *English Chronicle.* Among her works are: *The Castles of Athlin and Dunbayne; A Sicilian Romance; The Romance of the Forest; Mysteries of Udolpho,* etc. Her popularity increased down to the date of her latest work, when, in her thirty-third year, "like an actress in full possession of her applauded powers," as Scott remarked, "she chose to retreat from the stage in the full blaze of her fame." She died in 1823.

Radcliffe, John, English physician and the founder of the Radcliffe library at Oxford, was born at Wakefield, Yorkshire, England, 1650. In 1686 Princess Anne of Denmark made him her physician. To University college he left his estate in Yorkshire, in trust for the endowment of two traveling fellowships and the purchase of perpetual advowsons, together with 5,000 pounds for the enlargement of the college buildings. He left 40,000 pounds for the erection of a public library in Oxford, since known as the Radcliffe library, which he endowed with 150 pounds per annum for a librarian. The Radcliffe infirmary and Radcliffe observatory, at Oxford, were both erected out of this fund; and from the same source, in 1823, the Radcliffe trustees contributed the sum of 2,000 pounds toward the erection of the college of physicians in Pall Mall, London. He died in 1714.

Rae, John, British author and journalist, was born in Wick, Scotland, 1845. He was graduated at Edinburgh university; M. A., Edinburgh; hon. LL. D., Edinburgh. He has written largely for the leading reviews, especially on social and economic subjects, and is the author of *Contemporary Socialism, Eight Hours for Work, Life of Adam Smith,* etc.

Rae, John, English Arctic explorer, was born in the Orkney islands, 1813. From 1846 he devoted over twenty years to Arctic exploration, walking over 20,000 miles, and exhibiting marvelous activity and endurance. He mapped out almost one thousand miles of coast line, and gained the reward of £10,000 offered for the first news of the lost Franklin expedition. Rae died in England, 1893.

Raeburn, Sir Henry, Scottish portrait-painter, was born at Stockbridge, near Edinburgh, 1756. He was apprenticed to a goldsmith, but adopted art, producing first water-color miniatures and then oils. At twenty-two he married the widow of Count Leslie, a lady of means, studied two years in Rome, 1785–87, then settled in Edinburgh, and soon attained preëminence among Scottish artists. In 1814 he was elected A. R. A., in 1815, R. A.; was knighted by George IV. in 1822, and appointed king's painter for Scotland a few days before his death, 1823. His style was to some extent founded on that of Reynolds. Among his sitters were Scott, Hume, Boswell, "Christopher North," Lord Melville, Sir David Baird, Henry Mackenzie, Neil Gow, Harry Erskine, Dugald Stewart, Principal Robertson, Lord Jeffrey, and Lord Cockburn.

Raff (*răf*), **Joachim,** German composer, was born at Lachen on the lake of Zürich, 1822. In 1850–56 he lived near Liszt in Weimar, taught music at Wiesbaden until 1877, and was then director of the conservatory at Frankfort-on-Main. He wrote over 200 symphonies, overtures, operas, quartets, songs, etc.; the symphonies *Lenore* and *Im Walde* are his best works. In *Die Wagnerfrage,* issued in 1852, he championed the new German musical school. Among his operas the chief are *König Alfred* and *Dame Kobold.* Died, 1882.

Raglan (*răg'-lan*), **Lord** (Fitzroy James Henry Somerset), British general, was born in 1788. He entered the army in his sixteenth year, and after serving on the staff of the duke of Wellington in the Copenhagen expedition and the Peninsular war, became his secretary in 1812. He lost his right arm in the battle of Waterloo; and for his brilliant services in that campaign was made a K. C. B. In 1852 he was made master-general of the ordnance, and entered the house of lords as Baron Raglan. When war was declared against Russia, in 1854, Lord Raglan was appointed commander of the English forces in the Crimea, and, at the desperate battle of Inkerman, he won the baton of a field-marshal. The siege of Sebastopol continued into June, 1855, when a general assault was ordered, at which both English and French troops suffered terrible losses. Raglan died a few days later, 1855.

Ragozin (*rȧ-gō'-zēn*), **Zenaide Alexeievna,** American author, was born in Russia, 1835. She traveled extensively in Europe, came to the United States in 1874, and became a naturalized citizen. She has since devoted herself to historical and oriental literature. Author: *Story of Chaldea; Story of Assyria; Story of Media, Babylon and Persia; Story of Vedic India; History of the World; Siegfried, the Hero of the Netherlands; Beowulf, the Hero of the Anglo-Saxons; Frithjof, the Viking of Norway; Roland, the Paladin of France; Salammbô, the Maid of Carthage,* etc. She also translated from French Anatole Leroy Beaulieu's *The Empire of the Tsars and the Russians.*

Raikes (*rāks*), **Robert,** English publisher and philanthropist, founder of the modern Sunday schools, was born at Gloucester, England, 1735. In 1757 he succeeded his father as proprietor of the *Gloucester Journal.* He early interested himself in the pitiable condition of prisoners in the jails; and then his consideration for the misery and ignorance of many children in his native city led him in 1780 to start a Sunday school where they might learn to read and understand the Bible. He lived to see such schools spread over England. Died, 1811.

Raleigh (*rô'-lĭ; răl'-ĭ*), or **Ralegh, Sir Walter,** English courtier, colonizer, and man of letters, was born at Budleigh, in Devonshire, 1552, and was educated at Oriel college, Oxford. Between 1569 and 1581 he served with distinction in the army of the French Protestants, in the Netherlands, and in Ireland, and accompanied his half-brother, Sir Humphry Gilbert, in a voyage to America. Shortly after his return he seems first to have attracted the attention of Queen Elizabeth, with whom he speedily rose high in favor. In 1584, a patent having been granted him to take possession of lands to be discovered by him on the continent of North America, he fitted out two ships at his own expense, and shortly achieved the discovery and occupation of the territory known as Virginia, a name chosen as containing an allusion to the "virgin queen" herself. Elizabeth also conferred on Raleigh the honor of knighthood. It was through him that the potato and tobacco were introduced into England at this time. He held in 1596 the post of admiral in the great expedition against Cadiz, commanded by Howard and the earl of Essex, and was admittedly the main instrument of its success. With the death of Elizabeth in 1603 ends the brilliant and successful portion of his career. Her successor, James, from the first regarded him with a suspicion and dislike which he was at no pains to conceal. He was accused of complicity in a plot against the king. Sentence of death was passed, but James did not venture to execute him, and he was sent to the Tower, where for thirteen years he remained a prisoner, his estates being confiscated and made over to the king's favorite, Carr, subsequently earl of Somerset. During his imprisonment he devoted himself to literary and scientific pursuits, and wrote his *History of the World*, a noble fragment, still notable to the student as one of the finest models of the quaint and stately old English style. In 1615 he procured his release, and sailed for Guiana. After his return, in 1618, he was infamously executed, nominally on the sentence passed on him sixteen years before, but really there is reason to suppose in base compliance on James' part with the urgencies of the king of Spain, who resented Raleigh's persistent hostility.

Rambaud (*rāɴ′-bō′*), **Alfred Nicolas**, French historian, was born at Besançon, 1842. He was a member of the French cabinet, 1879-80, and in 1896 became minister of public instruction. He was appointed, in 1883, professor of history in the university of Paris, and became a member of the academy of moral and political sciences in 1897. He wrote works on Russia, French civilization, colonial France, etc., and, with Lavisse, *Histoire Générale du Ivme Siecle*, in 12 vols. Died, 1905.

Rameses I. (*răm′-ē-sēz*), ruled about 1355 B. C., and was king during the nineteenth Egyptian dynasty, formed a treaty with the Hittites, and maintained the conquests of Egypt as far as Wady Halfa. His grandson, Rameses II., usually called the Great, defeated the Hittites at Katesh, then formed a peace with them, and married a Hittite princess. He subjected Ethiopia, which had revolted, established a fleet in the Mediterranean, and erected some of the largest of the Egyptian edifices. His name and reputation formed the basis of the legendary Sesostris. Rameses III. warred with the Philistines and maritime tribes of Greece and Asia Minor, and repeated the conquest of Ethiopia. It is usual to identify the warrior king Rameses II. with the Pharaoh of the oppression, and Merenptah, his son, as the Pharaoh of the Exodus.

Ramsay, Sir William, British chemist, was born at Glasgow, 1852. He was educated at Glasgow university, and at Tübingen; M. D., Ph. D., LL. D., D. Sc. He was assistant in chemistry, Glasgow university, 1874–80; professor of chemistry at University college, Bristol, 1880–87; principal from 1881 to 1887; in 1887 accepted the chemistry chair at University college, London. In conjunction with Lord Rayleigh he discovered argon in 1894, and in 1895 obtained helium from clêveite. In 1904 he was awarded the Nobel prize for chemistry. He is the author of numerous papers, the most important of which are perhaps *The Molecular Surface-Energy of Liquids; Argon, A New Constituent of the Atmosphere*, in conjunction with Lord Rayleigh; and *Helium, A Constituent of Certain Minerals;* also *Neon, Krypton, and Xenon*, three new atmospheric gases; and *The Discovery of the Constituents of the Air*. He is also author of several textbooks on chemistry.

Ramsay, Sir William Mitchell, professor of humanity at Aberdeen university, 1886–1911; was born at Glasgow, 1851. He was educated at the universities of Aberdeen, Oxford, and Göttingen; hon. D. C. L., Oxford; LL. D., St. Andrews and Glasgow; Litt. D., Cambridge. He traveled widely in Asiatic Turkey, 1880–91; was professor of classical art in Oxford university, 1885; Levering lecturer in Johns Hopkins university, Baltimore, 1894. Author: *The Historical Geography of Asia Minor; The Church in the Roman Empire; St. Paul the Traveler and the Roman Citizen; Impressions of Turkey; Was Christ Born at Bethlehem? The Education of Christ; Pauline and other Studies in Early Christian History; Studies in the History and Art of the Eastern Provinces of the Roman Empire; The Cities of St. Paul; Lucan and Pauline Studies;* and numerous articles in German, Austrian, French, American, and English literary, archæological, and geographical journals.

Randall, Samuel J., American statesman, was born at Philadelphia, Pa., 1828. After spending a number of years in mercantile business in his native city, he was elected to congress as a democrat in 1862. He held this position up to the time of his death at Washington, D. C., 1890. He was elected speaker of the house of representatives to fill an unexpired term in 1876. He was also chosen speaker of the house in 1877 and again in 1879. He was a democratic protectionist, consistently opposed to tariff reform. Throughout his congressional career, his ability and integrity were conceded by men of all parties, and he was held in the highest esteem by his fellow-congressmen.

Randolph, Edmund Jennings, American statesman, was born at Williamsburg, Va., 1753, and was admitted to the Virginia bar. In 1776 he helped to frame the constitution of Virginia, and became the first attorney-general of that state; was governor of Virginia from 1786 to 1788, and a member of the convention which framed the constitution of the United States. In 1789 he entered Washington's cabinet as attorney-general, and in 1794 was appointed secretary of state, to succeed Jefferson, which office he resigned in the following year on account of some misunderstanding with the president and his colleagues in reference to the Jay treaty. He died in Virginia, 1813.

Randolph, John, of Roanoke, American orator and statesman, was born in Chesterfield county, Va., 1773. At the age of twenty-six he entered upon public life as a member of congress, and at once took a leading position in politics. He was United States senator, 1825–27; United States minister to Russia in 1830; and again elected to congress in 1832. He was conspicuous for his many odd ways, and for a wit so sharp as to make him the terror of all who opposed him in congress. Randolph prided himself on his descent from Pocahontas, and his marked Indian features bore witness to his origin. He died in Philadelphia, Pa., 1833.

Ranke (*rāng′-kĕ*), **Leopold von**, eminent German historian, was born at Wiehe, Thuringia, 1795. He was educated at Leipzig, and at twenty-three became head master of the gymnasium at Frankfort-on-the-Oder, where he devoted his leisure to historical studies. Six years later he published *A Critique upon the Later Historians*, and the *History of the Roman and Germanic Peoples from* 1495 *to* 1535, which attracted wide attention and won him the chair of history at Berlin in 1825, which he retained until 1871. Not long after he was sent by the Prussian government to Vienna, Rome, and especially to Venice, to examine the historical material and MSS. in the libraries and monasteries of those cities. The result of his researches was the *Princes and People of Southern Europe in the Seventeenth and Eighteenth Centuries*, and the *Conspiracy against Venice in* 1688. These were soon followed by the *Popes of Rome: Their Church and Their State in the Sixteenth and Seventeenth Centuries.* His most complete and elaborate effort, however, is his *German History in the Time of the Reformation.* He published besides *Annals of the German Monarchy under the House of Saxony*, nine books of Russian history, *Civil Wars and Monarchy in the Sixteenth and Seventeenth Centuries; History of France;* and many other works. He edited the *Historical and Political Gazette*, but was obliged to discontinue it on account of its liberal tone, which had given offense to the government. In 1880, in his eighty-fourth year, he published the first volume of his *Welt-Geschichte*, or *History of the World*, writing a volume annually. Probably no man of his time, even in his own land, toiled more indefatigably or laid up greater stores of knowledge. He died in 1886.

Raphael (*răf'-ā-ĕl; rä'-fā-ĕl*), or **Raffaello Sanzio.** See page 134.

Rauch (*rou*K), **Christian Daniel**, noted German sculptor, was born at Arolsen, in the principality of Waldeck, 1777. He was a pupil of Canova and of Thorwaldsen. In 1811 he was called by the king of Prussia to Berlin to execute a statue of Queen Louise, which was placed in the mausoleum of the queen in the garden of Charlottenburg. He was not, however, quite satisfied with the statue, and undertook a new statue of the queen, which he finished eleven years afterward. The latter now stands in the palace of Sans Souci, near Potsdam. His greatest effort was the colossal monument to Frederick the Great, which was dedicated in the city of Berlin in 1851. His last work was a model of "Moses Praying on Mount Nebo between Aaron and Hur." The greater portion of his long life was spent in Berlin, but he died at Dresden, 1857.

Rawlinson, George, English historian and orientalist, brother of Henry Rawlinson, was born at Chadlington, Oxfordshire, 1812. He was graduated at Oxford; was elected a fellow and tutor of Exeter college; became professor of ancient history at Oxford in 1861; canon of Canterbury cathedral in 1872; and rector of All Hallows', London, 1888. In 1860 he published his notable Bampton lectures on the *Historic Evidence for the Truth of the Christian Records.* His historical works cover nearly the entire history of the ancient orient, commencing with an edition of Herodotus, in which many of his brother's discoveries are incorporated. This was followed by *The Five Great Monarchies of the Ancient Eastern World; The Sixth and Seventh Great Oriental Monarchy; A Manual of Ancient History; A History of Ancient Egypt*, and others. He died at Canterbury, 1902.

Rawlinson, Sir Henry Creswicke, English oriental scholar and diplomat, was born at Chadlington, Oxfordshire, England, 1810. He was educated in Ealing, Middlesex, and entered the East India military service in 1827; served in the Bombay presidency until 1833, and was then appointed to assist in reorganizing the army of the shah of Persia. During the six years he spent in that country, he began to study the cuneiform or wedge-shaped inscriptions, and made a translation of the famous Behistun inscription of Darius, which he published in the *Journal of the Asiatic Society.* After he left Persia he held command of Kandahar during 1840–42, and in 1844 was appointed political agent at Bagdad, and consul-general there in 1851. He then returned to England, but in 1859 was sent back to Persia as British minister. In 1871–73 he was president of the royal geographical society, and in 1891 was made a baronet. Died, 1895. He wrote a number of books, among which are: *England and Russia in the East; The Cuneiform Inscriptions of Western Asia; Outline History of Assyria*, etc.

Rayleigh (*rā'-lĭ*), **John William Strutt, Lord**, distinguished English physicist, was born in 1842, graduated at Trinity college, Cambridge, in 1865, and became a fellow in the following year. He succeeded to the title of baron in 1873, was professor of experimental physics at Cambridge, 1879–84, and of natural philosophy at the royal institution, London, 1887–1905. In 1894, with Professor Ramsay, he discovered argon. His experimental work in physics is characterized by the most extreme care, and has extended to almost every branch of the science. He is an officer of the legion of honor, received the Nobel prize for physics in 1904, and was elected president of the royal society in 1905.

Raymond, George Lansing, American educator and author, was born at Chicago, 1839. He was graduated at Williams college, 1862, A. M., L. H. D.; A. M., Princeton; L. H. D., Rutgers; graduated at Princeton theological seminary, 1865, and was a student in Europe, 1865–68. He was pastor of the Presbyterian church, Darby, Pa., 1870–74; professor of oratory, Williams, 1874–80; professor of oratory and æsthetic criticism, 1880–93, professor of æsthetics, 1893–1905, Princeton; professor of æsthetics, George Washington, since 1905. Author: *Colony Ballads; Ideals Made Real; Orator's Manual; Modern Fishers of Men; A Life in Song; Poetry as a Representative Art; Ballads of the Revolution; Sketches in Song; The Genesis of Art-Form; The Speaker*, in part; *The Writer*, in part; *Art in Theory; Pictures in Verse; Rhythm and Harmony in Poetry and Music; Painting, Sculpture and Architecture as Representative Arts; Proportion and Harmony of Line and Color in Painting, Sculpture and Architecture; The Representative Significance of Form; The Aztec God, and Other Dramas; Ballads and Other Poems*, etc.

Raymond, Henry J., American journalist, was born at Lima, N. Y., 1820. He was graduated at the university of Vermont in 1840, and after serving for a number of years on the staff of the *New York Tribune* and other papers, he in 1851 founded the *New York Times*, which speedily took rank among the leading journals of the country. He was elected lieutenant-governor of New York in 1854, and was active in support of Fremont for president in 1856 and of Lincoln in 1860. In 1864 he was elected a member of congress from New York city, but declined a reëlection two years later, preferring to devote himself to the duties of journalism. He was the author of *The Life and Public Services of Abraham Lincoln.* Died, 1869.

Rayner, Isidor, lawyer, United States senator, was born in Baltimore, Md., 1850. He was educated at the university of Maryland and at the university of Virginia, where he completed the academic and law courses. He was admitted to the bar in 1871; elected to the Maryland legislature, 1878, state senate, 1886; member of congress, 1887–89, 1891–95, and attorney-general of Maryland, 1899–1903. He was counsel for Rear-admiral Schley before investigation commission in 1901, and elected United States senator from Maryland for terms, 1905–11, 1911–17. He was recognized as one of the leading lawyers of the senate, a finished orator, and an authority on constitutional and international law. Died, 1912.

Read, Thomas Buchanan, American poet and painter, was born in Chester county, Pa., 1822.

UNIV. OF
CALIFORNIA

GEORGE RAWLINSON
From a photograph

UNIV. OF
CALIFORNIA

He entered a sculptor's studio in Cincinnati, afterward studied painting, and in 1841 settled in Boston, where he began to paint portraits. In 1846 he returned to Philadelphia, and in 1850 went to Florence, where he spent most of the rest of his life. Among his works are *Lays and Ballads; The House by the Sea; The Wagoner of the Alleghanies; A Summer Story;* and *Poetical Works.* He is best known as the author of *Sheridan's Ride.* He died at New York, 1872.

Reade, Charles, distinguished English novelist, was born in Oxfordshire, England, 1814. He was the youngest son of John Reade, Esq., of Ipsden House, Oxfordshire; was graduated at Oxford, secured a fellowship there, and in 1847 was admitted to the bar as a member of Lincoln's Inn. He began his literary career by playwriting; studied the art of fiction for fifteen years, and first made his mark as novelist in 1852, when he was nearly forty, by the publication of *Peg Woffington.* This was followed in 1856 by *It is Never too Late to Mend*, and in 1861 by *The Cloister and the Hearth*, the last his best and the most popular. Several of his later novels are written with a purpose, and include the well-known problem novels, *Hard Cash*, and *Foul Play.* His most popular plays are *Masks and Faces* and *Drink.* He died in London, 1884.

Réaumur (*rā'-ō'-mür'*), **René Antoine Ferchault de,** French naturalist and physicist, was born at La Rochelle, France, 1683. He was educated at Poitiers, Bourges, and Paris, and was elected a member of the academy of sciences in 1708. He subsequently devoted himself to biological study; discovered the method of tinning iron; and invented the Réaumur thermometer. He also succeeded in producing an opaque glass which was equal to the porcelain of Saxony and Japan. He died in 1757, leaving behind him a voluminous array of works, the most important of which is the *Mémoires pour servir à l'Histoire des Insectes.*

Récamier (*rā'-kȧ'-myā'*), **Mme.** (née Jeanne Françoise Julie Adelaide Bernard), French woman of society, was born at Lyons, France, 1777. Her father was a banker of that city, and, as well as her mother, was distinguished by much of the personal grace and charm which, in the daughter, seem to have culminated in a form of almost typical perfection. She was beautiful, and in rare measure possessed a French woman's indefinable fascination and brilliance. At fifteen she was married to Jacques Récamier, and attracted to her salon at Paris a brilliant circle during the consulate and empire. A record of the splendid social triumphs of Mme. Récamier would involve notice of nearly all that was distinguished in Paris during a space of about fifty years. She became a power in the whole of France, and so continued in spite of changes of fortune which ordinarily would have involved the extinction of even more solid celebrity. Died, 1849.

Reclus (*rĕ'-klü'*), **Jean Jacques Élisée,** French geographer, was born at Ste-Foix-la-Grande, France, 1830. He was educated at Montauban and Berlin. An extreme democrat, he left France after the *coup d'état* of 1851, and spent seven years in England, Ireland, and America. He returned in 1858, and published *Voyage à la Sierra Nevada de Ste Marthe*, etc. For his share in the commune of 1871 he was banished. In Switzerland he began his masterpiece, *Nouvelle Géographie Universelle;* wrote also a physical geography, *La Terre; Histoire d'un Ruisseau; Les Phénomènes Terrestres;* and *Histoire d'une Montagne.* In 1893 he became a professor at Brussels. Died, 1905.

Red Jacket, or Sa-go-ye-wat'-ha, "He keeps them awake," a noted chief of the Seneca tribe of Indians, was born at Old Castle, on Seneca lake, New York, about 1751. In early life he was noted for his swift running, and during the revolution the British officers employed him as a messenger. One of them gave him a bright red coat, and after that he was called Red Jacket. He was a friend of the whites, though he wished to have the Indians keep their own lands; and, when the six nations made a treaty to sell theirs, he opposed the treaty in an eloquent speech, 1784. Some years after this he visited General Washington, who gave him a silver medal. During the war of 1812 he was of great service to the American army, giving important information and advice before the battle of Chippewa. In later life he visited New York and Washington, and the speeches that he made there are among the finest specimens of Indian eloquence. He died at Seneca village, near Buffalo, N. Y., 1830.

Reed, Thomas Brackett, American lawyer and legislator, was born at Portland, Me., 1839, and was graduated from Bowdoin college in 1860. After serving a short time as assistant paymaster in the navy, he studied law, and commenced legal practice in 1865. He was a member of the Maine legislature; attorney-general of the state; city solicitor of Portland; and was elected to congress in 1876. His ability was so clearly recognized that he soon became the acknowledged leader of the republican party on the floor; and, when his party secured a majority of the house of representatives in the fifty-first congress, Reed was chosen speaker. He served in congress until 1899, and was elected speaker of the fifty-fourth and fifty-fifth congresses. He was reëlected in 1899, but resigned his seat and took up the practice of law in New York city. His ruling, as speaker, that all members present, though not voting, should be counted toward a quorum, attracted national attention and approval. He published *Reed's Rules* in 1894, and edited *Modern Eloquence* in 1901. Died, 1902.

Reed, Walter, American surgeon and bacteriologist, was born in Virginia, 1851. Received his medical education at university of Virginia and at Bellevue hospital in New York. Entered the army as assistant surgeon in 1875; studied bacteriology during 1890 at Johns Hopkins, and established bacteriological laboratory at the army medical school, Washington. Reed demonstrated that typhoid fever is spread in camps through flies and personal contact, rather than by infected water, and that yellow fever is caused only by the bite of a certain kind of mosquito. By means of the precautions he urged after the Spanish war, the yellow fever plague was practically exterminated in Cuba. He died, 1902.

Reeves, John Sims, English tenor, was born at Shooter's Hill, Kent, 1822. At fourteen he was a clever performer on various instruments, and was appointed organist and director of the choir in the church of North Cray, in Kent. He went to Paris, 1843, in order to perfect his voice and style, and on his return to England, 1847, was recognized as the first tenor in that country, a position which he maintained for a number of years. In 1892 he became professor in the Guildhall school of music, London, and retired from the stage, returning to concert work, however, in 1896. His voice was one of wide range, and of great natural sweetness and purity. He died at Worthing, Sussex, 1900.

Regiomontanus (*rĕ'-jĭ-ō-mŏn-tā'-nŭs*), the name given from his birthplace at Königsberg (*Mons Regius*) to the mathematician and astronomer Johann Müller. He was born in 1436, studied at Vienna, and in 1461 accompanied Cardinal Bessarion to Italy to learn Greek. In 1471 he settled in Nuremberg, where, with Bernhard Walther, he labored at the "Alphonsine tables," and published *Ephemerides* 1475–1506 in 1473, of which Columbus made much use. He established the study of algebra and trigonometry in Germany, and wrote on water-works, burning-glasses, weights and measures, the quadrature of the circle, etc. He was summoned to Rome in 1474 by Sixtus IV. to help to reform the calendar, and died there, 1476.

Regnard (*rĕ′-nyȧr′*), **Jean François**, French dramatist, was born at Paris, France, 1655. He was a scion of wealth, and received an excellent education. After a roving and adventurous life in various countries, he returned to France about 1683, and became prominently connected with the ministry of finance. Regnard was one of the best followers of Molière, and is regarded as second only to that great master as an exponent of French comedy. His *Le Joueur*, published in 1696, is one of the masterpieces of the French stage. He also wrote *Le Divorce, Le Distrait, Les folies amoureuses*, etc. He excelled as a satirical poet, and his house was a resort of wits. He died at his estate of Grillon, near Dourdan, 1709.

Regnault (*rĕ′-nyō′*), **Henri**, French figure and genre painter, was born in Paris, 1843. He studied there and at Rome, later making a study of Velasquez in Madrid. Among his best works are "La dame en rouge," "Judith," "Salome," a symphonic incarnation of sensual cruelty, in yellow, and "The Moorish Headsman," a symphony in red. His equestrian portrait of Marshal Prim was one of the finest of the century. Regnault enlisted in the army during the Franco-Prussian war and was killed at Buzevenal, 1871.

Regnault, Henri Victor, French chemist and physicist, was born at Aix-la-Chapelle, 1810. He worked as a draper to support himself and sister, while he studied at the École Polytechnique, where he became a professor in 1840; in 1841 he succeeded Dulong as professor of physics in the Collège de France; in 1847 he became chief engineer of mines, and in 1854 director of the porcelain factory at Sevres. He rendered distinguished service to science by his exact determination of physico-chemical constants, his numerical data on the working of steam-engines, and his criticism of the law of Boyle and Mariotte. Died, 1878.

Régnier (*rā′-nyā′*), **Mathurin**, French poet, was born at Chartres, 1573. After a life of dissipation he became in 1609 canon of the cathedral of Chartres, and was called "the good Régnier," on account of his amiability. Boileau called him the best satirical poet before Molière. His collected works appeared in a new edition in 1875. He died at Rouen, 1613.

Regulus (*rĕg′-ū-lŭs*), **Marcus Atilius**, Roman general, was consul in 267 B. C., when he took Brundusium, and received a triumph. In 256 B. C. he was a second time consul, and in conjunction with his colleague, Manlius, defeated the Carthaginian fleet of 350 sail under Hanno and Hamilcar, landed at Clypea, and ravaged the enemy's territory. Manlius returned to Rome, and Regulus defeated the three Carthaginian generals in a great battle and captured town after town, including Tunis. The Carthaginians at last defeated him and took him prisoner. After five years' captivity he was sent in 250 B. C. to Rome, along with an embassy, on condition that he would return if the negotiations were unsuccessful. He persuaded the senate to refuse to make peace, and returned to Carthage, where he was put to death about 250 B. C.

Rehan (*rē′-an; rā′-an*), **Ada**, actress, was born in Limerick, Ireland, 1860. She came to the United States in childhood, made her first appearance on the stage at fourteen, in Newark, N. J., and played in Philadelphia, Baltimore, Albany, and Louisville stock companies. In 1879 she was engaged by Augustin Daly to fill leading positions in Daly's theater, and continued with him until his death, in 1899. She played characters in Shakespearean and old comedies such as Rosalind, Katherine, Viola, Beatrice, Portia, Lady Teazle, Peggy in the *Country Girl*, and many high-class modern comedy parts.

Reich (*rīᴋ*), **Dr. Emil**, Austrian author and lecturer, was born in Eperjes, Hungary, 1854. He was educated at Prague, Budapest, and Vienna university; J. U. D., Vienna. He spent five years in the United States, four in France, and, with interruptions, about thirteen years in England; lectured frequently at Oxford, Cambridge, and London universities; and was employed by British government in the preparation of the British case in the Venezuela boundary matter. Author: *History of Civilization; Græco-Roman Institutions*, Oxford lectures; *Hungarian Literature; Foundations of Modern Europe; Success among Nations; Select Documents illustrating Mediæval and Modern History; Atlas of Modern History; The Fundamental Principles of Evidence; Imperialism; The Failure of the Higher Criticism of the Bible; Plato, as an Introduction to Modern Life; Success in Life; General History of Western Nations*, etc. Died, 1910.

Reid, Sir James, British physician, physician-in-ordinary to the king, was born in Scotland, 1849. He was graduated at Aberdeen university, M. A., 1869, M. D., 1875, LL. D., 1895; hon. LL. D., Glasgow, 1901. He studied at Vienna, 1876–77; practiced in Scotland, 1877–81; resident physician to Queen Victoria, 1881–1901; physician extraordinary, 1887–89; physician-in-ordinary, 1889–1901. He is the author of numerous papers in medical journals, etc. Fellow of royal society of medicine. Created baronet, 1897.

Reid, Robert Gillespie, Canadian railway builder and capitalist, was born in Scotland, 1840. In 1871 he came to America and had charge of the construction of the international railway bridge at Niagara Falls, the international bridge over the Rio Grande, and the Lachine bridge over the St. Lawrence. In 1893 he made a contract with the Newfoundland government to construct a railway from St. John's to Port au Basques, and operate it for ten years for $15,000 a mile and a grant of 5,000 acres of land, in alternate blocks, for each mile of railway constructed. A further contract in 1898 to operate all railways in the island for fifty years, seven steamers and a street railway in St. John's, for which he was to receive 2,500,000 acres of land, and the ownership of the railways and government telegraph lines, was broken by the liberal government on the ground that it practically sold Newfoundland to Reid, who then transferred his interests to the Reid Newfoundland company, which undertook the operation of the lines under a new contract. Died, 1908.

Reid, Thomas, Scottish philosopher, was born at Strachan, Scotland, 1710. He took his degree of M. A. at Aberdeen in 1726, and continued to act as librarian there for a number of years. In 1737 he was appointed minister to the parish church of New Machar, where he remained until 1752, when he was appointed professor of philosophy in King's college, Aberdeen. In 1763 he was chosen to succeed Adam Smith as professor of moral philosophy in the university of Glasgow, and henceforth devoted himself to mental and metaphysical speculation, resigning his chair in 1781. In 1764 he published his *Inquiry into the Human Mind;* in 1785, his *Essays on the Intellectual Powers;* and in 1788,

his *Active Powers of the Human Mind*. Died, 1796.

Reid, Whitelaw, American diplomat and journalist, was born at Xenia, Ohio, 1837. He was graduated at Miami university, Oxford, Ohio, 1856; LL. D., Miami, 1890, Princeton, 1899, Yale, 1901, Cambridge, 1902, St. Andrews, 1905; D. C. L., Oxford, 1907. He edited the *Xenia News*, 1858-59; was legislative correspondent, 1860-61, war correspondent, 1861-62, Washington correspondent, 1862-68, *Cincinnati Gazette;* aide-de-camp on the staff of Generals Thomas A. Morris and W. S. Rosecrans in West Virginia; clerk of the military committee of the thirty-seventh congress, 1862-63; librarian house of representatives, 1863-66; and cotton planter, Concordia parish, La., 1866-67. In 1868 he was attached to the editorial staff of *New York Tribune;* managing editor, 1869, editor-in-chief, and chief proprietor, 1872-1905. He declined appointment as United States minister to Germany, 1877, and again in 1881; was United States minister to France, 1889-92; republican nominee for vice-president of United States, 1892; special ambassador of the United States to Queen Victoria's jubilee, 1897; member of peace commission to Paris, 1898; special ambassador for coronation of Edward VII., 1902, and United States ambassador to England, 1905-12. Author: *After the War, a Southern Tour; Ohio in the War; Schools of Journalism; Newspaper Tendencies; Town Hall Suggestions; Two Speeches at the Queen's Jubilee; Some Consequences of the Last Treaty of Paris; Our New Duties; Later Aspects of our New Duties; A Continental Union; Our New Interests; Problems of Expansion; Carnegie Institute Address; Monroe Doctrine; Greatest Fact in Modern History*; *How America Faced its Educational Problem*, etc. Died, 1912.

Reinsch (*rīnsh*), **Paul Samuel,** American educator and author, professor of political science, university of Wisconsin, since 1901, was born at Milwaukee, Wis., 1869; was graduated at the university of Wisconsin, 1892, in law department of same, 1894; Ph. D., 1898, and studied at the university of Berlin, at Rome and at Paris. He was United States delegate to the third Pan-American conference at Rio de Janeiro, 1906. Author: *The Common Law in the Early American Colonies; World Politics at the End of the Nineteenth Century as Influenced by the Oriental Situation; Colonial Government; Colonial Administration; American Legislatures and Legislative Methods;* and contributor to reviews, to historical and economic journals. His books have been translated into Japanese, Chinese, Spanish, German.

Réjane (*rā'-zhän'*), **Madame** (Gabrielle Réju), French actress, was born in Paris, 1857. She married M. Porel, director of the Vaudeville theater, Paris, from whom she was divorced in 1905. She was educated at the Paris conservatoire, under Regnier, and made her début at the Vaudeville theater in *Revue des Deux Mondes*, 1875; left the Vaudeville for Théâtre des Variétés, 1882; passed to L'Ambigu in order to create la Glu in 1882; afterward created Ma Camarade, Palais Royal; Clara Soleil, Vaudeville; Les Dem. Clochard, Variétés; Germinie Lacerteux, l'Odéon; Marquise, Vaudeville; Ma Cousine, Variétés; Amoureuse, l'Odéon; Lysistrata, Grand théâtre; Madame Sans Gêne, Vaudeville, 1893; and Maison de Poupée, 1894. She toured in America in 1895, and obtained an enormous success. One of her later successes at the Vaudeville was La Passerelle. She manages her own theater in Paris, Théâtre Réjane.

Rembrandt (*rĕm'-bränt*). See page 154.

Remington, Frederic, American artist, illustrator, sculptor, and author, was born in St. Lawrence county, N. Y., 1861. He early studied at Yale art school, and at the art students' league of New York, after which he led the life of a cowboy and stockman on a ranch in Montana and Wyoming, where he became notable as an animal painter and illustrator of western scenes and modes of life on the plains. He subsequently came into note as an illustrator for magazines, treating of military subjects and of ranching life, and after the Spanish-American war of Cuban scenes and characteristics. His chief canvases and best-known paintings are: "A Dash for the Timber"; "The Last Stand"; "Past all Surgery"; "The Last Lull in the Fight"; and "Conjuring the Buffalo Back." Among his leading works in sculpture are "The Broncho Buster" and "The Wounded Bunkie." He is the author of the following works: *Pony Tracks; Crooked Trails; The Way of an Indian; Frontier Sketches; John Ermine of the Yellowstone*, etc. Died, 1909.

Remsen, Ira, American chemist and educator, president, 1901-12, and professor of chemistry since 1876, Johns Hopkins university; was born in New York, 1846. He was graduated at the college of the city of New York, 1865; M. D., college of physicians and surgeons, New York; Ph. D., Göttingen; LL. D., Columbia, 1893, Princeton, 1896, Yale, 1901, Toronto, 1902. He was professor of chemistry, Williams college, 1872-76; founder, 1879, and since editor of the *American Chemical Journal;* president of national academy of sciences, 1907-08, etc. Author: *The Principles of Theoretical Chemistry; An Introduction to the Study of the Compounds of Carbon, or Organic Chemistry; The Elements of Chemistry; Inorganic Chemistry; A Laboratory Manual; Chemical Experiments;* and many scientific articles and addresses.

Renan (*rĕ-näɴ'*), **Joseph Ernest,** French philologist, historian, and critic, was born at Tréguier, in Brittany, 1823. He began to study for the church at Paris, but, as the result of the study of Hebrew and of German criticism, renounced traditional Christianity, and in 1845 abandoned all thoughts of the church as a profession. By his elder sister Henrietta's assistance and counsel he was enabled to follow out his purpose, a life of study untrammeled by creeds or formularies. At twenty-five he received his doctorate at the university of Paris, and in 1850 obtained a post in the Bibliothèque Nationale. In 1860 he was made one of a commission sent by the government to study the remains of Phoenician civilization. In 1862 he was chosen professor of Hebrew in the Collège de France; but the emperor, inspired by the clerical party, refused to ratify the appointment; and it was not until 1870 that he was established in the chair. In 1878 he was elected to the academy. His first work of importance was published in 1854, but his European reputation dates from the publication of the *Life of Jesus*, in 1863, first in the series which its author regarded as the special work of his life, *History of the Origin of Christianity*. None of the other volumes excited the extraordinary interest of the first. Of the volumes that followed, those on St. Paul, 1869, and Marcus Aurelius, 1882, are specially noteworthy. In completion of his life's task Renan undertook a *History of the People of Israel*, in 5 vols. He also wrote many other works of a more general character, including *The History of the Semitic Languages; The Future of Science; Brother and Sister; Studies in the History of Religion*, etc. Whatever may be the judgment of time on the intrinsic value of Renan's contribution to the sum of knowledge, he can never lose his place among the few great names in the history of letters. In London he delivered the Hibbert lectures, 1880, on *The Influence of Rome on Christianity.* He died in 1892.

Rennie (*rĕn'-ĭ*), **John,** British civil engineer, was born at Phantassie farm, East Lothian, Scotland, 1761. After working as a millwright he studied at Edinburgh university. In 1780 he entered the employ of Boulton and Watt, and in 1791 started in London on his own account as an engineer and bridge-builder. He erected the bridges at Leeds, Musselburgh, Newton-Stewart, Boston, New Galloway, and the Southwark and Waterloo bridges over the Thames, and formulated the plans for London bridge. He made many important canals; drained fens; assisted in the Bell Rock lighthouse; designed the London docks, and others at Blackwall, Hull, Liverpool, Dublin, Greenock, and Leith; and improved the harbors and dockyards at Portsmouth, Chatham, Sheerness, and Plymouth, where he constructed the celebrated breakwater in 1811–14. He died in 1821 and was buried in St. Paul's.

Reuter (*roi'-tĕr*), **Baron Paul Julius,** German journalist, was born in Cassel in 1821. In 1849 he established an office at Aix-la-Chapelle for supplying news by telegraph, and thereby revolutionized the press of Europe. In 1851 he transferred his business to London, became a naturalized citizen of Great Britain, and founded Reuter's news service. He laid several important telegraphic cables. Died, 1899.

Revere (*rē-vĕr'*), **Paul,** American patriot, was born in Boston, Mass., 1735, and learned the business of a goldsmith. He was conspicuous for his zeal against the mother country, and one of the first actors in the revolt. He became famous in history and song for his ride from Boston to Lexington to arouse the minute-men, April 18-19, 1775. He died at Boston, 1818.

Reynolds, John Fulton, American general, was born in Lancaster, Pa., 1820. He was graduated at West Point, 1841, and entered the artillery; served in the Mexican war and on the frontier; in 1861 took command of a brigade of the Pennsylvania reserve corps, and led them in McClellan's peninsular campaign in 1862 until he was taken prisoner at Glendale, June 30th. When Lee invaded Maryland, Governor Curtin, of Pennsylvania, selected General Reynolds to command the militia of that state, and soon after the first corps of the army of the Potomac was assigned to his command. He fought at Fredericksburg in 1862. Encountering the van of the confederate army at Gettysburg, he had already selected the ground for the impending battle, when at the opening of the fight he was killed by a rifle-shot, July 1, 1863. A monument was erected to him at Gettysburg, and a bronze equestrian statue of him by Rogers stands in Philadelphia in front of the city hall.

Reynolds, Sir Joshua, eminent English painter, was born at Plympton, in Devonshire, 1723. He studied under Thomas Hudson, a portrait painter, and when about twenty years old began his career as a portrait-painter, at Plymouth Dock, now Devenport. Three years later he established himself in London, where, except three years spent in Italy — from 1749 to 1752 — he passed the rest of his life. On the institution of the royal academy in 1769, he became president and was knighted by George III. His works are very numerous. He was especially famous for his portraits, though his historical paintings, of which upward of sixty are catalogued, show him to have been qualified to excel in both departments of his art. He was the friend of Johnson, Burke, Goldsmith, and the most eminent literary men of his time. His literary reputation rests on his *Discourses on Painting,* which were delivered by him in the academy during the successive years of his presidency. He died at London, 1792, and was buried in St. Paul's cathedral.

Rhees, Rush, American educator, president of university of Rochester since 1900, was born at Chicago, 1860. He was graduated at Amherst, 1883, LL. D., 1900; Hartford theological seminary, 1888; D. D., Colgate university, 1901. He was instructor in mathematics at Amherst, 1883–85; was pastor of Middle Street Baptist church, Portsmouth, N. H., 1889–92; associate professor of new testament interpretation, Newton theological institution, Newton Centre, Mass., 1892–94, and professor in the same, 1894–1900. Author: *The Life of Jesus of Nazareth, a Study; St. Paul's Experience as a Factor in His Theology;* and various articles in theological and educational journals and periodicals.

Rhodes, Cecil John, South African statesman, was born at Bishop Stortford, England, 1853. He was sent for his health to Natal, and subsequently made a fortune at the Kimberley diamond mines. He then returned to England and entered Oriel college, Oxford, and, though his residence was cut short by ill health, he ultimately took his degree. He entered the Cape Colony house of assembly as member for Barkly, and in 1884 occupied a place in the Cape Colony cabinet. He sent 10,000 pounds in 1888 to forward the cause of Irish home rule. In 1890 he became prime-minister of Cape Colony; but even before this he had become a ruling spirit in the extension of British territory, and secured, in 1889, the charter for the British South Africa company, of which until 1896 he was managing director. This territory is now known as Rhodesia. His policy was the ultimate establishment of a federal South African dominion under the British flag. In 1895 he was made a member of the British privy council. In 1896 he resigned the Cape premiership in consequence of complications arising from the raid of Dr. Jameson, the chartered company's administrator, into the Transvaal, in aid of the Uitlanders' claims. In 1899 he was made D. C. L. at Oxford. He was a conspicuous figure during the war of 1899–1902, died 1902, and was buried in the Matoppo hills, leaving a remarkable will which, besides making great benefactions to Cape Colony, founded rich scholarships at Oxford.

Rhodes, James Ford, American historian and essayist, was born at Cleveland, Ohio, 1848. He was educated in the public schools, at the university of New York, and the university of Chicago, but was not graduated; LL. D., Western Reserve university, 1893, Harvard, 1901, Yale, 1901, Wisconsin, 1904; Litt. D., Kenyon, 1903. He engaged in coal mining and the manufacture of pig-iron, 1870–85, and since 1885 has devoted himself to the study and to the writing of history. He received the Loubet prize of the Berlin academy of science in 1901. Author: *History of the United States from the Compromise of* 1850, in 7 vols., *Historical Essays,* etc.

Ricardo (*rĭ-kär'-dō*), **David,** British political economist, of Jewish extraction, was born in London, 1772, and entered upon a mercantile life, after having received a common school education. He gained a large fortune by commerce, obtained a seat in parliament for Portarlington, 1819, and acquired a high reputation as an economist and writer. He wrote *Principles of Political Economy and Taxation; On the Depreciation of the Currency; Essay on Rent; Funding System;* and other works of a similar nature. Died, 1823.

Ricciarelli (*rĕt'-chä-rĕl'-lē*), **Daniele,** known also by the name of Daniele da Volterra, Italian painter, was born at Volterra, 1509. He studied painting at Siena, and afterward repaired to Rome, where

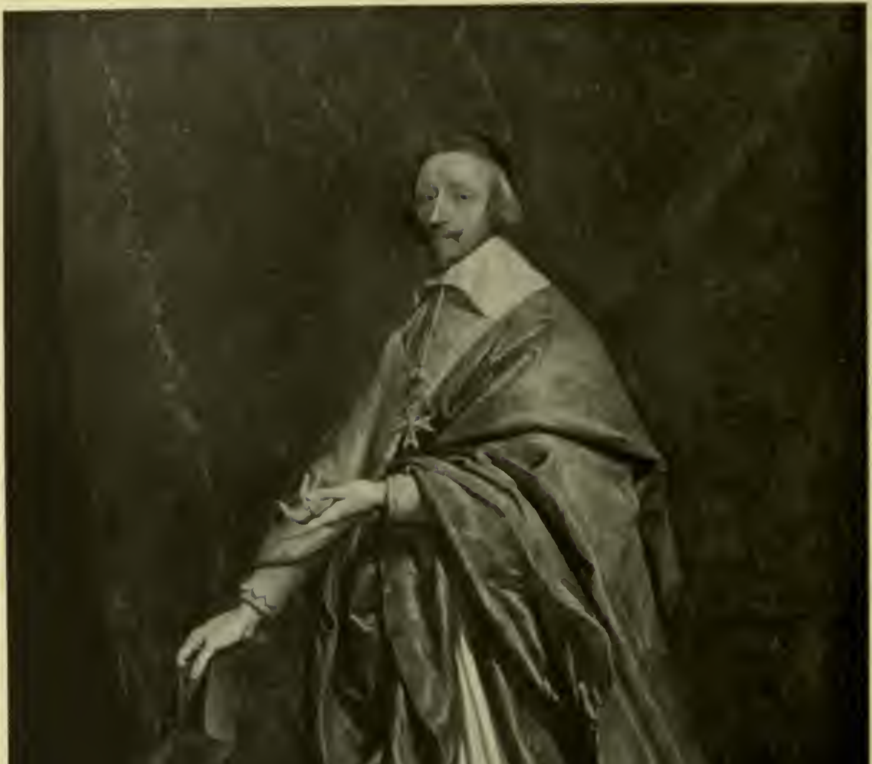
CALIFORNIA



CARDINAL RICHELIEU
From the painting by Champaigne

he was much indebted to the friendship of Michaelangelo, who not only instructed him, but gave him designs for some of his most celebrated works. His fame rests chiefly on a series of frescoes in the church of La Trinità de' Monti, Rome; and of these the "Descent from the Cross" is well known by Toschi's admirable engraving. Ricciarelli was employed by Paul IV. to partially drape the nude figures in Michaelangelo's "Last Judgment" in the Sistine chapel of the vatican. By this act he earned for himself the soubriquet of Il Braghettone, "the Breeches-maker." In the latter part of his life he applied himself also to sculpture. He died at Rome in 1566 or 1567.

Rice, Alice Hegan, American author, was born at Shelbyville, Ky., 1870, daughter of Samuel W. Hegan. She was educated at Hampton college, Louisville, and in 1902 married Cale Young Rice. Author: *Mrs. Wiggs of the Cabbage Patch; Lovey Mary; Sandy; Captain June,* etc., and a number of short magazine stories.

Richard I., surnamed Cœur de Lion, king of England from 1189 to 1199, was born at Oxford, 1157. He was the third son and successor of Henry II. He spent his early years in Poitou and Aquitaine, where he engaged in quarrels with his father; after his accession to the throne he flung himself with characteristic ardor into the crusade movement; in 1190 joined his forces with Philip Augustus of France in the third crusade; upheld the claims of Tancred in Sicily; captured Cyprus, and won great renown in the holy land, particularly by his defeat of Saladin. After shipwreck on the coast, on his way home, he was captured by the archduke of Austria, and handed over to the emperor Henry VI. in 1193. He was ransomed at a heavy price by his subjects, and landed in England in 1194. His later years were spent in his French possessions warring against Philip. He died of an arrow wound at the siege of Chalus in 1199. Not more than a year of his life was spent in England, and his reign is barren of constitutional change.

Richard II., king of England, was born at Bordeaux, France, in 1367. He was the son of Edward the Black Prince, and the grandson of Edward III., whom he succeeded. Being only eleven years old at his accession, a council of regency was appointed to govern the kingdom during his minority. In 1381 the insurrection of the peasantry under Wat Tyler broke out and was put down, the young king himself taking part in its suppression. Meantime, the war with France continued, and intolerable burdens were placed upon the shoulders of the people. Quarrels with his uncles, with the commons, and with his parliaments, on behalf of worthless favorites with whom he was surrounded, fill up the years of Richard's reign. The noted John of Gaunt, duke of Lancaster, and Thomas, duke of Gloucester, tried to bend their royal nephew to their own purposes. He resisted them successfully; but the murder of Gloucester, who was arrested near London, and slain at Calais in 1397, fixes an indelible stain upon his memory. Two years afterward he was defeated and deposed by his cousin, Henry of Bolingbroke, duke of Hereford, who succeeded him. He is believed to have been murdered in Pontefract castle, Yorkshire, in the following year. To this reign belong the translation of the Bible into English by Wycliffe.

Richard III., king of England 1483–85, surnamed Crookback, was born at Fotheringay castle, 1452, youngest son of Richard, duke of York, a brother of Edward IV., and uncle of Edward V., whom he murdered. Scarcely had he placed himself, securely as he thought, upon the throne, than a plot broke out, in which the duke of Buckingham took a leading share, in favor of Henry Tudor, earl of Richmond. The plot disastrously failed so far as Buckingham was concerned, for he was apprehended, condemned, and executed at Salisbury, 1483; but in 1485 the earl of Richmond landed at Milford Haven with a force of a few thousand men, and a few days later defeated the king in the battle of Bosworth field, in Leicestershire. In this battle Richard was killed. He was buried in Grey Friars' church, Leicester. The house of York and the Plantagenet line of kings ended with the death of Richard, who was succeeded by Henry VII., the first of the Tudor line.

Richardson, Harry Alden, United States senator, was born in Camden, Del., 1853. He attended school at East Greenwich, R. I., and at the age of sixteen returned to Delaware, where he learned the trade of canner and packer, going into his father's establishment at Dover, and working his way up from the lowest position. In 1876 he was taken into partnership by his father, and after the latter's death, in 1894, assumed entire control of the canning establishment, which he, with his sons, has since managed. He was elected to the United States senate in 1907 for the term 1907–13.

Richardson, Samuel, English novelist, was born in Derbyshire, 1689. He was early apprenticed to a printer in London; some years after became a master printer, and was successively printer to the house of commons, master of the Stationers' company, and law printer to the king. It was not until he was more than fifty years of age that he published his first novel, *Pamela, or Virtue Rewarded.* In 1749 appeared his second work, *The History of Clarissa Harlowe,* which greatly increased his reputation; and in 1753 he published *The History of Sir Charles Grandison,* in which he attempted the description of a model Christian gentleman. All his novels are in the epistolary style. He may be said to be the originator, after De Foe, of the English novel, and was the first to write a novel of high life. He died in 1761.

Richelieu (*rē'-shē-lyû'*), **Armand Jean Duplessis, Duc de,** celebrated French statesman and cardinal, was born of a noble family at Paris, 1585. He was educated for the military profession at the Collège de Navarre. He then pursued ecclesiastical studies, and underwent the preliminary examination for his degree at the Sorbonne. In 1607 he was consecrated bishop of Luçon at Rome in the presence of Pope Paul V., and for some time devoted himself zealously to the discharge of his duties in his diocese. At the states-general in 1614, being appointed one of the representatives of the clergy, he attracted the notice of the queen-mother by an address which he delivered in the presence of the young king, Louis XIII.; and, by his appointment in 1616 as secretary of war and foreign affairs, the way seemed opened to his success in political life. In 1622 he became a cardinal, and from 1624 to 1642 was the principal minister of Louis XIII. The administration of Richelieu forms an epoch in the history of France and her relations with other countries. It is memorable for several great measures, or series of measures, through which the posture of affairs underwent a complete and permanent change. Of these the first and most lasting in its results was that by which the absolute authority of the sovereign was established. From the mediæval period the power of the French kings had been controlled, and in many cases overridden, by the feudal privileges of the nobles; and in the stormy conflicts of the sixteenth and in the beginning of the seventeenth century the power of the crown had often been reduced to a cipher. By a succession of vigorous and energetic, and, it must be added, not unfrequently unscrupulous measures, Richelieu succeeded in breaking down the political power and subduing the arrogant assumptions of the great families, the heads of several among which were brought to the scaffold, while not a few were condemned to life imprisonment. Among his most inveterate and most powerful adversaries was Gaston, duke of Orleans, brother of the king; but Richelieu triumphed over him, and even the queen-mother, Marie de' Medici, was obliged to bow before his unbending spirit, and to withdraw into exile at Cologne. Thus Richelieu, at the close of his career, delivered up the royal authority, which he had wielded for eighteen years, almost without a single constitutional check upon its absolute exercise. Another of the great enterprises of this minister was the overthrow of the Huguenot party as a political power and a rival of the throne in France. The siege and capture of Rochelle, which he conducted in person in 1628, was followed by the submission of the other Huguenot strongholds. In the external relations of France the great object of all his measures was the overthrow of the preponderance of Austria. He died at Paris in 1642.

Richter (*rĭᴋ'-tĕr*), **Johann Paul Friedrich,** or "Jean Paul," German humorist and sentimentalist, was born at Wunsiedel, in Bavaria, 1763. He studied at Leipzig, and began his literary career in 1783 with *The Greenland Lawsuits.* In 1784 he fled from the city to avoid incarceration for debt, and in 1786 accepted a tutorship at Topen in the family of Herr von Oerthel. In 1790, at the request of several families of Schwarzenbach, he removed thither to take charge of the education of their children, and lived in this way as a private school-master for some years. In 1789 appeared *Selections from the Papers of the Devil,* and, in 1793, *The Invisible Lodge.* This was followed by *Hesperus,* the work by which he is perhaps best known outside of Germany; *Quintus Fixlein; The Valley of Campan; The Awkward Age,* which is probably his best work; *Dr. Latzenberger's Journey to the Watering-place; Preparatory Course in Esthetics,* etc., and a number of essays. He died at Bayreuth, 1825.

Ridder, Herman, American journalist, was born in New York, 1851, of German parentage. He attended the New York schools, and began business life at eleven as errand boy. He was an insurance agent at twenty; in 1878 established the *Katholisches Volksblatt,* and in 1886 the *Catholic News;* became trustee, treasurer and manager, 1890, president, 1907, of the *New York Staats-Zeitung.* As an independent democrat he was active in Cleveland campaigns and reform movements, especially in German-American reform union. He is a trustee of the Mutual life insurance company, Emigrant industrial savings bank; member of the Charity organization society, the Isabella Heimath, German society, St. Vincent de Paul society, Legal aid society, chamber of commerce, American museum of natural history, Metropolitan museum of art; director of the associated press and New York publishers' association.

Ridley, Nicholas, English reformer, was born in Northumberland, about 1500; studied at Cambridge, Paris, and Louvain; returned to Cambridge in 1529, became chaplain to Cranmer in 1537, and about 1540 master of Pembroke hall. He was appointed bishop of Rochester in 1547, and of London in 1550; took a leading part in composing the liturgy and drawing up the thirty-nine articles; favored the attempt to place Lady Jane Grey on the throne, and was imprisoned in the Tower. He was condemned to death for heresy, and burned, with Latimer, at Oxford, 1555.

Ridpath (*rĭd'-păth*), **John Clark,** American historian and educator, was born in Putnam county, Indiana, 1840. He was graduated at Asbury, now De Pauw, university, 1863, and in 1869 was appointed professor of literature at Asbury, and ten years later became vice-president of that university. For his alma mater he was instrumental in procuring the endowment from Mr. De Pauw, which subsequently resulted in its change of name. He was editor of *The Arena,* 1897-98, and from his industrious pen came histories, cyclopædias, and biographies. Among the latter are lives of Alexander Hamilton, Garfield, W. E. Gladstone, together with a history of Texas; an academic history and a popular history of the United States; *A Cyclopædia of Universal History,* and a compendious treatise on *The Great Races of Mankind.* Died at New York, 1900.

Rienzi (*rē-ĕn'-zē*), **Nicola Gabrini,** Italian patriot, commonly called "the last of the Roman tribunes," was born in Rome about 1313. He was well educated, and was a noted orator. At that time the noted schism obtained in the Roman Catholic church, Rome was almost without government, and the citizens were robbed and ill-treated by nobles who lived in fortified houses. At last the people made an attempt to free themselves, and chose Rienzi tribune, 1347. He proved an excellent leader at first, but soon became elated by success, caused himself to be crowned with seven crowns, and lived in great splendor and extravagance. In a few months the people became tired of him, and he was obliged to escape from the city in the dress of a monk. He was afterward recalled to Rome, and was assassinated in 1354, while making a speech to the people.

Riggs, Mrs. George C. See **Wiggin, Kate Douglas.**

Riis (*rēs*), **Jacob August,** American journalist, author, was born in Ribe, Denmark, 1849. He was educated at the Latin school there; came to New York, became police reporter for the *New York Sun,* and was subsequently active in the small parks and play-grounds movement, and in tenement house and school reform. He was secretary of the New York small parks commission, 1897, and executive officer of Good Government clubs, 1896-97. Author: *How the Other Half Lives; The Children of the Poor; The Making of an American; The Battle with the Slum; Children of the Tenements; The Peril and the Preservation of the Home; Theodore Roosevelt, the Citizen;* and magazine articles on social and economic subjects.

Riley, James Whitcomb, American poet, writer, and lecturer, was born at Greenfield, Ind., 1853. He received a public school education; M. A., Yale, 1902; Litt. D., Pennsylvania, 1904; LL.D., Indiana, 1907. He began contributing poems to Indiana papers, 1873. His earlier Hoosier dialect verse and his first book appeared under the pen-name, "Benj. F. Johnson, of Boone." For a number of years he appeared on the lecture platform throughout the country and gave readings from his works. Author: *The Old Swimmin' Hole and 'Leven More Poems; The Boss Girl and Other Sketches; Afterwhiles; Old-Fashioned Roses; Pipes o' Pan at Zekesbury; Rhymes of Childhood; The Flying Islands of the Night; Green Fields and Running Brooks; Armazindy; A Child-World; Neighborly Poems; Home Folks; Poems Here at Home; The Rubaiyat of Doc. Sifers; The Book of Joyous Children; An Old Sweetheart of Mine; Out to Old Aunt Mary's; A Defective Santa Claus; While the Heart Beats Young; Raggedy Man; Morning,* etc.

Rinehart, William Henry, American sculptor, was born in Carroll county, Md., 1825. He received a common school education, and at the age of twenty-one began his career as a marble worker in Baltimore. In 1855 he went to Italy, and after a two years' course of instruction and practice in Florence, brought back two bas-reliefs of unquestioned merit. After remaining in Baltimore about a year, he went to Rome, where he continued to work until his death. He completed Crawford's bronze doors for the capitol at Washington; executed a bronze statue of the late Chief-Justice Taney, under a commission from the state of Maryland, unveiled in Annapolis in 1872; "Love Reconciled with Death"; "Latona and Her Children"; "Angel of the Resurrection"; "Woman of Samaria"; "Clytie," etc. He died at Rome in 1874, leaving his property as a fund for the aid of indigent students of art.

Ripley, George, American scholar and critic, was born at Greenfield, Mass., 1802. He graduated at Harvard college, 1823, studied theology there and was ordained to the pastorate of a Unitarian church at Boston. This he held until 1841. In the meantime he had become one of the leading spirits in the transcendental movement, the first meeting of the club being held at his house in 1836; and on leaving the pulpit he started the Brook Farm experiment. This came to an end in 1847, when Ripley removed to New York and engaged in literary and journalistic work. He was co-editor of the *New American Cyclopedia.* Died, 1880.

Ripon, Bishop of. See **Carpenter, Rt. Rev. William Boyd.**

Ristori (*rēs-tō'-rē*), **Adelaide,** Italian actress, was born in 1821, the child of strolling players. She married the Marquis Capranica del Grillo, 1847, but afterward returned to the stage. Having established her reputation in Italy, she visited Paris, 1855, London, 1858, and other European capitals, as well as the United States and South America. In America she played with Edwin Booth. Her leading parts were: Francesca da Rimini, Marie Stuart, Phaedra, Lady Macbeth, Judith, etc. She retired from the stage in 1885 and died in 1906.

Ritter, Karl, German geographer, was born at Quedlinburg, Prussia, 1779. He studied at Halle, became professor of geography at Berlin in 1820, and afterward member of the academy and director of studies in the military school. With Ritter as the founder of comparative geography, began a new epoch in the history of geographical science. His chief work was *Geography in Its Relation to Nature and the History of Men.* His lectures were published in three volumes, *History of Geography, General History,* and *Europe.* He died at Berlin, 1859, and his name is perpetuated in two geographical institutions at Berlin and at Leipzig.

Rives (*rēvz*), **Amelia,** Princess Amélie Troubetzkoy, American novelist, was born at Richmond, Va., 1863. She early manifested a strong predilection for literature. Her earliest production was a series of stories entitled *A Brother to Dragons.* This was followed by a sensational work called *The Quick or the Dead?* which met with considerable popularity. Her later work embraces *Virginia of Virginia; Herod and Mariamne; According to St. John; Barbara Dering; Athelwold; Tanis; Augustine the Man; The Golden Rose;* and a number of magazine articles. In 1896, after being divorced from her first husband, J. A. Chanler, she married a Russian prince, Pierre Troubetzkoy.

Rivière (*rē'-vyâr'*), **Briton,** English painter, was born in London, 1840, of Huguenot ancestry. He was graduated at Oxford in 1867, M. A., D. C. L. He had exhibited at the royal academy in 1858, and from the appearance of "The Poacher's Nurse," 1866, he has been regularly represented there and at various international exhibitions. He became A. R. A. in 1878, R. A. in 1881. Among his works are, "Daniel in the Lions' Den"; "Persepolis"; "A Roman Holiday"; "Giants at Play"; "Actaeon"; "Vae Victis"; "Rizpah"; "A Mighty Hunter Before the Lord"; "Lady Wantage"; "Dead Hector"; "King's Libation"; "Beyond Man's Footstep"; "Ganymede"; "Apollo"; "The Last Arrow"; "The Temptation in the Wilderness"; "Lady Tennyson and the Poet's Old Wolf Hound"; "Kerénina"; "St. George and The Heron"; "To the Hills"; "Aphrodite," etc.

Rixey, Presley Marion, surgeon-general of United States navy, was born at Culpeper, Va., 1852. He was graduated in medicine at the university of Virginia, 1873; entered United States navy as assistant surgeon, 1874, and was made surgeon-general with rank of rear-admiral, 1902. He was decorated by Alphonso XIII., king of Spain, for services rendered officers and men on the *Santa Maria* following an explosion on that vessel. He spent eleven years at sea, and on shore was attached successively to the naval hospital, Philadelphia, navy yard, Norfolk, and naval dispensary, Washington. He was official physician to President McKinley from 1898 to the time of his death, and thereafter was continued as physician by President Roosevelt in addition to his official duties. Retired, 1910.

Robbia (*rŏb'-byä*), **Lucca della,** Italian sculptor, was born at Florence, about 1400. He decorated the campanile of the cathedral at Florence; made a bronze door for the sacristy of the same; and was famous for his work in enameled terracotta, since known as "della Robbia" ware. Died, 1482.

Robert I., king of Scotland. See **Bruce, Robert.**

Roberts, Charles George Douglas, Canadian author, was born at Douglas, N. B., Canada, 1860. He was graduated at the university of New Brunswick, 1879; was editor of the *Week,* Toronto, 1883-84; professor of English and French literature, King's college, Windsor, N. S., 1885–87, professor of English and economics, same, 1887–95; associate editor of the *Illustrated American,* in New York, 1897. Author: *Orion and Other Poems; In Divers Tones; Ave—An Ode for the Shelley Centenary; Songs of the Common Day; The Book of the Native; New York Nocturnes; The Book of the Rose; The Canadians of Old; Earth's Enigmas; The Raid from Beauséjour; A History of Canada; The Forge in the Forest; Around the Campfire; Reube Dare's Shad Boat; A Sister to Evangeline; Appleton's Canadian Guidebook; By the Marshes of Minas; The Heart of the Ancient Wood, The Kindred of the Wild: Barbara Ladd; The Prisoner of Mademoiselle; The Little People of the Sycamore; The Return to the Trails; Red Fox; The Heart that Knows; In the Deep of the Snow; The Young Acadian,* etc.

Roberts, Frederick Sleigh, baron of Kandahar and Waterford, distinguished British general, was born at Cawnpore, India, 1832. He was educated at Eton college, at Addiscombe, and at Sandhurst; D. C. L., Oxford, etc.; LL. D., Cambridge, etc. At the age of nineteen he joined the Bengal artillery and served through the Indian mutiny; was present at the siege and capture of Delhi, where he was wounded; was at the relief of Lucknow, and in the battle of Cawnpore and other actions of the period. For his heroism he received the Victoria cross. In 1868 he took part in the Abyssinian war, and was made a C. B. In the Afghan war of 1878 he commanded the Kuram field force, and in this affair he made his famous march from Kabul to Kandahar, effecting the relief of the latter place. For his great military feat in this war he was created a baronet, and earned from his soldiers the familiar sobriquet of "Little Bobs" or Bobs Bahadur. In 1892 he was raised to the peerage, having meanwhile served in South Africa and been given command of the British forces in India. He also received the thanks of both houses of the British parliament. In 1895 he was made field-marshal and commander of the forces in Ireland. In 1899 he proceeded to South Africa to take supreme command during the Boer war, where he invaded the Orange Free State and the Transvaal and turned the fortunes of that struggle in favor of the British. In the autumn of 1900 he returned to England to succeed Lord Wolseley as commander-in-chief of the army, retiring in 1904. He is the author of the *Rise of Wellington*, and *Forty-one Years in India*.

Roberts, Morley, English novelist and journalist, was born in London, 1857. He was educated at Owens college, served before the mast, on Australian sheep-runs, on Texan ranches, on California railways, and British Columbian saw-mills, and multiplied his experiences in the South seas, the Transvaal, Rhodesia, and Corsica. Since 1887 he has published more than forty works, mostly novels, including: *The Purification of Dolores Silva; The Colossus; A Son of Empire; Immortal Youth; Lady Penelope; Captain Baalaam; The Idlers; The Prey of the Strongest; The Blue Peter; The Flying Cloud; Lady Anne; Captain Spink*, etc.

Robertson, Frederick William, English pulpit orator and writer, was born in London, 1816. He was educated for the army at Tours and Edinburgh, but subsequently studied at Oxford, 1837–40, and devoted himself to the church. In 1842 he was settled at Cheltenham; in 1847 became incumbent of Trinity chapel, Brighton, where his earnestness, originality, and wide sympathy arrested attention, but provoked suspicion. He was especially devoted to the laboring classes. He resigned in 1853 because his vicar had refused to confirm his nomination of a curate, and died the same year. His *Sermons* were published complete in 1870. Another volume, *The Human Race*, etc., was issued in 1880. His other works are: *Expository Lectures on St. Paul's Epistle to the Corinthians; Lectures and Addresses; An Analysis of "In Memoriam"*; and *Notes on Genesis*.

Robertson, William, British historian, was born in Borthwick, Midlothian, 1721. He was educated in Edinburgh; entered the church, and became minister of Gladsmuir. He distinguished himself in the general assembly of the church, and became leader of the moderate party. He was one of the ministers of Greyfriars church, Edinburgh, and principal of the university from 1762. He wrote *History of Scotland During the Reigns of Mary and James VI.; History of the Reign of the Emperor Charles V.;* and *History of America*. He died near Edinburgh when nearly seventy-one years old, 1793.

Robespierre (*rō'-bes-pyâr'*), **Maximilien Marie Isidore**, noted French revolutionist, was born at Arras, France, 1758. He distinguished himself at the college of his native place, entered the states-general in 1789, and was elected a deputy of the *tiers-état*, in which capacity he immediately repaired to Versailles. It was, however, as a popular leader in the famous Jacobin club that his chief activity was exerted; and in this field his influence became immense. After the death of Mirabeau his importance became more and more recognized; and from this time forward until his death his biography is in effect the history of the revolution. He was elected to the national convention as head of the Paris deputies, and as recognized chief of the extreme party he was one of the main agents in procuring the execution of the king, which took place in December, 1792. In the following year occurred the final struggle with the Girondists, who had twice before attacked him with a view to compass his destruction, the chief men among whom he now triumphantly sent to the scaffold. A period of terror followed; Marie Antoinette and the infamous duke of Orleans were the first victims; Pétion, Danton, and Camille Desmoulins were next immolated, on a suspicion of having favored a reactionary policy; and for months, under the so-called committee of public safety, Paris became the scene of an indiscriminate quasi-judicial slaughter, in which some thousands of lives were sacrificed. With these enormous atrocities the name of Robespierre, together with those of his friends, Couthon and St. Just, remains peculiarly associated. A conspiracy was organized against "the tyrant," and after a scene of fierce tumult in the convention his arrest was accomplished. A rescue by the populace followed, but he lacked the courage and promptitude to turn the opportunity to account; while he hesitated his enemies acted, and in July, 1794, he closed his career on the scaffold.

Robinson, James Harvey, American historian and educator, professor of history, Columbia university, since 1895, was born at Bloomington, Ill., 1863. He was graduated at Harvard, 1887; pursued post-graduate courses at Harvard and in Germany; Ph. D., Freiburg, 1890. He was lecturer on European history, university of Pennsylvania, 1891; associate professor 1892–95, Columbia university; acting dean, Barnard college, 1900–01. Author: *The German Bundesrath; Petrarch, the First Modern Scholar and Man of Letters*, with H. W. Rolfe; *Introduction to the History of Western Europe; Readings in European History* (2 vols.); *The Development of Modern Europe* (2 vols.); and a number of articles and historical texts.

Robinson, William Callyhan, American educator and legal writer, dean of law school, Catholic university of America, 1895–1911; was born at Norwich, Conn., 1834. He was graduated at Dartmouth college, 1854; graduated in divinity, General Theological seminary, Protestant Episcopal church, 1857; studied law, and was admitted to the bar in 1864; LL. D., Dartmouth, 1879; M. A., Yale, 1881. He was ordained to the Episcopal ministry, 1857, in New York; was Episcopal missionary, Pittston, Pa., 1857–58, and rector of St. Luke's, Scranton, Pa., 1859–62. He practiced law at New Haven, Conn., 1865–95; was lecturer and professor of law, Yale university, 1869–95; judge of city court, New Haven, Conn., 1869–71; judge of court of common pleas, New Haven county, Conn., 1874–76; member of the legislature of Connecticut, 1874. Author: *Notes of Elementary Law; Elementary Law; Clavis Rerum; Law of Patents; Forensic Oratory; Elements of American Jurisprudence;* and has contributed various articles to the *Catholic World*, and *Catholic University Bulletin*. Edited *Mirror of Justices*, 1903. Died, 1911.

Robson, Eleanor Elise, American actress, was born at Wigan, Lancashire, England, daughter of Charles Robson. She was graduated at St. Peter's academy, Staten island, New York, 1897, and made her professional début at California theater, 1897. She played in stock companies in San Francisco, Denver and Milwaukee, 1897–99; was a great success as Bonita in *Arizona;* created rôle of Constance in *In a Balcony*, Flossie Williams in *Unleavened Bread*, M'lle de la Vire in *A Gentleman of France*, Audrey in *Audrey;*

played Juliet to the Romeo of Kyrle Bellew, 1903; starred in *Merely Mary Ann*, 1903–05, and headed an "all-star" cast in *She Stoops to Conquer*, at the New Amsterdam theater, New York, 1905. Early in 1906 she created the part of Sylvia Lang in Clyde Fitch's play, *The Girl Who Has Everything*, and that of Susan Gambett in Jerome's play, *Susan in Search of a Husband*, both specially written for her. She later played in repertoire at Liberty theater, New York, including *Salomy Jane*, and other successes. She married August Belmont, 1910, and retired from the stage.

Rochambeau (*rō'-shäɴ'-bō'*), **Jean Baptiste Donatien de Vimeur Comte de,** marshal of France, was born in 1725. He served in the war of the Austrian succession; distinguished himself in the Seven Years' war, coöperated with Washington at the siege and capture of Yorktown, during the American war of independence. In 1791 he became commander of the French army of the north, but resigned in 1792, and narrowly escaped execution during the reign of terror. Died, 1807.

Rochefoucauld. See **La Rochefoucauld, François, Duc de.**

Rockefeller, John Davison, American capitalist and philanthropist, was born at Richford, N. Y., 1839, and moved to Cleveland, Ohio, 1853. He received a public school education; was clerk in a forwarding and commission house, and at nineteen a partner in the firm of Clark and Rockefeller, commission merchants. Subsequently the firm became Andrews, Clark and Company, and engaged in the oil business. In 1865 the firm, then William Rockefeller and Company, built the Standard oil works at Cleveland, and this was consolidated with others in the Standard oil company, 1870. Other interests were later acquired and the Standard oil trust was formed, 1882, but dissolved, 1892, the various Standard oil companies being operated separately, with Rockefeller at the head until 1911 when he retired. He has given a total of $43,000,000 to the general education board; over $23,000,000 to the university of Chicago; a $100,000 building, 3,000 volumes on Greek art and literature, and money donations to Vassar; $1,375,000 to Barnard college; $250,000 to American Baptist missionary union and home missionary society; $1,000,000 to Yale; endowed Rockefeller institution for medical research, New York, with $1,825,000; Southern educational fund, $1,126,000; Harvard, $1,000,000; Teachers college, $500,000, and made numerous other donations to colleges, churches, missions, etc., making a total of more than $85,000,000 to philanthropies.

Rockefeller, John Davison, Jr., capitalist, son of preceding, was born in 1874. He was graduated at Brown university, and married, in 1901, Abby Green Aldrich, daughter of Nelson W. Aldrich, United States senator from Rhode Island. He is associated with his father in his various business enterprises. He devotes much time to religious and philanthropic work.

Rockefeller, William, capitalist, brother of John Davison, was born at Richford, N. Y., 1841. He was educated at Owego, N. Y., and Cleveland, Ohio; was bookkeeper and later partner in produce commission trade; soon after joined his brother, John Davison, in oil business, and from 1865 to 1911 was at the head of the business in New York. He was president of the Standard oil company of New York until 1911; was vice-president and director of Standard oil company of New Jersey; trustee of Anaconda copper mining company, Consolidated gas company, United States trust company, and numerous other railroad, industrial, and financial concerns.

Rodin (*rŏ'-dăɴ'*), **Auguste,** French sculptor, was born at Paris, 1840. He studied under Barye, and began to exhibit in the salon in 1875. He has produced a number of great scriptural and symbolical groups, including "Eve," "Les Bourgeois de Calais," "Le Porte de l'Enfer," "La Guerre," "The Kiss," "The Age of Bronze," etc., but is best known by his portrait busts and statues, notably the bust and the monument of Victor Hugo. Rodin is so keen a realist in execution that he was charged with having cast his "Age of Bronze" upon a living model. He is generally acknowledged to be the greatest of living sculptors.

Rodney, George Brydges, Lord, English admiral, was born in 1719. In 1759, after twenty-eight years of active service, he was made rear admiral. In 1761 he took Martinique, Grenada, and Santa Lucia. In 1762 he became vice admiral, and in 1764 was made a baronet. During the Seven Years' war he accomplished the relief of Gibraltar and Minorca; defeated, near Martinique, the French fleet, under Count de Guichen; took Eustatia from the Dutch, with 250 ships and other booty, estimated at three millions sterling; captured Demerara and Essequibo, and encountered the French fleet, under De Grasse, off Dominica, in April, 1782. De Grasse was totally defeated. Rodney's victory saved Jamaica, ruined the naval power of France and Spain, and gave the finishing blow to the war. He was elevated to the peerage as Baron Rodney, and received a pension of 2,000 pounds per annum for himself and his successors. Died, 1792.

Roebling (*rōb'-lĭng*), **John Augustus,** American civil engineer, was born in Mühlhausen, Prussia, 1806. He emigrated to the United States in 1831, and in course of years became the designer and constructor of many great public works, among them the canal aqueduct across the Allegheny river, and the Monongahela suspension bridge, both at Pittsburgh; the suspension bridge at Niagara; the Ohio bridge at Cincinnati, etc. He died in 1869, having just before projected the bridge over the East river, to connect the cities of New York and Brooklyn, completed by his son and opened to travel in 1883.

Roebling, Washington Augustus, American engineer, was born at Saxonburg, Pa., 1837. He was graduated as civil engineer at Rensselaer polytechnic institute, 1857; joined his father in construction of Pittsburgh suspension bridge across Allegheny river. Served in union army, 1861–65, from private to brevet colonel; resigned in 1865 to assist his father in building the Cincinnati and Covington suspension bridge. The Brooklyn bridge was undertaken by the father, but his death in 1869 left the entire construction to his son, who directed it to completion. He was president and director of the John A. Roebling's Sons company, manufacturers of iron and steel wire and wire rope, Trenton, N. J. Author: *Military Suspension Bridge*, etc. Lost his life on board the ill-fated Titanic, 1912.

Roentgen (*rûnt'-gĕn*), **Wilhelm Konrad,** eminent German scientist, distinguished investigator of physical problems, and discoverer of the "X" or Roentgen rays, was born in the province of Düsseldorf, Prussia, 1845. He was educated at Zürich and Utrecht; became professor of physics and director of the laboratory at the university of Würzburg, Bavaria. He also taught at Strassburg, and at Giessen. In December, 1895, he communicated to the Würzburg physico-medical society his remarkable discovery of the new and powerful "X-rays," since known by his name, and in the following month he described his discovery at the celebration of the semicentennial of the founding of the Berlin physical society. Later he demonstrated the rays in the presence of the emperor of Germany, who decorated him, and Prince Ludwig of Bavaria created him a baron. In 1901 he received the Nobel prize for physics.

Rogers, Henry Wade, American educator, dean of the law department of Yale university since 1903, was born at Holland Patent, N. Y., 1853. He was graduated at the university of Michigan, 1874; LL. D., Wesleyan university, Conn. He was admitted to the bar, 1877; was professor of law, university of Michigan, 1883–90; dean of same, 1885–1900; president of Northwestern university, 1890–1900, and professor of law at Yale since 1901. He was chairman of the World's congress on jurisprudence and law reform, World's Columbian exposition, Chicago, 1893; general chairman of Saratoga conference on the foreign policy of the United States, 1898; president of the association of American law schools, 1906, and chairman of the American bar association's committee on legal education and admission to the bar since 1906. Author: *Illinois Citations; Expert Testimony.* Joint author: *Two Centuries of American Law;* and numerous articles for law journals and reviews.

Rogers, Randolph, American sculptor, was born at Waterloo, N. Y., 1825. After following mercantile pursuits for a number of years in early life, he went to Rome to study the sculptor's art. Among the works for which he is distinguished are the designs for the Washington monument at Richmond, Va., a statue of John Adams in Mt. Auburn cemetery, a memorial monument for the state of Rhode Island at Providence, and a still larger one for the state of Michigan at Detroit, and the bronze statue of Abraham Lincoln at Philadelphia. He also designed and partially executed the bronze doors in the capitol at Washington. Died at Rome, 1892.

Rohlfs (*rōlfs*), **Anna Katharine Green.** See **Green, Anna Katharine.**

Roland (*rō'-lăɴ'*), **Marie Jeanne,** wife of Jean Marie Roland de la Platière, daughter of Pierre Gratien Philipon, was born at Paris, France, 1754. She delighted in scientific and philosophic studies, and from 1791 to 1793 her salon in Paris was the headquarters of the republicans and Girondists, preceding and during the French revolution. Her husband was obliged to flee from Paris, May 31, 1793, and the same night she was arrested and imprisoned in the Abbaye. A more dauntless and intrepid spirit never entered its walls. Summoned before the revolutionary tribunal in the beginning of November, she was condemned, and on the 9th was guillotined amid the shoutings of an insensate mob. It is said that while standing on the scaffold she asked for a pen and paper that she might "write down the strange thoughts that were passing through her head." Only a genuine child of the French republic could have been so ostentatiously speculative at such a moment. Still more celebrated is her apostrophe to the statue of Liberty, at the foot of which the scaffold was erected: "O Liberty, what crimes are committed in thy name!"

Rollin (*rō'-lăɴ'*), **Charles.** French historian, was born at Paris, 1661. He studied at the college of Duplessis; acquired there a knowledge of languages and philosophy, and studied theology for three years at the Sorbonne. Between 1683 and 1693 he filled the chairs of languages and philosophy, and studied theology for three years at the Sorbonne. Between 1683 and 1693 he filled the chairs of rhetoric and of eloquence at the college of Duplessis and the royal college. In 1694 he was appointed rector of the university of Paris and, in 1696, coadjutor of the college of Beauvais; but was at length driven from it by the intrigues of the Jesuits. Thenceforth he gave his time wholly to literature. His principal works are: *Ancient History, Roman History,* and *Treatise on the Mode of Studying.* Died, 1741.

Romanes (*rō-mä'-nĕs*), **George John,** naturalist, was born at Kingston, Canada, 1848, and was graduated in 1870 from Caius college, Cambridge. While still at the university he formed a friendship with Darwin, and he powerfully reinforced his master's arguments in his Croonian, Fullerian, and other lectures. He wrote: *Animal Intelligence; Scientific Evidences of Organic Evolution; Mental Evolution in Animals; Jelly-fish, Star-fish, and Sea-urchins; Mental Evolution in Man,* etc. He was elected an F. R. S. in 1879, later removed in 1890 to Oxford, and died there in 1894. Originally a defiant agnostic or sceptic, he was latterly a devout, if not wholly orthodox, Christian. Posthumous works by him were *Thoughts on Religion; Mind and Monism; Darwin and after Darwin;* and selections from his *Poems.*

Romilly (*rŏm'-ĭ-lĭ*), **Sir Samuel,** English lawyer and law reformer, was born in London in 1757. At twenty-one he entered Gray's Inn, and found his chief employment in chancery practice. In 1790 he published an able pamphlet on the French revolution; appointed solicitor-general of England in 1806. He devoted himself to mitigating the severity of the criminal law. His bills were session after session rejected, but he nevertheless persevered; shared in the anti-slavery agitation, and opposed the suspension of the habeas corpus act and the spy system. His wife died October 29, 1818, and the shock so preyed upon his mind that, on November 2d, he cut his throat.

Romney (*rŭm'-nĭ*), **George,** English painter, was born at Dalton, in Lancashire, 1734. After receiving some lessons from a country artist, he studied art in London in 1762; visited France in 1764, and Italy, 1773–75; and on his return to England became the rival of Reynolds as a portrait painter. He also gained distinction as a painter of historical pictures, and assisted in preparing the Boydell Shakespeare gallery. Died at Kendal, 1802.

Ronsard (*rôɴ'-sär'*), **Pierre de.** French poet, was born at the Château de la Poissonnière in Vendôme, 1524, served the dauphin and the duc' d'Orleans, and accompanied James V. with his bride, Marie de Lorraine, to Scotland, where he stayed three years. Becoming deaf, he abandoned arms for letters, and at the Collège Coqueret studied with Du Bellay and other members of the famous Pléiade. His seven years of study bore its first fruit in his *Odes,* 1550, which excited violent opposition from the older national school. In 1552 appeared his *Amours* and the fifth book of his *Odes,* his *Hymns* in 1555, the conclusion of the *Amours* in 1556, in 1560, *Complete Works,* and in 1572, twenty days after the massacre of St. Bartholomew, *La Franciade,* a fragment of an epic. Charles IX., like his predecessors, heaped favors upon the lucky poet, who spent his later years in lettered ease at the abbey of Croix-Val in Vendôme. He died at his priory of St. Cosme at Tours, in 1585.

Roosa, Daniel Bennett St. John. American physician, was born at Bethel, N. Y., 1838. He was graduated, M. D., university medical college, New York, 1860, after an academic education in Boston and New York; M. A., Yale; LL. D., university of Vermont. He was assistant surgeon of 5th New York volunteers, among the three months' troops called out by President Lincoln; professor in the university of the city of New York, and university of Vermont; was president of the New York post-graduate medical school and professor of diseases of the eye and ear. Author: *The Old Hospital and Other*

Papers; A Pocket Medical Lexicon; Treatise on the Ear; Treatise on the Eye; A Doctor's Suggestions; On the Necessity of Wearing Glasses; Defective Eye-Sight; The Ear, Nose and Pharynx, with Dr. Beaman Douglass, etc. Died, 1908.

Roosevelt (*rōz′-vĕlt*), **Theodore,** American soldier, writer, statesman, twenty-sixth president of the United States, was born in New York city, 1858, son of Theodore and Martha (Bullock) Roosevelt. Though physically delicate in youth, he entered Harvard university at eighteen, and was graduated in 1880; LL. D., Harvard, Yale, etc. The year following he began the study of law, but in the same year was elected to the New York legislature. He was twice reëlected, and became the candidate of the minority party for speaker in the second term. In 1884 he was chosen a delegate to the republican national convention, and later in the year went to North Dakota, where he spent two years on a ranch, raising cattle. In 1886 he was the unsuccessful candidate for mayor of New York. President Harrison appointed him a member of the United States civil service commission in 1889, in which capacity he served until 1895, when he resigned to accept the presidency of the police commission of New York city, under Mayor Strong. President McKinley appointed him assistant secretary of the navy in April, 1897, and upon the outbreak of the Spanish-American war, in 1898, he resigned the post to assist in organizing the 1st United States volunteer cavalry, afterward known as Roosevelt's rough riders, of which he became lieutenant-colonel, and later colonel, for gallantry in the battles of Las Guasimas and San Juan, Cuba. In September, 1898, he was mustered out, with his regiment, at Montauk, L. I. Shortly following he was nominated for governor of New York, and elected November, 1898. Two years later he was unanimously nominated for vice-president of the United States by the republican national convention, at Philadelphia, and elected. He succeeded to the presidency September 14, 1901, upon the death of President McKinley, and at the close of the term was unanimously nominated by his party to succeed himself, and elected for the term 1905–09. His efforts in bringing about the treaty of peace between Japan and Russia in 1905 were important and effective; and, in 1906, he was awarded the Nobel peace prize of $40,000, with which he endowed the foundation for the promotion of industrial peace. He is an enthusiastic hunter of big game, and after his retirement from the presidency on March 4, 1909, he led an expedition to East Africa for the Smithsonian and national museums at Washington. In 1910 he returned through Europe, enjoying a magnificent triumph. After a strenuous campaign in favor of republican candidates in 1910, he retired to private life and editorial work on *The Outlook.* In 1912 he was presidential candidate of the progressive party which he had organized. During the campaign he was shot at Milwaukee, but was not fatally wounded. He has long been an advocate of administrative, political, and social reforms, and has contributed widely to periodicals and general literature. Among his important publications are: *The Winning of the West; History of the Naval War of* 1812; *Hunting Trips of a Ranchman; Life of Thomas Hart Benton; Life of Gouverneur Morris; Ranch Life and Hunting Trail; History of New York; American Ideals and Other Essays; The Wilderness Hunter; The Rough Riders; Life of Oliver Cromwell; The Strenuous Life.* Part author: *Hero Tales from American History; The Deer Family; Outdoor Pastimes of an American Hunter; African Game Trails.*

Root (*rōōt*), **Elihu,** American statesman and lawyer, was born in Clinton, N. Y., 1845. He was graduated at Hamilton college in 1864; taught at Rome academy, 1865; was graduated at the law school of New York university, 1867; LL. D., Hamilton, 1894, Yale, 1900, Columbia, 1904, New York, 1904, Williams, 1905, Princeton, 1906, university of Buenos Ayres, 1906, Harvard, 1907. He was appointed by President Arthur United States attorney for the southern district of New York, 1883–85; was a delegate-at-large to the state constitutional convention, 1894, and chairman of the judiciary committee. On August 1, 1899, he was appointed secretary of war by President McKinley, and on March 5, 1901, was reappointed. After the Spanish-American war, he represented the United States government in all official communications with Cuba, Porto Rico, and the Philippine islands. In August, 1903, he resigned the office of secretary of war, his resignation to take effect in January, 1904; during 1903 he was a member of the Alaskan boundary tribunal. In 1905 President Roosevelt appointed him secretary of state, and while discharging the duties of that office he did much to unify the Pan-American countries. In 1907 he visited Mexico in the interest of a closer relationship between that country and the United States. In 1908 he was elected United States senator from New York for the term 1909–15. In the practice of his profession, Root was probably the ablest lawyer before the American bar.

Root, George Frederick, American musical composer, was born at Sheffield, Mass., 1820. After studying music a year in Paris, he returned to write numerous popular songs, among which are: "Music in the Air"; "Battle Cry of Freedom"; "Just Before the Battle, Mother"; "Tramp, Tramp, Tramp, the Boys are Marching." He also produced a *Te Deum,* and other more pretentious pieces, and received the degree of doctor of music from Chicago university in 1872. He died in 1895.

Rosa (*rō′-zä*), **Salvator,** Italian painter, was born at Arenella near Naples, 1615. He spent most of his youth wandering among the wild scenery of southern Italy and copying from nature, but went to Rome in 1635. He leaped into fame with a picture, "Tityus Tortured by the Vulture." At Rome his social talents and his princely generosity rendered him a great favorite. But he made powerful enemies by his satires, and withdrew to Florence for nine years. He then returned to Rome, and died in 1673. Salvator owes his reputation mainly to his landscapes of wild and savage scenes, though his masterpiece is considered to be the "Conspiracy of Catiline."

Rosas (*rō′-säs*), **Juan Manuel de,** Argentine dictator, was born in Buenos Ayres, in 1793. He became commander-in-chief in 1826, and was governor of the province in 1829–32. From 1835 to 1852 he governed as dictator. Refugees found an asylum in Uruguay, where Rosas supported his partisan, General Oribe. After Oribe's fall Rosas, in 1839, invaded Uruguay, but was defeated; in 1843 he sent Oribe back to attack Montevideo. The siege which followed led to the intervention of England and France and the blockade of Buenos Ayres, 1845–47. In 1849 Rosas secured for Buenos Ayres the entire navigation of the Platte, the Uruguay, and the Parana. This roused the other river provinces, and in 1851 Urquiza, governor of Entre Rios, supported by Brazil, defeated Oribe in Uruguay, then marched against Rosas, and in February, 1852, routed him at Monte Caseros, near Buenos Ayres. Rosas died in England, 1877.

Roscoe, Sir Henry Enfield, noted English chemist, was born at London, 1833. He was graduated at University college, London, and received his Ph. D. from Heidelberg university, 1853. He was professor of chemistry at Owens college, Manchester, 1857–87; member of parliament for Manchester, 1885–95; royal medallist, 1874, for researches on the chemical action of light, and on the metal vanadium; president of the society of chemical industry, 1881; president of the chemical society, 1882; vice-chancellor of the university of London, 1896–1902; officer of the legion of honor; correspondent of the academy of sciences, France, etc. Author: *Lessons in Elementary Chemistry; Treatise on Chemistry; Primer of Chemistry; New View of the Genesis of the Atomic Theory of Chemistry*, etc.

Rose, John Holland, English educator and historian, was born at Bedford, 1855. He was educated at Owens college, Manchester, and at Christ's college, Cambridge; Litt. D., Cambridge. For many years he was lecturer on modern history to the Cambridge university local lectures syndicate, and to the London university's board for the extension of university teaching. Author: *A Century of Continental History; The Revolutionary and Napoleonic Era; The Rise of Democracy; The Life of Napoleon I.;* an edition of Carlyle's *French Revolution* with critical and explanatory notes; chapters in the *Cambridge Modern History; Napoleonic Studies; Despatches Relating to the Third Coalition; The Development of the European Nations*, etc.; and numerous articles in the *English Historical Review, Monthly Review*, etc.

Rosebery, Archibald Philip Primrose, fifth Earl of, was born in 1847. He was graduated from Oxford; was rector of Aberdeen university, 1878–81, of Edinburgh university, 1882-83; under-secretary for home affairs, 1881–83; lord privy seal, 1885; chief commissioner of works, 1885; secretary for foreign affairs, 1886 and 1892–94; chairman of London county council, 1889-90 and 1892; prime minister and lord president of council, 1894-95, and lord rector of Glasgow university, 1899. He retired from the leadership of the liberal party, 1896, and since then has been prominent on several important occasions, notably during the Fashoda crisis and the Transvaal negotiations, in both of which he supported Lord Salisbury; and has delivered many notable speeches on literary and social subjects. Author: *Appreciations and Addresses; Sir Robert Peel; Napoleon; The Last Phase; Oliver Cromwell*, etc.

Rosecrans, William Starke, American general, was born at Kingston, Ohio, 1819. He was trained as an engineer, and had settled down to coal-mining when the civil war broke out; joined the army in 1861; highly distinguished himself during the campaigns of 1862-63, winning battles at Iuka, Corinth, and Stone river; but being defeated at Chickamauga, he lost his command. He was reinstated in 1864, and drove Price out of Missouri. He was afterward minister to Mexico, a member of congress, and, 1885–93, registrar of the United States treasury. He died near Los Angeles, Cal., 1898.

Ross, James Clark, English Arctic and Antarctic explorer, was born in 1800. He made five successive voyages to the Arctic regions, made himself famous by his sledge journeys, and determined the position of the north magnetic pole, 1831. From 1839 to 1843 he commanded the Antarctic expedition of the *Erebus* and the *Terror*, reached latitude 78° 10′ south, and discovered Victoria Land and two volcanoes, which he named after his ships. He was knighted in 1844, commanded an expedition in search of Sir John Franklin in 1848, and was made rear-admiral in 1856. Died, 1862.

Ross, George William, Canadian educator, was born near Nairn, Middlesex county, Ontario, 1841. He was educated at the normal school, Toronto, and at the law department of the Albert university, LL. B., 1883; LL. D., St. Andrews, Scotland, Toronto, Victoria, McMaster, and Queen's universities. He was admitted to the bar in 1887; was member of parliament for West Middlesex, 1872–74–78–82; minister of education, 1883–99; premier and treasurer of the province of Ontario, 1899–1905, and a member of the senate of Canada since 1907. He has edited the *Strathroy Age*, the *Huron Expositor*, and the *Ontario Teacher*. F. R. S., Canada. Author: *The Life and Times of the Hon. Alex. Mackenzie; The Universities of Canada, Their History and Origin*, etc.

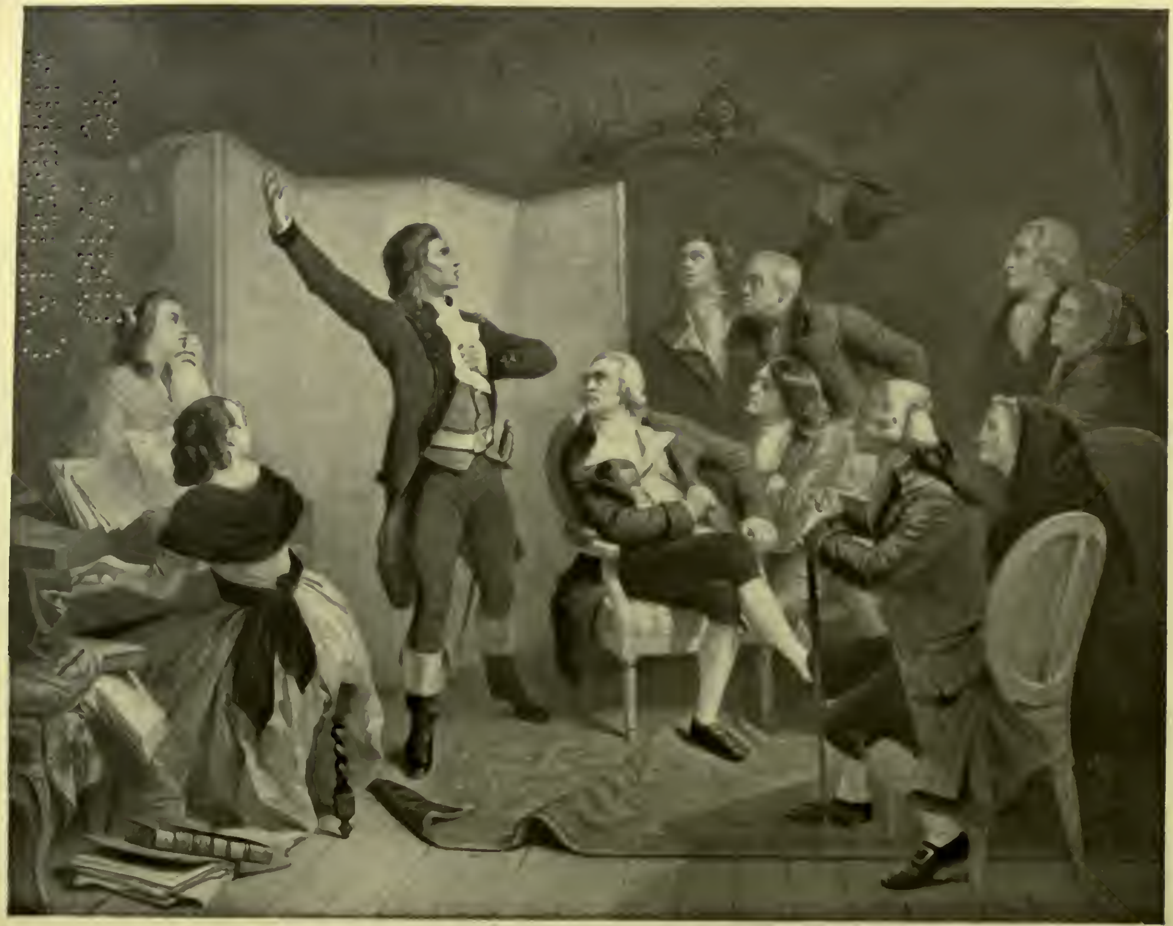
Rossetti (*rō-sĕt′-ē*), **Dante Gabriel,** British painter and poet, was born in London in 1828. His name was first brought prominently forward by his association with Millais and Holman Hunt in the pre-Raphaelite brotherhood. His chief paintings include: "Girlhood of Mary, Virgin"; "Boat of Love"; "Dante's Dream"; "Proserpina," etc. As an author he is well known by his *Early Italian Poets, Ballads and Sonnets, The Blessed Damozel*, etc. He played a distinguished part in the resuscitation of Gothic art in England. Died, 1882.

Rossini (*rŏs-sē′-nē*), **Gioacchino Antonio,** celebrated Italian composer, was born at Pesaro, Italy, 1792. He was the son of a strolling musician, and at twelve years of age sang in the churches of Bologna, where he attracted so much attention that he was sent, when fifteen, to the lyceum at Bologna, to acquire a knowledge of his art. When little more than twenty-one, he produced his opera of *Tancredi*, which was performed for the first time in Venice. Three years later he produced *Il Barbière di Seviglia*, "The Barber of Seville"; and this was followed by *La Cenerentola; Otello; Mosè in Egitto; La Donna del Lago; Semiramide; Guillaume Tell*, his last opera, and several other works. After *Guillaume Tell*, which appeared in 1829, he published only his *Stabat Mater*. His last years were spent in Paris, where he had been formerly for some time, until 1830, director of the Italian opera. He died in 1868.

Rostand (*rōs′-tăɴ′*), **Edmond,** French poet and dramatist, member of the Académie Française since 1901, was born at Marseilles, 1868. He was educated at the Lycée de Marseilles, and at the College Stanislass. Early in his career he settled in Paris and began to write verse. His first successful drama was *Les Romanesques*, which was produced in 1894. It was followed by *La Princesse Lointaine; La Samaritaine; Cyrano de Bergerac; L'Aiglon*, etc. His poetical works include: *Les Musardises; Pour la Grèce; Un Soir à Hernani; Les Mots*, etc. He is one of the ablest of modern dramatists.

Rothschild (*rŏths′-chīld′*), the name of a celebrated Jewish family of bankers and financiers. The founder of the family, Mayer Anselm, named from his father's signboard, the "Red Shield," was born at Frankfort-on-the-Main, 1743. He was educated for a Jewish rabbi, but founded a business as a money-lender and became the financial adviser of the landgrave of Hesse. The house got a heavy commission for transmitting money from the English government to Wellington in Spain, paid the British subsidies to continental princes, and negotiated loans for Denmark between 1804 and 1812. At his death, in 1812, the founder left five sons, all of whom were made barons of the Austrian empire in 1822. Mayer Anselm, 1773–1855, eldest son, succeeded as head of the firm at Frankfort. Salomon, 1774–1855, established a branch at Vienna; Nathan, 1777–1836, one in 1803 at London; Karl, 1788–1855, one at Naples, which was discontinued about 1861; and Jacob, or

UNIV. OF
CALIFORNIA



ROUGET DE LISLE SINGING THE "MARSEILLAISE"

From the painting by F. Pils

James, 1792–1868, one at Paris. They negotiated many of the great government loans of Europe in the nineteenth century, and Nathan raised the house to be first among the banking-houses of the world. He staked his fortunes on the success of Great Britain in her duel with Napoleon, and, receiving the first news of Waterloo, bought and sold stock which brought him a million pounds profit. His son Lionel, 1808–79, did much for the civil and political emancipation of the Jews in Great Britain. Lionel's son, Nathan, born in 1840, succeeded to the baronetcy conferred in 1847 on his uncle Anthony, and was made Baron Rothschild in 1885. His niece Hannah, 1851–90, in 1878 married the earl of Rosebery.

Rouget de Lisle (*rōō'-zhĕ' dē lēl'*), **Claude Joseph,** French soldier and poet, was born at Lons-le-Saunier, France, 1760, and wrote the *Marseillaise* when stationed in 1792 as captain of engineers at Strassburg. He was a royalist, and refused to take the oath of the constitution abolishing the crown; consequently he was stripped of his rank and imprisoned. He was released after the death of Robespierre, and rejoined the army. Wounded at Quiberon, 1795, he quitted the army, and lived poorly in Paris until Louis Philippe in 1830 awarded him a small pension. In 1796 he published a volume of *Essais en Vers et en Prose.* The *Marseillaise,* by its author called *Chant de l'Armee du Rhin,* was made known in Paris by troops from Marseilles. He died at Choisy-le-Roi, near Paris, 1836.

Rousseau (*rōō'-sō'*), **Jean Jacques,** French philosopher and prose writer, was born in 1712, son of a watchmaker at Geneva. He was apprenticed to an engraver, but made his escape into Savoy in 1728, where he was found by a priest, who intrusted him to the care of Madame de Warens at Annecy. During the ensuing years the greater part of his time was spent in her house, but he finally quarreled with her and went to Paris in 1741, whence in 1742 he accompanied the French ambassador to Venice as secretary. In 1750 he gained a prize, offered by the academy of Dijon, for an essay attacking the influence of the arts and sciences on society. Later he moved to Montmorency, to Switzerland, to England to visit Hume, with whom he quarreled, and back to France to remain until his death. The main significance of Rousseau was as a renewer of the force of the imagination and the feelings in an artificial time. He loved nature, and praised its beauties; he broke with the arid traditions of the past, and formed a new ideal of the future with an eloquence and a warmth that had great influence on the French revolution. He wrote on education and modified its narrowing tendencies, and in mere literature led the way to the romantic reaction against the cold copying of classicism. The most famous of his productions are: *Discourse sur l'Origine et les Fondements de l' Inegalite parmi les Hommes; Julie, ou la Nouvelle Héloise; Du Contrat Social, ou Principes du Droit Politique; Emile, ou de l'Education; Les Confessions;* and *Rêveries d'un Promeneur Solitaire.* His personal character is a puzzle to moralists. There is no denying the vices and meannesses which stained it; these rest on the most unimpeachable testimony — his own. They are set forth with copious and melancholy sincerity in his *Confessions.* Died, 1778.

Rowe, Leo S., American economist, educator, was born at McGregor, Iowa, 1871. He was graduated from the university of Pennsylvania, 1890, LL. B., 1895; Ph. D., university of Halle; LL. D., National university of La Plata, Argentine, 1906. He was instructor in public law, 1895–97, assistant professor of political science, 1897–1903, and head professor of political science, since 1903, in the university of Pennsylvania. In 1900–01 he was a member of the commission to revise and compile the laws of Porto Rico, and, 1901-02, was chairman of the insular code commission, reporting codes which were, with some modifications, adopted as the law under which the island is now governed. In 1906 he was United States delegate to the third international conference of American states, Rio Janeiro. Author: *Report of the United States Commission to Revise the Laws of Porto Rico,* in 2 vols., with Judge Daly and Hon. Juan Hernandez-Lopez; *Report of the Insular Code Commission,* in 8 vols., with Hon. J. M. Keedy; *The United States and Porto Rico;* and many reports, monographs, and articles in economic journals, reviews, and *Annals of the American Academy Political and Social Science.*

Royce, Josiah, American philosophical writer, professor of the history of philosophy at Harvard since 1892, was born at Grass Valley, Cal., 1855. He was graduated at the university of California, 1875; Ph. D., Johns Hopkins, 1878; LL. D., university of Aberdeen, Scotland, 1900; LL. D., Johns Hopkins, 1902. He was instructor in English literature and logic, university of California, 1878–82; instructor and assistant professor of philosophy at Harvard, 1882–92. Author: *Religious Aspect of Philosophy; The Feud of Oakfield Creek,* a novel; *The Spirit of Modern Philosophy; The Conception of Immortality; Studies of Good and Evil; Outlines of Psychology; Herbert Spencer, An Estimate and a Review; The Relation of the Principles of Logic to the Foundations of Geometry,* etc.

Rubens (*rōō'-bĕnz*), **Peter Paul.** See page 144.

Rubinstein (*rōō'-bĭn-stīn*), **Anton Gregor,** Russian composer and pianist, was born at Wechwotynetz, near Jassy, in Russian Bessarabia, 1829. He made his first appearance in public when only eight years old. At Berlin he studied composition under Dehn. He then returned to his native country, where he was appointed pianist to Grand Duchess Helena, and subsequently director of the concerts of the Russian musical society. In 1872-73 he visited America, and after 1867 he spent his time in traveling and composing. As a pianist he was the only rival, technically, that Liszt ever had, and as a composer his works are characterized by the most wonderful fertility of imagination, and many of them by a gorgeous oriental coloring. His works include six symphonies, five piano-forte concertos; the operas, *Ivan the Terrible, Feramors Nero,* and *The Demon;* the oratorios, *Paradise Lost, The Tower of Babel;* half a dozen orchestral works, fantasies, suites of dances like the *Bal Costume, The Vine,* etc.; a large amount of chamber music of all descriptions, songs, and smaller piano-forte works. Died, 1894.

Rudolf, or Rudolph I., founder of the Hapsburg imperial dynasty, was born at Schloss Limburg in the Breisgau, 1218, and, becoming a warm partisan of Frederick II., increased his possessions by inheritance and marriage, until he was the most powerful prince in Swabia. In 1273 the electors chose him German king; because never crowned by the pope, he was not entitled to be called kaiser or emperor. Ottocar of Bohemia refused to tender his allegiance, and in 1278 was defeated and slain at Marchfeld. Rudolf did much to suppress the robber knights. He died at Spires in 1291. Austria, Styria, and Carniola had been given, in 1278, to his son Albert and to his brother Rudolf. The former succeeded him as German king.

Rudolf, or Rudolph II., born at Vienna, 1552, eldest son of the emperor, Maximilian II., became king of Hungary in 1572; king of

Bohemia, with the title "king of the Romans," in 1575; and emperor on his father's death in 1576. Gloomy, taciturn, bigoted, and indolent, he left the empire to govern itself. His taste for astrology and the occult sciences made him extend his patronage to Kepler and Tycho Brahe; and their *Rudolphine Tables* were called after him. Meanwhile the Turks invaded Hungary and defeated the archduke Maximilian in 1596; Transylvania and Hungary revolted; and at last Rudolf's brother Matthias wrested from him Hungary, Bohemia, Austria, and Moravia. He died in 1612.

Runeberg (*ro͝o'-ne-bĕr'-y'*), **Johan Ludvig,** national poet of Finland, was born at Jacobstad, 1804. He was educated at the university of Abo, where he afterward lectured. He published his first volume, *Lyric Poems,* in 1830; edited a bi-weekly paper, and for forty years, until his death, was reader of Roman literature in the college of Borga. His epic idylls, *The Elk Hunters, Christmas Eve,* his epic *King Fjalar, Fänrik Stals Sagner,* etc., are the finest poems in the Swedish language, and are characterized by repose, simplicity, artistic finish, and the warmth of national life. He died in 1877.

Ruoff (*ro͝o'-ŏff*), **Henry Woldmar,** American journalist and author, was born in Germantown, Pa., 1867. He was graduated at Indiana university in 1890, and subsequently studied at Harvard, at Columbian, now George Washington, university, and in Europe; D. C. L., Columbian, 1901; George Washington, 1907. He was lecturer in philosophy and history, Pennsylvania state college, 1892-93; engaged in literary work, 1895–1904; associate editor of the *American Spectator, Ridgway's Illustrated Weekly,* and the *Nashville Tennessean,* 1904–08. He has traveled extensively in Europe, Asia, and Africa, and is a member of the national geographical society, American academy of political and social science, etc. Author and editor: *The Century Book of Facts; Leaders of Men; The Capitals of the World; Syllabus of American Politics; The Standard Dictionary of Facts; Masters of Achievement,* etc., the combined sale of which during the last decade has reached more than three quarters of a million volumes. He has also been a prolific contributor to popular educational literature.

Rupert, Prince, British general, third son of the elector palatine Frederick V., and Elizabeth, daughter of James I. of England, was born at Prague, 1619. After a year and a half at the English court, he served in 1637-38, during the thirty years' war, against the imperialists, until he was taken prisoner, and confined for nearly three years at Linz. In 1642 he returned to England, and for the next three years the "mad cavalier" was the life and soul of the royalist cause, winning many a battle by his resistless charges, to lose it as often by a too headlong pursuit. He fought at Worcester, Edgehill, Brentford, Chalgrove, Newbury, Bolton, Marston Moor, Newbury again, and Naseby, and in 1645 his surrender of Bristol so irritated Charles, who in 1644 had created him duke of Cumberland and generalissimo, that he dismissed him. A court-martial, however, cleared him, and he resumed his duties only to surrender at Oxford to Fairfax in 1646. He now took service with France, but in 1648 accepted the command of that portion of the English fleet which had espoused the king's cause, and acquitted himself with all his old daring and somewhat more caution. In 1653 he returned to France, residing chiefly there and in Germany until the restoration. Thereafter he served under the duke of York, and, in concert with the duke of Albemarle, in naval operations against the Dutch. He died in 1682.

Rush, Benjamin, American physician, was born near Philadelphia, Pa., 1745. He was graduated at Princeton in 1760, studied medicine at Edinburgh and at Paris, and became professor of chemistry in the Philadelphia medical college. He was a member of the continental congress and a signer of the declaration of independence. The next year he became physician-general of the army, but resigned in 1778, because he could not prevent frauds on soldiers in the hospital stores. He was a founder of the Philadelphia dispensary, the first in America, and of the college of physicians, and was given several medical professorships besides the one he already held at Philadelphia. During the yellow fever epidemic of 1793, he was a devoted worker and successful in his treatment. In 1799 he was made treasurer of the United States mint. Among his medical writings are: *Medical Inquiries and Observations; Essays;* and *Diseases of the Mind.* He died at Philadelphia, 1813.

Ruskin, John, distinguished English critic and writer on art, was born in London, 1819. He studied at Christ Church, Oxford, where he gained the Newdigate prize for English poetry in 1839, and took his degree in 1842. The year following appeared the first volume of his *Modern Painters,* the primary design of which was to prove the infinite superiority of modern landscape painters, especially Turner, to the old masters. In 1849 appeared *The Seven Lamps of Architecture,* and in 1851 to 1853 *The Stones of Venice,* both being efforts to introduce a new and loftier conception of the significance of domestic architecture. They were exquisitely illustrated by the author himself. About this time pre-Raphaelism began to develop itself as a distinctive phase of modern art, and Ruskin warmly espoused its cause. About 1860 he became deeply interested in the social problems of the age, and published *Unto this Last* and *Munera Pulveris.* Among his later works are: *Sesame and Lilies; The Ethics of the Dust; The Crown of Wild Olive;* and *Præterita,* a charming autobiography, completed in 1888. He was appointed Rede lecturer, at Cambridge, in 1867, and the senate conferred the degree of LL. D. upon him, May 15th. He was selected Slade professor of fine arts at Oxford, being thrice reëlected. He was obliged to resign the post in 1884 on account of failing health. For several years prior to his death he lived in retirement at Brantwood, on Lake Coniston. Died, 1900.

Russell, Annie, actress, was born in Liverpool, England, 1869, and made her first stage appearance at Montreal when seven. She afterward appeared at New York in *Pinafore,* went to South America and West Indies in varied repertory; returned to the United States and joined the Madison Square theater company; became famous in *Esmeralda* and *Elaine.* She retired for several years on account of ill health, and made her first appearance in London in 1898. She has since appeared as a star in *Miss Hobbs; A Royal Family; The Girl and the Judge; Mice and Men; Jinny the Carrier; Brother Jacques; Major Barbara; Midsummer Night's Dream,* etc. She married Oswald Yorke, an English actor, 1904.

Russell, James Earl, American educator, dean of Teachers college, Columbia university, since 1898, was born at Hamden, N. Y., 1864. He was graduated at Cornell in 1887; studied at the universities of Jena, Leipzig, and Berlin, 1893–95; Ph. D., Leipzig, 1894. He was principal of Cascadilla school, Ithaca, N. Y., 1890–93; professor of philosophy and pedagogy, university of Colorado, 1895–97; professor of education, Teachers college, since 1897; and Barnard professor of education, Columbia, since 1904.

Author: *The Extension of University Teaching in England and America* (translation of same into German by Dr. O. W. Beyer, Leipzig); *German Higher Schools; The History, Organization and Methods of Secondary Education in Germany*, etc. Editor of the American Teachers series and a frequent contributor to educational journals.

Russell, John, Earl, British statesman, third son of the sixth duke of Bedford, was born in 1792. He was educated at Westminster and Edinburgh; entered parliament as a whig in 1813; became an advocate of parliamentary reform; was instrumental in the repeal of the test and corporation acts in 1828, and the passing of the Catholic relief act in 1829. He was paymaster-general under Lord Grey, 1830–34, and drew up the government reform bill, 1832; was home secretary, 1835–39, and colonial secretary, 1839–41, under Lord Melbourne; led the opposition, 1841–46; was prime minister, 1846–52; went as British plenipotentiary to the Vienna conference, 1855; was foreign secretary under Lord Palmerston, 1859–65; again became prime minister in 1865, but resigned on the defeat of his reform bill in 1866. He published *Essay on the History of the English Government and Constitution, Life and Times of Fox*, and other works. Died, 1878.

Ruyter (*roi′-tẽr; rī′-tẽr*), **Michael Adriaanszoon de,** Dutch admiral, was born at Vlissingen in 1607, of poor parents, who sent him to sea as a cabin-boy when only eleven years old. He became a warrant officer, and in 1637 rose to be captain in the Dutch navy. After serving several years in the Indian seas he was, in 1641, made rear admiral. He had his legs shattered in an engagement off the coast of Sicily, and died of his wounds in 1676. Europe did justice to his bravery, and Louis XIV. said he could not help regretting the loss of a great man, although an enemy.

Ryan, Patrick John, American prelate, Roman Catholic archbishop, was born at Thurles, County Tipperary, Ireland, 1831. He was graduated at Carlow college, 1852; LL. D., university of New York and university of Pennsylvania. He was ordained sub-deacon in Ireland; came to the United States; became professor of English literature, Carondelet theological seminary, St. Louis; was ordained deacon there, and, in 1853, priest; served at the cathedral, where he became rector in 1856. He was chaplain of the Gratiot state military prison and hospital, St. Louis, during the civil war; and while rector of the Annunciation church, delivered lenten lectures in English at Rome, 1868, on invitation of Pope Pius IX. He was consecrated, 1872, titular bishop of Tricomia in Palestine and made coadjutor bishop of St. Louis; was promoted to archbishop, 1883, and in June, 1884, was transferred to the see of Philadelphia. Author: *What Catholics Do Not Believe; The Causes of Modern Religious Skepticism*, etc. Died, 1911.

Ryan, Thomas Fortune, American financier, was born in Nelson county, Va., 1851. He began business life, 1868, in a Baltimore dry goods house; entered Wall street, 1870, and became a member of the New York stock exchange, 1874. He was afterward interested in the consolidation and extension of street railway and lighting systems in New York, Chicago, and other cities, and in the reorganization of various railways in the South, coal properties in Ohio and West Virginia, and railways in Ohio. He purchased a controlling interest of the stock of the Equitable life assurance society of the United States in 1905. In 1908 he retired as officer or director of more than thirty corporations in which he was the controlling factor. He gave $1,000,000 for Roman Catholic church in New York city in 1912. He is a resident of Virginia, and was a delegate from that state to the national democratic convention, 1904.

Sachs (*zăks*), **Hans,** noted German poet, was born at Nürnberg, 1494. He was the son of a tailor, and by trade a shoemaker. He learned "the mystery of song" from a weaver. In 1568, on examining his stock for publication, he found that he had written over 6,000 pieces, among them 208 tragedies and comedies, and this besides having all along kept house, like an honest Nürnberg burgher, by assiduous shoemaking. Among his works are: *Lucretia; Virginia; Julian the Apostate; The Unlike Children of Eve;* and *Narrenschneiden*, a piece in which the doctor cures a bloated and lethargic patient by "cutting out half a dozen fools from his interior." He sank into oblivion during the seventeenth century, but his memory was revived by Goethe in the eighteenth. He died in 1576.

Sachs, Julius von, botanist, was born at Breslau, 1832. In 1867 he became professor of botany at Freiburg, and in 1868 at Würzburg. There he carried on important experiments, especially as to the influence of light and heat upon plants, and the organic activities of vegetable growth. He wrote extensively on botany, and is considered the founder of experimental vegetable physiology. Died at Würzburg, 1897.

Sacy (*sȧ′-sē′*), **Antoine Isaac, Baron Silvestre de,** French orientalist, was born at Paris, 1758. At twenty-three he was a master of classic, oriental, and modern European languages; was appointed in 1795 professor of Arabic in the school of oriental languages, and in 1806 of Persian in the Collège de France, besides which he held various other appointments. He founded the Asiatic society in 1822; was created a baron by Napoleon I., and entered the chamber of peers in 1832. His writings include: *Biographies of Persian Poets, Arabic Grammar*, etc. His writings gave a stimulus to oriental research throughout Europe. He died in 1838.

Sadi-Carnot. See **Carnot.**

Sadi (*sä-dē′*), Persian poet, was born at Shiraz, about 1184. He studied science and theology at Bagdad, and from there made the first of fourteen pilgrimages to Mecca. He traveled for many years in parts of Asia, Africa, and Europe. Near Jerusalem he was captured by the crusaders, but was ransomed by an Aleppo merchant, who recognized him, and gave him his daughter in marriage. He is called the "nightingale of a thousand songs," and the catalogue of his works contains twenty-two different kinds of writing in prose and poetry, in Arabic and Persian. The finest of his works is *Gulistan*, or "Rose Garden." Two others are *Bustan*, or "Fruit Garden," and *Pand-Namah*, or "Book of Counsels." Died, 1291.

Sagasta (*sä-gäs′-tä*), **Praxedes Mateo,** Spanish statesman, was born in 1827. He was obliged to leave the country for his share in the rising of 1856, and again, ten years later, to seek refuge in France. On his return he changed his views, joined General Prim, and held the portfolio of the interior for several years. After the accession of Alfonso XII., he became president of the Cortes, formed a liberal constitutionalist party, and having, in 1880, joined a new liberal combination, formed a coalition with Campos, which lasted until 1883. He was again the head of the ministry in 1885–90, 1893–95, 1897–99, and 1901–02. Died, 1903.

Sage, Russell, American capitalist, was born in Oneida county, New York, 1816. Educated in the public schools, he became a grocer's clerk, and established himself as a wholesale grocer in

Troy, 1839. He was a member of congress, 1852–56, removed to New York in 1863, purchased a seat on the stock exchange and associated himself with Jay Gould in extensive railway operations, gaining a wide reputation by his close bargaining and successful speculation. His fortune was variously estimated at from $60,000,000 to $100,000,000. Died, 1906.

Sage, Margaret Olivia Slocum, philanthropist, was born at Syracuse, N. Y., 1828, daughter of Joseph Slocum. She was graduated at Troy female seminary, 1847, and in 1869 married Russell Sage, at Watervliet, N. Y. She is president of the Emma Willard association, and member of the society of Mayflower descendants. During 1907 she gave $1,000,000 to the Emma Willard seminary, Troy, N. Y.; $1,000,000 to Rensselaer polytechnic institute; $115,000 to a public school at Sag Harbor, L. I.; $10,000,000 to be known as the Sage foundation, for social betterment; $350,000 to the Y. M. C. A., New York; $150,000 to American seaman's friend society; $150,000 to Northfield seminary; $300,000 to Sage institute of pathology, Blackwell's island; $250,000 to a home for indigent women; $100,000 to Syracuse university, and various other donations to charitable and educational institutions.

Saint Benedict. See **Benedict.**

Saint Bernard. See **Bernard.**

Saint Clair, Arthur, American general, was born in Scotland, 1734. After serving in the British army, he resigned, emigrated to America, became a citizen of Pennsylvania, and a brigadier-general in the revolutionary army, serving with distinction at the battles of Trenton and Princeton. In 1777 he became major-general, and entered congress in 1785, of which body he was elected president two years later. In 1789 he was made governor of the Northwest territory, and two years afterward suffered a defeat with heavy loss, at the hands of the Miami Indians. Died, 1818.

Saint Columba. See **Columba.**

Sainte-Beuve (*săNt'-bûv'*), **Charles Augustin,** French literary critic, was born at Boulogne-sur-Mer, 1804. He adopted medicine as a profession and for some years studied at Paris. In 1827 he became acquainted with Victor Hugo, whose commanding influence drew him into the romantic movement, and determined for him a literary career. He published a critical work on French poetry of the sixteenth century, in 1828, two volumes of poetry, 1829-1830, and a psychological novel, *Volupté*, in 1834. In 1837 he lectured at Lausanne on Port-Royal, and these lectures contain some of his finest writings. In 1840 he received an appointment in the Mazarin library, Paris; contributed to the *Revue des Deux Mondes;* was elected in 1845 to the academy; and three years later lectured for a session at Liège university. During 1849–69 he contributed to the *Constitutionnel.* These contributions form his famous *Causeries du Lundi* and *Nouveaux Lundis*, which, for variety of human interest, critical insight, and breadth of sympathy, remain unsurpassed. He was appointed professor of Latin in the Collège de France, 1854; but his unpopularity with the students, owing to his support of Napoleon III., led to his resignation. He was elected a senator in 1865, and his popularity revived by his eloquent advocacy of freedom of thought. In precision, in subtlety, and in delicacy, his works, fifty-three volumes in all, stand alone in the literature of criticism. Died, 1869.

Saint Francis of Assisi. See page 227.

Saint Gaudens (*sānt gô'-dĕnz*), **Augustus,** American sculptor, was born in Ireland in 1848, and was brought to the United States in infancy. During 1861–66 he was a student at Cooper institute, and at the academy of design, New York; went to Paris and studied at the École des Beaux Arts under Jouffroy. After a year spent at Rome, where his first work, "Hiawatha" was produced, he returned to New York in 1872. He executed a number of notable works, of which the most important are: "The Puritan"; "Farragut"; "Lincoln"; "Adoration of the Cross," in St. Thomas' church, New York; "The Puritan," "Diana," on tower of Madison Square garden, New York; "Peter Cooper," New York; "Colonel R. G. Shaw," Boston; monument to General Sherman, New York, and numerous other statues, busts, etc. He was awarded medals at the Paris, Buffalo and St. Louis expositions, and made an officer of the French legion of honor. Died, 1907.

Saint Jerome. See **Jerome.**

Saint Louis IX. See **Louis IX.**

Saint Paul. See page 206.

Saint Pierre (*săN' pyâr'*), **Jacques Henri Bernardin de,** French writer, was born in Havre, France, 1737. He became an engineer and entered the army, but was dismissed, and for many years led an adventurous life in different countries of Europe. In 1766 he went to Madagascar, and afterward to Mauritius, where he spent many years. On his return to France in 1771, he published an account of his voyage, and several other works. He is best known for his beautiful story, *Paul and Virginia*, which has been translated into many languages. Saint Pierre's two children, like the hero and heroine of the story, were named Paul and Virginia. He died at Eragny-sur-Oise, 1814.

Saint-Saëns (*săN' săNs'*), **Charles Camille,** French composer and pianist, was born at Paris, 1835. He wrote his first symphony at the age of sixteen, and studied at the Paris conservatoire under Benoit, Halévy, and Gounod; LL. D., Cambridge; Mus. D., Oxford. His works include the operas: *La Princesse Jaune, Le Timbre d'Argent, Etienne Marcel, Henry VIII., Les Barbares, Parysatis, Hélène,* and *L'Ancêtre;* the sacred drama, *Samson and Dalilah;* four widely known symphonic poems modeled on Liszt, *Le Rouêt d'Omphale, Phaëton, La Danse Macabre,* and *La Jeunesse d'Hercule;* symphonies, church music, chamber music, and considerable piano-forte and vocal music. From 1858 to 1877 he was organist of the Madeleine church in Paris. The strongest originality, sometimes becoming downright eccentricity, pervades his music, which is of the most modern school.

Saintsbury (*sānts'-bĕr-ĭ*), **George Edward Bateman,** English critic, was born at Southampton, 1845. He was educated at Merton college, Oxford. In 1868–76 he was a schoolmaster at Manchester, Guernsey, and Elgin, but soon after established himself as one of the most active critics of the day; in 1895 he became professor of English literature at Edinburgh. Among his books are: *Short History of French Literature; Dryden; Marlborough; History of Elizabethan Literature; Essays in English Literature,* 1780–1860; *Essays on French Novelists; Corrected Impressions; History of Nineteenth-Century Literature; The Flourishing of Romance and Rise of Allegory; A Short History of English Literature; History of Criticism; The Earlier Renaissance; Minor Caroline Poets; A History of English Prosody; The Later Nineteenth Century,* etc.

Saint Simon, Claude Henri, Comte de, French social philosopher, was born at Paris, 1760. At sixteen he entered the army, served in America, and distinguished himself. Captured by the British on his return home, he was taken to Jamaica, where he remained until the peace in 1783 restored him to liberty and France. After the restoration he began a socialistic propaganda which gained him many followers. Of these the most distinguished was Augustin Thierry, who assisted him in the redaction of his *Réorganisation de la Société Européenne*. In 1817-18 he published *L'Industrie ou Discussions Politiques, Morales, et Philosophiques*. The third volume is the work of Auguste Comte. The last and by far the most remarkable work of Simon is his *Nouveau Christianisme*, which contains his final and matured convictions. Died, 1825.

Saint Thomas Aquinas. See page 274.

Saionji (*sī'-ōn-jē*), **Marquis,** Japanese statesman, was born at Kioto in 1849. At the age of eighteen he gathered volunteers and fought for the emperor in the revolution of 1868. He then went to Paris, was a student in the Latin quarter, and returned to Japan in his thirty-third year. He at once started a daily paper at Tokio, and proclaimed himself a liberal of the European type. Subsequently he became minister to Austria-Hungary and then to Germany. On his return to Japan he joined the first Ito cabinet as minister of education, a post which he again occupied in the second Ito cabinet, having been minister of foreign affairs in the interval. He assisted Ito in forming the constitutional association of 1900, and became its leader in 1903. At four difficult crises the mikado called him to be prime-minister, his last term of office being from 1911 to 1912.

Saladin (*săl'-ȧ-dĭn*) or **Salah-ed-Din,** celebrated sultan of Egypt, flourished between 1137 and 1193. He was one of the great conquerors of his time; and in 1187 defeated the Christians in a great battle near Tiberias, afterward storming and capturing Jerusalem. He was, however, defeated by Richard Coeur-de-Lion in 1191, and died, broken down by disease and toil, in the spring of 1193. A story, probably fictitious, is told of Saladin, that in his last illness he ordered a winding-sheet which was to encircle his remains to be unfurled before his army, while a herald proclaimed aloud, "This is all which Saladin, the conqueror of the East, can retain of all his conquests." The valor, justice, and magnanimity which shone conspicuous in the life and actions of Saladin are the subject of panegyric, not only by eastern writers, but in the Christian chronicles of the crusades.

Salisbury (*sôlz'-bēr-ĭ*), **Robert Arthur Talbot Gascoyne-Cecil, Marquis of,** British statesman, was born at Hatfield, 1830. He was graduated from Christ Church, Oxford, 1849, and sat in parliament for Stamford, 1853–68. He was secretary for India, 1866-67, and again 1874–76. In the latter year he was special ambassador to the porte, and was practically the leader of the conference of Constantinople. In 1878 he was appointed foreign secretary, and, with Lord Beaconsfield, took a prominent part in the congress of Berlin. After the latter's death he became the principal leader of the conservatives in the house of lords, and was prime minister in 1885-1886, 1886–1892, and 1895–1902. Died, 1903.

Sallust (*săl'-ŭst*) or **Sallustius, Caius Crispus,** Roman historian, of equal talents and profligacy, was born at Amiternum, 86 B. C. He rose from a plebeian to a senator, but was expelled in 50 B. C. Cæsar restored him to his seat, and successively made him quaestor and praetor, and governor of Numidia. In the last of these offices he amassed an enormous fortune by acts of rapine. On his return to Rome he built for himself a splendid palace, on a site still known as Sallust's garden, and spent the rest of his life in luxury. In style he imitated Thucydides. His *History of the Roman Republic* is lost, with the exception of some fragments; but his masterly *Histories of the Jugurthine War*, and the *Conspiracy of Catiline* are extant, and bear ample testimony to his genius. Died, 34 B. C.

Salmon (*să'-mŭn*), **George,** British mathematician and theological writer, was born in Dublin, 1819. He was graduated at Trinity college in 1839, and became a fellow in 1841, regius professor of divinity in 1866, and provost in 1888, being also F. R. S., D. D., LL. D. and D. C. L. His contributions to mathematical learning include treatises on *Analytic Geometry; Modern Higher Geometry; Conic Sections; The Higher Plane Curves;* and *Geometry of Three Dimensions.* His theological writings comprise *College Sermons; The Reign of Law; Non-Miraculous Christianity; Gnosticism and Agnosticism; Introduction to the New Testament;* and *Infallibility of the Church.* Died, 1904.

Sampson, William Thomas, rear admiral of United States navy, was born at Palmyra, N. Y., 1840. He was graduated at Annapolis in 1861, and was aboard the *Patapsco* when that vessel was destroyed by a torpedo in Charleston harbor, 1865. He served six years as instructor at Annapolis and commanded successively the *Swatara, Iowa,* and *San Francisco,* then became chief of bureau of ordinance and gained an international reputation by his work in building up the new navy. On the outbreak of the war with Spain he was appointed acting rear admiral, 1898, and placed in command of the North Atlantic squadron operating against Spain in Cuban waters. When the Spanish fleet under Cervera took refuge in the harbor of Santiago de Cuba, Sampson established a close blockade of that port, resulting in the destruction of the Spanish fleet when it attempted to escape from the harbor, July 3, 1898. At the close of the war he was made rear admiral. Died, 1902.

Sand, George, pseudonym of Amantine Lucile Aurore Dudevant, French author, was born at Paris, 1804. She was descended on her father's side from the famous Marshal Saxe, and her maiden name was Dupin. After receiving a strict conventual education, she married M. Dudevant in 1822, but separated from him in 1831. She then settled in Paris and began a literary career that brought her both fame and fortune. She occupied herself with the education of her two children, mingled freely in politics, and spent her time sometimes in Paris, sometimes at her estate in Berri, where she had passed her childhood, or in journeys into Switzerland and Italy. Her best known works are: *Indiana; Valentine; Rose et Blanche,* written in conjunction with her friend Jules Sandeau; *Lelia; La Comtesse de Rudolstadt; Consuelo; Jacques; Mauprat,* etc. She also wrote some successful dramatic works. Died, 1876.

Sankey, Ira David, American evangelist and singer, was born at Edinburgh, Pa., 1840. He united with the Methodist Episcopal church at fifteen; became choir leader, Sunday school superintendent, and president of the Y. M. C. A. at New Castle, Pa. In 1870 he met Dwight L. Moody, and became associated with him as a solo singer in evangelistic work in the United States and abroad. Subsequently he also became a lecturer, and gave to New Castle, as a free gift, a Y. M. C. A. and public library building. He also gave a building site to the Methodist Episcopal church there. Compiler: *Gospel Hymns; Sacred Songs and Solos; Winnowed Songs; Young People's Songs of Praise,* etc., of which over 50,000,000 copies have been sold. He composed many of the most popular gospel songs of his day, including "The Ninety and Nine," and "When the Mists Have Rolled Away." Author: *The Gospel Choir; The Male Choir; Christian Endeavor Hymn-Book; Sankey's Story of the Gospel*

Hymns; My Life and Sacred Songs. He lost his sight in 1903. Died, 1908.

Santa Anna (*sän'-tä ä'-nä*), **Antonio Lopez de,** Mexican general, was born in Jalapa, 1795. He served in the Spanish army from 1810; assisted Iturbide in 1821 but overthrew him in the following year; was elected governor of the city and province of Vera Cruz in 1822; and proclaimed in the same year a Mexican republic, which was recognized by every foreign state except Spain. In 1829 he engaged and captured a division of Spanish troops which invaded Mexico. The separation of Texas from the Mexican union was vigorously but unavailingly opposed by him, but he recognized the independence of Texas, and defended Vera Cruz against the French in 1838. After having been dictator from 1841 to 1844, he was banished. In 1847, war having been declared by Mexico against the United States, he took command of the Mexican forces, and when the war came to an end, he retired from Mexico. In 1853 Mexico, torn by civil dissensions, and fallen into anarchy, again recalled him. In 1855 he was driven from the country. He was condemned to death some years later, but pardoned by Juarez on condition of his leaving Mexico. He afterward resided on Staten island, N. Y. After the death of Juarez in 1872, he returned to Mexico, where he died in 1876.

Sappho (*săf'-ō*), celebrated lyric poetess of Greece, was a native, probably, of Mitylene, in Lesbos. She flourished about 600 B. C., and was a contemporary and friend of Alcæus. The ancient writers agree in expressing the most unbounded admiration for her poetry; but, except some fragments, only two of her compositions have come down to us, the *Ode to a Young Female,* and *Hymn to Venus.* Her poems are usually printed along with those ascribed to Anacreon.

Sardou (*sär'-dōō'*), **Victorien,** French dramatist, was born in Paris, 1831. He studied medicine at the Collège Henri IV., but subsequently turned to literature. His first comedy, produced at the Odéon in 1854, was a failure. He then won a reputation by *M. Garat,* and other pieces, produced at the Déjazet theater, and was admitted to the academy in 1877. Among his best known plays are: *Les Pattes du Mouche,* the original of "A Scrap of Paper"; *La Taverne; Les gens Nerveux; Nos Intimes; Candide; La Famille Benoîton; Daniel Rochat; Divorçons; Theodora; La Tosca; Belle-Maman; Cléopâtra; Thermidor; Pamela; Robespierre; Dante; Madame Sans-Gêne,* etc. Died, 1908.

Sargent (*sär'-jent*), **Dudley Allen,** director Hemenway gymnasium, Harvard, was born at Belfast, Me., 1849. He was graduated at Bowdoin, 1875, A. M., 1887, Sc. D., 1894; M. D., Yale, 1878. He is the inventor of the modern system of gymnasium apparatus; director of the normal school of physical training, Cambridge, Mass., since 1881 and president of the American association for the promotion of physical education, 1890–95. Author: *Universal Test for Strength, Speed and Endurance; Health, Strength and Power; Physical Education;* and numerous articles and papers on physical training.

Sargent, John Singer, American artist, was born in Florence, Italy, 1856, of American parents. He was educated in Italy and Germany; studied painting at the academy of fine arts, Florence, Italy, and in Paris under Carolus Duran. He exhibited a portrait of Carolus Duran in Paris salon of 1877; traveled in Spain, 1879, and on his return opened studio in Paris; removed to London in 1884, and has since resided there. R. A., 1897; officer of legion of honor. He has painted many portraits, English and American, one of recent note being that of ex-President Roosevelt, painted in 1903; also various other pictures, of which his Japanese dancing girl was awarded a grand medal at the Paris exposition, 1889.

Sarto (*sär'-tō*), **Andrea del,** Italian painter, was born in Florence, Italy, 1487. His family name was Vannucchi, but he was nicknamed Del Sarto — the "tailor's son"— from his father's business. He painted two series of frescoes in Florence, the best of the first series being "Nativity of the Virgin" and "Journey of the Three Kings." He spent a year in Paris at the invitation of Francis I., and was very popular among the French. The most celebrated of his single pictures are the "Last Supper," the "Madonna with the Harpies," and "Fathers of the Church Disputing." He was a rapid worker, and excelled in accurate drawing. He died at Florence in 1531.

Saul, the first king of Israel, was the son of Kish, a wealthy chief of the tribe of Benjamin, and began to reign about 1050 B. C. The deliverance of the men of Jabesh-Gilead, above all, his victories over the Philistines, the Moabites, Ammonites, Edomites, and Amalekites were unmistakable proofs of his vigorous military capacity; but gradually there showed itself in the nature of the man a wild perversity —"an evil spirit of God," as it is called — culminating in paroxyms of insane rage, which led him to commit frightful deeds, as the massacre of the priests of Nob. Nothing availed to stay his downward career, and at last he fell in a disastrous and bloody battle with the Philistines on Mount Gilboa. He was succeeded by David.

Savage, Minot Judson, Unitarian clergyman and author, was born in Norridgewock, Me., 1841. He was graduated from Bangor theological seminary, 1864; D. D., Harvard, 1896; was Congregational home missionary in California, 1864–67; pastor at Framingham, Mass., 1867–69, and at Hannibal, Mo., 1869–73. In the latter year he became a Unitarian and served as pastor of Third Unitarian church, Chicago, 1873-74, church of the Unity, Boston, 1874–96, and church of the Messiah, New York, 1896–1906. Author: *Christianity, the Science of Manhood; The Religion of Evolution; Light on the Cloud; Bluffton, a Story of To-day; Life Questions; The Morals of Evolution; Talks About Jesus; Poems; Belief in God; Beliefs About Man; Beliefs About the Bible; The Modern Sphinx; Man, Woman, and Child; The Religious Life; Social Problems; These Degenerate Days; My Creed; Religious Reconstruction; Signs of the Times; Helps for Daily Living; Life; Four Great Questions Concerning God; The Irrepressible Conflict Between Two World-Theories; The Evolution of Christianity; Is This a Good World? Jesus and Modern Life; A Man; Religion for To-day; Our Unitarian Gospel; Hymns; The Minister's Hand-book; Psychics, Facts, and Theories; Life Beyond Death; Life's Dark Problems,* etc.

Savigny (*sȧ'-vēn'-yē'*), **Friederick Karl von,** one of the most distinguished of modern European jurists, the founder of the modern historical school of jurisprudence, was born at Frankfort-on-the-Main, 1779. He was professor of law at Landshut, 1808, and at Berlin, 1810–42. He then entered the Prussian ministry, taking charge of the revision of the law. His great works are *Das Recht des Besitzes, Beruf unserer Zeit für Gesetzgebung und Rechtswissenschaft, System des heutigen Römischen Rechts.* Savigny retired to private life in 1848, and died in 1861.

Savonarola (*săv'-ō-nȧ-rō'-lȧ*), **Girolamo,** Italian monk and reformer, was born at Ferrara, 1452. He became a Dominican monk in 1475, and in 1482 removed to Florence, where he became prior of St. Mark's in 1491. He headed the democratic party in Florence toward the close of the fifteenth century, and was remarkable both for his eloquence as a preacher and for his zeal as a reformer. He held that the mortal enemy of Christ's gospel in all ages of the world has been mammon, that simony is the sin against the Holy Ghost, that the interests of religion are naturally allied with those of liberty, and that the arts are the handmaids of both. He inveighed accordingly against the corruptions of the church, and drew down upon himself a vengeance of excommunication in 1497; was arrested at Florence in 1498 and put to death in the same year. His death preceded by but a few years the death of the Italian republic. He was the author of a number of works in Latin and Italian, most of which have been translated into other European languages.

Saxe, Maurice, French marshal, natural son of Augustus II., elector of Saxony and king of Poland, was born at Goslar, 1696. At twelve he ran off to join the army of Prince Eugene in Flanders, and next the Russo-Polish army in 1711. He fought against the Turks in Hungary under Prince Eugene, and studied the art of war in France. In 1726, elected duke of Courland, he maintained himself against Russians and Poles, but was compelled to retire in 1727. He took a brilliant part in the siege of Philippsburg, 1734, and in the war of the Austrian succession he invaded Bohemia and took Prague by storm. In 1744, now marshal of France, he commanded the French army in Flanders, showed splendid tactical skill, and took several fortresses. In 1745 he defeated the duke of Cumberland at Fontenoy. In 1746 he gained the victory of Raucoux, and was made marshal-general. For the third time, at Laffeld, 1747, he defeated Cumberland and captured Bergen-op-zoom. He then retired to his estate of Chambord, and died in 1750. His work on the art of war, *Mes Rêveries*, was published in 1751.

Say, Jean Baptiste, eminent French economist, was born at Lyons, 1767. He took up journalism as a profession, and in 1794 became editor of the *Décade philosophique littéraire et politique.* In 1799 he entered the tribunate but was retired later by Napoleon. In 1819 he became professor of industrial economy at the Conservatoire des Arts et Métiers, and in 1830 professor of political economy at the Collège de France. His chief work was his *Traite d'economie politique.* He was a disciple of Adam Smith and a popularizer of his theories. Say died in 1832.

Sayce (*sās*), **Archibald Henry,** English philologist, was born at Shirehampton, near Bristol, 1846. He was graduated from Queen's college, Oxford, 1869, and became a clerical fellow and tutor. He was deputy-professor of comparative philology, 1876–90, and from 1891 professor of Assyriology. He was a member of the Old Testament Revision company, and is D. D. and LL. D. Among his works are *Comparative Philology; The Science of Language; The Ancient Empires of the East;* Hibbert lectures on the Babylonian religion; *The Hittites; Races of the Old Testament; Egypt of the Hebrews; The Higher Criticism and the Verdict of the Monuments; Herodotus; Patriarchal Palestine; Assyrian Grammar; Israel and the Surrounding Nations; Babylonians and Assyrians; Genesis in Temple Bible*; *Egyptian and Babylonian Religion; The Archæology of Cuneiform Inscriptions*, etc.

Scaliger (*skăl'-ĭ-jẽr*), **Joseph Justus,** French scholar, was born in Guienne, 1540, and educated at Bordeaux. In large part, however, he educated himself, mastering Latin, Greek, Syrian, Hebrew, Persian and most of the modern European languages, and at his death in 1609 was recognized as the greatest scholar of his time. From 1793 until his death he was professor of literature at Leyden. In his treatise *De Emendatione Temporum* he laid down for the first time a complete system of chronology formed upon fixed principles. He also criticised and annotated editions of the Roman poets.

Schaeffer, Nathan C., American educator, state superintendent of public instruction, Pennsylvania, since 1893, was born in Berks county, Pa., 1849. He was graduated at Franklin and Marshall college, Lancaster, Pa.; studied divinity at the theological seminary of the Reformed church, and finished his education at the universities of Berlin, Tübingen, and Leipzig; Ph. D., D. D., LL. D. He was professor at Franklin and Marshall college, 1875–77, and principal of Keystone state normal school, 1877–93; president of national educational association, 1905–07. Author: *Thinking and Learning to Think; History of Education in Pennsylvania*, etc., and editor of the *Pennsylvania School Journal* since 1893.

Schaff (*shäf*), **Philip,** Presbyterian theologian, was born at Chur in Switzerland, 1819. He was privat-docent in Berlin; was called to a chair at the German Reformed seminary at Mercerburg, Pa., 1844, and in 1870 became professor in the Union seminary, New York. He was founder of the American branch of the evangelical alliance, and was president of the American old testament revision committee. Among his works are a *History of the Christian Church; The Creeds of Christendom; The Person of Christ;* and a *Bible Dictionary.* He also edited *The Religious Encyclopædia*, based on Herzog. Died, 1893.

Scheele (*shā'-lē*), **Carl William,** Swedish chemist, was born at Stralsund, in the Prussian province of Pomerania, 1742. Although by profession only an apothecary, and to a large extent self-taught, he made many important chemical discoveries, with which his name will always be associated. He discovered oxygen gas independently of Priestley in 1774, and in the same year discovered the element chlorine. He also first recognized the existence of baryta as distinct from lime, discovered prussic acid, and many other organic acids, and glycerine; indeed, he may be regarded as one of the foremost pioneers in organic chemistry. He was the author of a treatise on *Air and Fire*, and of many memoirs which he contributed to the transactions of the academy of Stockholm, of which he was an associate. Died, 1786.

Scheffer (*shĕf'-ẽr*), **Ary,** French painter, was born at Dordrecht, Holland, 1795, and studied under Guérin of Paris. He first made a reputation as a painter of genre pieces, such as "La Veuve du Soldat"; "Le Retour du Conscrit"; "La Soeur de Charité"; "La Scène d'Invasion," etc., which have been popularized in France by engravings. It was not until the romantic movement reached art, however, that he began to feel conscious of his peculiar power. The influence of Goethe and Byron became conspicuous in his choice of subjects. The public admired his new style greatly, and lavished eulogy with a liberal hand on his "Marguerite à son Rouet"; "Faust tourmenté par la Doute"; "Marguerite à l'Eglise"; "Marguerite au Jardin"; "Les Mignons"; "Le Lamoyeur"; "Francesca da Rimini," etc. Toward the year 1836 his art underwent its third and final phase —the religious. To this class belong his "Le Christ Consolateur"; "Le Christ Rémunérateur"; "Les Bergers conduits par l'Ange"; "Les Rois Mages déposant leurs Tresors"; "Le Christ au Jardin des Oliviers"; "Le Christ portant sa Croix"; and "Saint Augustin et sa Mère Sainte Monique." He also executed some remarkable portraits; among others those of Lafayette, Béranger, and Lamartine. Died, 1858.

Schelling (*shĕl′-ĭng*), **Friedrich Wilhelm Joseph,** German philosopher, was born at Würtemburg, 1775. He studied theology and philosophy at Tübingen and science and mathematics at Leipzig. He succeeded Fichte as teacher of philosophy in the university of Jena in 1798. From 1803 to 1808 he was professor at Würzburg; until 1820, secretary of the royal academy of arts at Munich; professor at Erlangen until 1827, when he returned to Munich to a position in the new university there, and finally was called to Berlin by King William IV. in 1841. He began as a follower in philosophy of Fichte and Hegel, with whom he ranks among German philosophers, but later was influenced by Spinoza and Boehme. The large number of his philosophical works include the *Inquiry into the Nature of Human Freedom; On the Possibility of Any Form of Philosophy; Philosophy of Nature;* and *The World Soul.* He died in Switzerland, 1854.

Schiff (*shĭf*), **Jacob Henry,** American banker, was born at Frankfort-on-the-Main, Germany, 1847. He was educated in the schools of Frankfort; came to the United States in 1865, and settled in New York. He is senior member of the firm Kuhn, Loeb and Co., bankers; was director of National city bank, Columbia bank, Morton trust company, Bond and Mortgage guarantee company, Title guarantee and trust company, Fifth Avenue trust company, Industrial trust company, Providence, National bank of commerce, Newport trust company; is director of Western Union telegraph company, Woodbine land and improvement company; president of Montefiore home for chronic invalids; vice-president and trustee of Baron De Hirsch fund; vice-president New York chamber of commerce; founded Jewish theological seminary, the Semitic museum, Harvard, nurses' settlement, New York; gave $50,000 to Hebrew sheltering home, New York, a like sum to aid in the training of Jewish teachers, and many other donations.

Schiller (*shĭl′-ĕr*), **Johann Christoph Friedrich von.** See page 84.

Schlegel (*shlā′-gel*), **August Wilhelm von,** German critic, poet, and scholar, was born at Hanover, 1767. He studied at Göttingen for the church, but turned to literature, and settled as a lecturer at Jena in 1798. In conjunction with Treck he completed the best German translation of Shakespeare that has yet appeared. In 1800 he published his first volume of poems; and, in company with his brother, the *Charakteristiken und Kritiken.* In 1801 he left Jena for Berlin, where he gave a series of lectures on literature, art, and the spirit of the time. In 1803 appeared his *Ion,* an antique tragedy of considerable merit, and in the next year his *Blumensträusse der italienischen, spanischen, und portugiesischen Poesie.* His most valuable and most widely popular work was his *Lectures on Dramatic Art and Literature,* originally delivered at Vienna, in the spring of 1808, and translated into most European languages. During 1811–15 he published a new collection of his poems, which contains his masterpieces, *Arion, Pygmalion, St. Lucas,* etc. In 1818 Schlegel, now ennobled, was appointed professor of history in the university of Bonn, and devoted himself to the history of the fine arts and to philological research. He was one of the first students of Sanskrit in Germany, established a Sanskrit printing office at Bonn, and an *Indische Bibliothek.* Died, 1845.

Schlegel, Karl Wilhelm Friedrich, German critic and author, brother of the preceding, was born at Hanover in 1772. He studied at Göttingen and Leipzig, and in 1797 published his first work, *The Greeks and Romans,* followed in the course of a year by his *History of Greek and Roman Poetry.* Proceeding to Jena, he started there as a privat-docent, holding lectures on philosophy, editing the *Athenaeum,* to which he also began to contribute poems of a superior quality. In 1802 appeared his *Alarcos,* a tragedy. From Jena he soon went to Dresden, and thence to Paris, where he edited the *Europa,* a monthly journal, and applied himself assiduously to the languages of southern Europe, and still more assiduously to Sanskrit. In 1808 he went to Vienna, where, in 1811, appeared his *Lectures on Modern History,* and in 1815 his *History of Ancient and Modern Literature.* Died, 1829.

Schleiermacher (*shlī′-ĕr-mä′-ᴋĕr*), **Friedrich Ernst Daniel,** German philosopher and theologian, was born at Breslau, 1768. He was educated at the Moravian schools of Niesky and Barby, 1783–87; next, having broken from the dogmatic narrowness of the brethren, he studied philosophy and theology at Halle. In 1794 he became assistant clergyman at Landsberg-on-the-Warthe, where he remained for two years. The first work that won for him general celebrity was his *Discourses on Religion,* which startled Germany from its spiritual torpor. Two years later he was appointed preacher at the charity house in Berlin, and in 1799 published his famous *Discourses of Religion,* in the following year his *Monologue* and his *Letters of a Preacher residing out of Berlin.* He was professor at Halle, 1804–06, and in 1810 was called to a theological chair in the new university of Berlin. Between 1804 and 1828 he published a translation of Plato into German — a translation considered the most correct that has appeared in any European language. In 1811 appeared his *Brief Outline of the Study of Theology;* in 1817 his *Critical Essay on the Writings of Luke;* and in 1821-22 his greatest work, *An Exhibition of the Christian Faith, according to the Principles of the Evangelical Church.* His *Lectures on the Life of Christ* was not published until many years after his death. The influence which he exerted upon the philosophic theology of his time was almost unique, and his eloquence in the pulpit is said to have been quite equal to his intellectual power. Died, 1834.

Schley (*shlī*), **Winfield Scott,** American admiral, was born near Frederick, Md., 1839. He was graduated from the United States naval academy, 1860; served in West Gulf blockading squadron 1862–63; was in engagements leading to the capture of Port Hudson, La., 1863, and remained in southern waters until 1864. He suppressed an insurrection among the Chinese coolies on Chinchi islands, 1864, and in 1865 landed 100 men at San Salvador to protect the United States consulate and custom house during the revolution. In 1872 he was placed at the head of the department of modern languages at Annapolis; served in Europe, west coast of Africa and the South Atlantic states, and in 1884 took command of Greeley relief expedition and rescued Lieutenant Greeley and six survivors at Cape Sabine. He commanded the *Baltimore,* and settled trouble at Valparaiso, Chile, 1891, when several American sailors were stoned by a mob. He carried Ericsson's body to Sweden, 1891, for which he received a gold medal from the king of Sweden. He was placed in command of the "flying squadron" on duty in Cuban waters in war with Spain; was in immediate command at the destruction of Cervera's fleet off Santiago, July 3, 1898. Promoted to rear-admiral, 1899; was presented with a gold sword by the people of Pennsylvania; a silver sword by the Royal Arcanum; a gold and jeweled medal, with the thanks of the Maryland legislature; a silver service, etc., for services at battle of Santiago. He retired at the age limit in 1901. Author: *Rescue of Greeley, Forty-five Years Under the Flag,* etc. Died, 1911.

Schliemann (*shlē'-män*), **Heinrich**, German traveler and archaeologist, was born at Mechlenburg-Schwerin, 1822. While in business in St. Petersburg he mastered Greek and the modern languages of Europe. Becoming convinced that the heaps of Hissarlik in Asia Minor covered the site of ancient Troy, when he possessed an independent fortune, he began in 1870 to excavate it at his own cost, carrying on the work for twelve years. He had to pay the Turkish government $10,000 for carrying off all the treasures he unearthed, contrary to agreement. His collection is now in the ethnological museum at Berlin. In 1876 he began excavations on the site of the ancient city of Mycenæ, in Greece, and the treasures found there are now preserved at Athens. He wrote an account of his work in *Mycenæ*, *Tiryns*, *Ilios*, *Troja*, and other volumes. He died at Naples, 1890, and was buried at Athens.

Schmidt (*shmĭt*), **Nathaniel**, professor of Semitic languages and literature at Cornell since 1896, was born at Hudiksvall, Sweden, 1862, and educated in the university of Stockholm, Colgate university, and at Berlin. He was professor of Semitic literature at Colgate, 1888–96, and has gained an international reputation as a student and critic of Semitic and biblical literature. Author: *Biblical Criticism and Theological Belief; Syllabus of Oriental History; The Republic of Man; The Prophet of Nazareth;* and histories of Egypt, India and Syria, besides over 200 contributions to the *New International Encyclopedia* and the *Jewish Encyclopedia*.

Schofield (*skō'-fēld*), **John McAllister**, American general, was born in Gerry, N. Y., 1831. He was graduated at West Point, 1853, and was made a professor there in 1855; LL. D., Chicago university. When the civil war broke out, he entered the army as major of the 1st Missouri volunteers, and was on General Lyon's staff when the latter was killed at the battle of Wilson's Creek. He was in command in Missouri until February, 1864, and then of the army of the Ohio. He shared Sherman's southern campaign, and was in most of the battles which ended with the taking of Atlanta, when he returned to Tennessee, defeating Hood at Franklin, and was with General Thomas at the battle of Nashville. Entering North Carolina, he took Wilmington, and again joined Sherman, for whom he drew up the supplementary articles of surrender of Johnston's army, which were afterward approved by the government. In 1868 he became secretary of war, and major-general in the regular army. Upon the death of General Sheridan, 1888, he succeeded to the command of the United States army. Previous to his retirement, he was, by act of congress, made lieutenant-general, 1895. He published a biographical narrative entitled *Forty-six Years in the Army*. Died, 1906.

Schoolcraft, Henry Rowe, American ethnologist and explorer, was born at Watervliet, N. Y., 1793. After studying at Union college, he visited the mining region west of the Mississippi, and also acted as geologist in an exploring expedition to Lake Superior and the upper Mississippi under General Cass. In 1822 he was Indian agent for the tribes about the lakes, and married in 1823 the granddaughter of an Ojibway chief who had been educated in Europe. While Indian agent he made treaties that gave the United States 16,000,000 acres. As a member of the legislature of Michigan territory, from 1828–32, he founded its historical society. An expedition which he commanded in 1832 discovered the sources of the Mississippi. After collecting the statistics of the Six Nations, he was employed by congress in 1847 to gather all the information possible about the Indian tribes, the result being published in five volumes, costing the government $30,000 a volume. He added a sixth volume to the collection in 1857. His works include narratives of his journeys: *Notes on the Iroquois; The Red Race of America; Thirty Years with the Indian Tribes;* and *The Indian in His Wigwam.* He died at Washington, D. C., 1864.

Schopenhauer (*shō'-pĕn-hou'-ẽr*), **Arthur**, German philosopher, was born at Dantzic, Germany, 1788. He studied first at Göttingen and afterward at Berlin and Jena. He spent the winter of 1813 at Weimar, where he enjoyed the society of Goethe and of the orientalist Friedrich Maier, who first turned his attention to the ancient Indian literature and philosophy. He then proceeded to Dresden, where he published a treatise *Sight and Color*, which was followed three years later by his great work, *The World as Will and Idea.* In 1831 he removed to Frankfort-on-the-Main, devoting himself uninterruptedly to the elaboration of his system. The fruits of his studies were *On the Will in Nature; The Fundamental Problems of Ethics*, etc. Died, 1860.

Schouler (*sko͝o'-lĕr*), **James**, American lawyer and historian, was born at Arlington, Mass., 1839. He was graduated at Harvard, 1859; LL. D., National university, 1891, Johns Hopkins, 1902. He was admitted to the Massachusetts bar, 1862, and to the supreme court of the United States, 1867; was professor of law, National university Washington; professor of law, Boston university, 1882–1902, and lecturer, Johns Hopkins, Baltimore. Author: *The Law of Domestic Relations; The Law of Bailments; The Law of Personal Property; The Law of Husband and Wife; Law of Executors and Administrators; Law of Wills; Life of Thomas Jefferson; Historical Briefs; History of the United States Under the Constitution; Alexander Hamilton; Eighty Years of Union; Americans of* 1776; and various magazine articles.

Schubert (*sho͝o'-bĕrt*), **Franz Peter**, Austrian composer, was born at Vienna, 1797. At eleven he was one of the leading choristers in the court chapel, and later became leading violinist in the school band. His talent for composition soon revealed itself, and by 1813 his supreme gift of lyric melody showed itself in the song "The Erlking," the *Mass in F*, etc. His brief life, spent chiefly in the drudgery of teaching, was harassed by pecuniary embarrassment, and embittered by the slow recognition his work won, though he was cheered by the friendly encouragement of Beethoven. His output of work was remarkable for its variety and quantity, embracing some 500 songs, ten symphonies, six masses, operas, sonatas, etc.; but his fame rests on his songs, which are infused by an intensity of poetic feeling, called by Beethoven "divine fire." He died in 1828.

Schumann (*sho͝o'-män*), **Robert**, German composer, was born in Zwickau, 1810. He studied at Heidelberg, 1828–30, and than at Leipzig under Wieck. In 1834 he founded the *Neue Zeitschrift für Musik*, which he long conducted. Up to 1840 nearly all his compositions had been for the piano, but he subsequently produced 138 songs, many of which have become classic. Between 1840 and 1854 appeared his symphonies, his quintet and quartet, *Paradise and the Peri*, *The Pilgrimage of the Rose*, and many other great works. In 1850–53 he was director of music at Düsseldorf. Before this time he had shown symptoms of mental derangement, and in 1854 threw himself into the Rhine. He was rescued, but never recovered his reason. Died, 1856.

Schumann-Heink (*sho͝o'-män hĭngk'*), **Ernestine, née Roessler**, German dramatic contralto, was born at Lieben, 1861. She studied at Gratz, and made her début at Dresden, 1878, as Azucena in *Il Trovatore.* In 1883 she went to Hamburg, in 1896 sang at Bayreuth as Erda, Waltraute, and the first Norn, in *Der Ring des Nibelungen.* She married Heink in 1883, Paul Schumann in 1893, and William Rapp Jr. of Chicago, 1905. She made her American début in 1898, since when she has devoted herself largely to concert work. In 1905 she bought a large estate at Montclair, N. J.

Schurman (*shŏŏr'-man*), **Jacob Gould**, American educator, president of Cornell university since 1892, was born at Freetown, Prince Edward island, 1854. He was graduated at the university of London, 1877; studied at Paris and the university of Edinburgh, 1877-78, and two years at Heidelberg, Berlin and Göttingen, and in Italy; D. Sc., Edinburgh; LL. D., Columbia university, 1892, Yale university, 1901, university of Edinburgh, 1902. In 1880–82 he was professor of English literature, political economy and psychology, Acadia college; 1882–86 professor of metaphysics and English literature, Dalhousie college; and 1886–92 Sage professor of philosophy, and latter part of time dean of Sage school of philosophy, Cornell. He was appointed, 1899, by the president, chairman of the United States Philippine commission, and spent most of 1899 in the Philippines. Author: *Kantian Ethics and the Ethics of Evolution; The Ethical Import of Darwinism; Belief in God; Agnosticism and Religion; A Generation of Cornell; Report of the Philippine Commission* (joint author); *Philippine Affairs — A Retrospect and Outlook,* etc. He was appointed life member of the American academy in Rome, 1905. Appointed United States minister to Greece, 1912.

Schurz (*shŏŏrts*), **Carl**, American publicist, was born in Liblar, near Cologne, Germany, 1829. He was educated at the gymnasium, Cologne, and university of Bonn; LL. D., Harvard, university of Missouri, and Columbia university. He published a liberal newspaper at Bonn; took part in a revolutionary movement in 1848-49; joined the revolutionary army, but finally had to flee to Switzerland. He was newspaper correspondent in Paris, 1851; teacher in London; came to the United States, 1852; settled in Watertown, Wis.; was defeated as republican candidate for lieutenant-governor of Wisconsin, 1857; United States minister to Spain, 1861; resigned to enter the Union army; appointed brigadier-general, 1862; major-general, 1863; and commanded a division at the second battle of Bull Run and at Chancellorsville, and a corps at Gettysburg. After the war he was Washington correspondent of the *New York Tribune,* 1865-66; founded the *Detroit Post,* 1866; was editor of the *St. Louis Westliche Post,* 1867; temporary chairman of republican national convention, Chicago, 1868; and United States senator from Missouri, 1869–75. He was one of the organizers of the liberal party, 1872; presided over the convention at Cincinnati which nominated Greeley for president; supported Hayes, 1876; was secretary of the interior, 1877–81, and was editor of the *New York Evening Post,* 1881–84. Author: *Speeches; Life of Henry Clay; Abraham Lincoln, an Essay,* and an autobiography published in *McClure's Magazine,* interrupted by his death in 1906.

Schuyler, Philip John, American general, was born at Albany, N. Y., 1733. He served in the French and Indian war, was a member of the colonial congress from 1768, and of the continental congress of 1775, and one of the first four major-generals of the revolutionary army. He was relieved of the command of the army of the North by Gates, but remained with it rendering valuable service, and in 1778 was acquitted with the highest honor of the charges against him. He made treaties with the Six Nations, was state senator for thirteen years, United States senator for two terms, and surveyor-general of the state from 1782. He was one of the leaders of the federal party in New York, and helped to prepare the state code of laws. He died at Albany, 1804.

Schwab (*shwäb*), **Charles M.**, American capitalist, ex-president of the United States steel corporation, was born in Williamsburg, Pa., 1862. He was educated in the village school and at St. Francis college; as a boy drove stage from Loretto to Cresson, Pa.; entered service of Carnegie company as stake-driver in engineering corps of Edgar Thompson steel works; became superintendent of Homestead works and finally president of Carnegie steel company, limited. He was president, 1901–03, of the United States steel corporation; general manager of the Bethlehem steel corporation; director of Bethlehem steel company, Carnegie steel company, Empire trust company, H. C. Frick coke company, Minnesota iron company, National bank of North America, National tube company, National tube works company, United States realty and improvement company, Chicago pneumatic tool company, Clyde steamship company, Elgin, Joliet and Eastern railway company, etc. He built the new Catholic church, costing $150,000, at Loretto, Pa.; established an industrial school at Homestead, Pa., etc.

Schwanthaler (*shvän'-tä-lẽr*), **Ludwig von**, German sculptor, was born at Munich, 1802. He studied under his father, and after a visit to Rome was charged by King Louis of Bavaria to execute bas-reliefs and figures for the public buildings of Munich. In 1835 he became professor at the Munich academy. Among his works are the colossal statue of "Bavaria"; statues of Goethe, Jean Paul Richter, Mozart, etc. He died in 1848.

Scipio (*sĭp'-ĭ-ō*), **Æmilianus Publius**, surnamed Africanus Minor, was born about 185 B. C. He was the son of Paulus Æmilius, and was adopted by the son of Scipio Africanus. After distinguishing himself in Spain, he proceeded to Africa to take part in the third Punic war. Here he laid siege to Carthage, took it by storm, and leveled it with the ground in 146 B.C. He was afterward sent to Spain, where he captured Numantia after a stubborn resistance, to the extension of the sway of Rome. He was an upright and magnanimous man, but his character was not proof against assault, and he died by the hand of an assassin, about 129 B. C.

Scipio, Publius Cornelius, surnamed Africanus Major, celebrated Roman general, was born about 237 B. C. In 212 B. C. he was elected ædile, and in the following year proconsul, with command of the Roman forces in Spain. His appearance there restored fortune to the Roman arms. He defeated Hasdrubal at Baesula, with heavy loss. In 205 B. C. he returned to Rome, where he was elected consul, and in the following year sailed from Lilybæum, in Sicily, at the head of a large army, for the invasion of Africa. His success compelled the Carthaginian senate to recall Hannibal from Italy. The great struggle between Rome and Carthage was terminated by the battle fought at Naragra, on the Bagradas, near Zama, 202 B. C., in which the Carthaginian troops were routed with immense slaughter. Peace was concluded the following year, when Scipio returned to Rome, and enjoyed a triumph. He was made a Roman consul in 194 B. C., and accompanied his brother Lucius in the campaign against Antiochus in 190 B. C. His laurels, however, did not protect him from the intrigues of his enemies in Rome. Various charges were brought against him, and he at length retired in disgust to his country seat at Liternum, where he died, 183 or 185 B. C.

Scott, Sir George Gilbert, British architect, was born at Gawcott, near Buckingham, England, 1811. He was indentured to a London architect, 1827–30, and eventually became the leading architect of the Gothic restoration in England, and as such built or restored 26 cathedrals, 9 abbey and 2 priory churches, 1 minster, 474 churches, 26 schools, 5 almshouses, 23 parsonages, 57 monumental works, 10 college chapels and 16 colleges, 27 public buildings, 42 mansions, etc. The martyrs' memorial at Oxford, St. Nicholas' at Hamburg, St. George's at Doncaster, the new government offices, Albert memorial, and Midland terminus in London, Preston town-hall, Glasgow university, the chapels of Exeter and St. John's colleges, Oxford, and the Episcopal cathedral at Edinburgh are specimens of his work. He was elected A. R. A. in 1855, R. A. in 1861; held the professorship of architecture at the London academy; and was knighted in 1872. He died in 1878, and was buried in Westminster abbey. He published several works on architecture.

Scott, James Brown, American lawyer and educator, lecturer on international law, Johns Hopkins university, since 1909; was born at Kincardine, Ontario, 1866. He was graduated at Harvard, and studied international law, 1891–94, in Berlin, Heidelberg, and Paris; J. U. D., Heidelberg, 1894. He practiced law at Los Angeles, Cal., 1894–99; organized Los Angeles law school, now law department university of southern California, 1896, and was its dean, 1896–99; dean of the college of law, university of Illinois, 1899–1903; professor of law, Columbia law school, 1903–06; professor of law, 1905–06, and of international law, 1906–11, George Washington university. He was solicitor for the department of state, 1906–11. He was delegate and expert in international law of United States to second peace conference at The Hague, 1907. Editor-in-chief of the *American Journal of International Law.* Author: *Cases on International Law; Cases on Quasi-Contracts; Cases on Equity Jurisdiction; Cases on Equity Pleading;* many contributions to legal and educational reviews on matters of international law and legal education.

Scott, Nathan Bay, ex-United States senator, was born in Ohio, 1842. He received his education in the common schools, Quaker City, Ohio. He subsequently clerked in a store; served in the Union army, 1862–65; located at Wheeling, W. Va., after the war, and became a glass manufacturer. He was president of the city council, 1880–82; state senator, 1882–90; member of national republican committee since 1886; commissioner of internal revenue, 1898–99, and was elected to the United States senate for the period of 1899–1911.

Scott, Richard William, Canadian senator and Dominion secretary of state, 1896–1908; was born at Prescott, Canada, 1825. He was educated at Prescott; was member of parliament for Ottawa, 1857–63; speaker of the house of commons, 1871; was commissioner of crown lands, 1872-73; appointed to senate, 1873; secretary of state, 1873–78; and leader of the opposition in the senate, 1879–96. He carried through parliament the school bill giving the Roman Catholics right to establish separate schools, 1863, and the Canada temperance (local option) act, known as Scott act, 1875.

Scott, Sir Walter. See page 88.

Scott, Winfield, American general, was born near Petersburg, Va., 1786. He studied at William and Mary college, and first became a lawyer, but in 1808 entered the army as captain. In the war of 1812 he was sent to the Canadian border, where he fought at Queenston and at Lundy's Lane, being taken prisoner at Queenston, but was soon exchanged. He was wounded in both the battles, having two horses shot under him at Lundy's Lane. He was made a major-general for his services, commanded the federal forces at Charleston harbor, during the nullification troubles, and also in the disputes about the border of Maine in 1839. As commander-in-chief of the United States army, 1841–47, he took command of the invasion of Mexico. He captured Vera Cruz, and defeated Santa Anna at Cerro Gordo, taking Jalapa and Puebla; took the castle of Chapultepec by storm, and September 14, 1847, marched into the city of Mexico, where he commanded until the treaty of peace was signed in February, 1848. He was a candidate for the presidency in 1852, but failed of election. At the beginning of the civil war he was in charge of the army, but soon yielded his position to younger men. He died at West Point, 1866.

Seaman, Owen, English humorist and editor of *Punch* since 1906, was born in 1861. He was educated at Shrewsbury and at Clare college, Cambridge; was professor of literature at Durham college of science at Newcastle-on-Tyne, 1890; began writing for *Punch,* 1894. He was made a barrister of Inner Temple, 1897, joined the staff of *Punch* in the same year, and was assistant editor in 1902. Author: *Œdipus the Wreck; With Double Pipe; Horace at Cambridge; Tillers of the Sand; The Battle of the Bays; In Cap and Bells; Borrowed Plumes; A Harvest of Chaff,* etc.

Seawell, Molly Elliot, American author, was born in Gloucester county, Va., 1860, daughter of John Tyler Seawell. She was educated privately, and began writing sketches and stories in 1886. In 1890 her *Little Jarvis* took a prize of $500 offered by the *Youth's Companion* for the best story for boys, and in 1895 her *Sprightly Romance of Marsac* took a prize of $3,000 offered by the *New York Herald.* Author: *Little Jarvis; Midshipman Paulding; Paul Jones; Maid Marian; Decatur and Somers; A Strange, Sad Comedy; The Sprightly Romance of Marsac; A Virginia Cavalier; The Rock of the Lion; Gavin Hamilton; The House of Egremont; Papa Bouchard; Francezka; Children of Destiny; The Chateau of Monplaisir; The Victory; The Secret of Toni,* etc.; and the plays, *Maid Marian* and *Sprightly Romance of Marsac.*

Sedgwick, John, American general, was born at Cornwall, Conn., 1813. He was graduated at West Point; served in Florida when the Cherokees were removed; served through the Mexican war, gaining promotion at the battles of Contreras, Churubusco, and Chapultepec; and achieved a brilliant record in the civil war. By the spring of 1862 he was in command of a division, and in July of that year was made major-general of volunteers. As commander of the 6th, or Sedgwick's corps, he made a forced march of thirty-five miles to Gettysburg, and commanded there the left wing in the battle of July 2 and 3, 1863. Three days after the battles of the Wilderness, 1864, in which he had taken part, he was shot by a sharp-shooter while ordering a battery to be brought into position at Spottsylvania. A monument made from the metal of cannon captured by his corps was erected in his honor at West Point in 1868.

Seeley, Sir John Robert, English historian, was born in London, 1834, son of the publisher, Robert Benton Seeley. He was educated at Christ's college, Cambridge, and was elected a fellow of his college in 1858. In 1863 he became professor of Latin in University college, London, and in 1869 of modern history at Cambridge. His *Ecce Homo* appeared anonymously in 1865, and excited an extraordinary commotion in the religious world. It was followed by *Natural Religion*, 1882. His other works are: *Life and Times of Stein; The Expansion of England; A Short Life of Napoleon the First; Growth of British Policy; Goethe Reviewed after Sixty Years;* and *Introduction to Political Science*. He was created a K. C. M. G. in 1894, and died, 1895.

Selden, John, English scholar and lawyer, was born in Sussex, England, 1584. He studied at Oxford three years, and then removed to London for the pursuit of law. It was here that his great learning began to attract attention. He wrote his first treatise, entitled *Analecton Anglo-Britannicon*, 1606, when only twenty-two years of age. In 1610 appeared his *Janus Anglorum Facies Altera*, and in 1614 was published his *Titles of Honor*, a work still regarded as of high authority on the subject of which it treats. Three years later appeared an erudite work on the Syrian gods. Next year, however, he excited great indignation among the clergy by his *Treatise of Tythes*. In 1623 he was elected to parliament for Lancaster. In 1630 he was committed to the Tower for his activity in opposing the policy of the court, and remained a prisoner for four years. In 1640 he was chosen member for the university of Oxford; and, when the struggle between the king and the nation began to grow earnest, he was suspected of not being zealous enough. He sided against the bishops when the question came up as to their tenure of seats in parliament; and he helped to draw up the articles of impeachment against Laud. After the execution of Charles he took little share in public matters. His *Table-Talk* is well known. He died in Kent, 1654.

Seligman (*sĕl'-ĭg-man*), **Edwin Robert Anderson,** American economist, McVickar professor of political economy, Columbia university, since 1904; was born in New York, 1861. He was graduated at Columbia, 1879; LL. B., Ph. D., LL. D.; and studied three years at the universities of Berlin, Heidelberg, Geneva, and Paris. He was adjunct professor political economy, 1888–91, professor political economy and finance, 1891–1904, Columbia university; president of the American economic association, 1902–04. He is editor of the *Political Science Quarterly*. Author: *Railway Tariffs; Finance Statistics of American Commonwealth; The Shifting and Incidence of Taxation; Progressive Taxation in Theory and Practice; Essays in Taxation; Two Chapters on Mediæval Guilds of England; Economic Interpretation of History; Principles of Economics*, etc.

Selous (*se-lōōs'*, or *lōō'*), **Frederick Courtenay,** English traveler and writer, was born in London, 1851, and was educated at Rugby, in Switzerland and in Germany. He first visited South Africa in 1871, and since has published *A Hunter's Wanderings in Africa; Travel and Adventure in South-east Africa; Sunshine and Storm in Rhodesia; Sport and Travel, East and West; Recent Hunting Trips in British North America; African Nature Notes and Reminiscences*, etc. He fought in Matabeleland during the Matabele war of 1893.

Sembrich (*zĕm'-brĭ*ᴋ), **Marcella,** Austrian soprano, was born in 1858. She studied under Stengel, whom she afterward married, Epstein, and Rokitansky in Vienna, and made her début at Athens in 1877, in *I Puritani*. In 1879 she sang in Dresden, and afterward at Vienna, Dresden, London, and New York, her favorite parts being Susanna, Martha, Zerlina, Rosina, Lucia, and Leonora. Besides possessing a voice of high quality, she is also an excellent actress.

Semmes (*sĕmz*), **Raphael,** American naval officer, was born in Maryland, 1809. He served in the Mexican war, in 1861 joined the naval service of the confederate states, and was appointed to the command of the war steamer *Sumter*. He also commanded the famous *Alabama* during her destructive cruise. After the war he practiced law at Mobile, Ala. He published the *Cruise of the Alabama and the Sumter; Memoirs of Service Afloat; Campaigns of General Scott*, etc. Died, 1877.

Seneca, Lucius Annaeus, Roman stoic philosopher, was born at Corduba, Spain, about 4 B. C. He was educated in Rome, and became for a time an advocate in the courts of justice, where he attained a considerable reputation. On the accession of Emperor Claudius, A. D. 41, he was banished to the island of Corsica, where he remained for eight years, consoling himself as well as he was able with the maxims of philosophy, but all the time making abject petitions to the emperor for pardon. On the marriage of Claudius to his second wife, Agrippina, Seneca was through her influence recalled, and was appointed tutor to her son Domitius, afterward the emperor Nero. Five years later his pupil ascended the throne, and Seneca became one of the chief advisers of the young emperor, attaining great power and immense wealth. All his influence failed, however, to restrain the vicious propensities of Nero; and, after the murder of Agrippina by the latter, A. D. 59, Seneca asked permission to retire from court, and offered to relinquish all he had to the emperor. This was at the time refused, and he sent the philosopher away with many protestations of respect and gratitude. He now wholly avoided public life, and devoted himself to his philosophical studies; but the emperor, who both disliked and feared him, followed him into his retirement, and is said to have sought to compass his death by poison. After the conspiracy of Piso, A. D. 65, Seneca was mentioned by one of the conspirators as having shared in the plot, and, without further proof, was ordered to put himself to death. He died with all the courage of a stoic, and his wife, Pompeia Paulina, attempted, though vainly, to die with him. Of Seneca's writings which have come down to us, the greater part are on moral and philosophical subjects.

Sennacherib (*sĕ-năk'-ĕr-ĭb*), celebrated king of ancient Assyria, reigned from 705 to 681 B. C. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he adorned with splendid buildings. The chief biblical event in his history is the destruction of his army, in a single night, while threatening the Egyptian frontier of Palestine. During this night 185,000 men are said to have been destroyed. This event is the subject of Lord Byron's powerful poem, *The Destruction of Sennacherib*. Of the death of Sennacherib nothing is known beyond the brief statement of scripture, that "as he was worshiping in the house of Nisroch, his god, Adrammelech and Sharezer, his sons, smote him with the sword, and escaped into the land of Armenia."

Septimius Severus. See **Severus.**

Sergel (*sĕr'-gel*), **John Tobias,** eminent Swedish sculptor, was born at Stockholm, 1740. He was a pupil of L'Archevêcque, and subsequently completed his studies at Rome; rose to great eminence, and was ennobled after his return to Sweden. Among his most admired productions are: "Othryades"; a recumbent faun; "Venus Callipyges"; "Diomedes bearing away the Palladium"; "Venus and Mars"; "Cupid and Psyche"; and the great historical group, "Oxenstierna Relating to History the Exploits of Gustavus Adolphus." He died in 1814.

Servetus (*sĕr-vē'-tŭs*), **Michael,** Spanish physician and controversialist, was born in Spain, about 1511. He studied law at Saragossa and Toulouse, was graduated in medicine at Paris, and afterward studied theology at Louvain. He practiced medicine first in the village of Charlieu, near

Lyons, and afterward at Vienne, in Dauphiny; was an earnest supporter of the reformation, but published, in 1531, an essay against the doctrine of the Trinity. He maintained a vigorous correspondence with Calvin, who endeavored for sixteen years to convince him of his errors; and the failure of the endeavor irritated Calvin, whose anger was doubtless increased by the trenchant style in which Servetus replied to his arguments. In 1553 he published his book called *Christianismi Restitutio*, of which, though he avoided putting his name to it, the authorship was discovered; and, on the complaint of Calvin, he was imprisoned at Vienne. He now proposed to retire to Naples, but was so imprudent as to pass through Geneva, where Calvin obtained intelligence of his arrival, and gave information of it to the magistrates. He was thereupon seized, once more imprisoned, tried for heresy, and ultimately burned by a slow fire, 1553.

Seton (*sē'-tŭn*), **Ernest Thompson**, artist, author, lecturer, was born at South Shields, England, 1860. He lived in the backwoods of Canada, 1866–70, on western plains, 1882–87. He was educated at Toronto collegiate institute and the royal academy, London, England, and studied art in Paris, 1890–96. He became official naturalist to the government of Manitoba; published *Mammals of Manitoba*, 1886, and *Birds of Manitoba*, 1891. He was one of the chief illustrators of *The Century Dictionary*, has illustrated many books about birds and mammals, and has delivered over 2,000 lectures. Author and illustrator: *Art Anatomy of Animals; Wild Animals I Have Known; The Trail of the Sandhill Stag; The Biography of a Grizzly; Wild Animal Play for Children; Lobo, Rag and Vixen; Lives of the Hunted; Pictures of Wild Animals; Krag and Johnny Bear; Two Little Savages; Monarch, the Big Bear; Woodmyth and Fable; Animal Heroes; The Birchbark Roll; Natural History of the Ten Commandments*, etc.

Severus (*sē-vē'-rŭs*), **Lucius Septimius**, Roman emperor, was born near Leptis Magna in Africa, 146. He rose to be prætor in 178, and commander of the army in Pannonia and Illyria. After the murder of Pertinax in 193, he was proclaimed emperor, marched upon Rome, utterly defeated his two rivals in 195 and 197, and between these dates made a splendid campaign in the East, and took Byzantium. In 198 he met with the most brilliant success in his campaign against the Parthians. At Rome in 202 he displayed unparalleled magnificence, and distributed extravagant largess. A rebellion in Britain drew him thither in 208, when he marched, it is said, to the extreme north of the island. To check south Britain from the Caledonian invasions, he repaired Hadrian's wall, sometimes called after Severus, and died soon after at Eboracum (York), 211.

Sévigné (*sā'-vēn'-yā'*), **Madame de, née Marie de Rabutin-Chantal**, one of the most charming of letter writers, was born at Paris, 1626. At eighteen she married the dissolute Marquis de Sévigné, who left her a widow at twenty-five. Her beauty and rare charms attracted many suitors, to one and all of whom, however, she turned a deaf ear, devoting herself with touching fidelity to her son and daughter, and finding all her happiness in their affection and in the social intercourse of a wide circle of friends. Her fame rests on her *Letters*, written chiefly to her daughter in Provence, which reflect the brightest and purest side of Parisian life, and contain the tender outpourings of her mother's heart in language of unstudied grace. She died in 1696.

Seward, William Henry, American statesman, was born in Florida, N. Y., 1801. He was graduated at Union college in 1820, was admitted to the bar in 1822, and settled at Auburn, N. Y. He was elected to the state senate in 1830; was elected governor of New York in 1838, and in 1849 was elected to the United States senate, where he became the acknowledged leader of his party. In the debate on the admission of California he promulgated what was called his "higher-law" doctrine, in saying that there was "a higher law than the constitution, which regulated the authority of congress over the national domain — the law of God and the interests of humanity." In 1860 he was the most prominent candidate of the republican party for nomination for the presidency, but personal and local interests finally secured the election of Abraham Lincoln. Seward afterward accepted the important post of secretary of state, in Lincoln's cabinet, in which he guided the diplomacy of the federal government through the perils of the civil war. On April 14, 1865, as the war approached its termination, and while Seward was confined to his room by a fall from his carriage, President Lincoln was assassinated at a theater in Washington. At the same time another assassin penetrated Seward's room, and with a poignard inflicted wounds upon him which were at first believed to be fatal. He recovered and continued as secretary of state throughout the presidency of Lincoln's successor, Andrew Johnson, when he conducted the negotiations for the Alaskan purchase. He resigned in 1869, on the accession of U. S. Grant. He published *Speeches and Orations*, in 4 vols., *Life of John Quincy Adams*, and *Life of De Witt Clinton*. Died, 1872.

Seymour, Sir Edward Hobart, English admiral, was born in 1840. He was educated at Radley, and entered the British navy in 1852. He served through the Crimean war in the Black sea; the China war, 1857–62; operations against Chinese rebels, and in the Egyptian war of 1882, taking part in most of the naval fighting in connection with those wars. As commander he was badly wounded in action on the river Congo. He became captain in 1873, rear-admiral, 1889, and vice-admiral, 1895, and was commander-in-chief of the China station, 1898–1901. From 1894 to 1897 he served in the British admiralty as superintendent of naval reserves. He commanded the naval brigade of the allied forces near Tientsin in 1900, and was, in October, 1902, appointed her majesty's first and principal naval aide-de-camp. He was commander-in-chief at Devonport, 1903–05; admiral of the fleet, 1905–10; accompanied Prince Arthur in his mission to Japan, 1906.

Seymour, Horatio, American statesman, was born at Pompey, N. Y., 1810. He studied at a military school; was admitted to the bar, 1832; entered New York legislature, 1841; and was chosen speaker, 1845. He was elected governor in 1852 and 1863, and came into great prominence as one of New York's "war governors." He presided over the democratic national convention of 1868, which was held in New York, and was nominated for the presidency by a sudden wave of enthusiasm, in spite of his loudly spoken protestations. He, however, received but eighty electoral votes. He died at Utica, N. Y., 1886.

Shaftesbury, Anthony Ashley Cooper, Earl of, British statesman, was born at Winborne, in Dorsetshire, 1621. He was educated at Exeter college, Oxford, and studied law at Lincoln's Inn. He entered parliament in 1640; changed from the royalist to the parliamentary side during the civil war, and was a member of Cromwell's council of state, but latterly attacked the protector's government, and was one of the chief promoters of the restoration. He was chancellor of the exchequer in 1661, and in 1672 was created an earl and lord chancellor, but, hoodwinked by Charles in the secret treaty of Dover, he went over to the opposition and lost his chancellorship. He then supported an anti-Catholic policy, and came into power again after the "popish plot," as the champion of toleration and Protestantism. He subsequently became president of the council, which passed the habeas corpus act. His virulent attacks on James and espousal of Monmouth's cause brought about his arrest on a charge of high treason in 1681, and although released he retired to Holland, where he died in 1683. He was one of the ablest men of his age, but of somewhat inscrutable character, whose shifting policy seems to have been chiefly dominated by a regard for self. He is the "Achitophel" of Dryden's great satire.

Shaftesbury, Anthony Ashley Cooper, Earl of, English philosopher, grandson of the preceding, was born in London, 1671. He was an ardent student in his youth, made a tour of the continent, and entered parliament in 1695. He was elevated to the house of lords on the death of his father in 1699, where, as a staunch whig, he gave steady support to William III. He withdrew from politics, never a congenial sphere to him, on the accession of Anne, and followed in his bent for literature and philosophy. In 1711 his collected writings appeared under the title *Characteristics*, in which he expounds, in the polite style of the eighteenth century, the philosophy of optimism. He died in 1713.

Shaftesbury, Anthony Ashley Cooper, seventh Earl of, English statesman and philanthropist, was born in London, 1801. He was graduated at Oxford, and entered parliament as a conservative in 1826; took office under Wellington in 1828; was a lord of the admiralty in Peel's ministry of 1834, and succeeded to the earldom in 1851. His name lives, however, by virtue of his noble and lifelong philanthropy, which took shape in numerous acts of parliament, such as the mines and collieries act of 1842, excluding women and boys under thirteen working in mines; the better treatment of lunatics act, 1845, called the magna charta of the insane; the factory acts, 1867, and the workshop regulation act, 1878; while outside of parliament he worked with rare devotion in behalf of benevolent and religious movements of all sorts, notably the ragged school movement and the better housing of the London poor. He died in 1885.

Shahan, Thomas Joseph, American educator, rector of the Catholic university of America since 1909, was born at Manchester, N. H., 1857. He was educated at Montreal college, Canada, 1872, American college, Rome, 1878–82; S. T. D., college of the Propaganda, Rome, 1882; J. U. L., Roman seminary, 1889; was a student of history at the university of Berlin, 1889–91, in 1891 at the New Sorbonne and Institut Catholique, Paris. He was ordained to the Roman Catholic priesthood in the cathedral of St. John Lateran, Rome, 1882; was chancellor and secretary of the diocese of Hartford, 1883–88; lecturer on history of education in Catholic university institute of pedagogy, New York, 1902-03; professor of church history and patrology, Catholic university of America, 1891–1909. Author: *The Blessed Virgin in the Catacombs; Giovanni Battista de Rossi; The Beginnings of Christianity; The Middle Ages; The House of God, and Other Addresses and Studies*, etc.

Shah-Jehan (*shä' je-hän'*), fifth of the Mogul emperors of Delhi, was born about 1592, and succeeded his father in 1627. He was a man of great administrative ability and a skilled warrior; conquered the Deccan and the kingdom of Golconda, and generally raised the Mogul empire to its zenith. His court was truly Eastern in its sumptuous magnificence. He founded the modern city of Delhi; built the Taj Mahal and other magnificent buildings at Agra; and ordered the construction of the peacock throne, which alone cost $35,000,000. Died in prison in 1666, a victim to the perfidy of his usurping son, Aurungzebe.

Shakespeare, William. See page 46.

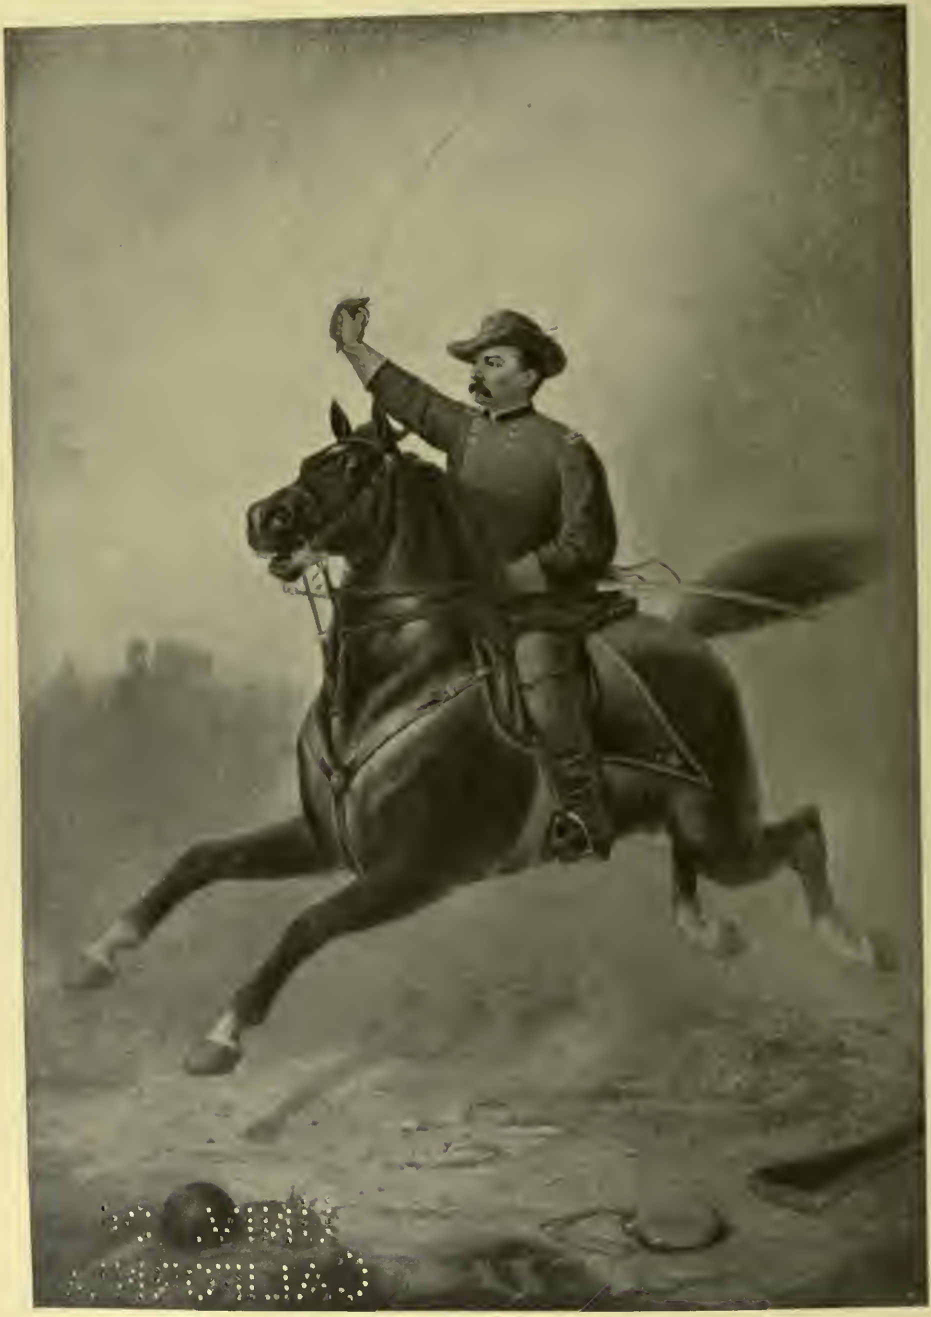
Shaler (*shā'-lẽr*), **Nathaniel Southgate,** American scientist, author, was born in Newport, Ky., 1841. He was graduated at Lawrence scientific school, Harvard, 1862; Sc. D., 1865; served two years as artillery officer in Union army during the civil war. He was instructor in zoölogy and geology, Lawrence scientific school, 1868–72; professor of palæontology, 1868–87, and afterward professor of geology, Harvard; director of Kentucky geological survey, 1873–80, devoting part of each year to that work, and from 1884 to 1906 was geologist in charge of the Atlantic division of the United States geological survey. Author: *A First Book in Geology; Kentucky, a Pioneer Commonwealth; The Nature of Intellectual Property; The Story of Our Continent; The Interpretation of Nature; Illustrations of the Earth's Surface; Sea and Land; The United States of America; A Study of the American Commonwealth; American Highways; Features of Coasts and Oceans; Domesticated Animals: Their Relation to Man; The Individual: Study of Life and Death; The Neighbor; The Citizen*, etc. Died, 1906.

Sharpless, Isaac, American educator, president of Haverford college since 1887, was born in Chester county, Pa., 1848. He was graduated at the Lawrence scientific school, Harvard, 1873; Sc. D., university of Pennsylvania; LL. D., Swarthmore college; L. H. D., Hobart college. He was instructor in mathematics, 1875–79, professor of mathematics and astronomy, 1879–84, and dean, 1884–87, of Haverford college. Author: *Astronomy; Geometry; English Education; A Quaker Experiment in Government; Two Centuries of Pennsylvania History; Quakerism and Politics*, etc.

Shaughnessy, Sir Thomas George, Canadian railway president, was born at Milwaukee, Wis., 1853. He received a common school education; entered the railway service in 1869, in the purchasing department of the Chicago, Milwaukee and St. Paul railroad. He was general storekeeper of the Chicago, Milwaukee and St. Paul railway, 1879–82; general purchasing agent, 1882–84, assistant to general manager, 1884–85; assistant general manager, 1885–89; assistant to president, 1889–91; vice-president and director, 1891–98, and president since 1898 of the Canadian Pacific railway. He is also vice-president and director of the Duluth, South Shore and Atlantic railway, Toronto, Hamilton and Buffalo railway, British Columbia Southern railway; president of the Montreal and Western railway; director of the Accident insurance company, Guarantee company of North America, Northwest land company, etc. He was knighted by Queen Victoria, 1901.

Shaw, Albert, editor of the *American Review of Reviews*, was born in Shandon, Ohio, 1857. He was graduated at Iowa college, Grinnell, Ia., 1879; Ph. D., Johns Hopkins, 1884; LL. D., university of Wisconsin, 1904. He was editorial writer with the *Minneapolis Tribune*, 1883–88, 1889-90; studied in Europe, 1888–89; established in 1891, and has since conducted, the *American Review of Reviews*. He is a member of numerous learned societies, and has lectured in many universities and colleges. Author: *Icaria — A Chapter in the History of Communism; Local Government in Illinois; Coöperation in the Northwest; Municipal Government in Great Britain;*

UNIV. OF
CALIFORNIA



SHERIDAN'S RIDE
From the painting by Read

Municipal Government in Continental Europe, etc.; and many articles on political science, economics, and municipal governments, in magazines, etc.

Shaw, George Bernard, British dramatist, critic, and novelist, was born in Dublin, Ireland, 1856, and went to London in 1876, where he engaged in newspaper work. He published a few novels, *Cashel Byron's Profession*, etc., which attracted little attention; joined the Fabian society in 1884; wrote musical critiques in the *London Star*, 1888–90, and in the *World*, 1890–94; and, in 1895, began his work as a dramatic critic, writing in the *Saturday Review*. In 1898 he published *Plays, Pleasant and Unpleasant* including, *You Never Can Tell; Arms and the Man; Candida; The Man of Destiny; Widowers' Houses;* and *Mrs. Warren's Profession*. Since then his chief literary work has been writing for the stage. His plays include *Man and Superman; John Bull's Other Island; Major Barbara; The Doctor's Dilemma; Cæsar and Cleopatra; Getting Married*, etc.

Shaw, Henry Wheeler, American humorist, was born in Lanesborough, Mass., 1818. In 1859 he began to write, and, in 1860, sent "An Essa on the Muel, bi Josh Billings" to a New York paper. It was reprinted in several comic journals, and extensively copied. His most successful literary venture, however, was his *Farmer's Allminax* a travesty on the *Old Farmers' Almanac*, 127,000 copies of which were sold in its second year. He began to lecture in 1863, and, for twenty years previous to his death, contributed regularly to the *New York World*. His complete works were published in 1877. Died in Monterey, Cal., 1885.

Shaw, Leslie Mortimer, American financier and lecturer, was born at Morristown, Vt., 1848. He was graduated at Cornell college, Mt. Vernon, Ia., M. S., 1874; Iowa college of law, 1876; LL. D., Simpson college, 1898, Cornell college, Ia., 1899, Wesleyan university, 1904. He was admitted to the Iowa bar in 1876, and began practice at Denison, Ia.; subsequently engaged in banking at Denison, Manilla, and Charter Oak, Ia. He occasionally took part in political campaigns as a republican speaker, and gained prominence as a McKinley advocate in 1896; was twice elected governor of Iowa, 1898–1900, 1900–02; secretary of the treasury, 1902–07, and president of the Carnegie trust company, New York, 1907–08. His time is now largely given to the lecture platform.

Shays, Daniel, American insurgent, was born in Hopkinton, Mass., 1747. He served as ensign at the battle of Bunker Hill; attained the rank of captain in the continental army, and took a leading part in the popular movement in western Massachusetts for the redress of alleged grievances due to misgovernment. In 1786 he appeared before Springfield, Mass., at the head of 1,000 men, to prevent the session of the supreme court at that place, and afterward commanded the rebel party at Pelham and at the engagement with the militia at Petersham. After the rebellion was put down, however, he was pardoned by the government, and later, in his old age, was allowed a pension for his services during the revolutionary war. He died in Sparta, N. Y., 1825.

Shelley, Percy Bysshe, famous English poet, was born at Field Place, near Horsham, England, 1792. In 1808 he left school, and after two years passed at home was sent to Oxford. A pamphlet entitled *The Necessity of Atheism*, which circulated during the second year of his college course, led to his expulsion from Oxford. In 1811 he married Harriet Westbrook, daughter of a retired innkeeper, but in 1814 a separation took place between him and his wife. His second wife was Mary Godwin. In 1813 appeared his poem *Queen Mab*, which was printed only for private circulation. In 1815 he wrote his *Alastor*, one of the most finished and characteristic of his works, which was followed by *The Revolt of Islam*. In 1818 he left England for Italy, and during that and the following year, chiefly while a resident at Rome, he produced what may rank as his two finest poems — the grand lyrical drama of *Prometheus Unbound* and the tragedy of *The Cenci*. While at Venice with Lord Byron in 1820 he wrote *Julian and Maddalo*, a record in verse of conversations between the poet and himself. His other works of chief importance are *Rosalind and Helen, The Witch of Atlas*, written in 1819; *Epipsychidion, Adonais*, on the death of Keats, and *Hellas* — all produced in 1821. He perished in 1822 by the capsizing of his boat, while sailing in the gulf of Leghorn.

Shelley, Mary Wollstonecraft Godwin, wife of the poet, was born in London in 1798, and married Shelley in 1816. In 1818 she produced a remarkable novel entitled *Frankenstein*. Other novels of hers are *Valperga, The Last Man, Lodore*, and *The Fortunes of Perkin Warbeck*. She likewise wrote *Rambles in Germany and Italy*, etc., and carefully edited her husband's poems. Died in London, 1851.

Shepard, Edward Morse, American lawyer and publicist, was born in New York, 1850. He was graduated at the college of the city of New York, 1869, studied law and was admitted to the bar. He was civil service commissioner of Brooklyn, 1883–85; New York state forestry commissioner, 1884-85, and democratic candidate for mayor of Greater New York, 1901. Besides attaining high rank as a lawyer, he was director in numerous railway and other corporations; was chairman of the board of trustees of the college of the city of New York, trustee of Packer collegiate institute, etc., and a member of the Cobden club, England. Author: *Martin Van Buren* in American Statesmen series; *Memoirs of Dugdale;* and many review, magazine and other articles and addresses on political, industrial and educational topics. Died, 1911.

Shepherd, F. J., Canadian physician, professor of anatomy and dean of the medical faculty, McGill university, Montreal, since 1883; was born at Cavagnol, province of Quebec, 1851. He was graduated at McGill university, M. D., 1873, and spent several years in study abroad in England, Germany, Austria, and France; LL. D., Edinburgh and Harvard. He was demonstrator of anatomy in McGill university, 1875; president of the Montreal medico-chirurgical society, and vice-president of the international dermatological congress, 1894 and 1907; was president of Canadian medical association; senior surgeon to the Montreal general hospital since 1883. Author: *American Text-Book of Surgery; Retrospect of Surgery*, 1881–94, etc.

Sheridan, Philip Henry, American general, was born at Albany, N. Y., 1831. He was graduated at West Point in 1853. At the beginning of the civil war he was a captain in the 13th infantry, was made quartermaster of the federal army in Missouri, and rapidly passed up through the various grades to major-general in 1863 for brilliant service in the battles of Perryville and Stone river. He subsequently distinguished himself at Missionary Ridge, Murfreesborough, Chickamauga, Chattanooga, Fisher's Hill, Cedar Creek, Five Forks, Winchester, and Appomattox Court House. After the battle of Fisher's Hill the confederate general, Early, received large reënforcements from General Lee, and again advanced into the Shenandoah valley, surprised the federal army at Cedar Creek in the early morning of October 19, 1864, and drove it back in confusion. Sheridan, who had been called to headquarters at Washington, had reached Winchester on his return, when he heard the guns twenty miles away. Hurrying forward, he reached the field and met his troops retreating in confusion before the enemy. Speedily forming a line to stop stragglers, he rode forward waving his hat and shouting, "Face the other way, boys; we are going back." Confidence was restored, the lines were reformed, and at 3 p. m. they moved back upon the enemy. The result was the total rout of Early's army, which was pursued up the valley for thirty miles. For this victory he was promoted to major-general in the regular army, and received the thanks of congress. Returning to the army of the Potomac, in 1865, he was conspicuous under Grant in the operations before Petersburg, and in the final battles preceding Lee's surrender. After the close of the war, Sheridan was placed in command at New Orleans, and later of the department of the Missouri, with headquarters at Chicago. When Sherman was made general, Sheridan was made lieutenant-general, and, when Sherman was retired, a special act of congress conferred the further rank of general upon Sheridan, who became commander-in-chief of the army. He died at Nonquitt, Mass., 1888.

Sheridan, Richard Brinsley, British dramatist and politician, was born in Dublin, 1751. He was educated at Harrow, and became a student of the Middle Temple, London, though he was never called to the bar. In 1773 he married, and devoted himself for a time to literature for a living, and, in 1775, produced *The Rivals* successfully at Covent Garden. In 1777 he became part proprietor of Drury Lane theater, for which he produced *The School for Scandal*, and also *The Critic*, one of the wittiest farces in the language. In 1780 he was returned to parliament for the borough of Stafford, and soon became distinguished as a powerful speaker on the side of the opposition, occupying afterward the position of secretary to the treasury in the coalition ministry of 1783. During the whole time of Pitt's ascendancy the talents of Sheridan were displayed in combating that great statesman, by whom, however, his eloquence was acknowledged, and especially his eloquence on the occasion of the Warren Hastings' trial. On the death of Pitt, in 1806, he became treasurer to the navy, but held that office for only a short time; and all through his career he had to struggle with difficulties, the result mainly of extravagance and dissipation. He retired from parliament some time before his death. Besides the dramatic works above mentioned, Sheridan was the author of *The Stranger* and of *Pizarro.* He died in 1816, and was buried in Westminster abbey.

Sherman, James Schoolcraft, lawyer, banker, was born in Utica, N. Y., 1855. He was graduated from Hamilton college in 1878, and was admitted to the bar in 1880; LL. D., Hamilton, 1903. He was president of the Utica trust and deposit company, and of the New Hartford canning company; was mayor of Utica, 1884-85; delegate to the republican national convention in 1892; chairman of republican state convention in 1895, 1900, and 1908; chairman of the republican national congressional committee in 1906. He was a member of congress, 1887-91, 1893-1903, and 1903-09. Was elected vice-president of the United States, 1908, taking his seat March 4, 1909. He was renominated in August, 1912, and died October 30th following.

Sherman, John, American statesman, brother of William Tecumseh, was born at Lancaster, Ohio, 1823. He was employed for a time at surveying, but finally entered the law office of his brother Charles at Mansfield, and was admitted to the bar in 1844, entering into partnership with his brother. He became an anti-slavery whig, and as such entered congress in 1855. He immediately took an active part, and soon a prominent one, in the proceedings of the house; was one of the committee of inquiry sent to Kansas; entered heartily into the movement for the formation of the republican party; and ardently supported Frémont in 1856. He was reëlected to congress that year and continued in the house until 1861, the recognized leader of the republicans. He was then United States senator, 1861-77, and 1881-97; secretary of the treasury under President Hayes, 1877-81; and secretary of state under President McKinley, 1897-98. In the senate he was prominently identified with the support of all measures for the prosecution of the war, taking a leading part in financial debates and committee work. He supported the reconstruction measures, defended the protective tariff, and took a leading part in the legislation for the restoration of specie payments and the refunding of the national debt, and was author of the famous Sherman anti-trust law. He was a candidate for the presidential nomination in 1880, 1884 and 1888. Died at Washington, 1900.

Sherman, Roger, American statesman, was born at Newton, Mass., 1721. He was a shoemaker by trade, then a surveyor of lands, and finally a lawyer and judge; served in both the continental and the United States congresses from 1774 to 1791; was one of the committee that drafted the declaration of independence, one of the signers of it, and was influential in having it ratified by the state convention of Connecticut, where he had resided since 1761. He was United States senator 1791-93. From 1784 until his death in 1793 he was mayor of New Haven, Conn.

Sherman, William Tecumseh, American general, was born in Lancaster, Ohio, 1820. He was graduated at West Point in 1840, and received a commission as first lieutenant in the United States army in 1841. During the war with Mexico he was promoted to the rank of captain, resigning in 1853. In 1861, at the commencement of the civil war, he offered his services to the federal government, and was appointed colonel of infantry. Raised to the rank of brigadier-general, he succeeded General Anderson in the department of Ohio, from which he was removed for declaring that it would require 200,000 men to end the war in the West. He distinguished himself at the battle of Shiloh, and as major-general in the siege of Vicksburg. Raised to an independent command, he marched across the state of Mississippi, took command of the army of Georgia, forced General Hood to evacuate Atlanta, and captured Savannah and Charleston, from which point he moved north, and, by cutting off the resources of General Lee, compelled the evacuation of Richmond, and the surrender of General Lee to General Grant, April 9, 1865. The surrender of the army of General Johnston to General Sherman in North Carolina a few days later, and that of General Kirby Smith, west of Mississippi, closed the war. No Northern general acquired greater popularity than Sherman. He was appointed lieutenant-general in 1866, and in 1869 became general and commander-in-chief. In point of daring originality of design, fertility of resource, brilliant strategy, and untiring energy, General Grant pronounced him "the best field officer the war had produced." He retired from the command of the army of the United States, 1884. Died, 1891.

Shively, Benjamin F., lawyer, United States senator, was born in St. Joseph county, Ind., 1857.

He was educated at the Northern Indiana normal school, and was graduated from the law department of the university of Michigan, 1886. He taught school, 1874–80; engaged in journalism; practiced law; he was elected to the 48th congress to fill a vacancy, and reëlected to the 50th, 51st, and 52d congresses. In 1896 he was the democratic nominee for governor of Indiana; received the democratic vote of the Indiana legislature for United States senator, 1903 and 1905, and was elected United States senator for the term 1909–15. He is president of the board of trustees of Indiana university.

Shonts (*shŏnts*), **Theodore Perry**, American railway official, was born in Crawford county, Pa., 1856. He was graduated at Monmouth college, 1876, and in the same year went into the banking business at Centerville, Iowa. He later studied law, was admitted to the Iowa bar and practiced four years as a member of the law firm of Drake, Baker and Shonts. In 1882 he engaged in railway construction, building two lines of railroad, from Albia to Centerville, one line now a part of the Iowa Central system, and the other now a part of the Burlington system; later engaged in completing the construction of the Indiana, Illinois and Iowa railroad, of which he was chief owner until the road was absorbed by the Lake Shore and Michigan Southern railroad. He is president of Toledo, St. Louis, and Western railroad, Iowa Central railroad company, Minneapolis and St. Louis railroad company, etc. He was appointed chairman of the isthmian canal commission by President Roosevelt, 1905; resigned after having completed the organization of that work in 1907, and has since been president of the Interborough-Metropolitan company, New York.

Sickles, Daniel Edgar, American general, was born at New York, 1825, and was admitted to the bar in 1846. In 1847 he was sent to the state legislature; in 1853 went to England as secretary of legation; was a member of congress 1857–61. When the civil war broke out, he was made colonel of a regiment he had raised in New York, and as brigadier-general commanded in the battles of Chickahominy. At Antietam and Fredericksburg he commanded Hooker's division of the 3d corps, and with the rank of major-general served at the head of the 3d corps at the battles of Chancellorsville and Gettysburg, losing a leg in the fight. After the war he was commander of the military district of North and South Carolina until 1867; appointed United States minister to Holland, 1866, to Mexico, 1869, declined; from 1869 to 1873 was United States minister to Spain. He was a member of congress from New York city, 1892–94, and was president of the New York State board of civil service commissioners, 1888–89.

Siddons, Sarah, noted English tragic actress, was born at Brecon, 1755, daughter of Roger Kemble, manager of a company of itinerant players. In her eighteenth year she married William Siddons, an actor, and in 1775 made her first appearance in London as Portia, but was unsuccessful. Time, however, matured her powers, and, after an absence of seven years, partly spent at Bath, where she was much admired, she reappeared at Drury Lane, 1782, in the character of Isabella in *The Fatal Marriage*. In 1785 she appeared as Lady Macbeth, her greatest rôle, and in 1788 as Queen Catharine. Thenceforth her course was a continual triumph. In 1812, having acquired an ample fortune, she withdrew to private life. She died in 1831. In 1783 Sir Joshua Reynolds painted her as "The Tragic Muse."

Sidgwick, Henry, English moralist and economist, was born in Yorkshire, 1838, and educated at Trinity college, Cambridge, where he lectured from 1859 to 1875, becoming professor of moral and political philosophy in the latter year, and professor of moral philosophy in 1883. He took a leading part in the movement for the higher education of women. His chief works comprise *The Methods of Ethics; The Principles of Political Economy; History of Ethics*, and *The Elements of Politics*. He was a co-editor of *Mind*, resigning in 1900. Died, 1901.

Sidney, Sir Philip, English writer and soldier, was born in Kent, 1554. He was educated at Oxford, traveled throughout Europe, and returned to become a favorite at the court of Elizabeth, who called him "the jewel of her dominions." For her entertainment he wrote his celebrated *Arcadia* and several minor poems. Among his works are also his *Apologie for Poetrie* and *Defense of Poetrie*. He was killed at the battle of Zutphen, 1586, when, dying, he handed his bottle of water to common soldiers wounded nearby, saying "Thy necessity is greater than mine." He was a rare and finished type of English character.

Siegel, Henry, American merchant, was born in Eubigheim, Germany, 1852. He was educated in Germany, and in night school, Washington. He came to the United States in 1867; moved to Chicago in 1876, established the cloak manufacturing firm of Siegel, Hartsfeld and Company, later Siegel Brothers, and finally established Siegel, Cooper and Company, department store, Chicago. In 1896 he established the store of Siegel-Cooper company, New York; purchased the Simpson-Crawford company store, New York, 1902, and now has six large department stores under his personal management.

Siemens, Ernst Werner von, German engineer and electrician, was born at Lenthe in Hanover, 1816. In 1838 he entered the Prussian artillery, and in 1844 took charge of the artillery workshops at Berlin. He developed the telegraphic system in Prussia, and discovered the insulating property of gutta-percha, and was the first to explode a submarine mine by electricity. Leaving the public service, he devoted himself to making telegraphic and electrical apparatus. In 1847 the firm of Siemens and Halske was established at Berlin, which, after 1867, became Siemens Brothers; and branches were formed in St. Petersburg, London, Vienna, and Tiflis. Besides devising numerous forms of galvanometers and other electrical instruments, Siemens was one of the discoverers of the self-acting dynamo. He determined the electrical resistance of different substances, the Siemens unit being called after him. In 1886 he gave 500,000 marks to found a technical institute, and in 1888 was ennobled. He died at Berlin in 1892.

Siemens, Sir William (Karl Wilhelm), German scientist, was born at Lenthe, Hanover, 1823, brother of the preceding. He studied at Göttingen, giving special attention to science. After two visits to England in the interests of his brother's inventions, he made England his home in 1844, and became a British subject in 1859. As manager of the house of Siemens Brothers, he was engaged in constructing telegraph lines, the steamship *Faraday* being designed by him for cable laying. He also built electric railroads. The principle of his "regenerative" furnace has been applied in many ways, but especially by himself in the manufacture of steel. He invented a water meter, a bathometer for measuring ocean depths, an electrical thermometer, and a process of hastening the growth of plants by electric light. In 1874 the royal Albert medal, and in 1875 the Bessemer medal were given him in recognition of his inventions. He was president of the three principal telegraphic societies of Great Britain, and of the British association, and in 1883 was knighted. He died at London, 1883.

Sienkiewicz (*shĕn-kyā'-vĭch*), **Henryk,** Polish novelist, was born at Wola Okrzejska, in Lithuania, 1846, and was educated at the university of Warsaw. Early in his career he devoted himself to literature, and soon won a high position as a novelist and short story writer. In 1876 he came to the United States, and for a time, in company with Madame Modjeska, his countrywoman, he resided in California, where he designed to establish a Polish colony. He returned to Poland and in 1880 wrote a work on *Tartar Slavery,* following this, a few years later, by his masterly novel, *With Fire and Sword.* To this succeeded *The Deluge, Pan Michael, Without Dogma* and *Children of the Soil* — all of them remarkable for their vigor of characterization, historical truth, and power of psychological analysis. In 1896 appeared his masterpiece, *Quo Vadis?* — a tale of the time of Nero, written with remarkable vigor and powerful effect. His later works include *The Knights of the Cross, Monte Carlo,* etc. In 1905 he received the Nobel prize for literature.

Sigsbee, Charles Dwight, American naval officer, was born in Albany, N. Y., 1845. He was graduated at the naval academy, 1863; served in West Gulf squadron, 1863-64, and was present at the battle of Mobile bay; in North Atlantic squadron, 1865, and at both attacks on Fort Fisher and final assault on same. After the civil war he was attached to the Asiatic squadron, 1865–69, and in 1874–78, sounded and explored the gulf of Mexico. He introduced numerous inventions and new methods in deep sea exploration, for which he later received the decoration of the red eagle of Prussia from Emperor William I., and received gold medal from abroad. He took command in 1897 of the battleship *Maine,* which was blown up and destroyed in Havana harbor, February 15, 1898; commanded the battleship *Texas,* 1898–1900; was made rear-admiral, 1903; became a member of the naval construction board and naval general board, and retired in 1907. Author: *Deep Sea Sounding and Dredging; Personal Narrative of the Battleship Maine,* etc. Died, 1909.

Silliman, Benjamin, American physicist, was born at Trumbull, Conn., 1779. He was educated at Yale college, and admitted to the bar in 1802, but soon after received from the college the appointment of professor of chemistry, and held that chair over half a century. Uniting mineralogy and geology to chemistry, he made a general survey of Connecticut, and observed the fall of a meteorite; constructed, with the aid of Professor Hare, a compound blowpipe; and repeated the experiments of Sir Humphry Davy. In 1818 he founded the *American Journal of Science,* better known as *Silliman's Journal,* of which he was for twenty years editor. He published *Elements of Chemistry; Travels in England, etc.; Narrative of a Visit to Europe.* Died, 1864.

Sieyès (*syā'-yĕs'*), **Emmanuel Joseph,** better known as the Abbé Sièyes, French revolutionist, was born in Frejus, France, 1748. He studied for the church at Paris; during the reign of terror he withdrew into the country; but after Robespierre's downfall returned to the convention, took an active part in affairs, and became president of the national assembly in 1790. In 1799, on his return from a mission to Berlin, by which he secured the neutrality of Prussia, he became a member of the directory. He subsequently suppressed the Jacobin club, and was active in bringing about the overthrow of the directory and the substitution of the consular government, the new constitution being devised by him. He soon found his speculations completely overmatched by Bonaparte's practical energy, and though a consul provisionally, he saw it desirable to terminate his political career. He retired with the title of count, and obtained grants of land and property to the value of at least $250,000. He was exiled at the restoration, but returned to Paris during the revolution of 1830, and died there in 1836.

Sifton, Clifford, Canadian statesman, was born in Middlesex county, Ontario. He was graduated at Victoria university, Cobourg, 1880; was admitted to the Manitoba bar, 1882; practiced in Brandon; was created queen's counsel by Dominion patent, 1895. He was a member of the Manitoba legislature, 1888–96; attorney-general and minister of education, 1891; codified the laws relating to civil procedure in Manitoba, retired from Manitoba government and entered Sir Wilfred Laurier's administration as minister of the interior and superintendent-general of Indian affairs, 1896, but resigned in 1905. He was first elected to the Dominion house of commons for Brandon, Manitoba, 1896, and reëlected in 1900, 1904, and 1908.

Sigel (*sē'-gel*), **Franz,** American general, was born in Germany, 1824. He was in the service of the grand-duke of Baden, and became minister of war in the revolution of 1848, but was obliged to flee, and came to the United States. He entered the federal army as colonel in 1861, during the civil war, and by gallant service rose to the rank of major-general. He was register of New York city, 1871–74, and United States pension agent for the city, 1886–89. Died, 1902.

Sigismund (*sĭj'-ĭs-mŭnd*), emperor of Germany, was born about 1368. When only nineteen he became king of Hungary through marriage. He was terribly defeated in an expedition against the Turks at Nicopolis in 1396. Some years later he conquered Bosnia, Herzegovina, and Servia, and became emperor of Germany in 1411. The council of Constance was held during his reign, and, failing to uphold the safe conduct he had granted to Huss, he permitted him to be burned by his enemies. The Hussite war followed, his succession to the throne of Bohemia after his brother's death was opposed by the Hussites, and he only secured it after making concessions, a year before his death, which took place in 1437.

Simmons, Furnifold McLendel, lawyer, United States senator, was born in Jones county, North Carolina, 1854. He was graduated at Trinity college, North Carolina, 1873, LL. D., 1901; was admitted to the bar, 1875. He continued in the active practice of the law, 1875–1886; was a member of congress, 1887–89, 2d North Carolina district; internal revenue collector, 4th district, 1893–96; was elected United States senator for the terms, 1901–07, 1907–13, 1913–19.

Simon (*sē'-môɴ'*), **Jules François,** French statesman and publicist, was born at Lorient, France, 1814. He was educated at Lorient and at Vannes, and in 1839 became professor of philosophy at the Sorbonne, Paris. In 1848–50 he was a republican member of the French assembly, and was removed from his professorship in 1851. He was then member of the corps législatif, 1863–70; minister of public instruction, 1871–73; senator and member of the French academy, 1875, and prime minister, 1876-77, under MacMahon, but resigned as a protest against the latter's monarchical schemes, which were by this action chiefly checkmated. He opposed Ferry's measures against religious bodies not sanctioned by the state, advocating entire liberty of conscience, and also advocated free trade. Amidst the general corruption he remained poor, supporting his family by his pen, and preserving an absolutely stainless character to the last. Died, 1896.

Simpson, Sir James Young, noted Scottish physician, was born at Bathgate, Scotland, 1811. He was graduated at the university of Edinburgh as doctor in medicine in 1832, and in 1840 was appointed to the chair of obstetrics there. In this field he introduced the use of chloroform and other anæsthetics, and made improvements in the old methods of practice. He was also much interested in archæology, and his contributions to antiquarian research would of themselves create an independent reputation. His scientific services were recognized by nearly every medical association, while his professional distinction secured for him, in 1867, a baronetcy from the queen. Died, 1870.

Simpson, Matthew, American Methodist Episcopal clergyman and bishop, was born in Cadiz, Ohio, 1811. He was graduated in medicine in 1833, and soon after entered the ministry in the Pittsburg conference. He was vice-president and professor in Allegheny college, 1837; president of Indiana Asbury university, 1839, and editor of the *Western Christian Advocate*, 1848. He was bishop in 1852, and was delegate to the Irish and British conferences, and the evangelical alliance at Berlin, and extended his travels through Greece, Turkey, Egypt, and the holy land. During the civil war he delivered numerous addresses in behalf of the Union and the freedmen, and officiated at the funeral of President Lincoln. In 1874 he visited Mexico, and later presided at the conferences in Europe; and in 1881 visited Europe for the third time as delegate to the first Methodist ecumenical council, and delivered the opening address. He was the author of *A Hundred Years of Methodism*, and of the *Cyclopedia of Methodism*, and was one of the most eminent pulpit orators of the nineteenth century. Died, 1884.

Sinclair, Upton, author, was born in Baltimore, 1878, and graduated from the college of the city of New York, 1897. He assisted the government in the stockyard's investigation in Chicago, and has taken a leading part in socialist movements. Author: *Springtime and Harvest; Prince Hagen, a Phantasy; Manassas; The Jungle; The Industrial Republic; The Overman*, etc.

Sinclair, William Macdonald, English prelate, archdeacon of London and canon of St. Paul's, 1889–1911; was born at Leeds, 1850. He was graduated at Balliol college, Oxford, and became assistant minister of Quebec chapel, 1876. He was resident chaplain to the bishop of London, 1877; vicar of St. Stephen's, Westminster, 1880; member of London school board, 1885; grand chaplain of England, 1894; chaplain to the order of St. John of Jerusalem, 1900, and chaplain-in-ordinary to Queen Victoria. Author: *The Servant of Christ; The Christian's Influence; Christ and our Times; Words to the Laity; Leaders of Thought in the English Church; Simplicity in Christ; The New Law; The Happy Life; Difficulties of our Day*, etc.

Sismondi (*sĭs-mŏn′-dĭ*), **Jean Charles Leonard Simonde de,** distinguished Swiss historian of Italian descent, was born at Geneva, 1773. Before he had completed his education the pecuniary reverses of his father made it necessary for him to enter a counting-house. Hateful as mercantile pursuits seem to have been to him, he became a thoroughly good clerk. The French revolution following, he took refuge in England along with his family. In 1795 they bought a small farm near Pescia, in Tuscany, and Sismondi had now leisure for literature. In 1803 appeared a work on political economy, followed by his *History of the Italian Republics*. The latter, published between 1807 and 1818, placed him in the first rank among contemporary historians. In 1813 appeared his *Literature of Southern Europe*, and in 1819 he began his greatest work, the *History of the French*, with which he was occupied until his death, in 1842.

Sixtus IV., Pope, Francisco della Rovere, was born in a small village near Savona, Italy, 1414. He had a great reputation as a preacher throughout Italy, and became pope in 1471. He exhausted the treasures of the papal church in providing for his relatives, and took part in a conspiracy against the Medici at Florence. Learning, and especially the improvement of the city, owed much to him. He built the Sistine chapel and the Sistine bridge across the Tiber, increased the vatican library, and patronized the great painters of his time. His union with the Venetians against the duke of Ferrara brought on an Italian war, which ended in the breaking up of the Venetian alliance. He died in 1484.

Sixtus V., Felice Peretti, one of the ablest of the popes, was born near Montalto, Italy, 1521. He was a professor of theology at Rimini and Siena, an eloquent preacher, vicar-general, and cardinal, and succeeded Gregory XIII. His pontificate was notable for vigorous administration. He stopped disorder, improved the working of the laws, gave liberty to the Jews to worship in their own way, and to trade in his dominions. He built the library buildings of the vatican, authorized a new edition of the septuagint and the vulgate, and in every way carried out his policy of increasing the power of the Catholic church against the Huguenots, the Lutherans, and Queen Elizabeth. He also fixed the number of cardinals at seventy. Died, 1590.

Skeat (*skēt*), **Walter William,** English philologist, was born in London, 1835. He was graduated from Christ's college, Cambridge, 1858, became a fellow in 1860, and in 1878 professor of Anglo-Saxon; Litt. D., LL. D., Ph. D., D. C. L. He was the first director of the dialect society, established in 1873, and contributed more than any scholar of his time to a sound knowledge of Middle English and English philology generally. His works include: *Piers Plowman; The Lay of Havelock the Dane;* Barbour's *Bruce;* Chaucer's *Treatise on the Astrolabe*, etc., all edited for the Early English Text society; editions of Chatterton's *Poems;* Chaucer's *Minor Poems; Kingis Quair; A Maeso-Gothic Glossary;* his admirable *Etymological English Dictionary; Principles of English Etymology;* his great edition of Chaucer, in 6 vols.; *The Student's Chaucer; A Student's Pastime; Chaucerian and Other Pieces; Notes on English Etymology; A Primer of Classical and English Philology*, etc. Died, 1912.

Skobelev (*skŏ′-bĕ-lyĕf*), **Mikhail Dimitrievich,** Russian general, was born in 1844. He fought against the Polish insurgents in 1863, and in 1871–75 was at the conquest of Khiva and Khokand. In the Russo-Turkish war of 1877-78 he bore a conspicuous part at Plevna, in the Shipka pass, and at Adrianople; in 1881 he stormed the Turkoman stronghold Geok-Tepe. He died near Moscow, in 1882. He was an ardent Panslavist.

Slicer, Thomas Roberts, Unitarian clergyman, was born at Washington, 1847. He was educated in Baltimore; A. M., Dickinson college; D. D., Harvard. He was a Methodist Episcopal minister ten years in Maryland, Colorado and New York; entered Unitarian ministry, 1881; held pastorates in Providence, R. I., and Buffalo, N. Y., and since 1897 has been pastor of the church of All Souls, New York. Author: *Doctrine of the Unity of God in the First Three Centuries; The Great Affirmations of Religion; The Power and Promise of the Liberal Faith; Book of*

Common Worship; One World at a Time; Shelley — An Appreciation; The Way to Happiness, etc.

Slidell (*slī-dĕl'*), **John**, American lawyer and politician, was born in New York city about 1793. After graduating at Columbia college, he studied law, and removing to New Orleans practiced there and became a leader in Louisiana politics. From 1842 to 1845 he served in congress; from 1853 to 1861, was a member of the United States senate; and in the civil war, when Louisiana seceded, he withdrew, and was appointed confederate minister to France. In company with James M. Mason, who was named minister to England, he was taken on the high seas by Captain Wilkes, of the United States navy, and both brought as prisoners to the United States, where they were confined in Fort Warren. On the demand of England, they were released, however, and proceeded on their respective missions. In France, aided by the sympathy of Napoleon III. for the confederate government, Slidell, though unable to secure recognition for his government, procured a ship, the *Stonewall*, for the confederacy, and negotiated with French capitalists for a loan to the Confederate States of £15,000,000. After the war closed, he settled in England and resided there until his death in 1871.

Sloane, William Milligan, American historian, Seth Low professor of history, Columbia, since 1896, was born at Richmond, Ohio, 1850. He graduated at Columbia, 1868; Ph. D., Leipzig, 1876; L. H. D., Columbia, 1887; A. M., Princeton, 1896; LL. D., Rutgers, 1898, Princeton, 1903. He was secretary to George Bancroft, the historian, in Berlin, 1873–75; professor at Princeton university, 1876–96; and editor *Princeton Review*, 1886–89. Author: *Life of James McCosh; The French War and the Revolution; Napoleon Bonaparte, a History*, 4 vols; *French Revolution and Religious Reform*, etc.

Slocum, Henry W., American general, was born, 1827, at Delphi, N. Y. He graduated from West Point in 1852, was assigned to the 1st artillery, resigned in 1856, practiced law at Syracuse, and was elected to the state legislature in 1860. On the outbreak of the civil war, he was commissioned colonel of the 27th New York volunteers and took part in the first battle of Bull Run, where he was wounded. In August he was made brigadier-general, commanded a brigade, and later a division in the army of the Potomac, taking part in McClellan's peninsular campaign in 1862. He distinguished himself at the battles of Gaines' Mill, Glendale, and Malvern Hill and was promoted to major-general of volunteers. He fought at second Bull Run, South Mountain, and Antietam, and as commander of the 12th corps rendered signal service at Fredericksburg, Chancellorsville, and Gettysburg. Later he was transferred with his corps to the army of the Cumberland, succeeded to the command of the 20th corps, and was the first to enter Atlanta. In Sherman's march to the sea and through the Carolinas he commanded the left wing, taking part in the actions of that campaign. After the war he took up the practice of law at Brooklyn, was elected to congress in 1870, and again in 1884. He died at Brooklyn, N. Y., 1894.

Smeaton, John, English civil engineer, was born near Leeds, England, 1724. He began his career as a maker of mathematical instruments, but continued his studies and experiments, inventing, in 1751, a machine for measuring a ship's path at sea. In 1755 he was appointed to rebuild the Eddystone lighthouse. It was built of stone and was the greatest work of the kind at the time, standing for one hundred twenty years as a monument of his skill. His other works were Ramsgate harbor, the Forth and Clyde canal, Spurn lighthouse, the preservation of the old London bridge, and the Perth and Banff bridges in Scotland. He died, 1792.

Smiles, Samuel, Scottish writer, was born at Haddington, Scotland, 1812. He was graduated in medicine at Edinburgh, at twenty, and practiced in Haddington. Subsequently he settled as a surgeon in Leeds, became editor of the *Leeds Times*, secretary of the Leeds and Thirsk railway in 1845, and in 1854 secretary of the South-Eastern railway, retiring in 1866. He wrote *Life of George Stephenson; Self-Help*, which has had an extraordinary success, and has been translated into a score of languages; *Character; Thrift; Duty; Life and Labor; Lives of the Engineers; Industrial Biography; Lives of Boulton and Watt; The Huguenots in England; The Huguenots in France; Men of Invention and Industry; Josiah Wedgwood*, etc. He died at London, 1904.

Smith, Adam, Scottish political economist, founder of the modern science of political economy, was born at Kirkcaldy, in Fifeshire, 1723. He was educated at Glasgow university, and at Balliol college, Oxford, and after giving a course of lectures in Edinburgh on rhetoric and belles lettres, he was elected, in 1751, professor of logic in Glasgow, and, in the following year, professor of moral philosophy. The result of his inquiries on the latter subject appeared in his *Theory of the Moral Sentiments*, which was published in 1759. In 1764 he accompanied the duke of Buccleuch to the continent as traveling tutor and governor, and this engagement occupied him for two years; but at the end of that time he returned to Kirkcaldy, where he lived until he was appointed a commissioner of customs in 1778, when he took up his residence in Edinburgh. In 1776 he produced his great work, *An Inquiry into the Nature and Causes of the Wealth of Nations*, and upon this work his reputation rests. A later work was his *Apology for the Life of David Hume*. In 1787 he was elected lord rector of the university of Glasgow, and died, 1790.

Smith, Benjamin Eli, American editor, was born in Beirut, Syria, 1857. He graduated at Amherst college, 1877, A. M., L. H. D. Editor and translator: Schwegler's *History of Philosophy; Century Cyclopædia of Names; Century Atlas;* Cicero's *De Amicitia;* Franklin's *Poor Richard's Almanac; Selections from Marcus Aurelius; Epictetus; Pascal*, etc. Died, 1913.

Smith, Charles Emory, American journalist, was born at Mansfield, Conn., 1842. He removed to Albany, N. Y., with parents, in 1849; graduated at Union college, 1861; LL. D., Union, 1889, Lafayette, 1900, Knox, 1900, Wesleyan, 1901. He was actively engaged during the civil war in raising and organizing Union volunteer regiment; was editor of *Albany Express*, 1865–70; *Albany Journal*, 1870–80; and *Philadelphia Press*, 1880–1908. He was United States minister to Russia, 1890–92; postmaster-general of United States, 1898–1902. He was well known throughout the United States as a forceful writer, orator, and publicist. Died, 1908.

Smith, Ellison DuRant, United States senator, was born, 1866, at Lynchburg, S. C. He graduated at Wofford college, Spartanburg, S. C., in 1889; was a member of the South Carolina legislature, 1896–1900. He became a national figure on account of addresses at New Orleans, Birmingham, Dallas, and Shreveport, on the cotton industry, and was elected to the United States senate, 1909, for the term 1909–15. He is a successful merchant and planter.

Smith, Francis Hopkinson, American artist, author, and engineer, was born at Baltimore, 1838. When quite young he was clerk in iron works, and was later educated as a mechanical engineer; L. H. D., Yale, 1907. He built the government sea-wall around Governor's island; another at Tompkinsville, S. I.; the Race Rock lighthouse off New London; foundation for Bartholdi statue of Liberty, etc. He has also done much landscape work in water colors, charcoal work and illustrations, and is represented in Walter's gallery, Baltimore, Marquand collection, etc. Author: *Old Lines in New Black and White; Well-Worn Roads; A White Umbrella in Mexico; A Gentleman Vagabond and Some Others; Tom Grogan; Gondola Days; Venice of To-day; Caleb West; The Other Fellow; The Fortunes of Oliver Horn; The Under Dog; Col. Carter's Christmas; At Close Range; The Wood Fire in No.* 3; *The Tides of Barnegat; The Veiled Lady; The Romance of an Old-Fashioned Gentleman; Peter*, etc.

Smith, Goldwin, English author and educator, was born in Reading, England, 1823; graduated from Magdalen college, Oxford, 1845; D. C. L., Oxford, 1882; LL. D., Princeton, 1896; and was called to the English bar, 1847. He was regius professor of modern history, Oxford, 1858–66; was an active champion of the North during the American civil war; visited United States, 1864; was lecturer, 1868–71, and later honorary professor of English and constitutional history, Cornell. He lived in Toronto after 1871. Author: *Irish History and Irish Character; Lectures on Modern History; Rational Religion and the Rationalistic Objections of the Bampton Lectures for* 1858; *Does the Bible Sanction American Slavery? The Empire; On the Morality of the Emancipation Proclamation; England and America; The Civil War in America; Three English Statesmen; The Irish Question; William Cowper; Jane Austen; The Conduct of England to Ireland; False Hopes; Loyalty, Aristocracy, and Jingoism; The Political Destiny of Canada; Canada and the Canadian Question; William Lloyd Garrison: a Biographical Essay; A Trip to England; History of the United States; Oxford and Her Colleges; Bay Leaves: Translations from the Latin Poets; Specimens of Greek Tragedy; Essays on Questions of the Day; Guesses at the Riddle of Existence; The United Kingdom; Shakespeare: The Man; Commonwealth or Empire; In the Court of History; The Founder of Christendom; Lines of Religious Inquiry; My Memory of Gladstone; Labor and Capital*, etc. He died in 1910 leaving the bulk of his fortune to Cornell.

Smith, Hoke, United States senator; born at Newton, North Carolina, 1855; educated in preparatory school conducted by his father; moved to Georgia, 1872; admitted to bar, 1873; practiced at Atlanta, Georgia, 1873–1909; delegate to democratic national convention, 1892; secretary of the interior, 1893–96; governor of Georgia, 1907–09; reëlected governor for term, 1911–13; resigned as governor, 1911, to become United States senator.

Smith, Captain John, English adventurer and colonist, founder of Virginia, was born in Lincolnshire, England, in 1580. He traveled in France and Holland, and, when on his way to join the Christian army fighting against the Turks in Hungary, was robbed by four adventurers. He joined a ship, half merchant and half pirate, and helped to capture a Venetian argosy. He distinguished himself in the service of Ferdinand, duke of Austria; was next sold as a slave, but escaped and traveled through Germany, France, Spain, and Morocco. In 1606 he sailed with an expedition of three vessels and one hundred five men to found a colony in Virginia. On the way out he was accused, by the leaders, of a conspiracy to make himself king of Virginia, and was kept a prisoner on the voyage. Jamestown was founded on the James river in May, 1607. Smith, after being tried and acquitted, was made a member of the council, and was the real head of the colony, saving it from destruction. On one of his journeys into the country for corn he was captured by the Indians, under the chief Powhatan, and his life saved by the chief's daughter Pocahontas. On his return to Jamestown he found the colony reduced to about forty men, who were anxious to return to England, but were induced by Smith to remain until others arrived. He then explored the coasts of the Chesapeake bay in two voyages, and made a map of the country. He was superseded in 1609 as governor of the colony by Lord Delaware, and returned to England. In 1614 he explored the coasts of New England, and undertook the founding of a colony in New England in 1615, but his vessel was captured by a French war ship, and he was carried to La Rochelle. After his escape, he wrote an account of his voyages to New England. He wrote also *General Historie of Virginia, New England and the Summer Isles*, and the *True Travels, Adventures, and Observations of Captain John Smith*. Died, 1631.

Smith, John Walter, United States senator, was born at Snow Hill, Maryland, 1845. He was educated by private tutors and at Washington academy, and began a business career at the age of eighteen. He has at present large lumber interests, and is a director in many business and financial institutions. He was a member of the state senate, Maryland, 1889–99; president of state senate, 1894; member of the fifty-sixth congress; governor of Maryland, 1900–04; United States senator for the term 1909–15.

Smith, Lyman Cornelius, manufacturer, was born in Connecticut, 1850, and educated in the public and state normal schools. Removed to New York, 1872, and engaged in commission and then in lumber business. From 1877 to 1890 he was engaged in the manufacture of breech-loading firearms. Began the manufacture of typewriters in 1886; organized the Smith Premier typewriter company, of which he was president, 1890; sold out to Union typewriter company, becoming its vice-president. He resigned in 1903, and with his brothers organized L. C. Smith and Brothers typewriter company. He was president of Hudson Portland cement company, National bank of Syracuse, Rochester, Syracuse and Eastern railway. In 1900 he gave to Syracuse university the Lyman Cornelius Smith college of applied science. Died, 1910.

Smith, Munroe, American educator, was born in Brooklyn, N. Y., 1854. He graduated at Amherst college, 1874; Columbia law school, 1877; J. U. D., Göttingen, 1880; LL. D., Columbia, 1904. He was instructor, 1880–83, adjunct professor of history, 1883–91, and professor of Roman law and comparative jurisprudence, since 1891, at Columbia; lecturer on Roman law, at Georgetown law school, Washington, since 1901. Author: *Bismarck and German Unity; Selections from Cicero;* and many legal articles in Harper's *Classical Dictionary*, Lalor's *Cyclopædia of Political Science*, the *Universal Cyclopædia*, the *International Cyclopædia*, etc.

Smith, Sydney, English clergyman and essayist, was born at Woodford, England, 1771. He graduated from Oxford, and entered the church; in 1802 resided in Edinburgh, and joined Brougham, Jeffrey, and others, in establishing the *Edinburgh Review*, of which he was the first editor. In 1803 he removed to London, where, between 1804 and 1806, he delivered a course of *Lectures on Moral Philosophy* at the royal institution. In 1807-08 he published *Letters on the Subject of the Catholics to my Brother Abraham who Lives in the Country, by Peter Plymley*, which had an immense success; and, in the following years, a number of political speeches and pamphlets, all inspired by the same humor, force of argument, and expression. From 1831 until his death in 1845 he was a canon of St. Paul's, London. He was a universal favorite in society and was distinguished for brilliant wit and his graceful and forcible English.

Smith, William Alden, lawyer, United States senator, was born at Dowagiac, Mich., 1859. He received a common school education; removed with parents to Grand Rapids, 1872; was a newsboy and messenger boy in Western Union telegraph office; appointed page in the Michigan house of representatives, 1879; studied law, and was admitted to the bar, 1883; A. M., Dartmouth, 1901. He is president of the *Grand Rapids Herald;* was a member of congress, 1895–1907, fifth Michigan district; and was elected United States senator for terms, 1907–13 and 1913–19.

Smith, William Robertson, British theologian and orientalist, was born at Keig, Scotland, 1846, and graduated at Aberdeen in 1865. He afterward studied theology at Edinburgh, Bonn, and Göttingen; and in 1870 became professor of Hebrew and old testament exegesis in the Free Church college, Aberdeen. In consequence of his article on the *Hebrew Language and Literature,* in the *Encyclopædia Britannica,* he was removed from his chair in 1881. He delivered in Edinburgh and Glasgow in 1880-81-82 two series of lectures, substantially republished in *The Old Testament in the Jewish Church;* and *The Prophets of Israel.* In 1881 he became associated with Professor Baynes in the editorship of the *Encyclopædia Britannica,* and in 1887 succeeded him as editor-in-chief. At Cambridge he was successively Lord Almoner's professor of Arabic in 1883, university librarian, 1886, and Adams professor of Arabic, 1889. His *Kinship and Marriage in Early Arabia* was published in 1885, *Religion of the Semites* in 1889. He died at Cambridge, 1894.

Smollett, Tobias George, English novelist, was born, 1721. He was educated at the university of Glasgow, and was afterward apprenticed to a surgeon. About 1740 he went to London and accepted the post of surgeon's-mate in the navy, and, in 1741, was present at the siege of Cartagena. In 1744 he returned to England, and in 1748 produced his *Roderick Random,* which was read with the utmost avidity. In 1751 appeared *Peregrine Pickle,* a more ambitious and not less successful work; and in 1753 *Ferdinand Count Fatham,* an inferior production, though containing scenes of striking adventure and eloquent description. He next translated *Don Quixote,* then undertook the editorship of *The Critical Review,* which was the most unfortunate of all his engagements, and involved him in endless quarrels and personalities. In 1758 he published his *History of England,* four volumes quarto, which was begun and completed in fourteen months. Though superficial and inaccurate, this history has passages of fine animated writing and masterly delineation of character. Another novel appeared in 1760-61, *The Adventures of Sir Launcelot Greaves;* in 1766 two volumes of *Travels in France and Italy;* in 1769 *The Adventures of an Atom,* a political satire unworthy of its author; and in 1771 *The Expedition of Humphrey Clinker,* the best of all his novels, and in the opinion of Thackeray one of the very best in the whole range of imaginative literature. Died at Leghorn, 1771.

Smoot, Reed, United States senator, banker, Mormon apostle, was born at Salt Lake city, 1862. He graduated at Brigham Young academy, Provo, Utah, 1879; is president of the Provo commercial and savings bank, Smoot investment company, Smoot drug company, The Electric company, Provo, Utah; director of the following Salt Lake corporations: Zion's coöperative mercantile company, Deseret national bank, and the Deseret savings bank. He was appointed one of the presidency of the Utah stake of the church of Jesus Christ of Latter Day Saints, 1895, and apostle, 1900. He was elected by Utah legislature, 1903, United States senator for term 1903–09, and reëlected for the term 1909–15.

Smyth (*smith*), **Newman,** American clergyman and author, pastor of First Congregational church, New Haven, 1882–1907, pastor emeritus, 1908; was born in Brunswick, Maine, 1843. He graduated at Bowdoin college, 1863; D. D., New York university, 1881; Yale, 1895. He was assistant teacher at the naval academy, Newport, 1863; served as lieutenant in the 16th Maine regiment, 1864-65; graduated at Andover theological seminary, 1867; was pastor of Mission chapel, Providence, R. I., 1867–70, First Congregational church, Bangor, Maine, 1870–75, and of the First Presbyterian church, Quincy, Ill., 1876–82. He is a member of the Yale corporation. Author: *The Religious Feeling, a Study for Faith; Old Faiths in New Light; The Orthodox Theology of To-day; The Reality of Faith; The Morality of the Old Testament; Christian Facts and Forces; Personal Creeds; Christian Ethics; The Place of Death in Evolution; Through Science to Faith; Passing Protestantism and Coming Catholicism; Modern Belief in Immortality,* etc.

Snorri Sturluson (*snŏr'-rē stŏŏr'-lŏŏ-sŭn*), Icelandic poet and historian, born in 1179. Tracing his descent from the kings of Norway, he early turned his attention to the history of their doings, and made a collection of sagas entitled the *Heimskringla,* or the "Ring of the World," in which are interspersed songs of his own composing. It contains a record of the Norwegian kings from the earliest time to the death of Magnus Erlingsson, in 1177, and was first printed in 1697. It has been translated into several languages. Snorri became chief judge of Iceland, but his ambitious and intriguing character led to his assassination in 1241. His name is also connected with the prose *Edda.*

Snow, Francis Huntington, American educator, was born at Fitchburg, Mass., 1840. He graduated at Williams college, 1862, Ph. D., 1881; graduated at Andover theological seminary, 1866; LL. D., Princeton, 1890. He was professor of mathematics and natural science, 1866–70, professor of natural history, 1870–89, president of the faculties, 1889-90, chancellor, 1890–1901, and professor of organic evolution, systematic entomology and meteorology, 1901–08, university of Kansas. He conducted twenty-six expeditions to Kansas, Colorado, New Mexico, Texas, and Arizona, making the Kansas university collection of 22,000 species of insects one of the largest in the United States. Died, 1908.

Snyders, or **Sneyders, Francis,** Belgian artist, celebrated as an animal painter, was born at Antwerp, 1579. Originally he confined himself exclusively to painting fruits, and worked with Rubens. For Philip III. of Spain he executed several hunting and battle pieces. The best specimens of his work are contained in the galleries of Vienna, Munich, and Dresden. Died at Antwerp, 1657.

Sobieski (*sō-byĕs'-kē*). See **John III.,** king of Poland.

Socinus (*sō-sī'-nŭs*), **Faustus,** Italian theologian, was born at Siena, Italy, 1539. After spending twelve years as an attendant upon the luxurious court of Florence, he resolved to be a religious reformer, and in 1574 took up his residence at Basel, where he busied himself in elaborating into a system the scattered hints and views in the writings of his uncle. In 1577 he appeared in open debate, maintaining that the Trinity was a pagan doctrine, and that Christ was a created and inferior being. His efforts being unsuccessful, he passed into Poland, where the anti-Trinitarian party had gained a strong foothold. His works, contained in the first two volumes of the *Bibliotheca Fratrum Polonorum*, consist of theological tracts, expositions of scripture, and polemical treatises, with a great number of letters. The Socinians were long a powerful religious body in Poland, Hungary, and Transylvania; their peculiar catechism is known as Racovian from its place of publication, Raków in Poland. He died near Cracow, 1604.

Socrates (*sŏk'-rȧ-tēz*). See page 254.

Solomon, king of Israel, about 993–953 B. C., was the son of David and Bathsheba, and was appointed by David to be his successor in preference to his elder brothers. By his remarkable judicial decisions and his completion of the political institutions of David, Solomon gained the respect and admiration of his people; while by the building of the temple, which gave to the Hebrew worship a magnificence it had not hitherto possessed, he bound the nation more strongly to his throne. The wealth of Solomon, accumulated by a prudent use of the treasures inherited from his father, by successful commerce, by a careful administration of the royal revenues, and by an increase of taxes enabled him to meet the expenses of erecting the temple, building palaces, cities, and fortifications, and of supporting the extravagances of a luxurious court. Fortune long seemed to favor this great king, Israel scarcely perceiving that he was continually becoming more despotic. Contrary to the laws of Moses, he admitted foreign women to his harem; and from love of them he was weak enough in his old age to permit the free practice of their idolatrous worship and even to take part in it himself. Toward the close of his reign troubles arose in consequence of these delinquencies, and the growing discontent, coming to a head after his death, resulted in the division of the kingdom, which his feeble son Rehoboam could not prevent. The forty years' reign of Solomon is still celebrated among the Jews for its splendor and its happy tranquility, as one of the brightest periods of their history. The writings attributed to Solomon are *The Book of Proverbs*, *Ecclesiastes*, and the *Song of Solomon*, with the apocryphal book the *Wisdom of Solomon*.

Solon (*sō'-lun*), famous legislator of Athens, and one of the seven sages of Greece, was born about 638 B. C., at Salamis, of an ancient family. He acquired fortune by commerce, and knowledge by his visits to foreign parts. He then directed his attention to state affairs. After having enhanced the glory of his country by recovering Salamis, he refused the sovereignty of Athens, but accepted the archonship. As archon, he framed a new code of laws, and, having obtained from the citizens an oath that they would observe them for ten years, he departed from Greece, and visited Egypt and Cyprus, and, perhaps, Lydia. On his return he found the tyranny of Pisistratus established, and he withdrew to Cyprus, where he is said to have died at the age of eighty, about 559 B. C.

Solyman, or Soliman II., surnamed The Magnificent, greatest of the Turkish sultans, was born about 1496, and succeeded in 1520 his father Selim I., who had carefully initiated him into the Ottoman policy. At the commencement of his reign he removed from office all who were unfit for the proper discharge of their duties. After having suppressed the revolt of the governor of Syria, he exterminated the Egyptian Mamelukes, and concluded a treaty with Persia. He drove the knights of St. John from Rhodes, 1522; and for three years following devoted himself to improvements in the administration. In 1535 he concluded with Francis I. the famous treaty which opened the commerce of the Levant to the French flag alone. By 1541 the long and desultory contest between the Turks and the imperialists for Hungary was ended in favor of the former, who took complete possession of the country. After this the alliance between the French and Turks began to bear fruit; the combined fleets ravaged the Italian coasts, and pillaged Nice, 1542, but peace was again restored with Germany in 1547. A brilliant naval victory, 1561, over the knights of Malta and their allies, the Spaniards, and an expedition to Hungary, 1566, were the chief events of the remainder of his reign. Died, 1566.

Somerville, Mary Fairfax, Scotch scientist, was born at Jedburgh, Scotland, 1780. She was a daughter of Admiral Sir William Fairfax, and was married first to Mr. Greig, a commissioner in the Russian navy, and afterward to Dr. William Somerville. In 1812 she attracted attention by some experiments on the violet rays of the solar spectrum, the results being published in the *Philosophical Transactions* of 1826. Subsequently she adapted Laplace's work on *Celestial Mechanics*, under the title, *Celestial Mechanism of the Heavens*, in 1830. She was granted a pension in 1835 and made a member of the royal astronomical society of England and of many foreign societies. When ninety-one years old she still spent five hours a day in mathematical studies. Other works published by her are *Connection of the Physical Sciences; Physical Geography;* and *Molecular and Microscopic Science*. She died at Naples, 1872.

Sonnino (*sōn-nē'-nō*), **Baron Sidney,** Italian statesman, was born at Florence, 1847, and educated at the university of Pisa, where he took his law degree in 1865. He afterward entered the diplomatic service, and was attached to the legations at Madrid, Vienna, Berlin, and Paris. He then turned to a study of the agrarian and social problems of southern Italy, published *I Contadini in Sicilia* and *La Mezzadria in Toscana*, and established the paper *Rassegna*. He was elected deputy for San Casciano, 1880, and has sat for it ever since. In 1887 he joined the Crispi administration as under secretary for the treasury, and first as finance minister, 1893, and then as minister of the treasury, he worked a great reform in the country's finances. After Crispi's fall in 1896, he became one of the opposition leaders, and was prime minister of Italy, 1906, and again, 1909–10.

Sontag (*zōn'-tä*ᴋ), **Henrietta,** German soprano singer, was born in Coblentz, Prussia, 1806. She was the favorite of the Berlin stage before she was eighteen; soon rose to a foremost place among European vocalists; and in 1828 married Count Rossi, a Piedmontese nobleman, and left the theater. But she never lost her love for her art, and continued to make progress as an artist in the midst of all the enjoyments of high life. After a happy union of nearly twenty years her husband lost his fortune. Without hesitation she resolved to have recourse to her art. She sang for several seasons in Europe, and came to the United States in 1852. After a brilliant and successful tour through the Union, she accepted a tempting offer from Mexico, where she died of cholera, 1854.

Sophocles (*sŏf'-ō-klēz*). See page 14.

Sorley, William Ritchie, British educator and philosophical writer, Knightbridge professor of moral philosophy, university of Cambridge, since 1900, was born at Selkirk, 1855. He was educated at Edinburgh, and Trinity college, Cambridge. He was deputy for the professor of philosophy of mind and logic, University college, London, 1886-87; professor of logic and philosophy at University college, Cardiff, 1888–94; and professor of moral philosophy, Aberdeen, 1894–1900. Author: *On the Ethics of Naturalism.* Edited: *Development of Modern Philosophy,* with other lectures by the late Professor Adamson; *Recent Tendencies in Ethics,* etc.

Sothern (*sŭᴛʜ'-ẽrn*), **Edward Hugh,** actor, was born in New Orleans, La., 1859. He received an academic education in England; studied painting in Spain; first appeared, 1879, in small part at Abbey's Park theater, New York. He later toured the United States with John McCullough; toured England, 1882-83; wrote the farce, *Whose Are They?* 1884; and played leading parts in *One of Our Girls; A Scrap of Paper; Met by Chance; Peg Woffington; The Love Chase.* He first took leading rôle, Lyceum theater, New York, 1887, as Jack Hammerton in *The Highest Bidder,* and subsequently starred with his own company in *Lord Chumley; The Maister of Woodbarrow; The Prisoner of Zenda; Under the Red Robe; An Enemy to the King; The Adventures of Lady Ursula; The Song of the Sword; A Shilling's Worth; The Sunken Bell; Hamlet; Richard Lovelace; If I Were King,* etc. He is now co-star with Julia Marlowe.

Soult (*so͞olt*), **Nicholas Jean de Dieu,** duke of Dalmatia and marshal of France, was born at Saint-Amans-la-Bastide in 1769. In 1785 he entered the army; was appointed general of division, 1799, and put under Masséna, in Switzerland and Italy; became an ardent Napoleonist, and received the baton of marshal of France in 1804. He achieved brilliant success in the campaign against the Austrians, closed by the battle of Austerlitz, which he decided by piercing the Russian center. He took part in the Russian campaign of 1806-07, after which he was appointed governor of Berlin, and created duke of Dalmatia. In 1809 he became commander-in-chief in Spain, gained a brilliant victory at Ocaña, and overran and subdued Andalusia. With his usual suppleness of character he became an ardent royalist after the abdication of Napoleon; but on the return of the latter from Elba he abandoned Louis XVIII., and became major-general of the imperial army. After Waterloo he rallied the army at Laon, and on July 3d, at the council of war, coincided with Carnot as to the uselessness of further resistance. In 1838 he was embassador to England, in 1845 retired from active duty, and was made marshal-general of France in 1847. He died, 1851.

Sousa (*so͞o'-zȧ*), **John Philip,** American musician, was born at Washington, D.C., 1854. He studied music, was a conductor at seventeen, and one of the first violins of Jacques Offenbach's orchestra when the latter was in the United States. He was then music director of the United States marine corps, 1880–92, and since 1892 director of Sousa's band. He toured in Europe, 1900, 1901, 1903, 1905, and received many decorations. Composer: "Washington Post"; "Liberty Bell"; "Manhattan Beach"; "High School Cadets"; "Semper Fidelis"; "The Gladiator"; "Stars and Stripes Forever"; "Invincible Eagle"; "Hail to the Spirit of Liberty"; "Hands Across the Sea"; "The Charlatan"; "The Bride-Elect"; "El Capitan"; "King Cotton"; "The Diplomat"; "The Free Lance"; "Last Days of Pompeii"; "Sheridan's Ride"; "Three Quotations"; "At the King's Court"; "Looking Upward"; "The Chariot Race"; and the operas: *The Smugglers; Desire; The Queen of Hearts; El Capitan; The Bride-Elect; The Charlatan; Chris and the Wonderful Lamp; The Free Lance,* etc. Author: *The Fifth String; Pipetown Sandy,* etc.

Southey, Robert, English poet and writer, was born, 1774, at Bristol, England. He was educated at Oxford, but left without a degree in 1794, and during the next two years traveled in Spain and Portugal. In 1801 he accepted a position as secretary to Corry, chancellor of the exchequer for Ireland, but soon resigned it, and finally betook himself to literature as his sole source of livelihood. In 1804 he settled at Greta Hall, in Cumberland, where he spent the remainder of his life, happy in his family relations and his unremitting daily round of congenial, though continuous, toil. In addition to his formal publications he wrote largely for various periodicals, notably for the *Quarterly Review,* to which, from its establishment in 1809, he was a most constant and valuable contributor. In 1813, on the death of Pye, he succeeded him as poet-laureate. His chief poetical works are *Madoc; Thalaba; The Curse of Kehama;* and *Roderick.* As a prose writer he ranks high; his style is easy, lucid, agreeable, best represented by his *Letters from England by Don Manuel Alvarez* and *The Doctor.* Of all his writings his *Life of Nelson* seems most likely to survive as a classic. Other excellent biographies are those of the poet Cowper, of Bunyan, and of Wesley. He died, 1843.

Spargo, John, socialist, author, was born at Stithians, Cornwall, England, 1876. He was educated in the public schools and through the Oxford and Cambridge university extension courses, and became identified with socialist cause in England at eighteen. He publicly opposed the Boer war; came to the United States, 1901, and has been active as socialistic lecturer, writer, and worker. He was one of the founders of the Prospect House social settlement, Yonkers, N. Y. Author: *The Bitter Cry of the Children; Socialism, a Study and Interpretation of Socialist Principles; The Socialists, Who They Are and What They Stand For; Underfed School Children; Forces That Make for Socialism in America; Capitalist and Laborer; Not Guilty,* a drama; and many pamphlets, brochures, and magazine articles on social and economic questions.

Sparks, Edwin Erle, American educator, historian, president of Pennsylvania state college since 1908, was born in Licking county, Ohio, 1860. He graduated from the Ohio state university, 1884; Ph. D., university of Chicago; LL. D., Lehigh university. He was instructor in the Ohio state university, 1884-85; professor in Pennsylvania state college, 1890–95; lecturer for the American society for university extension, 1892–95; lecturer, instructor, and later professor of American history, university of Chicago, 1895–1908; dean of University college, 1905-06. He is a member of the American historical association; Illinois historical society; and councilor of the American institute of civics. Author: *Expansion of the American People; The Men Who Made the Nation; Formative Incidents in American Diplomacy; The United States of America; Foundations of National Development,* etc.

Sparks, Jared, American historian, was born at Willington, Conn., 1789. He graduated at Harvard, in 1815; settled as a Unitarian minister at Baltimore, and finally became editor of the *North American Review.* He was ten years a professor of history at Harvard, and for four years its president. His writings include *Life of John Ledyard; Life of Gouverneur Morris;* and *Library of American Biography,* in 10 vols. He edited the *Works of Benjamin Franklin; Writings of George Washington; Correspondence of the American Revolution,* etc. He died at Cambridge, Mass., 1866.

Speer, Robert Elliott, secretary of Presbyterian board of foreign missions since 1891, was born at Huntingdon, Pa., 1867. He graduated at

Princeton, 1889, and studied one year at Princeton theological seminary. He made a tour of visitation of Christian missions in Persia, India, China, Korea, Japan, in 1896-97, and was traveling secretary of the volunteer movement for foreign missions, 1889-90. Author: *The Man Christ Jesus; The Man Paul; Missions and Politics in Asia; A Memorial of a True Life; Remember Jesus Christ; Studies in the Book of Acts; Studies in the Gospel of Luke; Christ and Life; The Principles of Jesus; Missionary Principles and Practice; Presbyterian Foreign Missions; Missions and Modern History; The Marks of a Man*, etc.

Spencer, Herbert. See page 318.

Spenser, Edmund, noted English poet, was born in London, about 1552. He was of humble origin, studied at Pembroke college, Cambridge, and was brought under the notice of Queen Elizabeth by the earl of Leicester. In 1579 he published *The Shepheard's Calender*, sounding the note of the Elizabethan outburst. Through the influence of Leicester he was then appointed chief secretary to Lord Grey de Wilton, the lord-lieutenant of Ireland; and Queen Elizabeth conferred on him an estate at Kilcolman, near Cork. It was while he was at Kilcolman that he wrote *The Faëry Queene*, his greatest work. The first part was published in 1589-90, the second part about six years later; and on the publication of the first part the queen conferred on the poet a pension of fifty pounds a year. In 1598 a rebellion broke out; the castle of Kilcolman was burned, an infant child of the poet perished in the flames; and Spenser returned to London, impoverished and broken-hearted, to die within three months after his arrival. He was buried near Chaucer in Westminster abbey. Spenser was also the author of *Tears of the Muses; Amoretti; Epithalamion; Astrophel; Hymns and Visions;* and some other pieces.

Speyer (*spīr*), **James,** American banker, was born in New York, 1861; educated at Frankfort-on-the-Main, Germany; entered his family's banking house in Frankfort-on-the-Main at age of twenty-two. He was later transferred to the Paris and London branches to receive thorough business education before returning to take charge of New York house, and is now senior member of the Speyer banking houses. He was one of the founders and is treasurer of the Provident loan society, which lends money to needy people on personal property at legal rates of interest; is trustee of the Union trust company, Central trust company, Girard trust company of Philadelphia, German savings bank, etc.; director of many railway and other corporations; member of the New York chamber of commerce.

Spinola (*spē-nō'-lä*), **Ambrosio, Marquis of,** Spanish general under Philip II. of Spain, was born at Genoa, Italy, 1569. With a following of 9,000, maintained at his own expense, he took Ostend after a resistance of three years. He was then appointed commander-in-chief, in which capacity he maintained a long struggle with Prince Maurice of Nassau, which terminated only with the death of the latter. His services on behalf of Spain, in the interest of which he spent his fortune, were never acknowledged. Died, 1630.

Spinoza (*spĭ-nō'-zȧ*), **Baruch,** or **Benedict.** See page 289.

Spohr (*shpōr*), **Ludwig,** German composer and violinist, was born at Brunswick, 1784. At the age of twelve he played a violin concerto of his own at the court of Brunswick; and at thirteen he obtained an appointment as chamber-musician to the duke of Hesse-Cassel. In 1804 he became music director at the court of Saxe-Gotha, and held afterward for several years the office of music director of a theater in Vienna. In 1823 he became chapelmaster at the court of Hesse-Cassel. His musical works include the operas, *Faust; Jessonda; Zemira und Azor; Der Zweikampf der Geliebten*, etc.; the oratorios, *Die Letzten Dinge; Des Heilands letzte Stunden; Der Fall Babylons;* and many instrumental and other pieces. He wrote *The Violin School*, a standard book of instruction. As a violinist he has seldom been surpassed. He died, 1859.

Spooner, John Coit, American lawyer, ex-United States senator, was born at Lawrenceburg, Ind., 1843, and removed to Madison, Wis., 1859. He graduated at the university of Wisconsin, 1864; LL. D., Wisconsin, etc. He served as private in company A, 40th Wisconsin infantry; captain and brevet major 50th Wisconsin infantry; and later as private and military secretary to Governor Lucius Fairchild, of Wisconsin. He was admitted to the bar, 1867; was assistant attorney-general of Wisconsin, and in general practice at Madison, 1867–70; practiced at Hudson, Wisconsin, 1870–84; was regent of the university of Wisconsin, 1882–85; member of the Wisconsin assembly, 1872; United States senator, 1885–91, and 1897–1907; resigned in 1907 to resume the practice of law at Madison, Wisconsin, and New York city. He was regarded as one of the ablest men in public life, and is one of the leaders of the American bar.

Spreckels, Claus, sugar refiner, was born in Lamstedt, Hanover, 1828. He came to the United States in 1846, was employed in Charleston, S. C., and New York city. He went to San Francisco in 1856, conducted a store and later a brewery. In 1863 he established the Bay sugar refinery, procuring his raw material from Hawaii, where he acquired vast property. He invented improved processes for refining, and owned some 1,500 acres devoted to beet-sugar, a large factory at Watsonville, Cal., and was principal owner of the Oceanic steamship company, plying between San Francisco and Honolulu. Died, 1908.

Spring-Rice, Sir Cecil Arthur, British diplomat; born, 1859; educated at Eton and at Balliol college, Oxford. Secretary at Brussels, Washington, Tokio, Berlin, and Constantinople; charge d'affaires, Teheran, 1900; British commissioner of public debt, Cairo, 1901; first secretary of embassy at St. Petersburg, 1903–05; minister and consul-general, Persia, 1906–08; envoy extraordinary and minister plenipotentiary to Sweden, 1908–12; British ambassador at Washington since 1913, succeeding the Rt. Hon. James Bryce.

Spurgeon, Charles Haddon, English preacher, was born at Kelvedon, 1834. In 1850 his sympathies drew him toward the Baptists, and, removing to Cambridge in 1851, he began to deliver cottage sermons in the neighborhood. At the age of eighteen he had charge of a small Baptist congregation in the village of Waterbeach. In 1854 he entered upon the pastorate of the New Park Street chapel, London, where his preaching proved so attractive that in two years' time the building had to be greatly enlarged. His hearers continuing to increase, the Surrey music hall was for some time engaged for his use; and finally his followers built for him the well-known London tabernacle, opened in 1861. Spurgeon continued to preach in the tabernacle every Sunday to thousands of hearers until the summer of 1891. His sermons were published weekly, and yearly volumes were issued. He also wrote *John Plowman's Talk; Morning by Morning; Evening by Evening; The Treasury of David; Lectures to My Students; The Saint and His Saviour*, etc.; and from 1865 edited a monthly magazine, *Sword and Trowel*. He died in 1892.

Squair, John, Canadian educator, professor of French, university of Toronto, was born at Bowmanville, Ontario, 1850, of Scotch parents.

He graduated from the university of Toronto, 1883, with gold medal in modern languages, and has been fellow, lecturer, associate professor and professor of French in University college, Toronto, since that time. He was lecturer in the school of pedagogy, Toronto, and examiner in French and German for the education department; has been secretary of the modern language association of Ontario; has been chairman of college and high school department of the Ontario educational association; is president of the higher education section of the Dominion educational association. He is joint author with W. H. Fraser of *French Grammar;* joint author with J. H. Cameron of *Exercises in French Prose;* and editor of several French texts for high schools and colleges.

Staël (*stäl*), **Madame de,** or **Anne Louise Germaine de Staël-Holstein,** celebrated French writer, was born in Paris, 1766, daughter of M. Necker, minister of finance under Louis XVI., and from 1786 the wife of the Baron de Staël-Holstein, who at the time of the marriage was Swedish minister in Paris. In 1788, when she was only twenty-two years of age, she published *Letters on the Works and Character of Rousseau,* which attracted considerable attention; and in 1793, having been compelled by the revolution to leave France, she published a defense of Marie Antoinette, then upon trial. In 1797 she returned to Paris, but only to find herself in conflict with Bonaparte, whom from the first she had suspected and disliked. By him she was at last once more exiled, and traveled through Italy and Germany, making at Weimar the acquaintance of Goethe, Schiller, and other eminent men. In Italy she gathered the materials for her novel of *Corinne;* and in Germany she gathered the materials for her celebrated work entitled *De d'Allemagne,* a description of the habits, literature, and political tendencies of the German people, which was printed in Paris in 1810, but by the order of Bonaparte was immediately suppressed. Soon afterward she visited England, where she wrote her *Ten Years of Exile,* an impassioned denunciation of Bonaparte and his arbitrary rule. After the fall of the empire she returned to Paris, but never again interfered in politics. She had now been several years a widow, and about this time married M. de Rocca, a member of an old Genoese family. From her former husband she had been separated for many years before his decease. Her last work was *Thoughts on the French Revolution,* which was not published until after her death. Besides the works above named, she was the author of a novel entitled *Delphine; Literature Considered in its Relation to Social Institutions;* and of many other publications. She died in 1817.

Stafford, Wendell Phillips, American jurist and publicist, was born at Barre, Vt., 1861. He graduated at St. Johnsbury academy, 1880; graduated from the law department of Boston university, 1883; practiced at St. Johnsbury; was president of the Vermont bar association, 1898-99; represented St. Johnsbury in Vermont legislature, 1892; was reporter of the decisions of the supreme court of Vermont, from 1896 to 1900. He delivered the oration at unveiling of the statue of Robert Burns, at Barre, Vt., 1899; has lectured frequently in Vermont, and occasionally in Boston, New York, and Washington. He was judge of the supreme court, Vermont, 1900–04; associate justice of the supreme court of the District of Columbia since 1904; professor of equity jurisprudence in the George Washington university since 1908. Author: *North Flowers,* poems; and a contributor of poems and articles to magazines.

Stahl (*shtäl*), **Georg Ernst,** German physician and chemist, was born at Anspach, 1660. He studied medicine at Jena, and was called, in 1694, to the chair of medicine, anatomy, and chemistry in the newly founded university of Halle, whence he removed to Berlin in 1716, where he was appointed physician to the king of Prussia. He wrote a system of medicine, *Theoria Medica vera; Zymotechnia Fundamentalis; Fermentationis Theoria Generalis,* etc. His system of medicine is founded upon the supposition of the existence of a mysterious force residing in, but independent of, and superior to matter. This force, the *anima,* or soul, not only forms the body, but directs it in the exercise of all its functions, and this, too, sometimes unconsciously; though the way in which this influence is exercised he does not explain. His system of therapeutics corresponded with his pathological principles, and was confined mostly to bleeding and the use of mild laxatives. Died in Berlin, 1734.

Standish, Miles, early New England colonist, was born in Lancashire, England, about 1584. He served in the army in the Netherlands and sailed with the pilgrims in the *Mayflower* in 1620, though not a member of the Leyden congregation. On reaching Massachusetts he was chosen captain by the pilgrims, and commanded in expeditions against the savages. He settled finally at Duxbury, Mass., where he died, 1656. A monument, 100 feet high, crowned by a statue, has been built to his memory at Duxbury. The story of his unsuccessful effort to secure a wife is told by Longfellow in his *Courtship of Miles Standish.*

Stanford, Leland, American capitalist and philanthropist, was born at Watervliet, N. Y., 1824. Early in life he studied law and was admitted to the New York bar; but in 1849, attracted by the gold discoveries in California, he proceeded there and engaged in gold mining and in business in San Francisco. He was one of the organizers of the Central Pacific railroad company, and entering political life was republican governor of California, 1861–63; and from 1885 to 1893, United States senator from California. Out of his large fortune he gave property to the value of $20,000,000 to found, in memory of a deceased son, a university at Palo Alto, to be known as the Leland Stanford Junior university. He died at Palo Alto, California, 1893.

Stanley, Arthur Penrhyn, English scholar and divine, was born at Alderley, England, 1815. He graduated at Oxford, was tutor there, 1841–51, and in the latter year was appointed canon of Canterbury. From 1856 to 1863 he was professor of ecclesiastical history at Oxford, canon of Christ Church, and chaplain to the bishop of London. In 1864 he succeeded Archbishop Trench as dean of Westminster. He was also chaplain to the prince of Wales, and chaplain-in-ordinary to the queen. He was elected lord rector of St. Andrews university in 1874. Stanley was one of the most accomplished and liberal theologians of his age, and may be regarded as the leader of the "broad church" party. He traveled widely in Egypt, Palestine, Russia, and America. His principal writings are: *Life of Dr. Arnold; Sermons and Essays on the Apostolical Age; Memoir of Bishop Stanley; The Epistles to the Corinthians; Sinai and Palestine; The Unity of Evangelical and Apostolical Teaching; Lectures on the Eastern Church; Lectures on the Jewish Church; Historical Memorials of Westminster Abbey,* etc. Died, 1881.

Stanley, Sir Henry Morton, African explorer, was born near Denbigh, Wales, in 1840. He was of obscure parentage, the name Stanley being assumed to honor a benefactor, in place of his own name, John Rowlands. Stanley went to California at an early age, served first in the confederate army, then in the federal navy during the civil war, and subsequently went to Turkey as a newspaper correspondent. When the English expedition was sent against King Theodore of Abyssinia in 1867, he accompanied it as commissioner of the New York *Herald*, and made his reputation as a correspondent by sending an account of Lord Napier's victory to London before the official dispatches arrived. In 1868 he went to Spain to report the Carlist war for the same paper. He was called away from there in 1869, to go in search of Dr. David Livingstone in Africa, from whom no news had been received for more than two years. He reached Zanzibar early in 1871; there organized a large expedition, and found Livingstone, November 10, 1871. After remaining with the veteran Scotch missionary and explorer four months he returned, Livingstone refusing to give up his enterprise until he had completed his work. Stanley arrived at Zanzibar in 1872. In 1874 he set out on a second African expedition for the *Herald* and London *Daily Telegraph*. He reached Victoria Nyanza in February, 1875; was the first to circumnavigate Victoria lake, and discovered the Shimeeyu river; and reached England again in February, 1878. Then came the Belgian enterprise, out of which was developed the free state of Congo, with Stanley as its conductor, with large means at his disposal. Near the close of 1886 Stanley, under the auspices of the Egyptian government and of English societies and individuals, undertook an expedition for the relief of Emin Pasha, who had of his own will continued to exercise the functions of Egyptian governor of the equatorial province after the Soudan was abandoned. For this purpose he left England in 1887, and returned in 1890, after escorting Emin Bey and a large troop of followers from the interior to the coast. His last journey in Africa lasted 1,012 days, of which hardly twenty were devoid of perils and tragic incident. The cost of the expedition was $150,000. He wrote *How I Found Livingstone; Through the Dark Continent; Congo and the Founding of its Free State;* and *In Darkest Africa*. He was made a D. C. L. by Oxford university in 1890, and in 1890-91 made a lecturing tour of the United States. He was a member of parliament, 1895–1900, and was knighted, 1899. He died, 1904.

Stanton, Edwin McMasters, American statesman, was born in Steubenville, Ohio, in 1814. He practiced law with success in his native town until 1847, when he settled in Pittsburg, Pa., and there became leader of the bar. In 1857 he took up his abode in Washington, in 1860 was made attorney-general of the United States, and, in 1862, secretary of war. This arduous post he filled throughout the civil war with conspicuous energy, industry, and ability. He retained office after the death of President Lincoln until 1867, when he was suspended by President Johnson, who appointed General Grant in his place *ad interim*. The latter, however, held the appointment only a few months when Stanton was reinstated by the senate in January, 1868. In May he definitely retired from the secretaryship. In December, 1869, he was appointed an associate justice of the supreme court of the United States, and died during the same month.

Stanton, Elizabeth Cady, reformer and suffragist, was born at Johnstown, N. Y., 1815. She married Henry B. Stanton, an anti-slavery reformer. She signed the call for the first woman's rights convention, at Seneca Falls, 1848, and became president of the national woman's suffrage association there formed, retaining the office until 1893. She devoted most of her time from 1848 to traveling and lecturing in behalf of woman's rights, and was the author of *A History of Woman Suffrage* and an autobiography. Died, 1902.

Stark, John, American soldier, was born at Londonderry, N. H., 1728. He served in the French and Indian war and at Ticonderoga in 1758. At Bunker Hill he was colonel of a regiment which he had enlisted; was at the front in the attack on Trenton, and in the battle of Princeton. He raised a new regiment in 1777, and was given command of the New Hampshire troops sent against the British troops from Canada. On August 16, 1777, he fought the battle of Bennington, which brought him the thanks of congress and the rank of general. With a new force recruited by him in New Hampshire he cut off Burgoyne's retreat from Saratoga, and, after serving in Rhode Island and New Jersey, had charge in 1781 of the northern department, with headquarters at Saratoga. He died, 1822, the last but one of generals of revolutionary army.

Stead, William Thomas, English journalist and writer, was born at Embleton, England, 1849, and educated at Wakefield. He was editor of the *Northern Echo* at Darlington, 1871–80; assistant editor of the *Pall Mall Gazette* until 1883, and editor from 1883 to 1889. In 1890 he founded the English *Review of Reviews*, and was its editor, 1890-1912. Author: *Truth About the Navy; Maiden Tribute of Modern Babylon; The Truth about Russia; The Pope and the New Era; The Story that Transformed the World; If Christ came to Chicago; The Labor War in the United States; Her Majesty the Queen; Satan's Invisible World: A Study of Despairing Democracy; The United States of Europe; Mr. Carnegie's Conundrum; Mrs. Booth, a Study; The Conference at The Hague; The Americanization of the World*, etc. He lost his life on the ill-fated Titanic, 1912.

Stedman, Edmund Clarence, American poet and critic, was born in Hartford, Conn., in 1833. He graduated at Yale, 1853; L. H. D., Columbia; LL. D., Yale. He was editor of the *Norwich Tribune*, 1852-53; *Winsted Herald*, 1854-55; on staff of *New York Tribune*, 1859–61; war correspondent for the *New York World*, 1861–63; and was a member of the New York stock exchange, 1869–1900. He delivered the initiatory course of lectures of the Turnbull chair of poetry, at Johns Hopkins, later repeated at Columbia and university of Pennsylvania. Author: *Poems Lyric and Idyllic; Alice of Monmouth — an Idyl of the Great War; The Blameless Prince; Poetical Works; Hawthorne, and Other Poems; Lyrics and Idyls, with Other Poems; Mater Coronata; Victorian Poets; Poets of America; The Nature and Elements of Poetry*, etc. Editor: *Cameos from the Poems of Walter Savage Landor*, with T. B. Aldrich; *Poems of Austin Dobson; A Library of American Literature*, with Ellen M. Hutchinson; *The Works of Edgar Allan Poe*, with Professor G. E. Woodbury; *A Victorian Anthology; An American Anthology;* co-editor, *History of New York Stock Exchange*, etc. Died in New York in 1908.

Steele, Sir Richard, British man of letters, was born in Dublin, 1672. He was educated at the Charterhouse with Addison, and at Oxford. Leaving college without taking a degree, he entered the army and rose to the rank of captain. In 1702 he produced a comedy, *The Funeral, or Grief a la Mode;* in 1703, *The Tender Husband*, and in 1704, *The Lying Lover*. In 1709 he founded the *Tatler*, a periodical published thrice a week, containing short essays on life and manners, which was succeeded by *The Spectator*, a daily literary journal of a higher tone and character. He also founded, in 1713, *The Guardian*. He was then elected to parliament, was expelled for libel, but afterward reinstated. In 1722 he produced his successful comedy, *The Conscious Lovers*. The last three years of his life were spent in retirement in Wales. He died, 1729. His essays have eclipsed his dramas.

Steen (*stān*), **Jan**, celebrated Dutch painter, was born at Leyden, 1626. He became a pupil of Van Goyen, whose daughter Margaret he married. The paintings "Feast of St. Nicholas," "Human Life," "Marriage Feast," etc., established his reputation, and as an artist of the Dutch school he ranks high. His works are now much valued. It was in homely and domestic scenes that his genius truly exhibited itself. He died, 1679.

Stein (*shtīn*), **Heinrich Friedrich Carl, Baron von**, Prussian statesman, was born at Nassau, 1757. He entered the service of Prussia in 1780, and became president of the Westphalian chambers, 1796. In 1804 he was summoned to take charge of the Prussian excise, customs, manufactures, and trade, but was unable then to modify the traditional methods, and resigned in 1807. After the treaty of Tilsit, Frederick William III. had no alternative but to recall Stein, who in barely a year produced such changes as laid the foundations of Prussia's subsequent greatness. He abolished the last relics of serfdom, did away with the privileges of caste, freed land from the shackles of feudalism, created peasant proprietors, extirpated monopolies and hindrances to free trade, promoted municipal government, and supported Scharnhorst in his schemes of army reform. Napoleon insisted upon his dismissal, and Stein withdrew, 1808, to Austria, but not before issuing his *Political Testament*. In 1812 he went to St. Petersburg and forwarded the coalition against Napoleon. From the battle of Leipzig to the congress of Vienna he was the ruling spirit of the opposition to the emperor. He died in 1831.

Steinmetz (*shtīn'-mĕts*), **Charles Proteus**, electrician, General electric company, was born in Breslau, Germany, 1865, and educated at Breslau, Berlin, Zürich, and in Switzerland. He is the consulting engineer for the General electric company, and a leading authority in mathematics and engineering. He is professor of electrical engineering at Union university. Author of *Theory and Calculation of Alternating Current Phenomena; Theoretical Elements of Electrical Engineering.*

Stelwagon, Henry Weightman, American physician, was born at Philadelphia, 1853. He graduated at Andalusia college, Pennsylvania, 1872; university of Pennsylvania, M. D., Ph. D., 1875. He was resident physician to Philadelphia hospital, 1875-76; student at the hospitals of Vienna and Berlin, 1876-78; physician in charge of Philadelphia dispensary for skin diseases, 1880-90; instructor in dermatology, university of Pennsylvania, 1885-90; was associated in professional partnership with Professor Duhring, 1885-90; dermatologist to Philadelphia hospital since 1888, to Northern dispensary, 1882-1900, Howard hospital, 1885-1912. He was clinical professor of dermatology, Woman's medical college, Philadelphia, 1888 – 1907, and at Jefferson medical college since 1890. Author: *Essentials of Diseases of the Skin; Treatise on Diseases of the Skin.* Translator and editor of Mracek's *Atlas of Skin Diseases;* wrote chapter on *Skin Diseases* for Pepper's *System of Medicine;* chapter on skin diseases, Wilson's *Applied Therapeutics;* and has been a contributor on dermatological subjects to a number of other medical works.

Stephen, Sir James Fitzjames, British jurist, was born at Kensington, England, 1829. He graduated at Trinity college, Cambridge, 1852; was admitted to the bar in 1854; was recorder of Newark-on-Trent, 1859-69; legal member of the viceroy of India's council, 1869-72; professor of common law at the Inns of Court, 1875-79; and judge of the high court of justice, 1879-91. On his retirement he was created a baronet. Among his works are: *General View of the Criminal Law of England; Liberty, Equality, and Fraternity; Digest of the Law of Evidence; Digest of the Criminal Law; History of the Criminal Law of England*, etc. He was an unsuccessful candidate for parliament as a moderate liberal. He died near Ipswich, 1894.

Stephen, Sir Leslie, English man of letters, was born at Kensington, 1832. He was educated at Eton, King's college, London, and at Trinity hall, Cambridge, where he was fellow and tutor. He was editor of the *Cornhill Magazine*, 1871-82, and of the first twenty-six volumes of the *Dictionary of National Biography.* His works include: *The Playground of Europe; Hours in a Library; History of English Thought in the Eighteenth Century; The English Utilitarians; Johnson; Pope; Swift; The Science of Ethics; Life of Henry Fawcett; An Agnostic's Apology; Studies of a Biographer; George Eliot;* and some lectures. He died in 1904.

Stephens, Alexander Hamilton, American statesman, was born in Georgia in 1812. He graduated at the university of Georgia, 1832; was admitted to the bar; and, in 1843, elected to congress by the whig party. He retained his seat in that body until 1859, during which period he supported the annexation of Texas, promoted the passage of the Kansas and Nebraska act of 1854, and joined the democratic party in upholding the measures of President Buchanan. In 1860 he opposed the secession of his state, but in the following year gave in his adhesion to sectional views, and was elected vice-president of the Confederate States of America. After the collapse of the latter, Stephens suffered a brief imprisonment at Fort Warren, and in 1866, after being reëlected United States senator, was not allowed to take his seat. He was, however, member of the house of representatives, 1873-82, and governor of Georgia, 1882-83. In 1869 he published *A History of the War of Secession*, and, in 1870, *A Constitutional View of the War Between the States.* Died, 1883.

Stephens, Henry Morse, British historical writer and educator, was born at Edinburgh, Scotland, 1857. He graduated at Balliol college, Oxford, 1880, M. A., 1892; was engaged in journalism, 1880-92; staff lecturer on Oxford university extension system, 1890-94. Lecturer on Indian history, Cambridge, England, 1892-94; professor of modern European and English history, Cornell university, 1894-1902; and professor of history and director of university extension at university of California since 1902. Author: *History of the French Revolution; The Story of Portugal; Albuquerque; Revolutionary Europe; Colonial Civil Service*, etc.

Stephenson, George. See page 390.

Stephenson, Isaac, United States senator, was born near Fredericton, New Brunswick, 1829. He received a common school education; moved to Wisconsin, with headquarters at Milwaukee, in 1845, and for twelve years engaged in the lumber trade at Escanaba, Mich. In 1858 he moved to Marinette, where he has led an active career as lumberman, farmer, and banker. In 1866 and 1868 he was a member of the Wisconsin legislature; was a member of the forty-eighth, forty-ninth, and fiftieth congresses; and was elected to the United States senate, 1907, to fill out the unexpired term of Hon. J. C. Spooner, resigned, and was reëlected, 1909, for the term 1909-15.

Stepniak (*styĕp-nyăk'*), pseudonym of Sergius Michaelevitch Kravtchinski, Russian revolutionary leader and writer, born, 1852. As an apostle of freedom, he was removed from his professorship at Kieff, and subsequently kept under such surveillance that he left Russia and settled, 1876, in Geneva, and then, 1885, in London. Among his works were: *Underground Russia; Russia under the Tzars; The Career of a Nihilist*, a novel; *Nihilism as it is; King Stork and King Log;* and *Russian Wit and Humor*. He was run over by a train in a London suburb, and killed, 1895.

Sternberg, George Miller, American physician, surgeon-general of the United States, 1893–1902, was born at Hartwick Seminary, Otsego county, N. Y., 1838. He graduated at the college of physicians and surgeons, New York, 1860; LL.D., Michigan, 1894, Brown, 1896. He was appointed assistant surgeon of United States army, 1861, and was steadily advanced to surgeon-general of United States in 1893. His service began in the army of the Potomac; at end of civil war he was in charge of the United States general hospital, Cleveland, Ohio; had command of medical service in the war with Spain, 1898; was member and secretary of Havana yellow fever commission, national board of health, 1879; is a member of many medical societies and was president, 1898, of the American medical association. Author: *Photo-Micrographs, and How to Make Them; Bacteria; Malaria and Malarial Diseases; Manual of Bacteriology; Text-Book of Bacteriology; Immunity, Protective Inoculations, and Serum-Therapy;* and many government reports, etc.

Sterne, Laurence, British novelist, was born at Clonmel, Ireland, 1713. He studied at Cambridge and became a clergyman. In 1759 he wrote the first two volumes of the *Life and Opinions of Tristram Shandy*, which made him famous. Its success was signal and he became the "lion" of the fashionable world. The other two volumes followed in the same year and were as heartily welcomed as the earlier ones. The rest of the work, which reached nine volumes, was written at Coxwold, where he had moved from his Yorkshire parish. *The Sentimental Journey through France and Italy*, published in 1768, was the result of a tour through those countries in 1765. He published also two volumes of sermons. His fame rests on his humor and the immortal characters of "Corporal Trim," "Yorick," and "My Uncle Tobey," found in *Tristram Shandy*. He died at London, 1768.

Steuben, Frederic William Augustus, Baron, general in the American revolutionary army, was born at Magdeburg, Prussia, 1730. He served when only fourteen in the siege of Prague, and rose in the army until, in 1752, he was on the staff of Frederick the Great. He came to America in 1778 and offered his services to Washington, who gladly accepted them during the dark days of Valley Forge. He was appointed inspector-general; remodeled the army; took part in the siege of Yorktown, and spent his whole fortune in clothing his men. Congress in 1790 voted him $2,400 yearly and a township of land near Utica, N. Y., where he died, 1794.

Stevens, John F., American civil engineer, was born at West Gardiner, Maine, 1853. He was assistant engineer for the city of Minneapolis, 1874–76; chief engineer Sabine Pass and North-Western railway, 1876–79; assistant engineer of Denver and Rio Grande railway, 1879–80, Chicago, Milwaukee and St. Paul railway, 1880–82; division engineer of Canadian Pacific railway, 1882–86; assistant engineer Chicago, Milwaukee and St. Paul railway, 1886; principal assistant engineer Duluth, South Shore and Atlantic railway, 1887–89; assistant engineer Spokane Falls and Northern railway, 1889; principal assistant engineer, 1889–93, assistant chief engineer, 1893–95, chief engineer, 1895–1902, general manager, 1902–03, Great Northern railway; chief engineer, 1903–04, second vice-president, 1904–05, Chicago, Rock Island and Pacific railway company; chief engineer of Panama canal, 1905–07; chairman of isthmian canal commission, 1907; and vice-president of New York, New Haven and Hartford railroad, in charge of operation, 1907–09.

Stevens, Thaddeus, American statesman, was born at Peacham, Vt., 1792. He graduated in 1814 at Dartmouth college, studied law, practiced at Gettysburg, Pa., served for a time in the Pennsylvania legislature, and became an active advocate of the public school system of Pennsylvania. He served in congress, 1849–53 and 1859–68, and meanwhile rose to a prominent position at the bar. In congress, in 1850, he opposed the Clay compromise measure, including the fugitive slave law. He was a pronounced advocate of emancipation and the enfranchisement of the negro; was bitterly hostile to the seceding states, and stringent in his proceedings against them. He lived to take an active part in the unsuccessful impeachment of President Johnson, and to see the readmission into the Union of the first group of reconstructed secession states. Died at Washington, 1868.

Stevenson, Adlai Ewing, American lawyer and politician, was born in Kentucky, 1835. He was educated at Centre college, Kentucky, studied law, and was admitted to the bar of Illinois in 1857. He was master in chancery, 1860–64; district attorney, 1865–69; member of congress, 1875–77 and 1879–81. He was first assistant postmaster-general of the United States, 1885–89, and vice-president of the United States, 1893–97. After his term as vice-president he was appointed, 1897, a member of the commission to Europe to try to secure international bimetallism. He was again democratic nominee for vice-president of the United States, 1900, and for governor of Illinois, 1908.

Stevenson, Robert, Scottish engineer, was born at Glasgow, 1772. In 1796 he became engineer and inspector of lighthouses, and, during his forty-seven years' tenure of that office, planned and constructed no fewer than twenty-three lighthouses — employing the catoptric system of illumination, and his valuable invention of intermittent and flashing lights. The most remarkable of these was that on Bell Rock, when the wreck of the *York*, a 74-gun ship, on this reef, drew general attention to the same subject. Stevenson was a consulting engineer of bridges, harbors, railways, etc., and introduced many improvements in their construction. He built the Britannia tubular bridge over Menai strait, Victoria tubular bridge near Montreal, the viaduct of Berwick, bridge at Newcastle, etc. Died, 1850.

Stevenson, Robert Louis Balfour, British novelist and essayist, born at Edinburgh, 1850. He was educated at Edinburgh university, and in 1875 was admitted to the bar; but soon abandoned law for the profession of letters, in which he rapidly came to the front. In 1878 appeared his first book, *An Inland Voyage*, quickly followed by *Travels with a Donkey, Virginibus Puerisque, Familiar Studies*, and *Treasure Island*. As a writer of adventure and romance, he established himself permanently in the public favor with *Kidnapped, The Master of Ballantrae, Dr. Jekyll and Mr. Hyde*, etc. His versatility in letters was further revealed in his charming *A Child's Garden of Verse, Ballads, Memories and Portraits*, and *A Footnote to History*. In 1890 failing health induced him to make his home in the island of Samoa, where he died and was buried, 1894.

Stewart, Alexander Turney, American merchant and capitalist, was born at Lisburn near Belfast, Ireland, 1803. He settled in New York in 1823, where two years later he opened his first dry goods store, and acquired great wealth. He was a leader in the building of street railways and other municipal improvements. Although his charities during his lifetime were numerous, yet at his death he left some $40,000,000. Died, 1876. His body was stolen in 1878, and restored to his widow three years after on payment of $20,000 through a lawyer.

Stewart, Balfour, British physicist, was born at Edinburgh, 1828, studied at St. Andrews and Edinburgh, and in 1853 forsook a commercial career in Australia to become assistant to Professor Forbes at Edinburgh. He became director of Kew observatory, 1859, and professor of physics at Owens college, Manchester, 1870. He made his first reputation by his work on *Radiant Heat* in 1858, and was one of the founders of spectrum analysis. Particularly valuable are his papers on terrestrial magnetism. He earned a high reputation by his text-books on physics — *Treatise on Heat, Elementary Physics,* and *Conservation of Energy.* With Professor Tait he published *The Unseen Universe* in 1875, a book which had a phenomenal reception. He died, 1887.

Stewart, Dugald, eminent Scottish philosopher and writer, was born, in 1753, at Edinburgh. He was educated at the high school and university of his native city; and attended the lectures of Dr. Reid at Glasgow. In 1785 he succeeded to the professorship of moral philosophy at Edinburgh. In 1780 he began to receive pupils into his house, and many young noblemen, who afterward became celebrated, received their knowledge under his roof. In 1792 he published the first volume of the *Philosophy of the Human Mind.* Among his other works are: *Outlines of Moral Philosophy; Philosophical Essays; Memoirs of Adam Smith, Drs. Robertson and Reid*; and a prefatory dissertation in the supplement to the *Encyclopædia Britannica.* He died, 1828.

Stilicho (*stĭl′-ĭ-kō*), **Flavius,** Roman general, by blood a Vandal, was born about 359. He was sent as ambassador to Persia in 384, and rewarded with the hand of Serena, niece of the emperor Theodosius. In 394 he departed from Constantinople for Rome in charge of the youthful Honorius, placed him on the throne of the western empire, and administered in his name the affairs of state. On the death of Theodosius, Stilicho's rival, Rufinus, instigated Alaric to invade Greece. Stilicho marched against Alaric, blocked him up in the Peloponnesus, but permitted him to escape with captives and booty. In 398 his daughter became the wife of Honorius. Alaric invaded northern Italy, but was signally defeated by Stilicho at Pollentia and Verona. When Radagaisus, at the head of 200,000 to 400,000 Goths, ravaged the country as far as Florence in 406, Stilicho routed the invaders and saved the western empire a second time. Next Vandals, Alans, and Suevi invaded Gaul; Stilicho's proposed alliance with Alaric against them was interpreted as treachery, and he was credited with aiming at the imperial dignity. The Roman army mutinied, and Stilicho fled to Ravenna, where he was murdered, 408.

Stimson, Frederic Jesup ("J. S. of Dale"), lawyer, author, was born at Dedham, Mass., 1855. He graduated at Harvard, 1876; Harvard law school, 1878; and was admitted to the New York and Boston bars. He was assistant attorney-general of Massachusetts, 1884-85; general counsel to the United States industrial commission, 1898–1902; and professor of comparative legislation at Harvard since 1903. Author: *Rollo's Journey to Cambridge; Guerndale; The Crime of Henry Vane; American Statute Law; The Sentimental Calendar; First Harvests; Stimson's Law Glossary; In the Three Zones; Government by Injunction; Labor in Its Relation to Law; Mrs. Knollys and Other Stories; Handbook to the Labor Law of the United States; Uniform State Legislation; Pirate Gold; King Noanett; Jethro Bacon of Sandwich; In Cure of Her Soul; The Law of the Constitutions, State and Federal;* and also a series of magazine articles on *The Ethics of Democracy,* etc.

Stimson, Henry Lewis, cabinet officer, lawyer, was born in New York city, 1867. He graduated at Yale, 1888; A. M. Harvard, 1889; Harvard law school, 1889, 1890. He was admitted to the bar, 1891; member of firm of Root and Clarke, 1893, Root, Howard, Winthrop and Stimson, 1897, Winthrop and Stimson, 1901. He was appointed by President Roosevelt United States attorney for the southern district of New York, 1906–09; resumed active practice; took charge of prosecution of sugar trust frauds for the government. In 1910 he was the unsuccessful candidate for governor of New York state, and in 1911 was appointed secretary of war by President Taft to fill the position left vacant by the resignation of Secretary Dickinson.

Stirling, James Hutchison, Scottish philosophical writer, was born at Glasgow, 1820, and was educated at the university of Glasgow, and in France and Germany; LL. D., Edinburgh and Glasgow. He graduated in medicine, Edinburgh, 1842, and was a practicing physician until 1851. He was the first appointed Gifford lecturer at the university of Edinburgh, 1888–90. Author: *The Secret of Hegel; Sir William Hamilton; Jerrold, Tennyson, and Macaulay, with other Critical Essays; Lectures on the Philosophy of Law, etc.; Text-Book to Kant; Philosophy in the Poets; The Community of Property; Thomas Carlyle's Counsels; Philosophy and Theology,* Gifford lectures; *Darwinianism, Workmen and Work; What is Thought? or The Problem of Philosophy; The Categories,* etc. Died, 1909.

Stockton, Francis Richard, American novelist, was born at Philadelphia, 1834. He was an engraver and journalist, became assistant editor of *St. Nicholas,* and first attracted notice by his stories for children. He is now best known as author of *Rudder Grange; The Lady, or the Tiger? The Squirrel Inn; Pomona's Travels; Mrs. Cliff's Yacht; The Great Stone of Sardis; The Girl at Cobhurst; The Hundredth Man; Personally Conducted; The Clocks of Rondaine,* etc. He died at Washington, D. C., 1902.

Stokes, George Gabriel, British mathematician and natural philosopher, was born at Skreen, Ireland, 1819. He graduated at Cambridge in 1841; became fellow of Pembroke college in the same year; and was elected in 1849 to fill the Lucasian chair of mathematics at Cambridge. In 1854 he was appointed secretary to the royal society, of which he became president in 1885. He is best known by his discovery of fluorescence. His paper on the *Change of the Refrangibility of Light* was printed in 1852. To mathematicians and natural philosophers he is known by a number of admirable papers in the *Cambridge Philosophical Transactions,* the *Cambridge and Dublin Mathematical Journal,* and the *Philosophical Magazine.* He was made baronet, 1889. Stokes stood preëminent among scientists in the field of optics during the nineteenth century. Died at Cambridge, 1903.

Stolypin (*stŏ-lĭ′-pĭn*), **Peter Arkadievitch,** Russian prime minister, was born in 1863. He graduated at the university of St. Petersburg, in 1884, and obtained an appointment at the ministry of the interior. After two years he was transferred to the ministry of agriculture, where he remained another two years, then retiring for a time to private life, devoted himself to the management of his estate in Kovno government. He served as marshal of the district nobility; was president of the arbitration board; justice of the peace; and in 1899 became marshal of the provincial nobility. He was appointed vice-governor of Grodno in 1902, governor of Saratoff in 1903, and from Saratoff was called to St. Petersburg to take up the portfolio of the interior. When Goremykin resigned in 1906, Stolypin succeeded him as premier, was thanked by the czar for his services, and appointed a member of the council of the empire, January, 1907. He suppressed the second duma and attempted to stamp out the revolutionary movement. His policy provoked the keenest controversy. His life was several times attempted. Died, 1911.

Stone, Lucy Blackwell, American reformer and advocate of woman's rights, was born at West Brookfield, Mass., 1818. She graduated at Oberlin college in 1847; devoted herself to the advocacy of woman suffrage, and to the cause of antislavery; lectured widely, and became editor of the *Woman's Journal*. She aided in organizing, in 1850, the first national woman's rights convention at Worcester, Mass., and was always zealous in that cause. In 1855 she married Henry B. Blackwell, though stipulating to bear her maiden name. She died at Dorchester, Mass., 1893.

Stone, Marcus, English painter, was born in 1840. He received his early training from his father and began to exhibit at the royal academy before he was eighteen. At an early age he illustrated books by Dickens, Trollope, and other writers. His pictures are subjects of human and historical interest. He has exhibited in more than fifty consecutive exhibitions of the royal academy; medals have been awarded him at the international exhibitions of Paris, Berlin, Vienna, Philadelphia, Chicago, Melbourne, and other parts of the world. The greater number of his works have been published as engravings.

Stone, Melville Elijah, American journalist, general manager of the associated press, was born at Hudson, Ill., 1848. He removed to Chicago, 1860; graduated at the high school, 1867; conducted a foundry and machine shop, 1869–71; was editor of several Chicago dailies, 1871–74; and established, with a partner, the *Chicago Daily News*, in 1875. He then bought out his partner and sold that interest to Victor F. Lawson. In 1881 they started the *Chicago Morning News*, which became the *Chicago Record*. Stone's health failing in 1888, he sold out his entire interest to Lawson, and spent three years in Europe. He returned to Chicago, 1891; organized Globe national bank, of which he was president until its consolidation with Continental national in 1898; removed to New York, and has been general manager of the associated press since 1893.

Stone, William Joel, lawyer, United States senator, was born in Madison county, Kentucky, 1848. He graduated at the university of Missouri, and was admitted to bar, 1869; LL. D., Missouri. He was prosecuting attorney of Vernon county, Missouri, 1873-74; presidential elector, 1876; member of congress, 1885–91; governor of Missouri, 1893–97; member of the democratic national committee, 1896–1904, vice-chairman, 1900–04; he was elected United States senator for terms 1903–09 and 1909–15.

Storey, Moorfield, American lawyer, was born at Roxbury, Mass., 1845. He graduated at Harvard, 1866; studied at the Harvard law school; and was admitted to the bar, 1869. He was private secretary of Charles Sumner 1867–69; editor of the *American Law Review*, 1873–79; overseer of Harvard college, 1877-88 and 1892-1910; president of the American bar association, 1896. Author: *Life of Charles Sumner; Politics as a Duty and as a Career; The American Legislature; A Year's Legislation; The Government of Cities;* and various pamphlets and occasional addresses. Became president of the anti-imperialist league, 1905.

Story, Joseph, distinguished American jurist and legal writer, was born at Marblehead, Mass., in 1779. He graduated at Harvard college in 1798, and rapidly rose to eminence as a special pleader at the bar. In 1808 he was elected to congress, and was an associate justice of the United States supreme court, 1811–45. He was professor of law at Harvard, 1829–45, and attained unusual eminence as a law lecturer and writer. His published works embrace the masterly *Commentaries on the Conflict of Laws; Commentaries on the Constitution of the United States; Commentaries on Equity Jurisprudence; A Treatise on the Law of Agency*, etc. Died, 1845.

Story, William Wetmore, American sculptor and poet, son of the above, was born at Salem, Mass., 1819. He graduated at Harvard university, 1838, from the law school, 1840, and was admitted to the bar. He published *Contracts not under Seal*, and other legal works, during the early part of his career, but afterward devoted himself to literature and sculpture. Among his publications are several poems, *Origin of the Italian Language and Literature, Conversations in a Studio*, etc. He executed numerous monuments, statues, and busts, chief of which are: "Cleopatra"; "Libyan Sibyl"; "Delilah"; "Semiramis"; and statues of George Peabody, Edward Everett, Professor Henry, and Francis Scott Key. Died in Italy, 1895.

Stowe, Harriet Elizabeth Beecher, sister of Rev. Henry Ward Beecher, American novelist, was born at Litchfield, Conn., 1811. She married Professor Calvin Ellis Stowe in 1836, became a frequent contributor to periodicals, and published some stories in a volume entitled *The Mayflower*, and other spirited juvenile stories. In 1851 she commenced in *The National Era*, an antislavery paper at Washington, D. C., a serial tale entitled *Uncle Tom's Cabin*. In 1853 she published a *Key to Uncle Tom's Cabin*, and made a visit to Europe, where she was received with distinguished consideration. The events and impressions of this triumphant tour are recorded in her *Sunny Memories of Foreign Lands*. In 1856 she published *Dred, a Tale of the Great Dismal Swamp*, followed in 1859 by *The Minister's Wooing*, a story of New England life in the eighteenth century. In 1869 she contributed to the *Atlantic Monthly* an article entitled *The True Story of Lady Byron's Life*, some statements in which were criticised, and she then wrote in reply *Lady Byron Vindicated*. In 1868–70 she was joint editor of *Hearth and Home*. The celebrated *Uncle Tom's Cabin* is one of the great successes in American literature and has been translated into many foreign languages. She died, 1896.

Strabo (*strā'-bō*), noted Greek geographer, was born at Amasia, in Pontus, about 63 B. C. He does not appear to have followed any professional calling, but to have spent his life in travel and study. His *Geography*, which describes Europe, Asia, Egypt and Libya, is a work of great value, and comprises seventeen books. He died about 21 A. D.

Stradivari (*strä'-dē-vä'-rē*) or **Stradivarius, Antonio,** celebrated Italian violin maker, was born at Cremona, Italy, in 1644. Besides violins, he made viols, guitars, and mandolins. His instruments are known for their finish and fine tone. He was the first to finish them neatly on the inside. The great care with which he selected and cut his wood, the study he gave to the shape and proportions, and the luster of the varnish used all combined to make an instrument without a rival. They are carefully preserved by those possessing them, and bring great prices, ranging from $1,000 to $15,000. He died at Cremona, 1737.

Strafford, Thomas Wentworth, Earl of, English statesman, was born in London, 1593. He studied at Cambridge, and after some months' travel on the continent entered parliament in 1614, but took no active part in affairs until 1621. In 1622 he felt compelled to side with the king, favored a strong government with the king at the head, and strove to put down with a firm hand all opposition to the royal authority. He was appointed lord-deputy in Ireland in 1632, and was at length, in 1640, exalted to the lord-lieutenancy, being at the same time created earl of Strafford. By this time he had risen to be the chief adviser of the king, and was held responsible for his arbitrary policy. After the meeting of the long parliament he was impeached for high treason, and as a result was beheaded on Tower hill, 1641.

Strathcona (*străth-kō'-na*), **Baron, Donald Alexander Smith,** high commissioner for Canada, 1896–1911; was born in Scotland, 1820. He was educated in Scotland; hon. LL. D., Cambridge, Yale, Aberdeen, Glasgow, and Toronto; D. C. L., Oxford and Dublin; entered the Hudson Bay company's service at an early age, and was the last resident governor of that corporation as a governing body. He was special commissioner during first Riel rebellion in Red river settlements, 1869-70; member of the first executive council of the Northwest territory, 1870; represented Winnipeg and St. John's in Manitoba legislature, 1871–84; member of parliament for Selkirk in Dominion house of commons, 1871-72, 1874, and 1878, for Montreal West, 1877–96. He is now governor of the Hudson Bay company, director of the St. Paul, Minneapolis, and Manitoba railway, and of the Canadian Pacific railway company; and hon. president of the bank of Montreal. He is also chancellor of McGill university, and was lord rector of Aberdeen university, 1899. He raised the Strathcona's horse for service in the South African war; has been a munificent benefactor to McGill university and other Canadian educational institutions; and, with Lord Mount-Stephen, gave an endowment of £16,000 a year to the king's hospital fund. He was raised to the peerage in 1897.

Straus (*strous*), **Oscar Solomon,** American merchant, diplomat and publicist, was born at Otterberg, Germany, 1850. He lived at Talbotton, and afterward at Columbus, Ga., until 1865 when he removed to New York, where he graduated at Columbia university, 1871; LL. B., Columbia law school, 1873. L. H. D., Brown, 1895; LL. D., Washington and Lee university, 1898, university of Pennsylvania, 1900, and Columbia, 1904. He practiced law, 1873–81; entered the mercantile life as a member of L. Straus and Sons, importers of pottery and glassware; was United States minister to Turkey, 1887–89, 1898–1901, 1909–11; appointed, 1902, by President Roosevelt, a member of the permanent court of arbitration at The Hague; and was secretary of commerce and labor, 1906–09. Author: *The Origin of Republican Form of Government in the United States; Roger Williams, the Pioneer of Religious Liberty; The Development of Religious Liberty in the United States; Reform in the Consular Service; United States Doctrine of Citizenship; Our Diplomacy with Reference to our Foreign Service,* etc.

Strauss (*shtrous*), **David Friedrich,** German theologian and critic, was born at Ludwigsburg, Würtemberg, 1808. He studied at Tübingen and Berlin; was ordained to the church in 1830; and in 1832 became lecturer at Tübingen. In 1835 he published the first volume of his celebrated *Leben Jesu,* which led to his expulsion from that office; and when, in 1839, he was appointed by the board of education in Zürich professor of dogmatics and church history in the university of that city, the public indignation at the appointment led, not only to the appointment being cancelled, but to the fall of the government, which was held to be responsible for it. In 1840-41 he published *Die Christliche Glaubenslehre,* "The Christian Doctrine," which was followed by several other works not theological, including a *Life of the Reformer Ulrich von Hutten.* In 1864 he published a new *Life of Jesus, composed for the German People;* and, in 1872, *The Old and New Faith.* Strauss's *Life of Jesus* was translated into English by George Eliot in 1846. He died, 1874.

Strauss, Johann, Austrian composer and conductor, was born at Vienna, 1825. He came of an eminently musical family, his father being a noted musician, while two of his brothers were composers. On his father's death, he became conductor, and toured the world with his own and his late father's orchestra. At the same time, from an early age, he composed waltzes and operettas, which have held the stage with great favor. In 1872 he conducted an orchestra of 1,000 performers at the Boston peace jubilee; he was for a time also musical director to the emperor Joseph at Vienna. His most famous waltz pieces are *Wiener Blut, Künstlerleben,* and *An der schönen blauen Donau.* Of his operettas; the following are best known: *Indigo; Cagliostra; La Tsigane; Die Fledermaus; Der lustige Krieg; Simplicius; Eine Nacht in Venedig;* and *Der Zigeunerbaron.* He died, 1899.

Strauss, Richard, German composer, was born, 1864, at Munich. He studied music at Munich, and in 1885 became conductor at Meiningen. From 1889 to 1894 he was chapelmaster, with Eduard Lassen, at Weimar, later conductor at the Munich opera house; since 1898 conductor of the royal opera, Berlin. He has written many charming songs, but his distinctiveness as a modern composer is due chiefly to extraordinarily elaborate instrumental works. Works: *Guntram; Feuersnot; Salome; Tod und Verklärung; Don Juan; Macbeth; Till Eulenspiegel; Don Quixote; Ein Heldenleben,* etc. He was made chevalier of the legion of honor, 1907.

Strong, Augustus Hopkins, American theologian, president and professor of systematic theology at Rochester theological seminary since 1872, was born at Rochester, N. Y., 1836. He graduated at Yale, 1857, Rochester theological seminary, 1859; D. D., Brown university, 1870, Yale, 1890, Princeton, 1896; LL. D., Bucknell, 1891, Alfred, 1904. He was pastor of the First Baptist church, Haverhill, Mass., 1861–65, First Baptist church, Cleveland, Ohio, 1865–72. Author: *Systematic Theology; Philosophy and Religion; The Great Poets and Their Theology; Christ in Creation and Ethical Monism,* etc.

Strong, Charles Augustus, American psychologist, educator, was born at Haverhill, Mass., 1862. He graduated at Harvard, 1885, and was a student in Berlin, 1886-87, Paris, Berlin and Freiburg, 1889-90. He was instructor in philosophy, Cornell university, 1887–89; docent Clark university, 1890; associate professor, psychology, university of Chicago, 1892–95; lecturer in psychology, 1895–1903, and professor of psychology, since 1903, Columbia university. Author: *Why the Mind Has a Body,* etc.

Stryker, Melancthon Woolsey, American educator, president of Hamilton college since 1892, was born at Vernon, N. Y., 1851. He was graduated at Hamilton college, 1872, Auburn theological seminary, 1876; D. D., Hamilton and Lafayette; LL. D., Lafayette. He was pastor of Presbyterian church, Auburn, N. Y., 1876–78, Ithaca, N. Y., 1878–83, Second Congregational church, Holyoke, Mass., 1883–85, and Fourth Presbyterian church, Chicago, 1885–92. Author: *Song of Miriam; Church Song; Dies Iræ, with versions; Hamilton, Lincoln and Addresses; Letter of James; Lattermath,* verse; *Well by the Gate,* sermons, etc.

Stuart, Gilbert Charles, American portrait painter, was born at Narragansett, R. I., 1755. In 1778 he made his way to London, where his talent was recognized by Benjamin West, president of the royal academy, who took him into his family, and whose full length portrait he painted for the national gallery. In 1781 he opened his studio in London, and painted the portraits of George III., the prince of Wales, the duke of Northumberland, Sir Joshua Reynolds, and many other celebrated characters. In 1792, in the fullness of his powers and fame, he returned to America, and painted portraits of Washington, Jefferson, and many of the distinguished men and women of the period. Died at Boston, Mass., 1828.

Stuart, James Ewell Brown, confederate cavalry general, was born in Patrick county, Virginia, 1833. His early career was spent as a mounted rifleman in Texas and Kansas, engaged in Indian warfare. When the civil war broke out, he held a captaincy in the Union army, but resigned this to enter the confederate service, in which he became the most distinguished of cavalry officers in the army of northern Virginia. His chief exploits were the night attack of August, 1862, when General Pope's papers were captured, and the raid across the Potomac in the same year. He was mortally wounded at Ashland, and died, 1864, at Richmond, Va.

Stubbs, William, English historian, was born at Knaresborough, England, 1825. He studied at Oxford, entered the church, and settled at Navestock, Essex, in 1850. In 1866 he was appointed professor of modern history at Oxford. He was made bishop of Chester in 1884, and changed to the see of Oxford in 1889. His writings are marked by great learning and rare impartiality, and hold the highest rank in English history. He has edited a large number of ancient histories and chronicles, such as *Gesta of Henry II. and Richard I.; Memorials of St. Dunstan,* and *Chronicles of the Reigns of Edward I. and Edward II.* His historical works include: *Constitutional History of England; The Early Plantagenets;* and *Seventeen Lectures on the Study of Mediæval and Modern History.* He died, 1901.

Stuyvesant (*stī'-ve-sant*), **Peter,** director-general of the New Netherlands, 1647–64, and last Dutch governor of New York, was born in Holland, 1592. He first served in the West Indies, and arrived at New Amsterdam, 1647. There he made peace with the Indians; arranged the Dutch and English boundary; recaptured the fort on the Delaware river, taking possession of the Swedish colony at the same time, but was forced to surrender the city of New York to the English, 1664. He then retired to his farm, the "Bouwerij," which gave the name to the modern Bowery, and died in 1682.

Suchet (*sü'-shĕ'*), **Louis Gabriel,** duke of Albufera, celebrated French marshal, was born in 1772 at Lyons, and entered the army, as a volunteer, in his twentieth year. Between that period and 1800 he distinguished himself in Italy, Switzerland, and the Grisons, and rose to the rank of major general. He subsequently increased his fame at Marengo, at Austerlitz, and in Poland. In 1808 he was appointed to the command of the French forces in the southeast of Spain, and this command he retained until the termination of the war. He gained many victories, reduced a great number of fortresses, and conquered Valencia; and his services were rewarded with the rank of marshal, and the title of duke. When Napoleon returned from Elba, he intrusted Suchet with the defense of the departments bordering on the frontier of Savoy. He died, 1826.

Sudermann (*zo͞o'-dẽr-män*), **Hermann,** German dramatist and novelist, was born in Mazisken, Prussia, 1857. He studied in the universities of Königsberg and Berlin, and was a teacher and journalist, 1881–89. He published a series of tales, of which *Frau Sorge, Der Katzensteg,* and *Es War,* are the most impressive. The drama *Sodoms Ende* was produced in 1891, and was followed by *Die Heimat,* which, translated as *Magda,* has been represented by Duse, Sarah Bernhardt, and Mrs. Patrick Campbell. His later works include: *Das Glück im Winkel; Reiherfedern; Morituri; Johannes;* and *Das Johannisfeuer.* In 1906 *Das Blumenboot* was produced in Berlin, and *Rosen* at Vienna in 1907.

Sue (*sü*), **Marie-Joseph Eugène,** French novelist, was born in Paris, 1804. His father was one of the household surgeons of Napoleon I.; and the son was brought up to the same profession, acting as surgeon first in the army and afterward in the navy. After the death of his father in 1829, the fortune he inherited enabled him to relinquish practice, and he thenceforth devoted himself to literature. In 1850 he was elected to the legislative assembly, as one of the deputies for the department of Seine; but, as an ardent socialist, he was expelled from France after the *coup d'état* of 1851. His writings extend over many volumes. Some of his later works were suppressed as immoral and seditious by the assize courts of Paris. His reputation as a writer rests mainly on *The Wandering Jew* and *The Mysteries of Paris.* He died in Savoy, in exile, 1859.

Sulla, Lucius Cornelius, Roman general and dictator, was born, 138 B. C. He acquired military fame in the armies of Marius and of Catullus. Success in the war against the Marsi, and great popularity among the soldiers incited him to aspire to the sovereign power under the title of dictator; and, though opposed by Marius, he gained his end, proscribing and putting to death all who opposed him. After holding the dictatorship for about two years, he resigned his office in 79 B. C., and retired to an estate he possessed at Puteoli, where he died in the following year. He wrote memoirs of his own life, which are lost, but which are supposed to have been made use of by Plutarch.

Sullivan, Sir Arthur Seymour, English composer, was born in London, 1842. He studied in London and at Leipzig, and in 1862 composed incidental music for *The Tempest,* performed at the Crystal Palace, London. Subsequently he wrote the famous comic operas, *H. M. S. Pinafore; Pirates of Penzance; Patience; Iolanthe; The Mikado; The Yeomen of the Guard; The Gondoliers,* etc. He has also written a grand opera entitled *Ivanhoe,* and several other able works — cantatas, overtures, oratorios, church music, and ballads. He became a member of the legion of honor, 1878, and was knighted in 1883. Died, 1900.

Sully, James, English educator and philosophical writer, late Grote professor of philosophy of mind and logic, University college, London, and lecturer on education to the college of preceptors, was born at Bridgewater, 1842. He was educated at Independent college, Taunton, Regent's Park college, London, and at the universities of Göttingen and Berlin. Author: *Sensation and Intuition; Pessimism; Illusions; Outlines of Psychology; Teacher's Handbook of Psychology; The Human Mind; Studies of Childhood; Children's Ways; An Essay on Laughter,* etc. He is one of the most eminent of modern English psychologists.

Sully, Maximilien de Béthune, Duke of, French soldier and statesman, noted minister of Henry IV., of France, was born at Rosny, near Mantes, 1560. He was brought up in the Protestant religion, and in the civil wars greatly distinguished himself on the side of the Huguenots. After the accession of Henry IV., in 1589, he made himself especially useful by his skill and integrity in managing the financial affairs of the kingdom, which were at that time in a deeply involved condition; and he was also employed in many important negotiations, one of the principal of which was that for the king's marriage to Mary de' Medici. In 1601 he was sent on a confidential mission to Queen Elizabeth of England, who professed great esteem for him; and on the accession of James I., in 1603, he was again sent on a mission to that country. He continued at the head of affairs until the assassination of Henry in 1610; but after that event his life was spent chiefly in retirement, though he was still occasionally consulted as to the condition of affairs. He had been created duke of Sully in 1606, and was made marshal of France in 1634. In the course of his long life he accumulated an immense fortune. His *Memoirs,* written during his retirement, are of great value, as furnishing materials for the history of the period. He died at Villebon, near Chartres, 1641.

Sully, Thomas, American painter, was born in Lincolnshire, England, in 1783. While a boy he emigrated to America, and studied his art at Charleston, afterward successively taking up his residence in Richmond, Va., New York, and Philadelphia. As a portrait painter, he enjoyed great reputation, Jefferson, Lafayette, Madison, Jackson, and many other of the most illustrious personages of the time being among his sitters. His chief historical work is "Washington Crossing the Delaware," now in the Boston museum. Died, 1872.

Sumner, Charles, American statesman, was born at Boston, 1811; was graduated at Harvard, 1830; studied law, and was admitted to the bar, 1834. He was reporter of the United States circuit court, and published *Sumner's Reports;* edited the *American Jurist;* lectured on law, and in 1837–40 traveled in Europe. He took no active part in politics until 1845, when on the 4th of July he pronounced in Boston an oration on *The True Grandeur of Nations,* followed by a number of public addresses. In 1851 he entered the United States senate as the successor of Daniel Webster, retaining his seat until his death. His first important speech was in opposition to the fugitive slave act. In the debate on the repeal of the Missouri compromise and on the contest in Kansas he took a prominent part. His speech upon this issue, delivered in 1856, under the title "The Crime against Kansas," greatly incensed the members of congress from South Carolina, one of whom, Preston S. Brooks, on May 22d assaulted Sumner at his desk in the senate chamber. He supported the election of Lincoln, urged upon him the proclamation of emancipation, and became the leader of the senate, as chairman of the committee on foreign relations. In 1871 he opposed the annexation of San Domingo to the United States. He published *White Slavery in the Barbary States; Orations and Speeches,* etc. Died in Washington, D. C., 1874.

Sumner, William Graham, American educator and economist, professor of political and social science at Yale, 1872–1910, was born at Paterson, N. J., 1840. He graduated at Yale, 1863; studied at Göttingen, and Oxford, LL. D., Tennessee. He was tutor at Yale, 1866–69; took orders in Protestant Episcopal church, and was assistant at Calvary church, New York, and rector of church of the Redeemer, Morristown, N. J., until 1872. Author: *A History of American Currency; What Social Classes Owe to Each Other; Collected Essays in Political and Social Sciences; Protectionism; Andrew Jackson; Alexander Hamilton; Robert Morris; The Financier and Finances of the Revolution; A History of Banking in the United States; Folkways,* etc. He died in 1910.

Sutherland, George, lawyer, United States senator, was born in Buckinghamshire, England, 1862. He came to the United States; received an academic education; attended the law department of the university of Michigan, 1882-83, and was admitted to the bar, 1883. He was a member of the first Utah state legislature, 1896; was a member of congress, Utah, 1901–03; was elected to the United States senate in 1905 and was reëlected in 1911.

Suvaroff (*sōō-vä'-rŏf*), **Prince Alexei,** celebrated Russian field marshal, was born in 1729, at Suskoi, in Finland, and was educated at the cadet school of St. Petersburg. He distinguished himself during the Seven Years' war; in Poland, in 1768, against the confederates; in 1773, against the Turks; and, in 1782, against the Nogay Tartars. For these services he was rewarded with the rank of general-in-chief, the government of the Crimea, the portrait of the empress set in diamonds, and several Russian orders. In the war against the Turks, from 1787 to 1790, he gained the battle of Rymnik, took Ismail by storm, and obtained other important advantages. In 1794 he defeated the Poles who were struggling for freedom, and carried Praga by assault. When Russia joined the continental coalition, in 1799, he was placed at the head of the combined army in Italy, and, after several sanguinary battles, succeeded in wresting that country from the French. He was less successful in Switzerland, whence he was obliged to retreat. He died, 1800, soon after his return to St. Petersburg.

Swain, Joseph, American educator, president of Swarthmore college since 1902, was born at Pendleton, Ind., 1857. He graduated at Indiana university, 1883; A. M., LL. D., Wabash college. He was instructor of mathematics and biology, 1883–85, associate professor of mathematics, 1885-86, and professor of mathematics, 1886–91, Indiana university; professor of mathematics in Leland Stanford Jr. university, 1891–93; president of Indiana university, 1893–1902. He has written numerous scientific papers; is president of the national council of education, national council of religious education.

Sweatman, Arthur, archbishop of Toronto, and primate of Canada, 1907-09; was born in 1834. He was graduated at Christ's college, Cambridge; was headmaster of Hellmuth college, London, Ontario, 1865–72; rector of Grace church, Brantford, Ontario, 1872–76; secretary of the diocesan synod, 1872–79; secretary to Canadian house of bishops, 1873–79; canon of Huron, 1875-76; archdeacon of Brant and rector of Woodstock, Ontario, 1876–79; and bishop of Toronto, 1897–1907. Died, 1909.

Swedenborg (*swē'-den-bŏrg*), **Emanuel,** Swedish philosopher and mystic, the founder of the New church, was the son of the bishop of Skara, and was born in 1688, at Stockholm. He studied at Upsala, possessed considerable scientific attainments for his age, and, after traveling abroad for five years, started the *Daedalus Hyperboreus*, a short-lived scientific journal. In 1717 Charles XII. appointed him assessor in the college of mines. He was ennobled in 1719, took a prominent part in the house of peers, and wrote on many scientific subjects, but his largest scientific work was the *Opera Mineralia et Philosophica*, which combined both the theoretical and the practical. He then studied anatomy and physiology, and wrote *The Economy of the Animal Kingdom* and *The Animal Kingdom*. In 1743 he claimed a divine commission to disclose the internal or spiritual sense of scripture by the correspondence existing between natural and spiritual things, and thereby to make known its true doctrines. His largest work, *Arcana Cœlestia*, a spiritual exposition of *Genesis* and *Exodus*, and *The Apocalypse Revealed* refer more to the former; his *Four Primary Doctrines* and *The True Christian Religion*, to the latter. He also stated that for the purpose of his mission he was intromitted as to his soul into heaven, hell, and the intermediate state between them. Of these he treats in *Heaven and Its Wonders, The Last Judgment*, and *The Earths in the Universe*. In his philosophy, which is really one with his theology, he treats of creation in his *Divine Love and Wisdom;* and of the relations of God's government to man's free agency in his *Divine Providence*. He died in London, 1772. The New church, which accepts Swedenborg's mission and general views, held its first public services in 1788.

Sweet, Henry, English philologist, was born in London, 1845. He studied at King's college, London, at Heidelberg, and at Balliol college, Oxford; M. A., Ph. D., LL. D. Author and editor: editions of Old and Middle English texts; Old and Middle English readers and primers; *Student's Dictionary of Anglo-Saxon; Primer of Spoken English; New English Grammar; Short Historical English Grammar; History of English Sounds; Primer of Phonetics; Manual of Current Shorthand; History of Language; The Practical Study of Languages;* and many papers and reviews in journals and transactions of learned societies. Died, 1912.

Swift, Jonathan, British satirist, was born in Dublin, of English parents, 1667. He was educated at Trinity college, Dublin, and then removed to London, and was admitted into the house of Sir William Temple. Temple died in 1699, and Swift published his posthumous works, after which he repaired to Ireland, and in 1713 was appointed dean of St. Patrick's. Before this he had written the most powerful satirical work of the eighteenth century, the *Tale of a Tub*, in 1704, and a few essays on ecclesiastical subjects, some ridicule of astrology under the name of "Isaac Bickerstaff," and poetical pieces possessing a peculiar vein of humor and description. He then wrote papers for the *London Examiner*, a *Letter to the October Club, The Conduct of the Allies, The Barrier Treaty*, and innumerable pasquinades against the whigs, and became a formidable power in the state. His *Drapier Letters*, 1724, produced quite a ferment in Ireland, and compelled the government to abandon a scheme for supplying Ireland with copper coinage. The triumphant author made his last visit to England in 1726, and published his *Gulliver's Travels*, the most popular of all his works. After this period he wrote some of his best minor pieces, *The Grand Question Debated; On Poetry, a Rhapsody; The Legion Club; Verses on the Death of Dr. Swift;* and *The Modest Proposal*. Died, 1745.

Swinburne, Algernon Charles, English poet and prose writer, was born in London, 1837, son of Admiral Swinburne. He was educated at Balliol college, Oxford, went to Florence and spent some time there. His first productions were the plays, *Queen Mother* and *Rosamond*, which were followed by two tragedies; *Poems and Ballads; A Song of Italy;* essay on *William Blake;* and *Songs before Sunrise*. The latter were instinct with pantheistic and republican ideas, and gave him rank with Landor, whose successor he was, and of whom he was a great admirer. His subsequent works include: *Under the Microscope; Bothwell, a Tragedy; Songs of Two Nations; A Study of Shakespeare; Songs of the Springtides; Mary Stuart, a Tragedy; A Century of Roundels; Marino Faliero, a Tragedy; A Study of Victor Hugo; Astrophal and other Poems; Studies in Prose and Poetry; Love's Cross Currents*, a novel; *The Duke of Gardia*, etc. He died in 1909.

Sybel (*zē'-bel*), **Heinrich von,** German historian, born at Düsseldorf, 1817. He studied at Berlin under Ranke; became professor of history at Bonn, 1844, at Marburg, 1846, at Munich, 1856, and at Bonn again in 1861; and in 1875 was made director of the state archives at Berlin. He published the political correspondence of Frederick the Great, shared in issuing the *Monumenta Germaniae Historica*, and founded and edited the *Historische Zeitschrift*. His history of the first crusade, in 1841, often ran counter to the accepted opinions of centuries; his next work was on the title "German king," 1844. Then came his great work, *Geschichte der Revolutionszeit*, 1789–95, a history of the French revolution based upon official documentary evidence. He also wrote an exhaustive history of the founding of the German empire by William I. He died at Marburg, 1895.

Sydenham (*sĭd'-en-am*), **Thomas,** English physician, was born at Winford Eagle in Dorsetshire, 1624. In 1648 he graduated M. D. at Oxford, and shortly after became a fellow of All Souls. In 1666 he published his *Methodus Curandi Febres;* and in 1676 took his M. D. at Cambridge. The friend of Locke and Boyle, he was a profound master of the Hippocratic method, but treated current medical theories with scant courtesy. He wrote in Latin on epidemics, venereal diseases, smallpox, gout, and hysteria. His last work, *Processus Integri*, in 1692, is an outline of pathology and therapeutics. Seemingly behind his age in science, he was really ahead of it in practice. He died at London, 1689.

Symonds (*sĭm'-ŭnz*), **John Addington,** an English man of letters, was born at Bristol, England, 1840. He was graduated at Oxford, but his delicate health required him to live chiefly in Italy, where he wrote much on Italian history and literature. His chief writings are an *Introduction to the Study of Dante; Studies of the Greek Poets; Sketches in Italy and Greece; The Renaissance in Italy; Italian Byways;* with lives of Shelley, Ben Jonson, Sir Philip Sidney, Boccaccio, Benevento Cellini, Michaelangelo, and *Shakespeare's Predecessors in the English Drama*. His work is marked by accurate learning and much critical insight. *The Renaissance in Italy* is his chief work, which forms in its several parts seven volumes, on which the author spent eleven years of intelligent labor. He died at Rome, 1893.

Tacitus (*tăs'-ĭ-tŭs*), **Gaius Cornelius,** Roman historian and orator, was born about 55 A. D. From the emperors Vespasian, Titus, and Domitian he received promotion and other marks of favor. In 97 he was appointed consul, succeeding T. Virginius Rufus. He had already attained distinction as an orator when the younger Pliny was entering upon public life; and both of them were appointed, in 99, to conduct the prosecution of Marius, then proconsul of Africa. Tacitus became one of the most intimate friends of the younger Pliny, of whose letters eleven are addressed to him. The time of his death is unknown, but he probably survived Trajan, who died in 117. His chief works are the *Life of Agricola*, and the *Germania*, both written about 98, the *Histories* extending from 68 to 96, and the *Annals* extending from 14 to 68.

Tadema, Alma. See **Alma-Tadema.**

Taft, William Howard, twenty-seventh president of the United States, was born in Cincinnati, Ohio, 1857. He was graduated at Yale, 1878, and from the law school, Cincinnati college, 1880; LL. D., university of Pennsylvania, Yale, etc.; admitted to the Ohio bar, 1880; was law reporter of the *Cincinnati Times*, and later of *Cincinnati Commercial*, 1880; assistant prosecuting attorney, Hamilton county, Ohio, 1881-82; collector of internal revenue, first district, Ohio, 1882-83; practiced law, Cincinnati, 1883–87; was assistant county solicitor, Hamilton county, Ohio, 1885–87; judge of the superior court of Ohio, 1887–90; solicitor-general of the United States, 1890–92; dean and professor in law department, university of Cincinnati, 1896–1900; United States circuit judge, sixth circuit, 1892–1900; president of the United States Philippine commission, 1900–01; first civil governor of the Philippine islands, 1901–04; secretary of war, United States, 1904–08. On November 3, 1908, he was elected president of the United States, and inaugurated March 4, 1909. In 1912 he was renominated for president by the republican party, but was defeated. He was made Kent professor of law, Yale, 1913.

Taine, Hippolyte Adolphe, French historian and critic, was born at Vouziers, France, 1828. He studied at the Collège Bourbon, and in 1864 was made professor of history and æsthetics in the school of arts. One of his first essays was crowned by the French academy. Among his most important works is his *History of English Literature*, a clear and valuable criticism written in brilliant style. In 1871 the university of Oxford conferred upon him the honorary degree of D. C. L., and in 1878 he was elected to membership in the French academy. His other writings embrace *Voyage in Italy; Voyage to the Pyrenees; The Ancient Régime; Notes on England;* and *The Ideal in Art*. Died, 1893.

Tait, Peter Guthrie, British mathematician and physicist, was born in 1831. He was educated at Edinburgh university, and St. Peter's college, Cambridge; was elected professor of mathematics at Belfast, 1854, and of natural philosophy at Edinburgh, 1860. His most important experimental work was on thermo-electricity, on the effects of pressure, on thermal conductivity, and on impact. He resigned his chair early in 1901, and died the same year. With W. J. Steele he wrote the *Dynamics of a Particle;* with Lord Kelvin, a *Treatise on Natural Philosophy;* with Balfour Stewart, *The Unseen Universe;* and he collaborated on lives of Forbes, Rankine, and Andrews. Among his other works may be named a treatise on *Quaternions; Recent Advances in Physical Science;* and text-books on *Light, Heat, Properties of Matter*, and *Dynamics.*

Takahira (*tä′-kȧ-hē′-rȧ*), **Kogoro,** Japanese diplomat, was born in Japan, 1854. He was educated in Tokyo, and entered the foreign office as student attaché, 1876; was appointed attaché, 1879, secretary, 1881, *chargé d'affaires*, 1882, of the legation at Washington; was secretary of the foreign office, 1883, *chargé d'affaires* in Korea, 1885–87, acting consul-general, 1888-89; chief of the political bureau, foreign office, 1890-91; consul-general at New York, 1892; minister resident to Holland and Denmark, 1893-94; envoy extraordinary and minister plenipotentiary to Italy, 1894-95 and 1906-07, to Austria and Switzerland, 1896–99; vice-minister for foreign affairs, 1889–1900, and envoy extraordinary and minister plenipotentiary to the United States, 1900–06, and 1908–09.

Taliaferro (*tŏl′-ĭ-vẽr*), **James Piper,** lawyer, ex-United States senator, was born at Orange, Va., 1847. He was educated in Virginia, leaving the school of William Dinwiddie, at Greenwood, in 1864, to volunteer in the confederate army, in which he served until the war ended; returned to his home after the war and resumed his studies, removing later to Jacksonville, Fla., where he engaged in business. He was elected to the United States senate in 1899, and reëlected for term 1905–11.

Talleyrand-Périgord (*tȧ′-lĕ′-rȧɴ′-pā′-rĕ′-gōr′*), **Charles Maurice, Prince de Bénévent,** was born in Paris, 1754. He was educated for the church, becoming in 1775 abbot of the monastery of St. Denis, in 1780 general agent of the clergy of France, and in 1788 bishop of Autun. As bishop of Autun he was a member of the states-general which was convoked in 1789, and took a leading part in the proceedings of that assembly, and also of the national assembly by which it was succeeded. He was soon after excommunicated by the pope and compelled to resign his bishopric, for which his personal character rendered him wholly unfitted, and thenceforward devoted himself entirely to politics. The progress of the revolution led to his retirement to England and afterward to America; but on the fall of Robespierre he returned to Paris, and, through the influence of Madame de Staël with Barras, was appointed foreign minister under the directory, an office which he retained under the consulate, and under the empire until 1807. In return for his services he was made grand chamberlain, and prince of Bénévent; but this did not prevent him from scheming against his master, by whom he was ultimately dismissed from office. After the fall of Napoleon, he became for a time prime minister under Louis XVIII., but ceased to hold this position subsequent to the battle of Waterloo. Under Louis Philippe he was employed as ambassador to the court of London, and this was the last public position he held. His skill and *finesse* in diplomacy are said to have been unrivaled. Died, 1838.

Talmage, Thomas De Witt, American Presbyterian minister and orator, was born in New Jersey, 1832. He was educated at New York university, and at the New Brunswick (N. J.) theological seminary. In 1870 he became pastor of the Brooklyn tabernacle. He edited for several years *The Christian at Work*, later the *Christian Herald*, and wrote extensively. In 1889-90 he visited the holy land, and in 1894 made a tour of the world. He was pastor of the First Presbyterian church, Washington, D. C., 1895–99. Author: *Crumbs Swept Up; Abominations of Modern Society; The Marriage Ring*, etc.; also many volumes of *Sermons*. Died, 1902.

Tamerlane, or **Timur** (*tē-mo͞or′*), oriental conqueror, was born at Sebz, near Samarkand, about 1336. He was a direct descendant of Jenghiz Khan, and consequently of Mongol origin. He began his military career when only twelve years of age, and in 1361 succeeded his father as chief of the Turkish tribe of the Berlas. In 1369 he made himself master of Balkh, in which city he assumed the title of Sahib Karan, or emperor of the age, after which he repaired to Samarkand, which he made the seat of his empire. He afterward overran the country now called Turkestan, subdued Persia, with his victorious hordes penetrated

the country as far north as Moscow, and then, turning back, crossed into India, where Delhi, with all its immense treasures, fell into his hands. He subsequently invaded Syria, and took Damascus, Ephesus, and Smyrna. His whole career was one of conquest, though he was frequently interrupted by revolts in his own dominions, and in the provinces he had brought under his rule. He was preparing for the conquest of China, but died on his march to that country, 1405.

Taney (*tô'-nĭ*), **Roger Brooke,** American jurist, was born in Calvert county, Md., 1777. He was graduated at Dickinson college, Pennsylvania, studied law, and took part in politics as a federalist. He afterward became a Jackson democrat and was made attorney-general in President Jackson's cabinet in 1831. Two years later he was appointed secretary of the treasury, and succeeded John Marshall as chief-justice of the United States supreme court in 1836. His most famous decision was that in the Dred Scott case, in 1857, in which the negro Scott brought suit to gain his freedom, on the ground of his having been carried by his master from the slave state Missouri into free territory. The decision, denying the right of citizenship to negroes, and also the authority of congress to keep slavery out of the territories, caused a greater excitement throughout the country than any decision of the supreme court before or since. He died at Washington, D. C., 1864.

Tarbell, Ida Minerva, American author and editor, was born in Erie county, Pa., 1857, daughter of Franklin S. Tarbell. She was graduated from Allegheny college; was associate editor of *The Chautauquan*, 1883–91; student in Paris at the Sorbonne and Collège de France, 1891–94; editor on staff, and associate editor of *McClure's Magazine*, 1894–1906, and associate editor of the *American Magazine* since 1906. Author: *Short Life of Napoleon Bonaparte; Life of Madame Roland; Early Life of Abraham Lincoln*, with J. McCan Davis; *Life of Abraham Lincoln; History of the Standard Oil Company; He Knew Lincoln;* and many magazine articles on history and current subjects.

Tarkington, Newton Booth, American novelist, was born in Indianapolis, Ind., 1869. He was graduated at Princeton, 1893; A. M., 1899. Author: *The Gentleman From Indiana; Monsieur Beaucaire; The Two Vanrevels; Cherry; In the Arena; The Conquest of Canaan; The Beautiful Lady; His Own People*, etc.

Tarr, Ralph Stockman, American educator, was born at Gloucester, Mass., 1864. He was graduated at Lawrence scientific school, Harvard, 1891; assistant professor of geology at Harvard, 1892–97; professor of dynamic geology and physical geography, 1897–1906, and professor of physical geography, 1906-12, Cornell university. He was special field assistant of the United States geological survey 1903-06. Author: *Economic Geology of United States; Elementary Physical Geography; Elementary Geology; First Book of Physical Geography; Physical Geography of New York State; New Physical Geography;* and many monographs on geological and geographical topics. Died, 1912.

Taschereau (*tȧsh'-rō'*), **Sir Henri Elzear,** Canadian jurist, chief-justice of the supreme court of Canada, 1902–06, was born in 1836. He was admitted to the Quebec bar, 1857; queen's counsel, 1867; sat in Canadian legislative assembly for Beance county, 1861–67; was appointed a judge of the Quebec superior court, 1871; judge of the supreme court of Canada, 1878. He is the author of several books on Canadian jurisprudence. Died, 1911.

Tasso (*täs'-sō*), **Torquato,** Italian poet, was born in Sorrento, 1544, and studied law at the university of Padua, where he published his earliest poem, *Rinaldo*, in 1562. In 1565 he entered the service of Cardinal Luigi d'Este, and was invited to the court of his brother, Alfonso, duke of Ferrara. While there he wrote his pastoral drama, *Aminta*, and in 1575 finished his great epic, *Jerusalem Delivered*, describing the first crusade. In 1577 he was imprisoned by Alfonso in a monastery, from which he escaped. In 1579 he returned to Ferrara, but, being a sufferer from occasional insanity, was confined in a madhouse, where he remained until 1586, when he was released on the intercession of the duke of Mantua and other princes. In 1594 Pope Clement VIII. summoned him to Rome to receive a laurel crown, but he died soon after his arrival, in 1595.

Tauler (*tou'-lĕr*), **Johann,** German mystic, was born at Strassburg, about 1300. He entered the Dominican order about 1318; was driven from Strassburg by a feud between the city and his order, and settled at Basel, where he associated with the devout "Friends of God," having before then been a disciple of Meister Eckhart. After seven years he returned to Strassburg. His fame as a preacher spread far and wide, and he became the center of the quickened religious life in the middle Rhine valley. He died at Strassburg in 1361. Sincere practical piety marks his *Sermons. Following in the Footsteps of Christ* is by some attributed to Tauler.

Taylor, Charles H., American journalist, editor and manager of the *Boston Daily Globe* since 1873, was born in Boston, Mass., 1846, and was educated in the Boston public schools; A. M., Dartmouth, 1896. He started in life as a printer and reporter on the *Boston Daily Traveler;* was private secretary to the governor of Massachusetts, 1869–71; member of the Massachusetts legislature, 1872; and clerk of the Massachusetts house of representatives, 1873. He served during the civil war in the 38th Massachusetts regiment; was wounded at Port Hudson, La., 1863; became lieutenant-colonel on the staff of Governor Claflin, 1869–71; and brigadier-general on Governor Russell's staff, 1891–93. He has long held a prominent place among American journalists and publicists.

Taylor, Hannis, American lawyer, diplomat, was born in New Bern, N. C., 1851. He was educated at the university of North Carolina; LL. D , Edinburgh and Dublin. Admitted to bar, 1870; practiced at Mobile, Ala., 1870-92. He was United States minister to Spain, 1893–97; was special counsel for the government of the United States before the Spanish treaty claims commission, 1902, and before the Alaskan boundary commission, 1903. Author: *The Origin and Growth of the English Constitution; International Public Law; Jurisdiction and Procedure of the Supreme Court of the United States*, etc.

Taylor, James Bayard, American author and traveler, was born at Kennett Square, Pa., 1825. At seventeen he began his poetical contributions to periodicals, and in 1844 published a volume of poems under the title of *Ximena*. Soon after he started on a pedestrian tour of Europe, and in 1846 published *Views Afoot, or Europe Seen with Knapsack and Staff*. After his return he settled in New York and wrote for the *Literary World* and *Tribune*. Of the latter he became assistant editor and part owner in 1849, and in the interests of that journal, as its correspondent, made extensive travels in various countries. In 1862-63 he was connected with the embassy at St. Petersburg, and in 1874 he was in Iceland and Egypt. For several years he resided in Germany. He was appointed United States minister to Berlin in 1878, where he died the same year. He was an industrious worker, and wrote many volumes of verse, fiction, sketches, essays, translations, and criticisms, besides several books of travel. Some of his best travesties are in his *Echo Club*. Among the finest of his poems are *Bedouin Song*, *The Quaker Widow*, and *The Old Pennsylvania Farmer*. His masterpiece is the translation of Goethe's *Faust*, "one of the glories of American literature." Perhaps the best of his novels is *The Story of Kennett*, which is largely his own story.

Taylor, James Monroe, American educator, professor of ethics and president of Vassar college, 1886-1913; was born in Brooklyn, 1848. He was graduated at the university of Rochester, 1868; D. D., Rochester theological seminary; LL. D., Rutgers; D. D., Yale. He was pastor of the Baptist church, South Norwalk, Conn., 1873–82, and at Providence, R. I., 1882–86. Author: *Psychology; New World and Old Gospel; Practical or Ideal*, etc.

Taylor, Jeremy, English divine, was born in Cambridge, England, 1613. He was graduated at Cambridge, and then attracted the attention of Archbishop Laud, who presented him with a fellowship at Oxford, 1636. He soon afterward became chaplain to Charles I., was rector of Uppingham, 1638–42, and accompanied the king to Oxford. About 1645 he withdrew into Wales, where he had charge of a school at Newton, in Caermarthenshire, and afterward found a shelter in the house of the earl of Carbery. He removed to Ireland in 1658, and, after the restoration, was made bishop of Down and Connor. His chief works are: *Holy Living; Holy Dying; Liberty of Prophesying; Ductor Dubitantium;* and *Sermons*. He is sometimes styled "the modern Chrysostom" on account of his golden eloquence, which has no equal in the whole series of ecclesiastical writers for richness of fancy. Died, 1667.

Taylor, Robert Love, lawyer, United States senator, was born in Happy Valley, Tenn., 1850. He was educated in Pennington, N. J.; admitted to the Tennessee bar, 1878; member of congress, 1879–81; elector at large on Cleveland's ticket, 1884 and 1892; pension agent at Knoxville, 1885–87; elected governor, 1886, as democrat, his opponent being his brother, Alfred A. Taylor; was governor, 1887–91; practiced law at Chattanooga, 1891–96; again governor, 1897–99; elected United States senator for term, 1907-13. He was editor-in-chief of *Bob Taylor's Magazine*, 1905-06, and of the *Taylor-Trotwood Magazine*, 1906-12. He was a well-known lecturer and writer. Died, 1912.

Taylor, Zachary, American general, and twelfth president of the United States, was born in Orange county, Va., 1784. He was educated in Kentucky, and, after entering the army in 1808, obtained the rank of colonel in 1832, and fought in the Black Hawk war. After defeating the Seminoles at Okechobee in 1837, he was given the chief command in Florida in the following year. In 1846 he was intrusted with the command of the army which entered Mexico. There he gained the battles of Palo Alto, Resaca de la Palma, and Buena Vista, and brought the campaign to a successful conclusion in 1847. In the following year he was nominated as whig candidate for the presidency, elected, and inaugurated in 1849. His tenure of office was chiefly signalized by the passing of Clay's compromise bill relative to the admission of California into the Union. Died, 1850.

Tecumseh (*tē-kŭm′-sĕ*), famous Shawnee chief, was born on the Scioto river, Ohio, about 1768. He headed an Indian alliance against the whites in the Northwest, and was defeated by the American general, Harrison, at Tippecanoe, 1811. In the war of 1812 he became an ally of the English, obtained the rank of brigadier-general in their service, and commanded the right wing in the battle of the Thames, in 1813, where he fell mortally wounded.

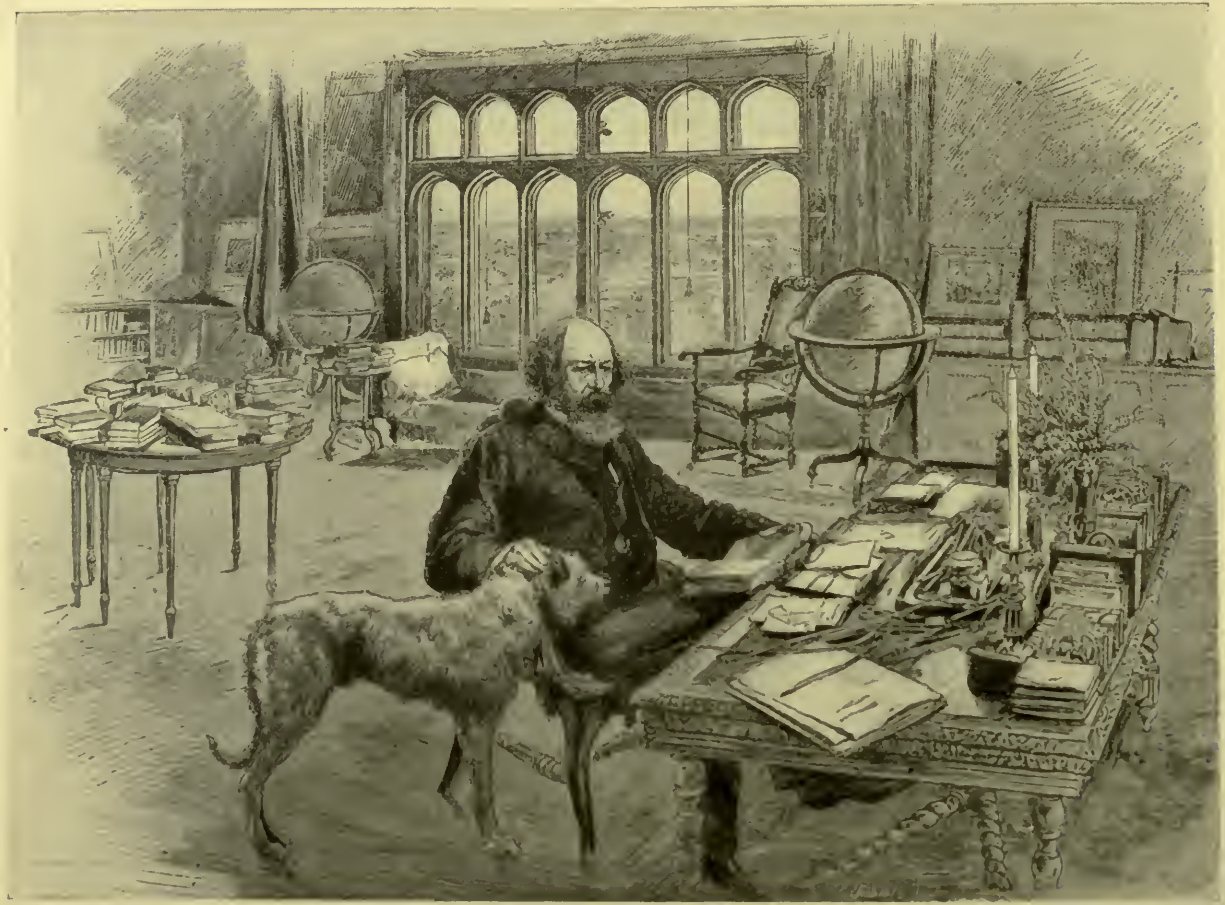
Tell, William, Swiss patriot, was born at Bürglen, near Altdorf, toward the close of the thirteenth century. His renown rests upon his resistance to the Austrians in 1307 and afterward. He was only a simple countryman, remarkable for nothing but his spirit of independence and his skill in the use of the cross-bow, both of which he proved to the tyrant Albrecht Gessler, who then represented the Austrians in Tell's canton of Uri, and but for whose austerity and insolence Tell's name would long since have been forgotten. An old tower at Altdorf is said to mark the spot from which Tell shot the apple from his son's head; and a fountain now occupies the place of the linden-tree under which it is alleged that the boy stood. The story of Tell has been the subject of numerous poems and dramas. The most notable is the *Wilhelm Tell* of Schiller.

Teller, Henry Moore, ex-United States senator, lawyer, was born at Granger, N. Y., 1830, and was educated at Alfred university; LL. D., 1886. He studied law, was admitted to the bar, and practiced in Illinois. He then removed to Colorado, from which state he was United States senator, 1876–82; was secretary of the interior in President Arthur's cabinet, 1882–85; and again a member of the United States senate, 1885–1909.

Tempest, Marie Susan (Mrs. Cosmo Stuart), opera singer, was born in London, 1866, daughter of Edwin Etherington. She received her musical education in the Convent des Ursulines, Thildonck, Belgium, and at the royal academy of music, London. She first sang in concert, but soon went into light opera in leading rôles; came to the United States as prima donna in New York Casino company; has appeared in comic opera in principal American cities, more recently in England; has received numerous medals for Italian and declamatory English singing. She married, 1898, Cosmo Charles Gordon-Lennox (Cosmo Stuart), son of Lord Alexander Gordon-Lennox. She created Nell Gwyn in *English Nell* and Becky Sharp.

Temple, Sir William, English diplomat and essay writer, was born in London, 1628. He studied at Cambridge, but at nineteen went abroad. He subsequently settled in Ireland, was returned for Carlow to the Dublin parliament in 1660, was sent in 1665 on a mission to Germany, and then created a baronet and appointed minister at Brussels. His great diplomatic success was the triple alliance, in 1668, of England, Holland, and Sweden, against France. He also took part in the congress of Aix-la-Chapelle, in 1668, and was ambassador at The Hague. In 1677 he helped to bring about the marriage of the prince of Orange with the princess Mary. He twice declined the offer of a secretaryship of state from Charles II., and suggested the scheme of a reformed privy-council of thirty. At the revolution he again refused the secretaryship, and gave the remainder of his days, after 1681, to letters and gardening. Died, 1699.

Teniers (*tĕ-nērs′*), **David, the Younger,** celebrated Flemish painter, was born at Antwerp, 1610. Before he was twenty his work bore the stamp of maturity, and he entered the guild as master in 1632. He was the most popular of all the Flemish painters. So numerous were his paintings that he was accustomed to say that a gallery two leagues long would not hold them. Among them are: "The Denial of St. Peter"; "The Prodigal Son"; "Village Festival"; "Judith"; "Parable of the Laborer"; "Charles V.



TENNYSON IN HIS LIBRARY

From an etching by Roberts

Leaving Dort"; "Boors Feasting," etc. He was habitually conversant with the higher classes of society; and the suavity of his manner and his irreproachable conduct made him the object of general esteem. His works — especially his smaller works — are very highly valued. He died at Brussels, 1690.

Tennyson, Alfred, English poet, was born in Somersby, Lincolnshire, England, 1809, of which parish his father was rector. He was the third of a large family, and was educated at Louth grammar school, and at Cambridge university. In 1827, with his brother Charles, he issued a small volume entitled *Poems, by Two Brothers*, of which almost nothing has been preserved. At Cambridge he gained the chancellor's medal by a poem in blank verse entitled *Timbuctoo;* but his literary career properly dated from 1830, in which year a volume appeared of *Poems, chiefly Lyrical*. From this time the reputation of the writer slowly extended itself, and the publication, in 1842, of *Poems, by Alfred Tennyson*, in two volumes, raised him to the position of supremacy, which he continued to occupy until his death. In 1847 appeared *The Princess, a Medley*, and in 1850 the series of elegies entitled *In Memoriam*. On the death of Wordsworth, in 1850, Tennyson succeeded him as poet laureate, in which capacity he issued, in 1852, his *Ode on the Death of the Duke of Wellington*. In 1855 appeared *Maud, and other Poems*. The *Idylls of the King* at once took rank as one of the noblest poems in the language. It was followed in 1864 by a volume containing *Enoch Arden; Aylmer's Field; Tithonus;* and a few other poems. *The Window*, or *Songs of the Wrens*, appeared in 1870. In 1875 he essayed in a new field by publishing *Queen Mary*, a drama, which was followed by *Harold*, also a play, in 1876. Then came *Locksley Hall Sixty Years After; Demeter, and other Poems; The Foresters, Robin Hood, and Maid Marian*, etc. He lived for the most part a retired life. In 1884 he was made an hereditary peer, with the title of Baron Tennyson. Died, 1892.

Terhune (*tĕr-hūn'*), **Mary Virginia,** neé Hawes, American novelist and miscellaneous writer, better known by her pen-name of "Marion Harland," was born in Amelia county, Va., 1831. Her first story was accepted by *Godey's Lady's Book* when she was only sixteen; in 1854 she published *Alone*, which at once created a sensation; and in 1855 she produced *The Hidden Path*. In 1856 she was married to Rev. Edward P. Terhune. In 1857 her *Moss-Side* appeared, and this was followed in rapid succession by *Nemesis; Husks; Husbands and Homes; Sunnybank; Christmas Holly; Ruby's Husband; Phemie's Temptation; At Last; The Empty Heart; Jessamine; Handicapped; A Gallant Fight*. Besides her novels "Marion Harland" has been noted for her counsel to housekeepers, and has written on many topics connected with the home. Hèr *Common Sense in the Household* had an immediate success.

Terry, Ellen Alicia (Mrs. James Carew), English actress, was born at Coventry, England, 1848; she made her first appearance on the stage with Charles Kean's Shakespearean revivals, in 1856, in *The Winter's Tale*, and afterward as Prince Arthur in *King John*. She subsequently joined a Bristol company, of which Mrs. Kendal was a member, and appeared in London as Gertrude in *The Little Treasure*, as Hero in *Much Ado about Nothing*, and as Mary Meredith in *Our American Cousin*. In 1864 she married G. F. Watts, the painter, but was speedily divorced; reappeared on the stage in 1867 for the first time with Henry Irving; and in 1868 married E. A. Wardell, and retired from the stage until 1874. In 1878 she was again associated with Irving, with whom she continued throughout the greater part of his subsequent career. Her personations include: Viola in *Twelfth Night;* Ruth Meadows in *Eugene Aram;* Henrietta Maria in *Charles I.;* Marguerite in *Faust;* Rosamonde in *Becket;* Lucy Ashton in *Ravenswood;* Lady Macbeth in Shakespeare's tragedy of *Macbeth;* Madame Sans-Gene in Sardou's play; Clarice in *Robespierre*, etc. She produced Ibsen's *The Vikings* in 1903, and Shakespearean plays with her own company at the Imperial theater. In 1905 she played at Duke of York's theater in Barrie's *Alice-sit-by-the-fire*, and celebrated her stage jubilee in 1906. In 1907 she married James Carew, actor, her former husband having died in 1885.

Tertullian (*tĕr-tŭl'-ĭ-an*), **Quintus Septimius Florens,** celebrated father of the Latin church, flourished in the latter part of the second and the earlier part of the third century, A. D. He was born at Carthage, practiced law in Rome, and later returned to his birthplace, where he became a presbyter, and spent the rest of his life. When and how he was converted to Christianity we are not informed; but he was well versed in Greek and Roman literature, and was remarkable for his impassioned eloquence, which he used with great power in his *Apology for the Christian Religion*, which is his most famous work. Thirty-one of his works are extant. At some period of his life he embraced the views of the Montanists.

Tesla (*tĕs'-lä*), **Nikola,** American electrical inventor, was born in Smiljan, Austria-Hungary, 1857. He studied engineering in Gratz, came to the United States in 1884, and for several years was employed at Edison's laboratory, near Orange, N. J. He then opened a laboratory of his own. In 1888 he completed his discovery of the rotating magnetic field by the invention of the rotary field-motor, the multi-phase system of which is used in the 50,000 horse power plant built to transmit the water power of Niagara Falls to Buffalo and other cities. He invented many methods and appliances for the use of electricity, among them the production of efficient light from lamps without filaments, and the production and transmission of power and intelligence without wires. In 1898 he announced the discovery of, and in 1900 patented, a method of transmitting electrical energy without wires. In 1901 he discovered that the capacity of the electrical conductor is variable. Since 1903 he has been engaged in developing his system of world telegraphy and telephony.

Tetrazzini (*tĕt'-trä-zē'-nē*) **Signora Luisa,** one of the greatest successes in operatic history, was born in Florence. She was educated under Signor Cecherini. First appeared in Florence in 1895 and at Covent Garden in 1907. Has toured in South America, Russia, and other countries. She is recognized as the true successor of Patti, and some rôles that made Patti famous have never been successfully sung since her retirement until Tetrazzini appeared upon the scene. She possesses a wonderful voice, remarkable for its purity and range.

Thackeray, William Makepeace, eminent English novelist, was born at Calcutta, India, 1811. Brought to England, he was educated first at the Charterhouse, and afterward at the university of Cambridge. His first profession was that of artist; but he soon abandoned art for literature, his earliest work to attract attention being some contributions to *Fraser's Magazine*, which appeared under the pseudonym of Michael Angelo Titmarsh. He afterward contributed largely to *Punch* and published several volumes under his adopted name, all of which exhibited power, especially of wit and satire. In 1846–48 *Vanity Fair* appeared, and Thackeray's reputation was at once established. In 1848–50 *Pendennis* appeared; in 1852, *The History of Henry Esmond;* in 1855, *The Newcomes;* and somewhat later, *The Virginians, Lovel the Widower*, and *Philip.* In 1851 he delivered and published his *Lectures on the English Humourists of the Eighteenth Century*, and in 1856 his *Lectures on the Four Georges.* In 1860 he established the *Cornhill Magazine*, to which he contributed his *Roundabout Papers.* His last novel, *Denis Duval*, was left incomplete, the hand of the writer being suddenly arrested by his death in 1863. Besides the works above mentioned, he wrote a number of smaller works, all marked by the same characteristic features as his larger productions.

Thales (*thā'-lēz*), early Greek philosopher, founder of the Ionic or physical school of philosophy, and one of the seven wise men, was a native of Miletus, in Asia Minor, and flourished during the first half of the sixth century B. C. He is regarded by some as the first Greek that speculated on the constitution of the universe. He regarded water as the principle of things; predicted an eclipse of the sun; and made various discoveries in geometry and astronomy.

Themistocles (*thē-mĭs'-tō-klēz*), Athenian statesman, was born at Athens, about 514 B. C., fought at Marathon, and devoted the succeeding years to the upbuilding of the Athenian navy. In 481 B. C. he was chief archon, and added greatly to the naval power of Athens. On the invasion of Greece by Xerxes, he was appointed to the command of the Athenian fleet, and to his energy, foresight, and courage the Greeks mainly owed their salvation from the Persian dominion. He later rebuilt the walls and fortified the Piræus. But he was wily, ambitious, and self-seeking; and, being accused of peculation in 471 B. C., he was ostracized, and retired for a time to Argos. Being still in danger of arrest on a charge of treason in concert with Pausanias, he fled to Asia, where he was received with great favor by Artaxerxes, who had just succeeded his father Xerxes on the Persian throne. He lived securely in Magnesia until his death, which, according to some writers, was caused by poison administered by himself. Died about 449 B. C.

Theocritus (*thē-ŏk'-rĭ-tŭs*), celebrated Greek poet, flourished in the time of Ptolemy Philadelphus, 285 to 247 B. C. He was a native of Syracuse, but very little is known of his personal history, except that he became famous as a poet during his residence at Alexandria, where a great part of his life appears to have been spent, and that he afterward returned to Syracuse, and lived there under the reign of Hiero II. The compositions of Theocritus bear the name of *Idyls*, of which there are thirty extant, though the genuineness of some of them is doubtful. Twenty-two epigrams, and a poem called *Berenice*, are also ascribed to him.

Theodoric (*thē-ŏd'-ō-rĭk*) **the Great**, founder of the monarchy of the Ostro- or East Goths, son of Theodemir, the Ostrogothic king of Pannonia, was born about 454. He was for ten years during his youth a hostage at the Byzantine court at Constantinople; succeeded his father in 474, and immediately began to push the fortunes of the Ostrogoths. Various territories fell into his hands, and alarm arose at the imperial court. In 493 he advanced upon Italy, overthrew Odoacer, and after his murder became sole ruler. He was now the most powerful of the Gothic kings, with an empire embracing Italy, Sicily, and Dalmatia, besides German possessions. As a ruler he proved himself as wise as he was strong; became in after years one of the great heroes of German legend, and figures in the *Nibelungenlied.* Died, 526.

Thiers (*tyâr*), **Louis Adolphe**, French statesman and historian, and president of the French republic, was born in Marseilles, 1797. He was educated for the law, but, discarding it at an early age, entered the field of journalism as a contributor to the *Constitutionnel.* Between the years 1823–27 appeared his *History of the French Revolution*, a work which stamped him an historian of the first order. He largely contributed to the revolution of 1830. In 1832 he was made minister of the interior; in 1834, was admitted to the French academy; and from February to August, 1836, filled the post of president of the council and minister for foreign affairs. In 1840 he was recalled to power, but being unable to prevail upon Louis Philippe to support his Eastern policy, he resigned office in October and employed his leisure in writing his *History of the Consulate and Empire*, one of the greatest historical works of the age. He entered the corps legislatif in 1863 and in 1870 resolutely opposed the impending war against Germany. In 1871 he succeeded in effecting peace on the best terms possible under the circumstances, and, in the same year, was elected president of the new republic. In 1873, after an adverse vote of the legislative body, he resigned, and was succeeded by Marshal MacMahon. Died, 1877.

Thomas, Ambroise, French composer, was born at Metz, 1811. He studied at the Paris conservatoire, 1828–32. His first success in opera was with *La Double Échelle*, in 1837, followed by *Mina, Betty, Le Caïd, Le Songe d'une Nuit d'Été, Le Carnaval de Venise, Mignon, Hamlet*, and *Françoise de Rimini*, the latter in 1882. He also wrote many cantatas, part-songs, and choral pieces. He became a member of the French institute in 1851, professor of composition, 1852, director of the conservatoire, 1871, and received the grand cross of the legion of honor, 1880. Died, 1896.

Thomas, Augustus, American playwright, was born at St. Louis, Mo., 1859. He was educated in the public schools there; studied law two years; was a page in the 41st congress; spent six years in practical railroading; was a special writer and illustrator on St. Louis, Kansas City and New York newspapers, and editor and proprietor of the *Kansas City Mirror.* Author: *Alabama; In Mizzoura; Arizona; The Burglar; Colorado Man of the World; After Thoughts; The Meddler; The Man Upstairs; Oliver Goldsmith; On the Quiet; A Proper Impropriety; That Overcoat; The Capitol; New Blood; The Hoosier Doctor; The Earl of Pawtucket; The Other Girl; Mrs. Leffingwell's Boots; The Education of Mr. Pipp; Jim De Lancey; The Embassy Ball; The Witching Hour*, etc.

Thomas à Becket. See **Becket, Thomas à.**

Thomas, George Henry, American general, was born in Southampton county, Va., 1816. He was graduated at West Point, served in the Mexican and Seminole wars, and for six years was in service in California and Texas. He began his career in the civil war as cavalry colonel in the Shenandoah valley. In 1861 he was appointed brigadier-general of volunteers, and in January, 1862, won the battle of Mill Springs. Major-general in command of the center of Rosecrans' army, he saved the battle of Stone river; and at Chickamauga again rendered the victory a barren one for the confederates. In October, 1863, he was given the command of the army of the Cumberland, and in November captured Mission Ridge. In 1864 he commanded the center in Sherman's advance on Atlanta, and then was sent to oppose Hood in Tennessee; in December he won the battle of

Nashville, and received the thanks of congress. He afterward commanded the military division of the Pacific, and declined the rank of lieutenant-general which was offered him, saying he had done nothing since the war to merit promotion. He died at San Francisco, 1870.

Thomas à Kempis. See **Kempis, Thomas à.**

Thomas, M. Carey, American educator, was born in Baltimore, Md., 1857, daughter of Dr. James Carey Thomas. She was graduated at Cornell, 1877; studied in Johns Hopkins, 1877–78, and at Leipzig, 1879–83; Ph. D., Zürich, 1883; LL. D., Western Pennsylvania, 1896. Professor of English since 1885, dean, 1885–95, and since 1895 president of Bryn Mawr college. First woman trustee, Cornell university, 1895–99; trustee Bryn Mawr college since 1903. Author and editor: *Sir Gawayne and the Green Knight; Education of Women; Should the Higher Education of Women Differ from That of Men? The College*, etc., and various educational addresses.

Thompson, Ernest Seton. See **Seton, Ernest Thompson.**

Thompson, Launt, American sculptor, was born in Ireland, 1833, but was brought up in Albany, N. Y. He was nine years in Palmer's studio in Albany, where his bust of "Little Nell" made him well known. A statue of General Winfield Scott, at the soldiers' home near Washington, a soldiers' monument at Pittsfield, Mass., a colossal statue of Napoleon, and a statue of the first president of Yale, on the college grounds, are some of his larger works. Died, 1894.

Thompson, Robert Ellis, American educator, president of Central high school, Philadelphia, since 1894, was born near Lurgan, Ireland, 1844. He was graduated at the university of Pennsylvania, 1865; S. T. D., 1887; Ph. D., Hamilton college, 1870. He was licensed to preach by the Reformed presbytery of Philadelphia, 1867; was professor of Latin and mathematics, 1868–71, social science, 1871–81, history and English literature, 1881–92, university of Pennsylvania. Author: *Social Science and National Economy; Elements of Political Economy; Protection to Home Industry*, Harvard lectures; *De Civitate Dei: The Divine Order of Human Society*, Princeton Stone lectures; *Political Economy for High Schools; The Hand of God in American History*, etc.

Thompson, William Oxley, American educator, was born at Cambridge, Ohio, 1855. He was graduated from Muskingum college, 1878, Western theological seminary, Allegheny City, Pa., 1882; D. D., 1891, Muskingum college; LL. D., Western university of Pennsylvania, 1897. He was ordained to the Presbyterian ministry, 1882; was president of Miami university, 1891–99, and has been president of Ohio state university since 1899.

Thomson, Elihu, American electrician, was born in Manchester, England, 1853. He was graduated from Central high school, Philadelphia, 1870; Ph. D., Tufts college. He was professor of chemistry and mechanics, Philadelphia Central high school, 1870–80, and since 1880 electrician for the Thomson-Houston and General electric companies, which manufacture his inventions, for which more than 500 patents have been obtained. He is the inventor of electric welding, which bears his name, and many other important devices in electric lighting, power, etc.

Thomson, James, British poet, was born in Roxburghshire, Scotland, 1700. He studied six years at Edinburgh. His fame rests upon his poems, *The Seasons*, the first of which, *Winter*, appeared in 1726, followed by *Summer*, *Spring*, and *Autumn*. He wrote several dramas, including *Agamemnon*, *Edward and Eleonora*, and *Tancred and Sigismunda*. The *Castle of Indolence*, next to *The Seasons*, his best known work, was written in 1748. The song, "Rule Britannia" is found in a masque, *Alfred*, written by Thomson in connection with Mallet. Died, 1748.

Thomson, Joseph John, English physicist, professor of experimental physics at Cambridge university, England, since 1884; professor of physics, royal institution, London, since 1905; was born near Manchester, 1856. He was graduated at Trinity college, Cambridge, 1880. His work has all been of a very profound character, and, besides numerous contributions to periodical literature, includes the following: *Treatise on the Motion of Vortex Rings; Application of Dynamics to Physics and Chemistry; Recent Researches in Electricity and Magnetism; Conduction of Electricity through Gases; Electricity and Matter*. In 1899 he accomplished the important achievement of dividing the hydrogen atom.

Thomson, Sir William. See **Kelvin, Lord,** page 415.

Thoreau (*thō′-rō, thō-rō′*), **Henry David,** American naturalist, friend of Emerson, and a member of the transcendental school of New England, was born at Concord, Mass., 1817. He was graduated at Harvard college in 1837, and became a surveyor; lived the simplest of lives, in the study of nature, and in writing. Emerson says of him: "He was bred to no profession; he never married; he lived alone; he never went to church; he never voted; he refused to pay a tax to the state; he ate no flesh; he drank no wine; he never knew the use of tobacco; and, though a naturalist, he used neither trap nor gun." This "poet naturalist" built with his own hands a small cabin on the banks of Walden pond, near Concord, and lived there alone for two years. His expenses during these years were nine cents a day, and he gave an account of his experiences in perhaps his finest book, *Walden*, published in 1854. Others were *Cape Cod, The Maine Woods*, and *A Yankee in Canada*. No one else has lived so close to nature or written of it so well. He became acquainted with John Brown in 1859, and devoted the remainder of his life to the liberationist cause. Died at Concord, 1862.

Thorpe, Thomas Edward, English chemist, director of the government laboratories, London, was born near Manchester, 1845. He was educated at Owens college, Manchester, and at the universities of Heidelberg and Bonn; was professor of chemistry in the Andersonian institution, 1870, Yorkshire college, Leeds, 1874, and at the royal college of science, London, 1885. He was president of the society of chemical industry, 1895; honorary or corresponding member of the royal society of Edinburgh, literary and philosophical societies of Glasgow, Manchester, Leeds, Haarlem, Berlin, etc. Author: *Chemical Problems; Inorganic Chemistry; Quantitative Analysis; Qualitative Analysis; A Dictionary of Applied Chemistry; Essays in Historical Chemistry; Humphrey Davy, Poet and Philosopher; Joseph Priestley;* and numerous memoirs in the philosophical transactions of the royal society, and of the chemical society.

Thorwaldsen (*tŏr′-wŏld-sĕn*), **Albert Bertel,** Danish sculptor, was born at Copenhagen, 1770. He studied at the academy of Copenhagen, where he gained the first gold medal in sculpture, and was sent by that body to Rome in 1796. His first great work was his "Jason." Except for a visit to Denmark in 1819-20, when he executed the statues of "Christ and the Twelve Apostles" for the Frue Kirke at Copenhagen, he remained in Rome until 1838. After that date he, for the most part, lived in Denmark. His masterpieces include the "Entry of Alexander into Babylon"; "Cupid and Psyche"; "St. John Preaching in the Wilderness"; "Procession to Golgotha"; the statue of "Prince Poniatowski"; the "Dying

Lion" at Lucerne, and busts of Byron and the Danish poet, Œhlenschläger. Died, 1844.

Thucydides (*thū-sĭd'-ĭ-dēz*), great Greek historian, was born at Athens, about 471 B. C. He belonged to a noble Athenian family, and was himself a person of great influence and wealth. Failing to secure the objects of an expedition which he commanded during the Peloponnesian war, he was banished from Athens in 423 B. C., and remained in exile for twenty years, being assassinated, it is said, at Athens soon after his return. It was during his exile that he wrote his *History of the Peloponnesian War*, which is supposed by some to have been edited by Xenophon, and is remarkable for the fullness and exactness of its details, for its philosophical spirit, and for the force and elegance of its style. Among the Romans, Sallust is believed to have taken Thucydides for his model. He died about 400 B. C.

Thurman, Allen Granbery, American statesman, was born at Lynchburg, Va., 1813. When six years old his family moved to Ohio, where he became a lawyer and was chosen a representative in the 29th congress. In 1851 he was made judge of the supreme court of Ohio, and served as chief-justice from 1854 to 1856. He then served as United States senator, 1869–81, and was one of the ablest and most prominent members of that body. In 1888 he was a candidate for vice-president on the democratic ticket with Cleveland. Died, 1895.

Thwing (*twĭng*), **Charles Franklin,** American educator, author, president of Western Reserve university since 1890, was born at New Sharon, Me., 1853. He was graduated at Harvard, 1876, Andover theological seminary, 1879; S. T. D., Chicago theological seminary, 1889; LL. D., Marietta, 1894, Illinois college, 1894, Waynesburg college, 1901, Washington and Jefferson, 1902. He was ordained to the Congregational ministry, 1879; was pastor of North Avenue Congregational church, Cambridge, Mass., 1879–86, and Plymouth church, Minneapolis, 1886–90. Author: *American Colleges — Their Students and Work; The Reading of Books; The Family*, with Mrs. Thwing; *The Working Church; Within College Walls; The College Woman; The American College in American Life; The Best Life; College Administration; The Youth's Dream of Life; God in His World; If I Were a College Student; The Choice of a College; A Liberal Education and a Liberal Faith; College Training and the Business Man; A History of Higher Education in America*, etc.

Ticknor, George, American author, was born at Boston, 1791. He was graduated at Dartmouth college when but sixteen years old, studied at Göttingen and elsewhere in Europe, 1815–19, and in 1819 became professor of French and Spanish in Harvard college. His *History of Spanish Literature* was published in 1849, and at once took high rank, and was translated into Spanish, German, and French. His *Life of Prescott* is considered one of the finest biographies ever written. He was one of the founders of the Boston public library. Died, 1871.

Tiffany, Charles Louis, American merchant, was born at Killingly, Conn., 1812. In 1837, in partnership with John B. Young, on a borrowed capital of $1,000, he established a stationery and fancy goods store next door to A. T. Stewart's establishment. The jewelry part of the business grew most rapidly. In 1847 Tiffany began the manufacture of gold jewelry; in 1850 made immense purchases of diamonds in Europe, selling them in the United States at tremendous profit. The firm became Tiffany and Company in 1851, and later established branches in several European centers. Tiffany adopted the sterling silver standard, .925 fine, which has since become standard throughout the country. Died, 1902.

Tiffany, Louis Comfort, American artist, was born in New York, 1848. He studied art under George Inness and Samuel Coleman, New York, and Léon Bailly, Paris, and has devoted himself chiefly to oriental scenes in oil and water colors. He has also done much decorative work and is president and art director of the Tiffany glass and decorating company; president of the Tiffany furnaces, Corona, L. I.; second vice-president and trustee of Tiffany and Company. He discovered the formulas for making decorative glass known as "Tiffany Favrile glass"; is a member of many American and foreign art societies.

Tilden, Samuel Jones, American statesman, was born at New Lebanon, N. Y., 1814. He was educated at Yale and at New York university, and admitted to the bar in 1841. He was a member of the New York legislature, 1845, and of the constitutional convention, 1846. By 1868 he had become leader of the democrats in the state, and attacked and destroyed the "Tweed Ring." In 1874 he became governor of New York; in 1876 was democratic candidate for the presidency, but failed to be seated on account of alleged irregularities in Louisiana. He won admiration by his temperate utterances and unselfish attitude. He died in 1886, leaving a great part of his large fortune to found a free library in New York city, which was realized in the completion of the splendid new library building in 1909.

Tillman, Benjamin Ryan, United States senator, farmer, was born in Edgefield county, S. C., 1847. He received an academic education; joined the confederate army, 1864, but was stricken with severe illness which caused the loss of his left eye and kept him an invalid for two years, so that he saw no military service. He then followed farming as his sole pursuit until 1886, when he became prominent in an agitation for industrial and technical education and other reforms. He was elected governor of South Carolina in 1890 and 1892, and has been United States senator since 1895; founded Clemson agricultural and mechanical college at Calhoun's old home, Fort Hill, and also Winthrop normal and industrial college at Rock Hill — the former for boys, the latter for girls, two of the largest schools of the kind in the South. He is also author of the dispensary system of selling liquor under state control; was the central figure in the South Carolina constitutional convention, 1895, which instituted educational qualification for suffrage; was one of the leaders in securing the insertion of advanced positions in democratic platform of 1896; was prominent in the democratic national conventions of 1900 and 1904, and in the latter was active in work of harmonizing contending factions of democracy. He is a picturesque debater of acknowledged ability, and a well-known lecturer.

Tilly, Johann Tserklaes, Count of, Belgian general, one of the great leaders of the Thirty Years' war, was born near Gembleaux, Belgium, 1559. He was designed for the priesthood and educated by Jesuits, but abandoned the church for the army. He was trained in the art of war by Parma and Alva, and proved himself a born soldier. He reorganized the Bavarian army, and, devoted to the Catholic cause, was given command of the Catholic army at the outbreak of the thirty years' war, during the course of which he won many notable battles. He subsequently coöperated with Wallenstein, whom, in 1630, he succeeded as commander-in-chief of the imperial forces. In 1631 he sacked with merciless cruelty the town of Madgeburg, a deed which Gustavus Adolphus was swift to avenge by crushing the Catholic forces in two successive battles — at Breitenfeld and at the river Lech — in the latter of which Tilly was mortally wounded, 1632.

Tintoretto (*tĕn'-tō-rĕt'-tō*), Venetian historical painter, was born in 1518. His real name was Jacopo Robusti, but he was called Tintoretto from the Venetian word meaning dyer, which was his father's trade. He was self-taught except for a few lessons from Titian. He took as his motto: "The design of Michaelangelo and the coloring of Titian." He rose to high reputation, and was employed by the Venetian government to paint a picture of the victory gained over the Turks in 1571. Most of his finest compositions are at Venice. He sketched so fast that he was called the "madman." Among his famous pictures are: "Belshazzar's Feast," a fresco; "The Last Supper"; "The Last Judgment"; "The Slaughter of the Innocents"; and "Paradise." He died at Venice, 1594.

Tischendorf (*tĭsh'-en-dôrf*), **Lobegott Friedrich Konstantin von,** German biblical scholar, was born at Lengenfeld in Saxony, 1815. In 1839 he became a university lecturer at Leipzig, and in 1845 a professor. His labors in search of the best and most ancient MSS. of the new testament, especially those in 1844, 1853, and 1859, resulted in the discovery of the fourth century *Sinaitic Codex* at the monastery on Mount Sinai. His journeys thither he described in *Reise in den Orient*, and *Aus dem Heiligen Lande.* Among his works are the editions of the Sinaitic and many other MSS.; the eighth edition of the new testament; an edition of the septuagint; and the *Monumenta Sacra Inedita. When were our Gospels Written?* was translated in 1866. He was created count of the Russian empire, LL. D. of Cambridge, D. C. L. of Oxford, etc. He died in Leipzig, 1874.

Tissot (*tē'-sō'*), **James Joseph Jacques,** French genre painter, was born at Nantes, France, 1836. He was educated at the École des Beaux Arts, in Paris, and under Lamothe and Flandrin. He made his first appearance in the Paris salon in 1859, with a number of fine water colors, etchings, etc., and in 1861 painted his "Faust and Marguerite," now in the Luxembourg, Paris. His other notable canvases include: "Return of the Infant Prodigal"; "Confidence"; "A Widow"; "An Interesting Story"; "The Captain's Daughter"; "On the Thames"; "A Young Girl in a Boat"; and "A Young Woman in Church." He then turned his attention to his series of religious subjects illustrating the *Life of Christ*, for which a firm of French publishers, it is said, paid him over a million francs. The series, 365 in number, were painted each on the spot traditionally associated with its subject, and were exhibited in London and Paris, where they won high fame for the distinguished artist. Died, 1902.

Titchener (*tĭch'-en-ĕr*), **Edward Bradford,** American educator, Sage professor of psychology at Cornell since 1895, was born at Chichester, England, 1867. He was graduated at Brasenose college, Oxford, 1890; Ph. D., Leipzig, 1892; D. Sc., Oxford, 1906; LL. D., university of Wisconsin, 1904. He was extension lecturer in biology, Oxford, 1892; assistant professor of psychology, Cornell, 1892–95; American editor of *Mind;* associate editor of *American Journal of Psychology.* Author: *An Outline of Psychology; A Primer of Psychology*, etc.; translator of several psychological works.

Titian (*tĭsh'-an*). See page 141.

Tittmann, Otto Hilgard, American scientist, was born at Belleville, Ill., 1850. He was educated in the public schools of St. Louis, Mo., 1859–66, and entered the United States coast and geodetic survey in 1867. He was assistant astronomer of Transit of Venus expedition to Japan, 1874, in charge of various surveying expeditions to the east and the west coast, United States; sent to Paris, 1890, to bring to the United States the national standard metre and to inspect weights and measures offices in London, Paris, and Berlin; United States delegate to international geodetic conference, Berlin, 1895. Member of permanent commission international geodetic association, 1900; assistant in charge of United States coast and geodetic survey office, 1895–99, assistant superintendent, 1899-1900, and superintendent since 1900. He was appointed to represent the United States in the demarkation of the boundary between Alaska and Canada in 1899, and was United States Alaska boundary commissioner, 1904.

Tocqueville (*tŏk'-vĭl*), **Alexis Charles Henri Clérel de,** French statesman and writer, was born at Verneuil of an old Norman line, 1805. He studied at Metz and at Paris, was admitted to the bar in 1825, and became an assistant magistrate at Versailles. Sent in 1831 to America to report on the penitentiary system, he wrote *Democracy in America*, which made a great sensation in Europe. He became successively a member of the academy of moral sciences and of the French academy. In 1835 he visited England, and in 1839 was elected to the chamber of deputies by the Norman farmers. After 1848 he was the most formidable opponent of the socialists and extreme republicans, and as strenuously opposed Louis Napoleon. He became vice-president of the assembly in 1849, and from June to October was minister of foreign affairs. After the *coup d'état*, he retired to his Norman estate, Tocqueville, and agricultural pursuits, and there wrote *L'ancien Régime et la Révolution.* He also wrote a work on the reign of Louis XV. Died, 1859.

Togo (*tō'-gō*), **Admiral Count Heihachiro,** Japanese admiral, a samurai of the Satsuma clan, was born at Kagoshima, 1847. He was sent to England for training on her majesty's ship *Worcester*, 1873-74, and after returning to his country became one of the group of hard-working young officers who successfully achieved the task of creating a new navy. He first came into prominence as commander of the *Naniwa*, which sank the transport *Kowshing* and forced on the war with China. He was then a rear-admiral and third in command of the fleet. After the war he became commander-in-chief at Maizuru, and was promoted vice-admiral. At the close of January, 1904, he was selected to command the entire Japanese fleet in the hostilities against Russia. After Nogi's guns from the land had completed the destruction of the Port Arthur fleet, Togo hid his ships for three months, pending the arrival of the Baltic fleet. Numerically the Russians were his superior, notably in battleships; but in speed, manœuvring, gun-fire, and discipline, the advantage was all with the Japanese. The battle of the sea of Japan was fought May 27-28, 1905, when of the Baltic fleet twenty ships were sunk, six captured, two demolished, and six disarmed and interned. Admirals Rojestvensky and Nebogatoff were captured with some 8,000 men, while 4,000 Russians were killed. The Japanese losses were three torpedo boats sunk, 116 men killed, and 538 wounded. Togo was made count in 1907.

Tolstoi (*tŏl-stoi'*), **Count Lyoff Nikolayevitch,** Russian author and social reformer, was born at Yasnaia Poliana, in the government of Toula, 1828. He studied at the university of Kazan; entered the army when twenty-three, and served in the Caucasus and at Sebastopol. He first made a literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His *War and Peace*, a tale of the invasion of Russia by Napoleon in 1812, is regarded as his masterpiece; but his *Anna Karenina*, which appeared in 1876, is better appreciated. *The Cossacks* is another admirable work. Translations of his *Kreutzer Sonata* appeared in 1890. He wrote much on education, published many short tales and reminiscences of childhood and youth, and latterly devoted himself to religious teaching. He made "Resist not evil" the keystone of the Christian faith, and insisted that the literal interpretation of the sermon on the mount is the only rule of the Christian life. His religious views are set forth in *Christ's Christianity* and *My Religion*. In 1892 he deposited his *Memoirs and Diaries* with the curator of the Rumyanzoff museum on the condition that they should not be published until ten years after his death. In November he legally made over his whole fortune, including his real and personal estate, to his wife and children. During 1893 he wrote *The Kingdom of God Within Us*, an important work on the social question; and in 1895 *The Four Gospels Harmonized and Translated*. He was excommunicated by the holy synod in 1901, and the same authority enjoined all true believers to refrain from celebrating his eightieth birthday in 1908. In November, 1910, he deserted his family and retired to Astapova, where he died in a peasant's hut on November 20.

Toombs, Robert, American politician, was born in Wilkes county, Ga., 1810. He was graduated at Union college, studied law at the university of Virginia, became a member of congress from Georgia in 1844, and in 1850 contributed to the passing of the compromise measures. From 1853 to 1861 he was a member of the United States senate, a Southern extremist and leading disunionist. In 1861 he became secretary of state under the confederate government, but resigned to accept the commission of brigadier-general in the confederate army. He was present at the second battle of Bull Run, was at Antietam in 1862, and in 1864 commanded the militia of Georgia. After the war he lived abroad until 1867, denounced strongly the reconstruction measures of congress, and on his return to the South refused to take the oath of allegiance to the United States government. He died in 1885.

Torricelli (*tŏr′-rē-chĕl′-lē*), **Evangelista,** distinguished Italian physicist and mathematician, was born probably at Piancaldoli, in the Romagna, 1608. He was a pupil of Galileo at the university of Florence, and succeeded him as professor of natural philosophy and mathematics in 1642 in the same institution. He is celebrated as the inventor of the barometer, and for his improvements in lenses for telescopes. He was likewise the first to make microscopes with globules of glass formed by the blow-pipe. He died, 1647.

Torstensson (*tôr′-sten-sŏn*), **Lennard,** count of Ortala, Swedish general, was born at the castle of Torstena, Sweden, 1603. He accompanied Adolphus to Germany in 1630, and in 1641 was appointed to the command of the Swedish army in Germany. He invaded Silesia, and, when driven back by the imperialists, turned and defeated them at Breitenfeld. The next winter he swept the Danes out of Holstein, and then drove the Austrians back into Bohemia. In 1645 he advanced to the walls of Vienna, but in the following year was compelled by illness to return to Sweden. He died in 1651.

Totleben (*tŏt-lyĕ′-bĕn*), or **Todleben, Franz Eduard Ivanovitch,** Russian general and military engineer, was born at Mitau in Courland, 1818, of German descent. He served as lieutenant of engineers in the Caucasus, and was with the Russian army in the Danubian principalities in 1853. Until he was severely wounded in 1855, he conducted with skill and energy the defense of Sebastopol, and thereafter completed the fortification of Nikolaieff and Cronstadt. During the Turkish war of 1877-78 he was called to besiege Plevna, which, after a brilliant defense, he took. He died at Bad Soden near Frankfort in 1884, and was buried at Sebastopol. He wrote an account of the defense of Sebastopol.

Tourgée (*to͞or-zhā′*), **Albion Winegar,** American author, was born at Williamsfield, Ohio, 1838. He studied at the university of Rochester, N. Y.; enlisted as a private in the 27th New York volunteers; was wounded at Bull Run and again at Perryville; and was held a prisoner for four months. He moved to North Carolina, where he was prominent in the reconstruction of the state, drawing up the constitution, and aiding in the revision of the laws. For some years prior to his death in 1905 he was United States consul at Bordeaux, France, and Halifax, Canada. His writings, besides legal works, include: *Toinette; Figs and Thistles; A Fool's Errand;* and *Bricks without Straw.*

Toussaint L'Ouverture (*to͞o′-săɴ′ lo͞o′-vĕr′-tür′*), **François Dominique,** Haitian general, was born in 1743, son of African slaves, in Santo Domingo. In 1796 he was appointed by the French directory chief of the army of Santo Domingo, and afterward established his authority throughout the island, which he ruled with justice and vigor. When Bonaparte sought to restore slavery in Santo Domingo in 1801, Toussaint resisted, but was forced to surrender, and was sent to France, where he died in prison in 1803.

Tower, Charlemagne, American capitalist and diplomat, was born in Philadelphia, Pa., 1848. He was graduated at Harvard in 1872; LL. D., Lafayette, university of Chicago, university of Glasgow. After graduation at Harvard he studied history, foreign languages and literature in Europe, 1872–76; studied law at Philadelphia, and was admitted to the bar in 1878. He lived in Duluth, Minn., 1882–87; was president of Duluth and Iron Range railroad and managing director of Minneapolis iron company; returned to Philadelphia, 1887, where he has large interests. He was United States minister to Austria-Hungary, 1897–99; ambassador to Russia, 1899–1902, and ambassador to Germany, 1902–08. Author: *The Marquis de La Fayette in the American Revolution.*

Toy, Crawford Howell, American educator, biblical scholar, was born in Norfolk, Va., 1836. He was graduated at the university of Virginia, 1856; studied at the university of Berlin, 1866–68; A. M., LL. D. He was professor of Hebrew in the Southern Baptist theological seminary, Greenville, S. C., and Louisville, Ky., 1869–79; Hancock professor of Hebrew and other oriental languages at Harvard, 1880–1909, professor emeritus since 1909; was Dexter lecturer on biblical literature until 1903. Author: *The Religion of Israel; Quotations in the New Testament; Judaism and Christianity; Hebrew Text and English Translation of Ezekiel; Commentary on Proverbs*, etc.

Trajan (*trā′-jan*), **Marcus Ulpius Crinitus,** Roman emperor, surnamed Optimus, was born at Italica, in Spain, about 52 A. D. After having distinguished himself at the head of the legions in lower Germany, he was, at the age of forty-two, adopted by Nerva. On the death of that monarch, 98 A. D., Trajan was invested with the imperial purple. The adoption of Nerva and the choice of the senate were justified by the conduct of the emperor. In his civil capacity, he ruled for the welfare of his people; in his military character, he sustained the glory of Rome, by defeating the Dacians, Parthians, Arabians, Armenians, and Persians. The column which bears his name was raised in the Roman capital to commemorate his victories. He died 117 A. D.

Tree, Herbert Beerbohm, English actor and manager, son of a grain merchant named Beerbohm, was born in London, 1853. Shortly after entering his father's office, in 1870, he became a member of an amateur dramatic club, and joined the profession in 1877. His first success was as the timid curate in *The Private Secretary*, and immediately after he played the grim spy Macari in *Called Back*. He managed the Comedy theater in 1887, and produced *The Red Lamp;* and in the autumn of the same year assumed charge of the Haymarket theater. In 1897 he opened his new theater, His Majesty's, in the Haymarket. Here he has produced the greatest of his successes: *Julius Cæsar; King John; A Midsummer Night's Dream; Herod; Twelfth Night; The Merry Wives of Windsor; Ulysses; The Eternal City; King Richard II.; The Darling of the Gods; The Tempest; Much Ado About Nothing; Business is Business; Oliver Twist; Nero; Colonel Newcome*, etc. In 1905 he inaugurated a Shakespeare festival, which is now one of the annual arrangements of the theater. During the Shakespeare celebrations in 1906, he revived *Hamlet, Julius Cæsar, Twelfth Night, Much Ado About Nothing, Henry IV.*, and *The Tempest.* In 1907 he produced several of Shakespeare's plays in Berlin, and was received by the emperor. His wife, an admirable Greek scholar, formerly connected with Queen's college, is a very refined actress.

Trench, Richard Chenevix, British prelate and writer, was born at Dublin, 1807. He was graduated at Trinity college, Cambridge, 1829. After a voyage to Gibraltar he became curate at Hadleigh, incumbent of Curdridge, and in 1841 curate to Samuel Wilberforce, afterward bishop of Winchester. During 1835–46 he published six volumes of poetry, reissued in 1865. In 1845 he became rector of Itchenstoke; in 1847 professor of theology in King's college, London; in 1856 dean of Westminster; and in 1863 archbishop of Dublin, an office which he resigned in 1884. His principal works are: *Notes on the Parables; Notes on the Miracles; Hulsean Lectures; Sacred Latin Poetry; The Study of Words; Lessons in Proverbs; New Testament Synonyms; English Past and Present; Life and Genius of Calderon; Select Glossary of English Words; Studies on the Gospels;* and *Lectures on Mediæval Church History.* He died in 1886, and was buried in Westminster abbey.

Trent, William Peterfield, American educator and critic, was born at Richmond, Va., 1862. He was graduated at the university of Virginia, A. M., 1884; LL. D., Wake Forest college, 1899; D. C. L., university of the South, 1905. He was professor of English, 1888–1900, and dean of the academic department, 1894–1900, university of the South. Editor of the *Sewanee Review*, 1892–1900. Author: *English Culture in Virginia; Life of William Gilmore Simms; Southern Statesmen of the Old Régime; Robert E. Lee; Verses; John Milton, a Short Study of His Life and Works; Authority of Criticism; War and Civilization; The Progress of the United States in the Century; A History of American Literature*, 1607–1865; *History of the United States for Schools; A Brief History of American Literature; Greatness in Literature, and Other Papers; Daniel Defoe*, etc.

Tribonian (*trĭ-bō'-nĭ-an*), celebrated Byzantine jurisconsult, was born at Sida, in Pamphylia, about the beginning of the sixth century. He gained a high reputation at the bar, and rose, through a succession of state offices, to those of prætorian prefect and consul. Justinian intrusted to him the superintendence of his new code of laws. This task was begun in 530 and completed in 534. Died, 545.

Trollope, Anthony, English novelist, was born in London, 1815. He was educated at Winchester school, and subsequently at Harrow, and for many years held a position in the London post-office. He produced a long series of novels, among which are: *Barchester Towers; Doctor Thorne; The Bertrams; The Claverings; Castle Richmond;* and *The Golden Lion of Granpere.* Besides these he published several volumes of travel about the West Indies and the Spanish Main, on North America, on Australia, and on South Africa. He also wrote the *Life of Cicero*, one of Cæsar, and sketches of Thackeray. He died in 1882.

Tromp, Martin Harpertzoon, Dutch admiral, was born at Briel, 1597. He entered the navy in 1624, and as lieutenant-admiral defeated a superior Spanish fleet off Gravelines in 1639. The same year he defeated another fleet off the Downs, and captured thirteen richly laden galleons. In 1652 he was worsted by an English fleet under Blake. In November he again encountered Blake in the strait of Dover, this time successfully, but in February, 1653, Blake, with Monk and Deane, defeated Tromp off Portland, after an obstinate three days' contest. In June another terrific battle between Tromp and Deane took place off the North Foreland, the Dutch being defeated. In the final battle with Monk, July 31, 1653, off the coast of Holland, the Dutch lost thirty men-of-war, but their greatest loss was the heroic admiral, the victor in thirty-three sea-fights, shot through the heart. He was buried at Delft.

Troubetzkoy (*trōō-bĕts'-koi*), **Princess.** See **Rives, Amelia.**

Trowbridge, John Townsend, American novelist, poet, and editor, was born at Ogden, N. Y., 1827. Early in life he lived on a farm, and in 1847 went to New York and began to write for the press. He removed to Boston and there contributed to magazines and journals and took actively to authorship. His chief works are: *Neighbor Jackwood; Cudjo's Cave; Farnell's Folly; Neighbors' Wives; The South and Its Battlefields; Three Scouts; Jack Hazard* series; *The Silver Medal* series; *The Drummer Boy; The Tide Mill* series; the *Toby Trafford* series; and *Start in Life* series. He has also published, besides his popular stories, some volumes of verse, notably, *The Vagabonds, and Other Poems; The Book of Gold, and Other Poems; The Emigrant's Story, and Other Poems.*

Trumbull, John, American painter, was born at Lebanon, Conn., 1756. He was graduated at Harvard college, and studied art at Boston. He served in the army during the revolutionary war as adjutant of the first Connecticut regiment, aid-de-camp to Washington, major, and colonel, resigning in 1777. While studying painting in London, in 1780, he was imprisoned for eight months during the excitement produced by the execution of André. His first American historical pictures were "Battle of Bunker Hill," and the "Death of Montgomery." He painted portraits of Washington and other revolutionary characters. In 1817 he was employed by congress to paint four pictures for the rotunda of the capitol, and chose for his subjects, "The Signing of the Declaration of Independence," "Surrender of Burgoyne," "Surrender of Cornwallis," and "Resignation of Washington." He died at New York, 1843.

Tschaikowsky (*chĭ-kŏf'-skē*), **Petr Ilich,** the greatest musical composer Russia has thus far produced, was born in the Ural mining region, 1840. He studied jurisprudence at St. Petersburg, in 1859 secured a position under the ministry of justice, and then studied at the conservatory under Rubinstein. In 1866 he became teacher of harmony at the Moscow conservatory. He visited America in 1891, and died at St. Petersburg in 1893. His best work is found in his *Manfred, Roméo et Juliette, The Tempest, Francesca da Rimini,* and his remarkable symphonies. He also wrote over a hundred songs, some of which are masterpieces.

Tupper, Sir Charles, Canadian statesman, was born in Amherst, Nova Scotia, 1821. He studied medicine at Edinburgh university; practiced his profession in his native town; in 1855 was made a member of the provincial legislature, and was prime minister of Nova Scotia, 1864–67. He warmly advocated the formation of the Dominion of Canada; became a member of Sir John A. Macdonald's cabinet in 1870; was minister of public works in 1878; and 1879–84, minister of railways and canals. While filling the latter office he promoted the construction of the Canadian Pacific railway. In 1884 he was appointed high commissioner for Canada in London. He was one of the negotiators of the fisheries treaty with the United States in 1887-88, and was created a baronet in the latter year. In 1895 he represented Canada at the international railway conference in London. In 1896 he was prime minister of Canada.

Turenne (*tü'-rĕn'*), **Henri de la Tour d'Auvergne, Vicomte de,** French general, son of the Duc de Bouillon, and grandson of William I., prince of Orange, was born in 1611. He was brought up in the Reformed faith, and was sent in 1623 to Holland, where, under his uncle, the celebrated Maurice, he was initiated into the art of war. Returning to France in 1630, he was favorably received by Richelieu, who at once gave him a commission in the French army. In 1637 he was attached to the army of Bernard of Weimar, and gained much repute. After his conquest of Roussillon, in 1642, he was made a marshal of France and given chief command on the Rhine, when he defeated the Bavarians at Rottweil, but was himself defeated by their general, Mercy, at Marienthal. With Condé, he avenged this defeat at Nördlingen, where Mercy was slain. Turenne finished the war by conquering the electorate of Treves, and, with the help of the Swedes, Bavaria, and conducted a successful campaign in Flanders. In the civil wars in France, the two greatest generals of the period, Condé and Turenne, were on opposite sides, and Turenne with inferior forces was uniformly victorious, finally driving Condé from France. He then conquered much of the Spanish Netherlands. Louis XIV. made him marshal-general of France, and only his Protestantism prevented his being appointed constable. Bossuet's celebrated *Exposition of the Christian Doctrine* was written at the king's suggestion to effect the conversion of Turenne to Catholicism, and, aided by the king's solicitations, was successful. In the campaign in Holland, 1672, he compelled the elector of Brandenburg to beg for peace. His last campaign is disfigured by the devastation of the Palatinate, where he burned about thirty towns. He was killed at the battle of Sasbach, while viewing the preparations for the attack, 1675.

Turgenieff (*tŏŏr-gĕn'-yĕf*), **Ivan Sergyevitch,** Russian novelist, was born in Orel, Russia, 1818. After studying at Moscow, St. Petersburg, and Berlin, he obtained a position in the department of the interior at St. Petersburg. On account of his liberal ideas he was banished for a period, but was finally allowed to return to Russia. His home, however, was for the most part at Paris and at Baden. Many of his works were written in French, and have been translated into English and German. Among his best known novels are: *Fathers and Sons; Liza; Smoke; Dimitri Rudin; Journal of a Useless Man;* and *Virgin Soil.* Died, 1883.

Turgot (*tür'-gō'*), **Anne Robert Jacques,** French statesman and economist, was born in Paris, 1727. He was educated for the church, and was prior of the Sorbonne in 1749. In 1752 he studied law and became councilor in parliament. He was given charge of the province of Limoges in 1761, where he introduced many reforms, such as abolishing the method of mending the roads by the compulsory labor of the poor. He introduced the cultivation of the potato and other means of subsistence for the people. Under Louis XVI. he was put in charge of the finances of the country, and, if his plans had been received with favor by the nobility and statesmen, France might have been spared the horrors of the revolution. But the combination against him was so strong that the king yielded, and Turgot retired after twenty months of service. Among his writings are, *Reflections upon the Formation and Distribution of Riches,* and a work on *Usury.* He died at Paris in 1781.

Turner, Joseph Mallord William, British landscape painter, was born in London, 1775. His genius for art showed itself very early, and in 1787, when only twelve years old, he exhibited two drawings at the royal academy. Again, in 1790, he exhibited, and thence onward until his death. In 1799 he was elected an associate of the royal academy, and three years afterward attained the full dignity of academician. He traveled much, and was frequently in Scotland, France, Switzerland, the Rhine countries, and Italy. His industry was almost as unexampled as his genius. To the exhibitions of the royal academy he contributed in all 259 pictures. In 1808 he commenced the publication of his famous *Liber Studiorum,* a series of engravings from original designs, which ranks as one of his most important undertakings; to this is to be added his *Scenery of the Southern Coast; England and Wales; Rivers of England; Rivers of France;* etc. Among his finest paintings are: "Dido Building Carthage"; "The Sun Rising in a Mist"; "The Slave Ship"; "The Burial of Wilkie at Sea"; "The Grand Canal"; "Ulysses Deriding Polyphemus," etc. Died, 1851.

Twain, Mark. See **Clemens, Samuel Langhorne.**

Tycho Brahe. See **Brahe.**

Tyler, John, tenth president of the United States, was born at Greenway, Va., 1790. He was graduated at William and Mary college, 1807; studied law, and was admitted to the bar. He was elected five times to the state legislature, and three times to congress. He sympathized with the states' rights party, and opposed the United States bank, protection, and all limitations of slavery. In 1825 and again in 1827 he was chosen governor of Virginia; and in 1833 was elected United States senator. From this time he acted with the whig party, being an active partisan of Henry Clay, and in 1840 was elected by that party vice-president of the United States, with Harrison as president. The death of President Harrison, a month after his inauguration, made Tyler president in 1841. His administration, at first favorable to the whigs, was soon displeasing to them. He vetoed the bill for a United States bank, at that time a favorite project of the party. Several members of the cabinet resigned, and finally John C. Calhoun, the great democratic statesman, was made secretary of state. The annexation of Texas in 1845, and the passing of a protective tariff law in 1842, were among the important acts of Tyler's administration. In 1861 he was president of the peace convention which met at Washington to effect a compromise between the North and the South. He afterward joined the confederate cause, and was a member of the confederate congress at his death, which occurred at Richmond, Va., 1862.

Tyler, Moses Coit, American educator and writer, professor of American history at Cornell university, 1881–1900, was born at Griswold, Conn., 1835, and was graduated at Yale in 1857. He spent several years in the ministry, later traveling in Europe. From 1867 to 1881 he was professor of English at the university of Michigan, and for a time was literary editor of *The Christian Union*. In 1881 he accepted the chair of American history at Cornell. He wrote: *Manual of English Literature; History of American Literature during the Colonial Period*, 1606–1765; *The Literary History of the American Revolution; Glimpses of England; Life of Patrick Henry*, etc. Died, 1900.

Tylor, Edward Burnett, English anthropologist, was born at Camberwell, 1832. He was educated at Tottenham, and, after traveling in Cuba and Mexico, he wrote *Anahuac, or Mexico and the Mexicans*. He was in 1883 appointed keeper of the Oxford university museum and reader in anthropology; and in 1896 was made professor of anthropology. He was in 1888 Gifford lecturer at Aberdeen, and president of the anthropological society in 1891. His *Researches into the Early History of Mankind, Primitive Culture*, and *Anthropology* stand first among works of their class.

Tyndale, William, English divine, was born in Gloucestershire, about 1484. He studied at both Oxford and Cambridge, where he acquired a knowledge of the Greek language, at that time little understood in England. Having become impressed with the importance of giving to the English people the Bible in their own language, he devoted himself to that work in private for many years; until, in 1523, finding it no longer safe to prosecute his labors in his own country, he sailed for Hamburg, and from that port proceeded to Wittenberg. There he completed his version of the new testament, which was published at Antwerp, 1526. He then undertook a translation of the old testament, in which he was assisted by Miles Coverdale. After 1530 he lived at Antwerp, where he was taken prisoner, at the instigation of Henry VIII., and was confined for a year and a half in the castle of Vilvoord, or Villefort, near Brussels; and was at length strangled in 1536 near his prison, his body being afterward burned. His last words were, "Lord, open the king of England's eyes." Besides his version of the Bible, Tyndale wrote several treatises, of which *The Wicked Mammon* and *The True Obedience of a Christian Man* are the best known.

Tyndall, John, British physicist, was born in County Carlow, Ireland, 1820. He began his career as a surveyor and railway engineer, went to Germany for study during 1848–51, and became in 1853 professor of natural philosophy in the royal institution of London, a post he held to within a year or two of his death. His published lectures on *Light, Sound*, and *Heat a Mode of Motion* are well known; he also wrote on glaciers, the physics of crystals, and many essays on other subjects. As a lecturer he greatly developed the system of lantern demonstration now so general in all educational theaters. In 1874 he presided at the meeting of the British association in Belfast, and there delivered an address which by its materialistic tendency and anti-teleologic tone created much excitement and opposition, as it was in fact intended to do. He was, however, best known as a popular exponent of physical science, and his lectures on light, delivered in America, attracted immense audiences. His chief works, besides the above, are: *Essays on the Imagination in Science; The Forms of Water; Lessons in Electricity; Fermentation; Fragments of Science*, etc. He died in 1893.

Uhland (*o͝o'-lănt*), **Johann Ludwig,** German poet, was born at Tübingen, 1787, and studied at the university of his native city. He began to publish ballads and other lyrics in various periodicals, collected under the title of *Gedichte*, in 1815. It is on these and his songs, such as *Der gute Kamerad* and *Das Schloss am Meer*, that his fame rests. His other productions include the essays, *Ueber Walther von der Vogelweide; Der Mythus von Thôr; Sagenlehre vom Thor;* and two dramas, *Herzog Ernst von Schwaben* and *Ludwig der Bayer*. He died at Tübingen, 1862.

Ulfilas (*ŭl'-fĭ-läs*), translator of the Bible into Gothic, was born about 311. He was made bishop in 341, was expelled by his heathen compatriots from his native place seven years later, and sought refuge, together with a number of newly converted Christians, in lower Mœsia, at the foot of the Hæmus, where he remained for thirty years. He was one of the chief lights of Arianism, in the interest of which he exerted himself with the utmost energy. Familiar with Latin, Greek, and Gothic, and accustomed to write in each of them, he undertook to render the whole Bible, with the exception of *Kings*, into Gothic. Up to the ninth century this sacred and national work accompanied the Goths in all their migrations. The Swedes captured it and took it to Upsala, where it still remains in the university library under the name of the *Codex Argenteus*. Died, 381.

Ulpian (*ŭl'-pĭ-an*), **Domitius,** Roman jurist, born at Tyre, about 170 A. D. He held judicial offices under Septimius Severus and Caracalla, and, on the accession of Alexander Severus in 222, became his principal adviser and *præfectus prætorio*. He was murdered by his own soldiery, 228 A. D. He was a voluminous writer. In Justinian's *Digest* there are nearly twenty-five hundred excerpts from Ulpian, but the originals are almost wholly lost.

Underwood, Oscar W., democratic floor leader of the house of representatives, was born in Louisville, Kentucky, 1862. Educated at Rugby school, Louisville, and at university of Virginia; admitted to bar, 1884; member of 54th to 63rd congresses (1895–1915), 9th Alabama district.

Untermyer, Samuel, American lawyer, was born in Lynchburg, Va., 1858. He was educated at the college of the city of New York and at Columbia university law school, and was admitted to the bar, 1879. He has since practiced in New York, and is now a member of the law firm of Guggenheimer, Untermyer and Marshall. He organized and is counsel for many trade combinations; director of many corporations.

Urban VIII., Pope, 1623–44, the successor of Gregory XV., whose family name was Maffeo Barberini, was born at Florence in 1568. His memory has suffered through the imputation of nepotism; but his pontificate was, on the whole, vigorous and enlightened. He was the founder of the celebrated college of the Propaganda, and to him Rome is indebted for many public works, including large and important additions to the vatican library. His pontificate was also distinguished by the acquisition of the duchy of Urbino to the holy see in the year 1626. He died in 1644, and was succeeded by Innocent X.

Usher (*ŭsh'-ẽr*), **James**, British prelate, theologian and scholar, was born in Dublin, 1580. He graduated at Trinity college, Dublin, in 1600; in 1601 he was ordained deacon and priest, and was shortly after appointed preacher at Christ church, Dublin. In 1607 he was chosen to the chair of divinity in the university of Dublin, a post which he held for thirteen years. In 1613 his first publication appeared, *De Ecclesiarum Christianarum Successione et Statu*. In 1623 he was constituted privy councilor of Ireland, and two years later was raised to the highest ecclesiastical dignity in the kingdom, the archbishopric of Armagh. Among his many works were: *Veterum Epistolarum Hibernicarum Sylloge; Emmanuel, or A Treatise on the Incarnation of the Son of God;* and *Annales Veteris et Novi Testamenti*, giving in two parts a chronological digest of universal history from the creation of the world to the time of Vespasian. It was Usher who formulated the system of biblical chronology now generally adopted. He died in 1656.

Valentine, Edward Virginius, American sculptor, was born at Richmond, Va., 1838. He studied art under Couture, and Jouffroy in Paris, in Florence under Bonaiuti, and in Berlin under Kiss. His most prominent works include: Recumbent figure of General Robert E. Lee, Memorial chapel, Washington and Lee university, Lexington, Va.; bronze figure of General Thomas J. Jackson, Lexington, Va.; bronze figure of Vice-president Breckinridge, Lexington, Ky.; marble statue of Thomas Jefferson, Richmond, Va.; "Andromache and Astyanax"; "The Blind Girl"; "Judas and Grief"; heroic bronze statues of Jefferson Davis and allegorical female figures, symbolical of the South, for Richmond, Va.; statue of Gen. Robert E. Lee for statuary hall, Washington. Among his earlier works were the small figure, "The Nation's Ward," and the bust, "Unc' Henry."

Van Alstyne, Mrs. Frances Jane. See **Crosby, Fanny.**

Van Buren, Martin, American statesman, eighth president of the United States, was born of Knickerbocker stock, in Kinderhook, N. Y., 1782. After studying law and becoming a member of the bar, he was elected by the democratic party to the state senate in 1812, and became attorney-general in 1815. In 1816 he largely contributed to the organization of the so-called Albany regency, a political body which maintained an ascendancy in the state for many years. In 1821 Van Buren entered the United States senate, and was reëlected in 1827. As a senator he supported the protective tariff of 1828, and in the same year was elected governor of New York. In 1830 he took office as secretary of state in President Jackson's cabinet, resigning the same in April of the following year. After the rejection by the senate of his nomination as minister to England, he was elected in the Jackson interest vice-president of the United States, and in 1836 became the successful democratic candidate for the presidency. During his tenure of office occurred the financial crisis of 1837, and the suspension of specie payments by the banks—a state of things which induced the president to recommend to congress the establishment of an independent treasury, a measure carried into effect in 1840. In the latter year Van Buren's renomination for the presidency was defeated by General Harrison, and in 1841 he temporarily retired to private life. His third candidature for the presidency, in 1844, was frustrated by the Southern vote, and he subsequently seceded from the democrats to become a free-soiler, and the unsuccessful nominee of the latter party in the presidential election in 1848. Died, 1862.

Vanderbilt, Cornelius, American capitalist, was born near Stapleton, Staten Island, N. Y., 1794. He early engaged in steamboat transportation between Staten Island and New York and so enlarged his business that he soon gained complete control of the New York and Staten Island lines. Later he started steamboats in various waters — the Hudson, the Delaware, Long Island sound, and established steamboats and other connections between New York and California. In 1864 he withdrew his capital from shipping and invested it in railroads. He secured the management of one railroad after another and, in 1877, controlled stocks representing an aggregate capital of $150,000,000, of which he owned fully one-half. In 1861 he presented the steamship *Vanderbilt* to the United States government to be used for the capture of confederate privateers, and in 1872 founded Vanderbilt university at Nashville, Tenn., to which he gave about $1,000,000. At the time of his death in New York city, 1877, his fortune was estimated at nearly $100,000,000.

Vanderbilt, George Washington, capitalist, was born at New Dorp, Staten Island, N. Y., 1862. He was educated by private tutors and at the best schools, and traveled extensively. He gave to New York the Thirteenth street branch of the free circulating library, which he founded, provided with suitable buildings and appointments; presented New York college for the training of teachers, its site on Morningside Heights, adjoining site selected for Columbia college; and presented American fine arts society of New York the room in their building known as the Vanderbilt gallery. He subsequently purchased 100,000 acres of mountain land on the French Broad river, near Asheville, N. C., and laid it out in a vast park; erected mansion and stables; stocked this estate and spends much of his time superintending its improvements.

Vanderbilt, William Kissam, capitalist, was born in Staten Island, 1849. He received an academic education, and studied several years in Geneva, Switzerland. He subsequently learned railroading and was second vice-president of the New York Central and Hudson River railroad, 1877–83; was chairman of the board of directors of the Lake Shore and Michigan Southern railway from 1883; director of New York Central and Hudson River railroad, New York, Chicago and St. Louis railroad company, Michigan Central railroad company, Lake Erie and Western railroad company, Chicago and Northwestern railway company, Chicago, St. Paul, Minneapolis and Omaha railway company, Cleveland, Cincinnati, Chicago and St. Louis railway company, Detroit and Chicago railroad company, New York and Harlem railroad, Pittsburgh and Lake Erie railroad company, West Shore railroad company, The Pullman company, etc.

Vanderlip, Frank Arthur, banker, president of the National city bank, New York, since 1909, was born in Aurora, Ill., 1864. He studied at the university of Illinois and university of Chicago; became reporter, Chicago *Tribune*, later financial editor; associate editor, *Chicago Economist;* private secretary to Secretary of the Treasury Gage, 1897; assistant secretary of the treasury, 1897–1901; and vice-president of National city bank, New York, 1901–09. He was a delegate to the international conference of commerce and industry, Ostend, Belgium, 1902; is trustee of Carnegie foundation; member of council of New York university; and director in various financial institutions. Author: *Chicago Street Railways; The American Commercial Invasion of Europe; Business and Education*, etc.

Vanderlyn, John, American painter, was born at Kingston, N. Y., 1775. He studied painting under Gilbert Stuart, visited Paris and studied his art in that city for a number of years. He returned home in 1801, but in 1803 made another journey to Europe, where he remained until 1815. Among his works executed while in Europe were, "The Murder of Jane McCrea by the Indians" and "Marius sitting among the Ruins of Carthage." The "Landing of Columbus," placed in the rotunda of the national capitol and engraved on the five dollar note was designed by Vanderlyn. One of his best known portraits is that of Washington in the hall of the house of representatives. Died, 1852.

Van Devanter, Willis, jurist, was born at Marion, Ind., 1859; educated at Indiana Asbury (now De Pauw) university, 1875–78; LL. B., Cincinnati Law School, 1881. He practiced law at Marion, Ind., 1881–84, at Cheyenne, Wyo., from 1884. He was commissioner to revise the Wyoming statutes, 1886; city attorney, Cheyenne, 1887–88; member of territorial legislature, 1888; chief justice of supreme court of Wyoming, 1889–90; chairman republican state committee, 1892–94; member republican national committee, 1896–1900; assistant attorney-general of United States, 1897–1903; United States circuit judge, 8th judicial district, 1903–10. Professor in law department of Columbian university, Washington, D. C., 1898–1903. In 1910 he was appointed by President Taft an associate justice of the United States supreme court.

Van Dyck, or Vandyke, Sir Anthony, Flemish painter, distinguished for his surpassing excellence in portraiture, was born in Antwerp, 1599. He was a pupil of Rubens, and subsequently studied in Venice, Genoa, and Rome. In 1632 he became court painter to Charles I. of England, and was knighted by that monarch. His "Christ on the Cross" at Antwerp is his greatest historical work, and his full-length picture of "Charles I. on Horseback" his best example of portraiture. Died in London in 1641.

Van Dyke, Henry Jackson, American educator and writer, was born in Germantown, Pa., in 1852. He was graduated at Princeton university in 1873, at the Princeton theological seminary in 1877, and at Berlin university in 1879. Soon afterward he assumed the pastorate of the United Congregational church in Newport, R. I., and was pastor of the Brick Presbyterian church, New York city, 1883–1900. In the latter year he became professor of English literature in Princeton university. Author: *The Reality of Religion; The Story of the Psalms; The Poetry of Tennyson; Sermons to Young Men; The Christ Child in Art; Little Rivers; The Other Wise Man; The Gospel for an Age of Doubt; The First Christmas Tree; The Builders, and Other Poems; Ships and Havens; The Lost Word; The Gospel for a World of Sin; Fisherman's Luck; The Toiling of Felix, and Other Poems; The Poetry of the Psalms; The Friendly Year; The Ruling Passion; The Blue Flower; The Open Door; The School of Life; Essays in Application; The Spirit of Christmas,* etc.

Van Dyke, John Charles, author, educator, art critic, was born in New Brunswick, N. J., 1856. He was privately educated, and studied at Columbia; L. H. D., Rutgers, 1899. He was admitted to the New York bar, 1877, but turned attention to literature, and since 1878 has been librarian of the Sage library, New Brunswick, N. J. He studied art many years in Europe; traveled much on both continents and has written extensively on both art and nature; has been professor of history of art, Rutgers college, since 1889; lecturer in Columbia, Harvard, Princeton. Editor: *The Studio,* 1883-84; *Art Review,* 1887-88; *College Histories of Art; History of American Art.* Author: *Books and How to Use Them; Studies in Pictures; The New New York; What is Art?* etc.

Vane, Sir Henry, English statesman, colonial governor of Massachusetts, was born in 1612. He was opposed to the English church, and in 1635 came to America to join the Puritans in Massachusetts. The next year he was chosen governor; but religious troubles arose in the colony, and in 1637 he returned to England. In 1640 he was elected to parliament and was knighted. He was always opposed to Cromwell, and, after the latter's death, was the leader of the republican party. On the restoration of the king, Charles II., Vane was arrested and imprisoned; but the king promised to spare his life. Charles, however, broke his word, and Vane was tried on a charge of high treason and condemned to die. At the scaffold he tried to address the people; but his voice was drowned by the noise of drums and trumpets. He was beheaded on Tower hill, London, 1662.

Van Hise (*văn hīs'*), **Charles Richard,** American educator, geologist, was born in Fulton, Wis., 1857. He graduated at the university of Wisconsin, 1879, Ph. D., 1892; LL. D., Chicago, 1903, Yale, 1904. He was instructor in metallurgy, 1879–83, assistant professor metallurgy, 1883–86, professor metallurgy, 1886–88, professor mineralogy, 1888–90, professor archæan and applied geology, 1890–92, professor geology, 1892–1903, president since 1903 of the university of Wisconsin. Since 1883 he has been connected with the United States and Wisconsin geological surveys. He is a member of many scientific societies. Author: *Principles of North American Pre-Cambrian Geology; Some Principles Controlling the Deposition of Ores; A Treatise on Metamorphism;* and many scientific and educational papers.

Van Horne, Sir William Cornelius, Canadian railway official, was born in Will county, Illinois, 1843. He was educated in the common schools, and became telegraph operator with the Illinois Central railroad, 1857. He was with the Michigan Central in various capacities, 1858–64; Chicago and Alton as train dispatcher, superintendent telegraph, and division superintendent, 1864–72; St. Louis, Kansas City and Northern as general superintendent, 1872–74; Southern Minnesota, general manager, 1874–77, continuing as president to 1879; Chicago and Alton, general superintendent, 1877–79; Chicago, Milwaukee and St. Paul, general superintendent, 1880–81; Canadian Pacific, general manager, 1882–84, vice-president and general manager, 1884–88, president, 1888–99; chairman of the board of the Canadian Pacific railway company, 1899–1910. He is also president of the Cuba company.

Vasari (*vä-zä'-rē*), **Giorgio,** Italian art historian, painter and architect, was born at Arezzo, 1511. He studied under Michaelangelo and Andrea del Sarto, and entered the service of Duke Cosimo the Great, with whom he remained until his death, 1574. He was one of the most versatile artists of the later renaissance, and an architect of no mean merit. His greatest service to art is his world-renowned *Lives* by which we gain our chief knowledge of the artists of the Italian renaissance. Vasari has been termed the founder of modern art history and criticism.

Vassar, Matthew, American philanthropist and founder of Vassar college, was born in Norfolk county, England, 1792. Four years later he accompanied his father to America, where he settled on a farm near Poughkeepsie, N. Y., his father establishing a brewery in that city. The son subsequently succeeded to his father's interests, and amassed a fortune. In 1861 he donated $400,000 to the institution in Poughkeepsie that became known as Vassar college.

On his death, in 1868, he provided in his will for a further donation of $400,000 to Vassar. The institution has been since enriched by large sums donated to it by the nephews of Matthew Vassar.

Vauban (*vō'-bäɴ'*), **Sébastian le Prestre de,** French marshal, one of the greatest of military engineers, was born in 1633, at Saint Leger de Foucheret, in Burgundy. He first served in the Spanish army, under Condé, but, being taken prisoner by the French troops, Mazarin gave him a lieutenancy. The sieges of Ypres, Gravelines, and Oudenarde, in 1658, were his first attempts in the science of attack. From that period until the peace of Ryswick he was incessantly employed, either in erecting fortresses for the defense of France, or in reducing those which belonged to her enemies. In 1703 he reluctantly accepted the marshal's staff. The siege of Brisach was his last operation. He died in 1707. Vauban wrote various works, principally on fortification.

Veblen, Thorstein, educator, author, was graduated at Carleton college, 1880; Ph. D., Yale, 1884. He was fellow in economics and finance, Cornell, 1891-92; and successively fellow, reader, assistant and instructor, 1892–1900, and associate professor of economics, 1900–06, at the university of Chicago; associate professor of economics at Leland Stanford Jr. university, 1906–09. Author of *The Theory of the Leisure Class* and *The Theory of Business Enterprise.*

Vedder (*vĕd'-ĕr*), **Elihu,** American painter, was born at New York, 1836. He studied at Paris and in Italy, and made Rome his ultimate residence. His subjects are mostly ideal, and include: "The Lair of the Sea-serpent"; "Fisherman and Djin"; "Death of Abel"; "Greek Actor's Daughter"; "Cumean Sibyl"; "Nausicaa and her Companions"; "The Monk upon the Gloomy Path," etc. He has finely illustrated Edward FitzGerald's *Omar Khayyám*, etc.

Vega Carpio (*vā'-gä kär'-pyō*), **Lope Felix de,** noted Spanish dramatist, was born at Madrid, 1562. He was a graduate of Alcalá; served in the Portuguese campaign of 1580 and in the Armada; was secretary to the duke of Alva, marquis of Malpica, and marquis of Sarria; was banished from Madrid because of a quarrel, lived two years at Valencia, and about 1614 took priest's orders. He died poor, for his large income from his dramas and other sources was almost wholly devoted to charity and church. The mere list of Lope's works presents a picture of unparalleled mental activity. His first work of length was a poem, the *Angelica.* Then followed *Arcadia*, a story, and *Dragontea*, an expression of exultation in ten cantos over the death of the dragon. But it was as a ballad writer that he first made his mark. The more notable of his miscellaneous works are: the *Rimas; Peregrino en su Patria*, a romance; *Jerusalen Conquistada*, an epic in competition with Tasso; *Pastores de Belen*, a religious pastoral; *Filomena* and *Circe*, miscellanies in emulation of Cervantes; *Corona Tragica*, an epic on Mary Stuart; *Laurel de Apolo; Rimas de Tome de Burguillos*, a collection of lighter verse, with the *Gatomaquia*, a mock-heroic; and *Dorotea*, in form a prose drama, obviously the story of his own early love adventures. All these works show the hand, not of a great artist, but of a consummate artificer. He died, 1635.

Velásquez (*vā-läs'-kāth*). See page 150.

Vendôme (*väɴ'-dōm'*), **Louis Joseph, Duc de,** French general, was born at Paris, 1654, and saw his first service in the Dutch campaign of 1672. He next served with distinction under Turenne in Germany and Alsace, again in Holland under Luxembourg, and in Italy under Catinat; in 1695 he received the command of the army in Catalonia. He shook off his indolence, and closed a series of brilliant successes by the capture of Barcelona in 1697. After five years of sloth he superseded Villeroi in Italy, much to the delight of the soldiers. He fought an undecided battle with Prince Eugene at Luzzara, then burst into the Tyrol, returning to Italy to check the united Savoyards and Austrians. In August, 1705, he fought a second indecisive battle with Prince Eugene at Cassano, and at Calcinato he crushed the Austrians in 1706. That summer he was recalled to supersede Villeroi in Holland. The defeat at Oudenarde, 1708, cost him his command, but in 1710 he was sent to Spain to aid Philip V. His appearance turned the tide of disaster; he brought the king back to Madrid, and defeated the English at Brihuega, and next day the Austrians at Villaviciosa. He died at Tinaroz, in Valencia, 1712.

Verdi (*vâr'-dē*), **Giuseppe,** Italian operatic composer, was born in 1813, at Rancola, in the duchy of Parma. He studied at Busseto and Milan, settled in the latter city, 1838, but in later life lived in Genoa and at his villa St. Agata, near Busseto. He was a member of the Italian parliament in 1860 and senator in 1875. He was a member of many artistic societies, and was decorated by the rulers of Russia and Egypt. His works comprise a long list of popular favorites, including *Ernani, Macbeth, Rigoletto, Il Trovatore, La Traviata, Aïda, Othello, Falstaff*, etc. He died at Milan, 1901.

Vereshchagin (*vyĕ-rĕ-shchä'-gĭn*), **Vassili,** Russian painter, was born in 1842, at Tcherepovets, in Novgorod. He entered the navy in 1859, but studied art under Gérôme at Paris. In 1867 he was with Kauffmann in the Turcoman compaigns, and reaped a rich artistic harvest from a visit to India in 1874. Still more famous were his realistic pictures of the horrors of the Russo-Turkish war of 1877. In 1884 he made another journey to India, Syria, and Palestine; and produced a series of pictures of the life of Christ. He painted also gigantic pictures of the execution of mutinous sepoys by English soldiers and of nihilists by the Russian authorities. He was blown up on Makaroff's flagship off Port Arthur, 1904.

Vergil. See page 28.

Verne (*vĕrn*), **Jules,** French author, was born at Nantes, 1828. He studied law, but turned to literature, producing his *Cinq semaines en ballon* in 1863. He struck the rich but not unexplored vein of scientific adventure. Among his works are: *Twenty Thousand Leagues Under the Sea; The Mysterious Island; Around the World in Eighty Days; Michael Strogoff; From the Earth to the Moon;* and *The Purchase of the North Pole.* Died, 1905.

Vernet (*vĕr'-nĕ'*), **Émile Jean Horace,** French battle painter, was born in Paris, 1789. In early life he served for a time in the army, and this circumstance, combined with the fact that both his father and his grandfather had attained considerable distinction as painters of battle pieces, induced him to devote himself to the same department of his art. He studied under Moreau and Vincent, and achieved a success hitherto unequaled as a painter of battles. In 1842 he was made commander of the legion of honor, and declined the rank of baron. Many of his pictures are to be found in the galleries of Paris and Versailles, and include the "Grenadier of Waterloo"; battles of Jemappes, Valmy, Hanau, Bouvines, Jena, Friedland, Wagram, Isly; "Barrier of Clichy"; "Bridge of Arcola"; "Siege of Antwerp", etc. Died, 1863.

Veronese (*vā'-rō-nā'-sā*), **Paolo.** See **Cagliari, Paolo.**

Verrazano (*vĕr'-rät-sä'-nō*), **Giovanni da,** Florentine navigator, was born at Florence, Italy, about 1480, and died, probably, about 1527 — being executed as a pirate, it is said, in New

Castile. About 1505, it is known that he entered the French maritime service, made a voyage to the East Indies in a Portuguese ship in 1517, and became expert as an explorer and navigator. In 1522 he is said to have captured the rich treasure ship in which Cortes was sending the spoils of Mexico to Charles V. of Spain. From the Madeira islands he is further known to have sailed in 1524 on a voyage of discovery in American waters. and, on sighting Cape Fear, he coasted along until he reached what is now New York bay, continuing his explorations as far as Rhode Island and New Hampshire. It was on a second voyage to the new world, in 1527, that it is alleged he was captured by Spaniards and hanged as a corsair.

Vesalius (*vē-sā'-lĭ-ŭs*), **Andreas,** Belgian anatomist and physician, was born in Brussels in 1514. He lectured on anatomy at Basel, Padua, and elsewhere after 1537; was appointed physician to Charles V. in 1544; accompanied Charles in his campaigns as physician, and also attended Philip II. of Spain. He died in 1564, in Zante, where he had been wrecked on his return from Jerusalem. His great work was *De Corporis Humani Fabrica.*

Vespasian (*vĕs-pā'-zhĭ-an*), **Titus Flavius Vespasianus,** Roman emperor from 70 to 79, was born 9 A. D. His father was a native of Reate, in the country of the Sabini, but his mother was the sister of a Roman senator. In the reign of Claudius he was appointed to a military command in Britain; when he conquered the Isle of Wight; and was afterward proconsul of Africa under Nero, who subsequently sent him to the East to conduct the war against the Jews. After the death of Vitellius he was proclaimed emperor by the soldiers; and the wisdom, moderation, and firmness of his reign showed the propriety of the choice. The most important events of the reign were the destruction of Jerusalem by Titus, A. D. 70, and the conquest of North Wales and the island of Anglesea by Agricola, who was sent into Britain in 78. In the following year Vespasian retired and died.

Vespucci (*vĕs-pōōt'-chē*), **Amerigo,** Italian navigator, was born at Florence, 1451. He was first employed in the commercial house of the Medici, and in 1493 went to Spain where he became a member of a commercial firm in Seville about 1495. In 1497 he embarked at Cadiz in one of a fleet of five ships commanded by Alonso de Hojeda, and after thirty-seven days' sailing reached America, coasted along the continent for several hundred leagues, and returned to Spain the same year. Columbus had already landed on the mainland of America in the previous year, so that to him doubtless belongs the honor of being the discoverer of the continent, but the discovery had been kept a state secret, and the prior publication of Vespucci's narrative led to his name being given to the continent, at the suggestion, it is said, of the publisher of the narrative. His first voyage was followed by several others, first in the service of Spain, and afterward in that of Portugal. In 1506 he was recalled to the court of Spain, and two years afterward was appointed chief pilot, which office he retained until his death in 1512.

Vest, George Graham, American legislator, was born at Frankfort, Ky., 1830. He graduated at Centre college, Kentucky, and at the law department of the Transylvania university at Lexington. In 1853 he removed to Missouri, where he practiced law, and became a member of the state legislature. During the civil war his secessionist leanings induced him to become a member of the confederate congress and later of the confederate senate. From 1879 to 1903 he was a democratic member for Missouri in the United States senate, where he was prominent in many important debates. He died in 1904.

Viaud (*vyō*), **Louis Marie Julien,** "Pierre Loti," French writer, was born of a Huguenot line, at Rochefort, 1850. He entered the navy in 1867, became a lieutenant in 1881 and resigned in 1898. He traveled extensively, and produced in 1879 his first work of importance, *Aziyadé*, a series of pictures of life on the Bosphorus. This was followed by *Le Mariage de Loti*, which carried the imagination captive with all the charm of the coral seas. Later came *Le Roman d'un Spahi; Mon Frère Yves; Le Pêcheur d'Islande*, dealing with Brittany and the frozen North; *Propos d'Exil; Madame Chrysanthème; Japonneries d'Automne; Le Roman d'un Enfant; Le Livre de la Pitie et de la Mort; Fantôme d'Orient; Le Désert; La Galilée; Figures et Choses; Jerusalem; L'Inde sans les Anglais; Madame Prune*, etc.

Victor Emmanuel II., first king of modern Italy, was born at Turin, 1820, son of Charles Albert, king of Sardinia. After serving gallantly in the army, he became king of Sardinia by the abdication of his father, on the evening of the battle of Novara, March 23, 1849. From the Austrian conquerors of his country, he succeeded in obtaining the withdrawal of their demand that the Sardinian constitution should be abolished. This liberal constitution, granted by his father, he faithfully maintained, earning by this conduct the title of the "honest king," and winning the confidence of the Italian nation. He chose wise counselors, and, with Cavour to guide, made many reforms, took part in the Crimean war, and visited Paris and London. With the help of the French, the battles of Solferino and Magenta were fought against Austria, but the peace of Villafranca between Austria and France left Italy still distant from its hoped for unity. But Tuscany, Modena, Parma, and the Romagna voted for annexation to Sardinia, and the Prussian alliance in 1866 gave Venice to Italy. The French withdrew from Rome, and on December 31, 1870, Victor Emmanuel entered Rome and became king of a united Italy. He reigned eight years, dying at Rome, 1878.

Victoria, Alexandrina, queen of Great Britain and Ireland, empress of India, born in 1819, died in 1901. She was the only child of Edward, duke of Kent, fourth son of George III., and, on the death of William IV., she succeeded to the throne in 1837, and was crowned queen in 1838. In 1840 she married Albert, prince of Saxe-Coburg-Gotha, who died in 1861, and by whom she had nine children. She assumed title of empress of India in 1877. The jubilee of her reign was celebrated in 1887, and her diamond jubilee in 1897. Five attempts were made on her life. The chief events of her reign were the establishment of the penny post; the repeal of the corn laws; the annexation of the Punjaub; the Crimean war, the Indian mutiny, followed by the assumption of sovereignty over India; the second and third reform bills; wars in Afghanistan, China, South Africa, and Egypt; and the Fenian and home rule agitations in Ireland. Queen Victoria was strictly impartial in the party politics of her reign, and was remarkable for her wisdom, knowledge of foreign affairs, unselfishness, and uprightness of character. No sovereign has ever been more revered by her subjects.

Vigny (*vĕn'-yĕ'*), **Alfred Victor, Comte de,** French poet and novelist, was born at Loches, France, 1799. He entered the French army at sixteen and served twelve years. In 1822 he published anonymously a small volume of verse, followed in 1824 by *Eloa*, an exquisite piece of mystic phantasy. He then issued his collected *Poèmes antiques et modernes; Cinq Mars*, a historical romance; a translation of *Othello;* and a drama, *La Maréchale d'Ancre.* After 1830 he published chiefly works in prose, including *Stello; Grandeur et Servitude Militaires;* and a drama, *Chatterton.* He left at his death a volume of verse, *Destinées,* and *Journal d'un Poète.* In 1845 he was elected to the academy. He died in 1863.

Vilas (*vī'-lăs*), **William Freeman**, American lawyer and legislator, was born at Chelsea, Vt., 1840. He graduated at the university of Wisconsin, 1858, and at the Albany law school, 1860. In 1862 he recruited Company A, 23d Wisconsin volunteers; took part in Vicksburg campaign; was promoted to lieutenant-colonel, commanding his regiment during siege of Vicksburg; afterward resigned his commission and resumed practice. He was law professor, 1868–85, and 1881–85 and 1897–1905, regent of the university of Wisconsin. He was a member of the commission to revise statutes of Wisconsin, 1875–78; member of the Wisconsin legislature, 1885; postmaster-general of the United States, 1885–88; secretary of the interior, 1888-89; and United States senator, 1891–97. At his death in 1908 he left an endowment of $3,000,000 to the university of Wisconsin.

Vincent de Paul (*văN'-säN' dē pōl'*), **Saint**, French philanthropist and ecclesiastic reformer, was born in Landes in 1576. He was captured by Tunisian pirates in 1605, and remained for two years in slavery. After his escape he repaired to Paris, where he became curate of Clichy, and preceptor to the celebrated Cardinal de Retz, and engaged himself in various works of benevolence and church improvement. He established a foundling hospital at Paris in 1638; organized the congregation of the Missions, and instituted the order of Sisters of Charity. Died in 1660, and was canonized by Pope Clement XII. in 1737.

Vincent, John Heyl, bishop of the Methodist Episcopal church and chancellor of the Chautauqua system, was born in Tuscaloosa, Ala., in 1832. He was educated in Lewisburg and Milton, Pa.; began to preach at eighteen; and subsequently studied in Wesleyan institute, Newark, N. J.; S. T. D., Ohio Wesleyan and Harvard; LL. D., Washington and Jefferson. He was pastor at Galena, Chicago, etc., 1857–65; established *Northwest Sunday School Quarterly,* 1865; *Sunday School Teacher,* 1866; and was corresponding secretary of Sunday school union and editor of Sunday school publications, 1868–84. He was one of the founders, in 1874, of the Chautauqua assembly; founder, 1878, of the Chautauqua literary and scientific circle, and has been its chancellor ever since; was preacher to Harvard, Yale, Cornell, Wellesley, and other colleges, and in 1900 was made resident bishop in charge of European work of Methodist Episcopal church, but retired from the active episcopate in 1904. Author: *The Modern Sunday School; Studies in Young Life; Little Footprints in Bible Lands; The Church School and Sunday School Institutes; Earthly Footsteps of the Man of Galilee; Better Not; The Chautauqua Movement; To Old Bethlehem; Our Own Church; Outline History of England; Outline History of Greece; The Church at Home; Family Worship for Every Day in the Year,* etc.

Vinci da (*dä vēn'-chē*), **Leonardo.** See page 124.

Vinogradoff (*vē'-nō-grä'-dôf*), **Paul**, Russian educator and writer, Corpus professor of jurisprudence, Oxford university, since 1903, and formerly professor of history, university of Moscow, was born at Kostroma, Russia, 1854. While professor in Moscow he exerted himself for the spread of instruction in Russia, founded the Moscow pedagogical society, and was chairman of the educational committee of the city of Moscow. He resigned his chair in consequence of a conflict with bureaucratic authorities and settled in England, where he resumed his interrupted studies in English social and legal history. He lectured in Harvard and other American universities in 1907; D. C. L., of Oxford; LL. D., Cambridge and Harvard, etc. Author: *Villainage in England; The Growth of the Manor; The Rise of Feudalism in Lombard Italy; Inquiries in the Social History of England; English Society in the Eleventh Century;* several articles in the eleventh edition of the *Encyclopædia Britannica,* etc.

Virchow (*fēr'-*Kō), **Rudolf**, German pathologist, was born in Prussia, 1821. He graduated in medicine at Berlin university, and in 1847 became a lecturer there. After being involved in trouble on account of his share in the revolution of 1848, he obtained the chair of pathological anatomy at Würzburg, but was recalled in 1856 to Berlin. He was a member of the Prussian diet, 1862–1902; of the German Reischtag, 1880–93; became leader of the liberal opposition in the Prussian diet, and was challenged to a duel in 1865 by Bismarck. In 1878 he retired from public life. He was much consulted during the illness of the emperor Frederick. His master work was *Cellular Pathology,* which laid the foundation of that branch of science. Died, 1902.

Virgil. See page 28.

Vittoria Colonna. See **Colonna.**

Vladimir (*vlä-dyē'-mēr*) **the Great,** Russian emperor, who reigned from 980 to 1015. He added largely to the kingdom by conquest, but is best known for the introduction of Christianity into the empire. He embraced the doctrines of the Greek church, and was baptized at Constantinople in 988, the day after his marriage to the sister of the Turkish czar. He died in 1015.

Vogt (*fōKt*), **Karl**, German naturalist, was born at Giessen, 1817. At Neufchatel he studied natural history for five years under Agassiz. He was made professor of natural history at Giessen in 1847, but lost his position and had to leave Germany because of his zeal in the revolutionary movements of 1848. In 1849 he was made professor of geology at Geneva, and held that position to the time of his death, May 6, 1895. He claims to have written the first volume and a part of the second of Agassiz's *Natural History of Fresh-Water Fishes.* He wrote also *Studies in Geology and Petrefactions; Man, His Place in Creation and in the History of the Earth; Essays on the Darwinian Theory;* works on physiology, zoölogy, anthropology, and geology, and many scientific papers. His work on *Faith and Science,* published in 1855, is best known, and has been severely criticised for its supposed atheistic tendencies. Died, 1895.

Volta (*vōl'-tä*), **Alessandro**, Italian physicist, was born at Como, 1745. He invented the voltaic arc, electrophore, electroscope, and condenser; discovered several new properties in electricity; and was for thirty years professor of natural philosophy at Pavia. He was made an Italian count and senator by Napoleon; was a member of many learned bodies; and died in 1827.

Voltaire (*vōl'-târ'*). See page 67.

Wade, Benjamin Franklin, American statesman, was born at Springfield, Mass., 1800. He studied law in Ohio, was three times elected state senator, becoming United States senator in 1851, again in 1857 and 1863. He was known as a strong anti-slavery man, being one of six senators who voted to repeal the fugitive slave law. He also opposed all the measures proposed as compromises between the North and the South, and was influential in getting the homestead bill through congress. After the death of President Lincoln, Wade was acting vice-president of the United States. Died at Jefferson, Ohio, 1878.

Wadlin, Horace Greeley, librarian of Boston public library since 1903, was born at Wakefield, Mass.,

1851. He was educated in the schools of Reading, Mass., and received private instruction; Litt. D., Tufts, 1905. He studied architecture at Salem and Boston, Mass., and began practice as an architect in Boston, 1875; became, in 1879, special agent and later in charge of special lines of statistical work for the Massachusetts bureau of statistics of labor, and in 1888 chief of bureau, and relinquished professional practice. He resigned in 1903 to accept his present appointment. He was a member of the Massachusetts house of representatives, 1884–88; supervisor of United States census, 1899, 1900; lecturer upon social science, history and art, etc. Author: *Annual Statistics of Manufactures of Massachusetts*, 1886–1901; *Reports on the Statistics of Labor of Massachusetts*, 1888–1901; *The Decennial Census of Massachusetts for* 1895, etc.

Wagner (*văg'-nĕr'*), **Charles**, French Protestant clergyman and essayist, was born in 1852, and educated at Paris, Strassburg and Göttingen. After several years' service in the Protestant missions in the provinces, he settled in Paris in 1882, and aroused general interest by his effective protest against the degenerating tendencies of Parisian literature and life in *La Jeunesse, Le courage*, and *La vie simple*. The last was translated and published in the United States, as *The Simple Life*, meeting with universal approval and gaining the endorsement of President Roosevelt. Wagner visited this country in 1905, recording his observations later in *My Impressions of America*.

Wagner (*văg'-nĕr*), **Richard.** See page 180.

Wainwright, Richard, American naval officer, was born at Washington, D. C., 1849. He was graduated from the naval academy in 1868, and was attached for a time to the brig *Jamestown*, on the Pacific station. Later on he served on the Asiatic station, and after gaining a lieutenancy he did duty on the coast-survey vessel *Arago*. In September, 1894, he reached the rank of lieutenant-commander, and was executive officer on the battleship *Maine*, when destroyed in Havana harbor, February 15, 1898. After this he did good service at the battle of Santiago de Cuba as commander of the gunboat *Gloucester*, when Cervera's squadron was destroyed. He commanded the ships at the naval academy, 1899–1900; was superintendent of the naval academy, 1900–02; became a captain in 1903; commander of *Newark*, 1902–04; member of general board, 1904–07, and commander of the *Louisiana*, 1907–08.

Waite, Morrison Remick, American jurist, chief-justice of the supreme court of the United States, 1874–88, was born at Lyme, Conn., 1816. He was graduated from Yale, 1837; studied law and practiced in Ohio; was a member of the Ohio legislature, 1849-50, and in 1871 was appointed one of the attorneys to represent the United States before the tribunal of arbitration at Geneva. He was nominated by President Grant chief-justice of the United States supreme court, 1874, and served until his death in 1888.

Walcott, Charles Doolittle, American geologist, secretary of the Smithsonian institution since 1907, was born at New York Mills, N. Y., 1850. He was educated in the public schools, Utica, N. Y.; LL. D., Hamilton, 1897, Chicago, 1901, Johns Hopkins, 1902, Pennsylvania, 1903. He became assistant to the New York state survey in 1876; assistant geologist to the United States geological survey in 1879; paleontologist in charge of invertebrate paleontology, 1888–93, geologist in general charge of geology and paleontology, 1893-94, and director of United States geological survey, 1894–1907. He is a member of many scientific societies, and author of the following: *The Trilobite; Paleontology of the Eureka District; The Cambrian Faunas of North America; The Fauna of the Lower Cambrian or Olenellus Zone; Pre-Cambrian Fossiliferous Formations; Correlation Papers;* and many reports and papers on geological and paleontological subjects.

Waldersee (*văl'-dĕr-ză'*), **Count Alfred von**, German general, was born in Potsdam, Prussia, 1832, and entered the German army in 1850. He served with distinction through the war of 1866, and was chief of the general staff in the Franco-Prussian war; succeeded Moltke as chief of staff in 1888, and in 1891 became commander of the ninth army corps. In 1900 he was created field-marshal, and was appointed to the chief command in China of the allied armies engaged in suppressing the Boxer disturbances at Pekin and in the province of Pe-chili. In 1874 he married the widow of Prince Frederick of Schleswig-Holstein, who was formerly Miss Lee of New York. Died, 1904.

Waldstein (*wăld'-stīn*), **Charles**, American archæologist, was born in New York, 1856. He was educated at Columbia college, Heidelberg, and Leipzig. He was university lecturer, classical archæology, 1880, university reader, 1882, director of the Fitzwilliam museum, 1883–89, Cambridge university; Slade professor of fine arts at Cambridge university, 1895–1901 and since 1904; director, 1889–95, and professor, 1895–97, American school of classical studies, Athens, Greece. Author: *Excavations at the Heraion of Argos; Balance of Emotion and Intellect; Essays on the Art of Phidias; The Work of John Ruskin; The Study of Art in Universities; The Surface of Things; The Jewish Question; The Expansion of Western Ideals and the World's Peace; The Argive Heræum*, etc.

Walker, Francis Amasa, American political economist, was born at Boston, Mass., 1840. He was graduated from Amherst in 1860; took part in the civil war, and in 1865 rose to the brevet rank of brigadier-general of volunteers. He was wounded at Chancellorsville, and for a time was an inmate of Libby prison. In 1871-72 he was United States Indian commissioner; was also chief of the bureau of statistics at Washington, and superintendent of the 9th and 10th United States censuses. From 1873 to 1881 he was professor of political economy in the Sheffield scientific school at Yale, and in 1881 became president of the Massachusetts institute of technology at Boston. In 1898 he acted as United States commissioner to the international monetary conference at Paris. His treatment of wages and profits has profoundly influenced economic theory. Walker was a leading advocate of international bimetallism. His published writings include: *The Indian Question; The Wages Question; Money; Money, Trade, and Industry; Land and Its Rent; Political Economy; Bimetallism;* and *History of the Second Army Corps*. Died, 1897.

Walker, William, American filibuster, was born at Nashville, Tenn., 1824. He studied medicine at Edinburgh and Heidelberg, but afterward took up law and then journalism at New Orleans and in California. In 1853 he failed to found a new republic in northern Mexico; in 1854 fought his way to California, and with fifty-five followers started for Nicaragua to help the democrats. In June, 1855, he was repulsed; but in September, with 110 men, he took the capital, Granada. He was generalissimo of the new government, and raised an American force of 1,400 men. In 1856 Costa Rica made war on the foreigners. Walker was elected president; and his government, recognized by the United States, restored slavery. Meanwhile his enemies were closing in on him, and at Rivas, in 1857, he capitulated to a United States sloop-of-war. In November he landed again with 150 men — only to surrender, in December, to a United States frigate. In 1860 he published *The War in Nicaragua.* In August he sailed for Honduras with 100 men, took Trujillo, was compelled to evacuate by a British man-of-war, and, given up to the Honduras authorities, was tried and shot in September, 1860.

Wallace, Alfred Russel, English naturalist and traveler, was born in Monmouthshire, England, 1823. He was educated as a surveyor and architect, but devoted his attention to natural history after 1845. He visited South America and the Malay archipelago, published the results of his observations on his return, and simultaneously with Darwin announced the theory of natural selection. Among his other works are: *Contributions to the Theory of Natural Selection; On Miracles and Modern Spiritualism; Land Nationalization; Darwinism; Geographical Distribution of Animals,* etc.

Wallace, John Findley, American civil engineer, was born at Fall River, Mass., 1852. He was educated at Monmouth college; C. E., university of Wooster; LL. D., Monmouth college; Sc. D., Armour institute, Chicago. He was assistant United States engineer, upper Mississippi river and improvements of Rock island rapids, 1871–76; county surveyor and city engineer, 1876–78; chief engineer and superintendent of Peoria and Farmington railroad, 1878–81; chief engineer and superintendent of Central Iowa railway in Illinois, 1881–83; construction engineer and master of transportation, Central Iowa railway, 1883–86; bridge engineer of Atchison, Topeka and Santa Fe railroad, 1886–89; resident engineer of Chicago, Madison and Northern railroad, 1889–91; with Illinois Central railroad, 1891–1904; chief engineer of the Panama canal, 1904; isthmian canal commissioner, 1905; president of Electric Properties company since 1906. He is chairman of the board of directors of Westinghouse, Church, Kerr and Company; was vice-president Holland-American construction company; director Atha steel foundries, New York, and of the Wallace-Coates engineering company, Chicago.

Wallace, Lewis, American general, diplomat, and author, was born at Brookville, Ind., 1827. He served as first lieutenant in the Mexican war; engaged in the practice of law in Indiana from 1848; entered the Union service during the civil war; became a brigadier-general in 1861, and served throughout the war. He was governor of New Mexico, 1878–81, and from 1881 to 1885 was United States minister to Turkey. Author: *The Fair God; Ben Hur; The Boyhood of Christ; The Prince of India,* etc. Died, 1905.

Wallace, O. C. S., Canadian clergyman and educator, chancellor of McMaster university, Toronto, since 1895, was born at Canaan, Nova Scotia, 1856. He was graduated from Acadia university, Wolfville, Nova Scotia, and at Newton theological institution, Newton Centre, Mass., D. D., LL. D. He was ordained as pastor of the First Baptist church, Lawrence, Mass., 1885; remained there six years, and was called to Bloor Street Baptist church, Toronto, Canada, and entered upon his pastorate, 1891. Author: *Life of Jesus; Teachings of Jesus; Labors and Letters of the Apostles,* etc.

Wallace, Sir William, Scottish patriot, was born about 1272. He headed the rising of 1297 against the English, and won a victory at Stirling bridge, after which he crossed the border, devastated northern England, and was named guardian of Scotland on his return. The next year, however, he was defeated by Edward I. at Falkirk, after which, deserted by the nobles, he carried on a guerilla warfare for seven years. After being imprisoned in France, where he had sought aid, he was declared an outlaw in 1304, was captured the next year, sent to London and hanged.

Wallenstein (*văl'-en-shtīn*), **Albrecht Wenzel Eusebius,** duke of Friedland, celebrated German general, was born in Bohemia, 1583, and began life as page to the margrave of Burgau. After having traveled over nearly all of Europe, he married a widow possessed of immense riches, who left him a widower at the end of four years. At the head of a formidable army raised by him for the service of the emperor, and paid from his own resources and from unlimited plunder, he, for several years, distinguished himself by his successes in Moravia, Bohemia, and northern Germany, and was rewarded with the dukedoms of Mecklenburgh and Friedland. His enemies at length succeeded in procuring his dismissal, and he retired to Prague, where he lived with all the state of a sovereign. The progress of Gustavus Adolphus compelled the emperor, in 1632, to place Wallenstein again in command of his forces, with almost regal authority. He foiled Gustavus at Nuremberg, but was defeated at Lützen. At length he was accused of treason, and his commission was revoked; and, while he was meditating projects of revenge, he was assassinated, in 1634, by some of his own officers.

Walpole, Horace, English author, was born in 1717, and in 1791 succeeded to the title of earl of Orford, originally granted to his father. He graduated from Cambridge, and entered parliament in 1741. In 1747 he purchased the famous estate of Strawberry Hill, Twickenham, the building and adornment of which occupied him during a considerable portion of his life. In this house he collected works of art and curiosities of every description, and likewise established a private printing-press, at which several of his own works and some others were printed. Although he remained a member of the house of commons until 1768, he devoted himself chiefly to literary and artistic pursuits from the period of his entering into possession of the house at Strawberry Hill. He wrote *Catalogue of Royal and Noble Authors; Anecdotes of Painting in England; The Castle of Otranto; Historic Doubts on the Life and Reign of Richard III.;* and subsequently, *Reminiscences of the Courts of George I. and II.,* the publication of which was not completed until after his death. He is now remembered chiefly for his *Letters,* which extend over a period of sixty years, and which are remarkable for their wit and humor, and for their delineations of the society in which he lived. Died, 1797.

Walpole, Sir Robert, English statesman, was born at Houghton, England, 1676. He was graduated from Cambridge, and entered parliament in 1701. He was secretary of war, 1708; treasurer of the navy, 1709; chancellor of the exchequer, 1715–17; and prime minister, 1721–42. As chancellor of the exchequer he had to deal with the difficulty in which Great Britain was placed through the collapse of the South Sea company; and was one of the first to urge the establishment of a sinking fund for the purpose of reducing the national debt. He was an enemy of war, and a strong supporter of the Protestant succession. On his retirement in 1742 he was created earl of Orford, with a pension of 4,000 pounds a year. Died, 1745.

Walsh, Blanche, American actress, was born in New York, 1873, daughter of Thomas P. Walsh. She made her dramatic début as Olivia in *Twelfth Night,* with Marie Wainwright, Chicago, 1889, and remained with that company until 1892. She then joined Charles Frohman's company; played the title rôle in *Trilby,* 1896;

created the part of Maslova in Tolstoi's *Resurrection*, 1903. She married, 1896, Alfred Hickman, whom she divorced in 1903; and in 1906 married W. M. Travers, actor.

Walsh, Thomas F., mine owner and mining engineer, was born in the county of Tipperary, Ireland, 1851. He was educated in the public schools, learned the millwright's trade; emigrated to the United States at the age of nineteen, and settled in Colorado. He there engaged in the mining business, studied geology, mineralogy, metallurgy, the deposition of ore bodies, and the development and treatment of ores, and was instrumental in introducing new methods of treatment. He developed, equipped and was a large owner in the Camp Bird mines, Ouray, Col., and other properties. Died, 1910.

Walter, Thomas Ustick, American architect, was born in Philadelphia, Pa., 1804. In 1833 he made the designs for the Girard college building, which, on its completion, in 1847, was pronounced the finest specimen of classic architecture in the United States. His next great work was the breakwater at La Guayra for the Venezuelan government. In 1848 his design for the extension of the capitol at Washington, D. C., was adopted Having been appointed government architect, he removed to Washington, and remained there until the completion of the work in 1862. While in Washington he also designed the extensions of the patent office, treasury, and post-office buildings, the dome of the capitol, and the government hospital for the insane. He died in Philadelphia, Pa., 1887.

Walton, Clifford Stevens, American lawyer, was born at Chardon, Ohio, 1861. He was educated at the United States military academy, university of Madrid, Spain, and National law university, Washington. He was an authority on Spanish jurisprudence, and served as attorney for or against the United States on several international law commissions, including controversies between the United States and Chile, Peru, Salvador, etc. Major United States volunteers, 1898-99, on staffs of Major-generals Brooke and Ludlow in Porto Rico and Cuba. Author: *The Civil Law in Spain and Spanish America; Leyes Comerciales y Maritimas de la America Latina*, etc. Died, 1912.

Walton, Izaak, English writer, was born at Stafford, England, 1593. He is chiefly remembered as the author of *The Compleat Angler, or The Contemplative Man's Recreation*, which was published in 1655. He was a linendraper in the city of London, first in Cornhill, and afterward in Fleet street. At fifty years of age he retired from business, and thenceforward devoted himself to literary pursuits, and to angling, which seems to have been his passion. His *Compleat Angler* is still a popular book, especially pleasing for its quiet and quaint dialogue, and for its glimpses of rural scenery, manners, and pastimes. He also wrote *Life of Dr. Donne; Life of Sir H. Wotton; Life of Richard Hooker; Life of George Herbert; Life of Bishop Sanderson*. Died, 1683.

Wanamaker, John, American merchant, was born at Philadelphia, Pa., 1838. He was educated in the public schools until 1852; was errand boy in book store at fourteen; went to Indiana, but returned, 1856; retail clothing salesman, 1856–58; established, 1861, with Nathan Brown, clothing house of Wanamaker and Brown, Philadelphia; established, 1876, department store in Philadelphia, and a similar business in New York in 1896, in succession to the business of A. T. Stewart, now among the largest in the country. He declined the republican nomination to the 48th congress, and the independent nomination for mayor of Philadelphia, 1886; was postmaster-general of the United States, 1889–93; and has long been active in religious work. He founded, 1858, the Bethany Sunday school, probably the largest in the United States; was one of the founders of the Christian commission during the civil war, and was president of the Y. M. C. A. of Philadelphia, 1870–83.

"Ward, Artemus." See **Browne, Charles Farrar.**

Ward, Elizabeth Stuart Phelps. See **Phelps-Ward, Elizabeth Stuart.**

Ward, Mrs. Humphry (Mary Augusta Arnold), English novelist and writer, was born at Hobart, in Tasmania, 1851, daughter of Thomas Arnold, second son of Dr. Arnold of Rugby. In 1872 she married Thomas Humphry Ward, a well-known critic and writer. She began early to contribute to *Macmillan's Magazine*, and gave the fruits of her Spanish studies to Smith's *Dictionary of Christian Biography*. A child's story, *Milly and Olly, Miss Bretherton*, a slight novel, and the translation of Amiel's *Journal Intime*, prepared the way for the spiritual romance of *Robert Elsmere*, in 1888. Since then she has published: *The History of David Grieve; Marcella; Sir George Tressady; Lady Rose's Daughter; Helbeck of Bannisdale; Eleanor*, a play; *The Marriage of William Ashe; Fenwick's Career; Diana Mallory*, etc. She is also an occasional lecturer and is prominent in settlement work in London.

Ward, John Quincy Adams, American sculptor, was born at Urbana, Ohio, 1830. His first work was done in Washington, and consisted largely of busts of noted men, including Alexander Stephens, Hannibal Hamlin, and others. After 1861 his home was in New York. His "Indian Hunter," "A Private of the Seventh Regiment," and "Shakespeare" are in Central park, New York; his colossal statue of Washington is on the steps of the sub-treasury building in Wall street, New York, and a statue of Henry Ward Beecher in Brooklyn, and that of William E. Dodge on Broadway, New York. He also executed the "Good Samaritan," "The Freedman," statues of Commodore Perry, Washington, and General Thomas, and equestrian statues of Sheridan and Hancock. Died, 1910.

Warfield, David, American actor, was born at San Francisco, 1866. He received a public school education, and made his first appearance at the Wigwam theater, San Francisco, 1886. He went to New York in 1890; played in Casino theater and Weber and Field's music hall, 1895–98; was starred by David Belasco in *The Auctioneer*, 1898–1901; *The Music Master*, 1901–07, and 1909; *A Grand Army Man*, 1907-08; *The Return of Peter Grimm*, 1911, etc.

Warner, Charles Dudley, American author, was born at Plainfield, Mass., 1829. He was graduated at Hamilton college, 1851; practiced law in Chicago, 1856–60, then settled as an editor at Hartford, Conn., and became associate editor of the *Hartford Courant* in 1867. In 1884 he became co-editor of *Harper's Magazine*, in which his papers on the South, Mexico, and the great West appeared. In 1873 he wrote with "Mark Twain" *The Gilded Age*. His other works include: *My Summer in a Garden; Back-log Studies; Being a Boy; Washington Irving; Captain John Smith;* books of travel, such as *In the Levant*, etc. Died, 1900.

Warren, Francis Emroy, United States senator, was born in Hinsdale, Mass., 1844. He received a common school and academic education; enlisted in 1862 in the 49th Massachusetts regiment of infantry, and served as private and non-commissioned officer in that regiment until it was mustered out of service. He was engaged in farming and stock raising in Massachusetts until early in 1868, when he moved to Wyoming. He was president of the senate of Wyoming legislature, 1873-74, and member of the senate, 1884-85; was three terms treasurer of Wyoming; was appointed governor of Wyoming by President Arthur in 1885, and removed by President Cleveland in 1886; was again appointed governor of Wyoming by President Harrison in 1889, and served until the territory was admitted as a state, when he was elected the first governor of the state. He was elected to the United States senate in 1890, and reëlected in 1895, 1901, 1907, and 1913.

Warren, Joseph, American soldier, was born at Roxbury, Mass., 1741. He was graduated at Harvard in 1759, and became a physician in Boston, 1764. In 1772 he was a member of the committee of correspondence. He was a member of the Suffolk county convention, which was called to oppose Governor Gage's proposed fortification of the south entrance to Boston harbor, and as chairman of the committee appointed to remonstrate with Gage on that subject, drew up two papers, which were afterward laid before congress. In 1774 he was a member and president of the Massachusetts congress, and chairman of the committee of public safety. He had much to do with the success at Lexington, and in 1775 was commissioned major-general. He opposed the occupation of Charlestown heights, advocated by Putnam and Prescott, thinking the American supply of ammunition too small to repel an attack. Overruled by a majority of the council, which resolved to fortify Bunker Hill, he went there as a volunteer, refusing to take the chief command offered to him by both Prescott and Putnam. As he was leaving the field among the last, he was killed by a ball in the forehead, 1775.

Warren, Samuel, English novelist, was born in Denbighshire, 1807. He studied medicine and law, was called to the bar and made queen's counsel in 1851. He was recorder of Hull, 1854–74; conservative member of parliament for Midhurst, 1856–59, and then master of lunacy in 1859. He is chiefly remembered by his *Passages from the Diary of a Late Physician*, and *Ten Thousand a Year*, the amusing story of Tittlebat Titmouse, both of which appeared first in *Blackwood's*. Other works were: *Now and Then*, *The Lily and the Bee*, and several law books. Died, 1877.

Warren, Winslow, American lawyer, was born at Plymouth, Mass., 1838. He was graduated at Harvard, 1858, at Harvard law school, 1860; was admitted to the bar and engaged in practice in Boston, 1860. He was formerly associate counsel for the Boston and Providence railroad; collector of the port of Boston, 1894–98; United States commissioner, 1861–94, and is now counsel for many corporations. He is a director of the Columbian National life insurance company; president-general of the society of the Cincinnati; president of Massachusetts society of the Cincinnati; ex-president of the Bunker Hill monument association; overseer of Harvard college since 1899; member of Massachusetts historical society, etc.

Warwick, Richard Neville, Earl of, surnamed the "king-maker," was born about 1428. He was the wealthiest and most powerful subject of his time in Europe, and allied by blood to the royal houses of England and France. After joining the Yorkists in the commencement of the calamitous war of the Roses, and taking King Henry VI. prisoner, Warwick, after his victory of Towton, placed Edward, duke of York, on the throne as Edward IV. Upon the latter quarreling with his great vassal, Warwick allied himself with the Lancastrians, formed an alliance with France, and at the head of a powerful army drove Edward out of England, and reinstated Henry VI. on the throne. He was killed in the battle of Barnet, 1471.

Washington, Booker Taliaferro, principal of Tuskegee normal and industrial institute since 1881, was born near Hale's Ford, Va., about 1859, the son of a mulatto slave and a white man. He was graduated from Hampton institute, Virginia, 1875; A. M., Harvard, 1896; LL. D., Dartmouth, 1901. He was a teacher at Hampton institute until elected by the state authorities head of Tuskegee institute, which he organized and has made successful. He is a well-known and able writer and speaker on racial and educational subjects. Author: *Sowing and Reaping; Up From Slavery; Future of the American Negro; Character Building; Story of My Life and Work; Working With Hands; Tuskegee and Its People*, etc.

Washington, George. See page 473.

Watson, John, Canadian educator and writer, was born at Glasgow, Scotland, 1847. He was graduated at Glasgow university, M. A., 1872, LL. D., 1880; has been professor of logic, metaphysics, and ethics in Queen's university, Kingston, since 1872. Author: *Kant and his English Critics; Schelling's Transcendental Idealism, a Critical Exposition; The Philosophy of Kant as Contained in Extracts from his own Writings; Comte, Mill, and Spencer, an Outline of Philosophy; Hedonistic Theories, from Aristippus to Spencer; Christianity and Idealism; An Outline of Philosophy; The Philosophical Basis of Religion; The Philosophy of Kant Explained*, etc.

Watson, John. See **Maclaren, Ian.**

Watson, Thomas E., American lawyer and politician, was born in Georgia, 1856. He studied two years in Mercer college, and was admitted to the bar in 1875. He was a member of the Georgia legislature, 1882-83; member of congress, 1891–93; and while in congress secured the first appropriation for the free delivery of mails in rural districts that congress ever passed. He was nominated for vice-president of the United States at the St. Louis populist convention, 1896; was nominated for president by the people's party, 1904; began the publication of *Tom Watson's Magazine*, in New York, 1905. Author: *The Story of France; Life of Thomas Jefferson; Life of Napoleon; Life and Times of Thomas Jefferson; Bethany, a Study and Story of the Old South*, etc.

Watson, William, English poet, was born at Burley-in-Wharfedale, 1858. His father became a merchant in Liverpool, and there he received his education; hon. LL. D., Aberdeen, 1904. His early poems were published in the *Liverpool Argus* in 1875, and his first book, *The Prince's Quest*, appeared in 1880. Since then have appeared: *Epigrams of Art, Life, and Nature; Wordsworth's Grave; Lachrymae Musarum; Lyric Love; The Eloping Angels; Excursions in Criticism; Odes, and other Poems; The Father of the Forest; The Purple East; The Year of Shame; The Hope of the World; Collected Poems; Ode on the Coronation of King Edward VII.; For England; The Woman with the Serpent's Tongue*, etc.

Watt, James. See page 375.

Watterson, Henry, American journalist and orator, was born at Washington, D. C., 1840. He was privately educated, and began his career on the *Democratic Review* and on *The States* in Washington, D. C. He edited the *Republican Banner*, at Nashville, Tenn., before and after the civil war, in the interim serving with distinction in the confederate army as chief of scouts under General Joseph E. Johnston. He subsequently settled at Louisville, Ky., where he founded and has since edited the *Courier-Journal*, which he has made one of the foremost democrat newspapers. During the years 1876-77 he was a member of congress, and, though repeatedly urged, he has uniformly declined office, but has contented himself with presiding over conventions and supporting his democratic friends and allies in their political contests. At Chicago, in 1893, he delivered the dedicatory oration at the opening of the World's Columbian exposition. In 1896 he declined the offer of a nomination for president on the national gold democratic ticket. He has published a *History of the Spanish-American War; Oddities of Southern Life and Character; Abraham Lincoln; The Compromises of Life*, etc.; and continues to be one of America's most brilliant journalists.

Watts, George Frederick, English artist, sculptor, portrait painter, and delineator of historical subjects, was born at London, 1817. He first exhibited at the royal academy in 1837, and gained a reputation for the size, artistic excellence, and beauty of coloring of his pictures. His chief exhibits included: "Caractacus"; "Alfred the Great"; "St. George and the Dragon"; "Cymbeline"; "Fata Morgana"; "Life's Allusions"; "Endymion"; "Love and Death"; "The Good Samaritan"; "Hope"; "Sir Galahad"; "Orpheus and Eurydice"; together with portraits of Tennyson, Browning, Gladstone, Lord Lytton, Matthew Arnold, Holman Hunt, Swinburne, Dean Stanley, John Stuart Mill, William Morris, and others. Died, 1904.

Watts, Isaac, English hymn writer and theologian, was born at Southampton, England, 1674. In 1696 he became tutor in the family of Sir John Hartopp, with whom he remained six years. During the latter part of his time he officiated as assistant minister of the Independent church in Mark Lane, London, to which post he succeeded in 1702, resigning because of ill health, 1712. His theological works were numerous, and his treatise on *Logic* had a considerable reputation. His reputation has been chiefly perpetuated by his well known hymns. Died, 1748.

Wayne, Anthony, famous general in the war of the revolution, was born in Pennsylvania, 1745. At the outbreak of hostilities he raised a regiment of volunteers, of which he was appointed colonel, and sent to Canada. He commanded Ticonderoga until 1777, when he was made brigadier-general, and joined Washington in New Jersey; led the attack at Germantown; captured supplies for the distressed army at Valley Forge; distinguished himself at Monmouth; was defeated at Paoli, but achieved a brilliant victory in the storming of Stony Point, 1779. His courage and skill saved Lafayette in Virginia, 1780. He aided in the siege of Yorktown, and commanded in Georgia. By his dash and audacity he acquired the sobriquet of "Mad Anthony." He became major-general and commander-in-chief in 1792. Died, 1796.

Weber (*vā'-bĕr*), **Karl Maria von,** German composer, was born at Eutin near Lübeck, 1786, of a famed musical family. He early gave proof of musical talent; studied at Vienna under Abbé Vogler, and at Dresden became founder and director of the German opera. His first great production was *Der Freischütz*, which established his fame, and was followed by *Oberon*, his masterpiece; *Das Waldmädchen*, etc. *Oberon* was produced in London in 1826, where, shortly afterward, he died in the same year. He also wrote a number of pieces for the piano, deservedly popular.

Webster, Arthur Gordon, American physicist, professor of physics, Clark university, Worcester, Mass., was born at Brookline, Mass., 1863. He was graduated at Harvard, 1885; studied at Berlin, Paris, Stockholm, 1886–90; Ph. D., Berlin, 1890; D. Sc., Tufts, 1905. He was awarded the Thomson prize of 5,000 francs at Paris, 1895, for experimental research on the *Period of Electrical Oscillations*. He is a member of many scientific associations, and author of: *A Mathematical Treatise on the Theory of Electricity and Magnetism; Dynamics of Particles, and of Rigid, Elastic and Fluid Bodies; Lowell Institute Lectures on Electricity and Ether;* and many papers on physics.

Webster, Daniel. See page 494.

Webster, John, great English dramatist, was born about 1580. Little of his life is known. He collaborated with a number of writers of the period, and then produced unaided the tragedy of *The White Devil*, one of his two great masterpieces, about 1610. *Appius and Virginia* followed, and about 1616 Webster produced his famous *Duchess of Malfi*. *The Devil's Law Case*, a later work, proved more commonplace. As a master of tragedy, especially the tragedy of terror and violence, Webster must be ranked second only to Shakespeare. He died about 1625.

Webster, Noah, author and philologist, was born at Hartford, Conn., 1758, and was educated at Yale college; admitted to the bar in 1781, but engaged in scholastic and literary occupations. While employed in teaching at Goshen, N. Y., he prepared his *Grammatical Institutes of the English Language*, and edited Governor Winthrop's *Journal*. In 1784 he wrote *Sketches of American Policy*, advocating the formation of a new constitution, and gave public lectures on the English language, which were published in 1789. In 1807 he published *A Philosophical and Practical Grammar of the English Language*, and commenced his American *Dictionary of the English Language;* but finding difficulties in etymology, he devoted ten years to its study, and prepared a *Synopsis of Words in Twenty Languages;* then began his dictionary anew, and in seven years completed it. He also published a popular *History of the United States, Dissertations on the English Language*, and a *Manual of Useful Studies*. He was a judge, a member of the state legislature, and one of the founders of Amherst college. Died in New Haven, Conn., 1843.

Weed, Thurlow, American journalist, was born at Cairo, N. Y., 1797. At the age of ten he was a cabin boy on a sloop on the Hudson river, and at twelve an apprentice in a printing office at Catskill, N. Y. He served as a volunteer in the war of 1812; established the *Agriculturalist* in western New York; edited several other journals, and became famous as the editor of the *Albany Journal*, 1830–62, the organ of the whig party. Here he became an acknowledged leader of the whig and republican party, and had great influence in securing the nominations of William H. Harrison, Taylor, and Scott. In 1865 he moved to New York city and became editor of the *New York Times*, and afterward of the *Commercial Advertiser*. In 1861-62 he was sent to Europe on a special mission by President Lincoln. He published several volumes of reminiscences and letters. Died at New York in 1882.

Weir (*wēr*), **Robert Walter,** American painter, was born at New Rochelle, N. Y., 1803. After studying in Italy several years he was made professor of drawing at West Point, N. Y., where he remained for forty-two years. His best known works are: "The Landing of Henry Hudson"; "Columbus before the Council of Salamanca"; "Indian Captives"; "Embarkation of the Pilgrims," in the rotunda of Washington; and "Christ in the Garden." Some of his works in private collections at New York are very fine, as a "View of Hudson from West Point," "Rebecca," from *Ivanhoe*, and "A Pier at Venice." He died at New York in 1889.

Weismann (*vis'-män*), **August,** German biologist, professor of zoölogy, university of Freiburg, since 1867; was born at Frankfort, 1834. He studied medicine at Göttingen, and in 1861 became physician to the archduke Stephen of Austria. His first work was on the *Development of the Diptera*, in 1863. In 1868–76 appeared a series of papers, translated in 1882 as *Studies in the Theory of Descent.* His *Essays upon Heredity and Kindred Biological Problems* raised a great controversy by denying that characters acquired by the individual are transmitted to offspring. He contends that natural selection is the dominant factor in evolution, and that use and disuse of parts and the action of environment count for little or nothing so far as future generations are concerned. He has published, besides the Romanes lectures of 1894, *The Evolution Theory,* and half a dozen works on kindred problems.

Welch, William Henry, American physician and pathologist, was born at Norfolk, Conn., 1850. He was graduated from Yale in 1870; M. D., college of physicians and surgeons, New York, 1875; and was a graduate student at Strassburg, Leipzig, Breslau, and Berlin, 1876–78, 1884–85; hon. M. D., university of Pennsylvania, 1894; LL. D., Western Reserve, 1894, Yale, 1896, Harvard, 1900, Toronto, 1903, Columbia, 1904, Jefferson medical college, 1907. He was professor of pathological anatomy and general pathology, University and Bellevue hospital medical college, 1879–84; Baxley professor of pathology, Johns Hopkins, since 1884; and pathologist to the Johns Hopkins hospital since 1889. President board of directors, Rockefeller institute for medical research, since 1901. He is the author of *General Pathology of Fever*, and numerous papers on pathological and bacteriological subjects.

Wellington, Arthur Wellesley, Duke of, celebrated British general, was born at Dangan Castle, Ireland, 1769. He completed his military education a few years before the French revolution, in the military college of Angers, in France; entered the army as ensign in 1787, and became lieutenant-colonel in 1793. In 1794 he embarked to join the duke of York's army in the Netherlands. In this, his first term of actual service, he commanded three battalions on the retreat of the army through Holland, and distinguished himself in several repulses of the French. It was in the Mahratta war of 1803 that he won his first fame. In 1808 he commanded an expedition which sailed from Cork, being the first division of the British army sent out to assist in the expulsion of the French from Spain and Portugal. Throughout the peninsula campaign success crowned his efforts, and the French were vanquished everywhere. In 1814 he was created marquis of Douro and duke of Wellington. He was appointed ambassador-extraordinary to the congress of Vienna. Napoleon having escaped from Elba, the congress was abruptly broken up. He was then appointed commander of the British forces on the continent of Europe, and from Vienna joined the army at Brussels. It appeared probable that Napoleon would make a bold advance into Belgium, and its defense was assigned to an army under Wellington, and a Prussian army under Blücher. The battles of Ligny and Quatre Bras were succeeded on June 18, 1815, by the great battle of Waterloo. Here the grand and decisive blow was struck, and the power of Napoleon was finally crushed. When the allied armies evacuated France in 1818, the emperors of Russia and Austria and the king of Prussia created Wellington a field marshal of their armies. At the coronation of George IV., in 1821, he officiated as lord high constable of England. In 1827 he succeeded the duke of York as commander-in-chief of the British army, and from 1828 to 1830 was prime minister. In 1834 he was elected chancellor of the university of Oxford. Died, at Walmer Castle, in 1852.

Wells, Carolyn, author, was born at Rahway, N. J., daughter of William E. Wells, and has been engaged in literary work since 1895. Author: *At the Sign of the Sphinx; Idle Idylls; A Nonsense Anthology; Eight Girls and a Dog; The Gordon Elopement; The Staying Guest; The Dorrance Domain; Marjorie's Vacation; Rainy Day Diversions; Emily Emmins Papers;* the *Patty Fairfield* series, etc.

Wells, David Ames, American economist, was born at Springfield, Mass., 1828. He was graduated from Williams college, and at the Lawrence scientific school, Harvard; was for a time associate editor of the *Springfield Republican.* In 1866 he was appointed United States commissioner of revenue; in 1871 was chairman of a commission to report upon the laws relating to taxation in the state of New York, and was an industrious and prolific writer. Among his published works are text-books on *Science of Common Things; Elements of Natural Philosophy; First Principles of Geology; Production and Distribution of Wealth; Practical Economics; The Relation of the Tariff to Wages; Recent Economic Changes; The Principles of Taxation;* also published *Robinson Crusoe's Money,* and a work entitled *Our Merchant Marine.* Died, 1898.

Wells, Herbert George, English novelist, was born at Bromley, Kent, 1866. He was graduated at the royal college of science, 1888. His scientific training and his writing for the *Pall Mall Gazette* and the *Saturday Review* prepared him for the series of books remarkable alike for a mixture of weird adventure and scientific knowledge, and for a bold, wide imagination. Among these are: *The Time Machine; The Stolen Bacillus and Other Stories; The Wonderful Visit; The Island of Doctor Moreau; The First Men in the Moon; The Invisible Man; Mankind in the Making; The Food of the Gods; The Future in America; In the Days of the Comet; Twelve Stories and a Dream; The War in the Air.* A radical socialist, he is a constant contributor to magazines on socialist topics.

Wells, Webster, American educator and mathematician, was born at Boston, Mass., 1851. He was graduated at the Massachusetts institute of technology, 1873; studied civil engineering, and became professor of mathematics in the Massachusetts institute of technology, 1893. Author: *Elementary Treatise on Logarithms; University Algebra; Plane and Spherical Trigonometry; Academic Algebra; Elements of Geometry; Higher Algebra; Essentials of Trigonometry; College Algebra; Academic Arithmetic; Essentials of Algebra; Essentials of Plane and Solid Geometry; New Higher Algebra; Complete Trigonometry; New Four Place Tables; Advanced Course in Algebra; Algebra for Secondary Schools; Text-Book in Algebra,* etc.

Wendell, Barrett, American educator, writer, and critic, was born at Boston, 1855. He was graduated at Harvard, 1877; was instructor at Harvard, 1880–88, assistant professor, 1888–98, professor since 1898, and lecturer at the Sorbonne and other French universities, 1904–05. Author: *The Duchess Emilia,* a novel; *Rankell's Remains,* a novel; *English Composition; Life of Cotton Mather; Stelligeri and Other Essays Concerning America; William Shakespeare, a Study of Elizabethan Literature; A Literary History of America; Raleigh in Guiana; Rosamond, and a Christmas Masque; The Temper of the Seventeenth Century in English Literature,* Clark lectures given at Trinity college, Cambridge, England, 1902-03; *History of Literature in America,* with

Chester N. Greenough; *Liberty, Union and Democracy — the National Ideals of America; The France of To-day*, etc.

Wenley, Robert Mark, American educator, head of philosophical department, university of Michigan, since 1896, was born at Edinburgh, Scotland, 1861. He was graduated at the university of Glasgow, M. A., 1884, Ph. D., 1895; university of Edinburgh, Sc. D., 1891; hon. LL. D., Glasgow, 1901. He studied in Paris, Rome, Germany; was assistant professor of logic, Glasgow, 1886–94; and was in charge of the philosophical department, Queen Margaret college, Glasgow, 1888–95. Author: *Socrates and Christ; Aspects of Pessimism; Contemporary Theology and Theism; Introduction to Kant; Preparation for Christianity in the Ancient World; Kant and his Philosophical Revolution*, etc. Joint editor: *The American Journal of Religious Psychology*, etc.

Werner (*vĕr'-nĕr*), **Abraham Gottlob,** German mineralogist and geologist, was born at Wehrau, in upper Lusatia, 1750. He studied at Freiberg and Leipzig, and in his twenty-fourth year published an unusual treatise on the *Character of Minerals.* In 1775 he was appointed professor of mineralogy and curator of the mineralogical collections at Freiberg. In 1791 he published a *Theory of the Formation of Metallic Veins*, which greatly extended his reputation. He was not a voluminous author, but his views were diffused by his pupils, among whom were the most eminent German mineralogists of the time. In 1792 he was appointed councilor of mines in Saxony, and his lectures soon extended his reputation throughout Europe. In addition to the above are *Classification and Distribution of Mountains*, and a translation of *Cronstadt's Mineralogy.* His influence was very great in the promotion both of mineralogy and of geology. In his mineralogical system minerals were distinguished and arranged chiefly according to their external characters. He died at Dresden in 1817.

Wesley, Charles, English hymn writer, was born at Epworth, England, 1707, and was associated with his brother John in the whole Methodist movement. He studied at Christ Church, Oxford, visited Georgia at the same time with his brother, and took an active part in the subsequent work in England. He was a clear and simple preacher and a man of fervent piety. He is the author of a great number of hymns, many of which are among the best and most admired in the English language, replete with pious feeling, and of unsurpassed lyrical power and sweetness. He died in 1788.

Wesley, John. See page 246.

West, Benjamin, American painter, was born at Springfield, Pa., 1738. He began to paint at seven years of age, worked in Philadelphia and New York, studied in Italy, 1760–63, and settled in England in the latter year. In 1792 he succeeded Sir Joshua Reynolds as president of the royal academy, an office which he held until his death. His works were formerly very highly esteemed, and he is still considered one of the greatest painters whom America has produced. Among his best paintings are: "The Death of Wolfe"; "Christ Healing the Sick"; "Death on the Pale Horse"; "Alexander the Great and his Physicians"; "Penn's Treaty with the Indians," etc. Died in London in 1820.

Westcott, Brooke Foss, English prelate, writer, and biblical scholar, was born near Birmingham in 1825, and was educated at Trinity college, Cambridge. He was successively master at Harrow, canon of Petersborough, regius professor of divinity at Cambridge, canon of Westminster, and in 1890 was appointed bishop of Durham. His writings embrace: *History of the Canon of the New Testament; Introduction to the Study of the Gospels; History of the English Bible; The Gospel of the Resurrection; The Gospel of Life; Social Aspects of Christianity; The Historic Faith; The Revelation of the Risen Lord; Characteristics of the Gospel Miracles; The New Testament in the Original Greek*, with Dr. Hort, etc. Died, 1901.

Westinghouse, George, American inventor and manufacturer, was born in New York in 1846. He spent much time in his father's machine shop, and invented, at the age of fifteen, a rotary engine. He served in the Union army, 1863-64; was assistant engineer in the United States navy, 1864-65; then attended Union college to sophomore year; Ph. D., 1890. In 1865 he invented a device for replacing railroad cars on the track; in 1868 invented and successfully introduced the Westinghouse air brake, which he has since greatly improved; and has also made other inventions in railway signals, steam and gas engines, steam turbines, and electric machinery. He was the pioneer in introducing alternating current machinery in America, which has rendered possible the great development of water powers for long distance electrical transmission; built the great generators at Niagara Falls and those for elevated railway and rapid transit system in New York; has established large works in the United States, England, France, and Germany for manufacturing air brakes, electrical and steam machinery. He is president of numerous corporations, employing over 50,000 people and with a capitalization of about $120,000,000.

Wetmore, George Peabody, ex-United States senator, was born during a visit of his parents abroad, at London, England, 1846. He was graduated at Yale college in 1867, at Columbia law school, 1869; was admitted to the bar of Rhode Island and of New York, 1869. He is a trustee of the Peabody education fund; was governor of Rhode Island, 1885-86, 1886-87; elected to the United States senate, 1894, was reëlected in 1900, and again in 1906.

Weyman (*wī'-man*), **Stanley John,** English novelist, was born at Ludlow, 1855. He was educated at Shrewsbury and at Christ Church, Oxford, and became a barrister in 1881. In 1890 he published *The House of the Wolf*, followed by *Francis Cludde;* and in 1893 made himself famous by *A Gentleman of France.* His later books include: *Under the Red Robe; My Lady Rotha; Memoirs of a Minister of France; The Red Cockade; The Man in Black; Shrewsbury; The Castle Inn; Count Hannibal; In King's Byways; The Long Night; The Abbess of Vlaye; Starvecrow Farm; Laid Up in Lavender; The Wild Geese*, etc.

Wharton, Joseph, American manufacturer and philanthropist, was born in Philadelphia, Pa., 1826. He was educated by private tutors; Sc. D., university of Pennsylvania, LL. D., Swarthmore college. He was clerk in a mercantile house, 1845–47; afterward a white lead manufacturer and connected with other enterprises; manufacturer, 1853–63, the Lehigh zinc company; purchased, 1873, the Gap nickel mines, Lancaster county, Pa., and established in Camden, N. J., the first successful nickel and cobalt works in America. He endowed a chair of history and economics at Swarthmore college; founded the Wharton school of finance and commerce, university of Pennsylvania, to which he gave $500,000; and was also active in other philanthropic work. Died, 1909

Wheatstone, Sir Charles, English physicist and electrician, was born at Gloucester, England, 1802. In a paper on binocular vision, read before the royal society in 1838, he explained the principle of the stereoscope. Among his other inventions are the cryptograph; automatic telegraph in two forms; telegraph thermometer and barometer; a machine for the conversion of dynamical into electrical force without the use of permanent magnets; and an apparatus for conveying instructions to engineers and steersmen on board large steam-vessels. He is well known for the Wheatstone bridge which, however, he did not invent but brought into general use. Died, 1875.

Wheaton, Henry, American jurist, was born at Providence, R. I., 1785. In 1812–15 he edited the *National Advocate* in New York, where for four years he was a justice of the marine court, and from 1816 to 1827 reporter for the United States supreme court. In 1827–35 he was *chargé d'affaires* at Copenhagen, and in 1835–46 minister at Berlin. Besides his *Elements of International Law*, he wrote a *Life of William Pinkney, History of the Northmen, Law of Nations*, etc. Died, 1848.

Wheeler, Benjamin Ide, American educator and philologist, president of the university of California since 1899, was born at Randolph, Mass., 1854. He was graduated at Brown university, 1875; Ph. D., Heidelberg, Germany, 1885; hon. LL. D., Princeton, 1896, Harvard, 1900, Brown, 1900, Yale, 1901, Johns Hopkins, 1902, Wisconsin, 1904, Illinois college, 1904. He was instructor at Brown university, 1879–81; at Harvard, 1885-86; became professor of comparative philology, 1887, and professor of Greek, 1888, at Cornell; and was professor of Greek at the American school of classical studies, Athens, Greece, 1895–96. Author: *The Greek Noun-Accent; Analogy in Language; Introduction to the History of Language; Dionysos and Immortality; Organization of Higher Education in the United States; Life of Alexander the Great*, etc. Roosevelt lecturer at the university of Berlin, 1909–10.

Wheeler, Joseph, American general, was born in Augusta, Ga., 1836. He was graduated at the United States military academy in 1859; served in the cavalry until the outbreak of the civil war, when he entered the confederate army, in which he was later commissioned major-general and senior commander of cavalry. He won great distinction during the civil war as a raider. After the war he practiced law; held a seat in congress, 1880–99; and was made major-general of volunteers during the Spanish-American war in 1898. During the Santiago campaign in Cuba he commanded the cavalry division; participated in the battles of Las Guasimas and San Juan hill; was appointed senior member of the commission to make arrangements for the surrender of the Spanish army; served in the Philippines, 1899-1900; and was appointed brigadier-general in the United States army, June, 1900, and was retired the following September. Died, 1906.

Whipple, Edwin Percy, American author, was born at Gloucester, Mass., 1819. He attended the public schools at Salem, and in 1837 was appointed superintendent of the newsroom of the merchant's exchange in Boston. Following this he wrote for the *Boston Miscellany* and other magazines, and lectured in Boston and other cities. In 1872 he became literary editor of the *Boston Globe;* in 1877 wrote for the *North American Review*, and at the same time did considerable bookseller's jobwork. His publications include: *Essays and Reviews; Literature and Life; Character and Characteristic Men; Literature of the Age of Elizabeth*, etc. Died, 1886.

Whistler, James Abbott McNeill, noted American painter, was born in Lowell, Mass., 1834. He entered the United States military academy but was dismissed; studied drawing and painting in Paris, France, and in 1863 settled in London, England. He held original views concerning his art, and made interesting experiments with color, in quest of novel effects. He also gained celebrity as an etcher, and is the author of etchings and paintings of established reputation and worth. His paintings include many portraits, among which are: "The White Girl," "Portrait of my Mother," "Nocturne in Blue and Gold," "Harmony in Gray and Green," etc. In 1890 he wrote the *Gentle Art of Making Enemies*. Died in London, 1903.

White, Andrew Dickson, American diplomatist and educator, was born in Homer, N. Y., 1832. He was graduated at Yale in 1853; traveled in Europe; was attaché to legation of the United States, St. Petersburg, 1854-55; studied in the university of Berlin; professor of history and English literature, 1857-63, lecturer on history, 1863–67, university of Michigan; also at university of Pennsylvania, Stanford and Tulane universities; returned to Syracuse and was state senator, 1863–67; chosen first president of Cornell university, toward the founding of which he gave $300,000 and an historical library of 40,000 volumes; and in addition to filling the presidency, 1867–85, filled the chair of modern history. He was appointed by President Grant commissioner to Santo Domingo, to study and report on the question of annexation, 1871; minister to Berlin, 1879–81; minister to St. Petersburg, 1892–94; member of the Venezuelan commission, 1896-97; ambassador to Berlin under President McKinley, 1897–1902; and was president of the American delegation to the international peace congress at The Hague in 1899. His best known works are: *Warfare of Science with Theology; The New Germany;* and *Studies in General History.*

White, Edward Douglass, American jurist, was born in the parish of Lafourche, La., 1845. He was educated at Mount St. Mary's college, Maryland, and at the Jesuit college in New Orleans. During the civil war he served in the confederate army. Afterward he practiced law; was state senator of Louisiana in 1874; associate justice of the supreme court of Louisiana, 1878; and United States senator in 1891–94. While in the senate he was appointed associate justice of the United States supreme court in 1894, and was appointed chief-justice by President Taft, 1910.

White, Gilbert, English naturalist, was born at Selborne in Hampshire, 1720. In 1744 he obtained a fellowship at Oriel college, Oxford; in 1747 took orders; in 1752 became senior proctor; and in 1758 accepted the sinecure college living of Morton Pinkney, Northants. Six years before he had retired to Selborne, to indulge his taste for literature and natural history. His charming *Natural History and Antiquities of Selborne* is now considered an English classic. Died, 1793.

White, Horace, American journalist, was born in Colebrook, N. H., 1834. He was graduated at Beloit college, Wis., 1853. For many years he was with the *Chicago Tribune*, and was its editor and one of its chief proprietors, 1864–74; and from 1883 to 1903 was connected with the *New York Evening Post*, as president of the company, editorial writer, and editor-in-chief. Edited: Bastiat's *Sophismes Economiques* and Luigi Cossa's *Scienza delle Finanze*. Author: *Money and Banking Illustrated by American History; The Roman History of Appian of Alexandria*, etc.

White, Horatio Stevens, professor of German at Harvard, was born in Syracuse, N. Y., 1852; graduated at Harvard, 1873; LL. D., Glasgow university, 1901. Traveled and studied several years in Europe; admitted to the New York bar, 1878; assistant professor of Greek and Latin, 1876–78, assistant professor of German, 1878–83, head of German department, 1891–1902, dean of general faculty, 1888–96, dean university faculty, 1896–1902, Cornell university. In 1902 he became professor of German at Harvard.

Edited: *Selections from Lessing's Prose; Selections from Heine's Poems; Selections for German Prose Composition;* and *Deutsche Volklieder.* He was also general editor of Appleton's *Twentieth Century Series of German Classics.*

White, James William, American physician and surgeon, was born in Philadelphia, Pa., 1850. He was graduated at the university of Pennsylvania, M. D., 1871; Ph. D., Pennsylvania; LL. D., Aberdeen. He was resident physician of Philadelphia hospital, 1873; surgeon to eastern state penitentiary, 1874–76; was first professor of genito-urinary surgery, then professor of clinical surgery; is now John Rhea Barton professor of surgery, university of Pennsylvania. Joint author: *American Text Book of Surgery; Genito-Urinary Surgery;* and has written numerous articles on medical and surgical subjects in medical journals.

White, Richard Grant, American author and critic, was born in New York city, 1822. He was educated at the college of the city of New York, and, though a student of medicine and of law, he adopted a literary career. He was for fourteen years on the *Courier and Enquirer* of New York, part of the time as editor. The result of his studies and writings on music and art was a volume on *Christian Art,* published in 1853. His other works include: *National Hymns,* published during the war; *Poetry of the Civil War; Words and Their Uses; Every-Day English; Life of Shakespeare; England Without and Within; Studies in Shakespeare,* etc.; and an edition of Shakespeare's plays. He died in New York city, 1885.

White, Stewart Edward, author, was born in Grand Rapids, Mich., 1873; Ph. B., university of Michigan, 1895; studied law one year at Columbia law school. He is a frequent contributor to magazines, and author of *The Westerners; The Claim Jumpers; The Blazed Trail; The Forest; The Magic Forest; The Silent Places; Conjuror's House; The Mountains; Blazed Trail Stories; The Pass; The Mystery,* with S. H. Adams; *Arizona Nights; The Wilderness Traveler; Camp and Trail.*

White, William Allen, American journalist and author, owner and editor of the Emporia *Daily and Weekly Gazette,* was born at Emporia, Kansas, 1868. He was educated at the university of Kansas, and began his career as a contributor to magazines and newspapers. Subsequently his paper attracted attention throughout the country for the picturesqueness and virility of its editorials, and he became widely known as a special writer. Author: *The Real Issue, and Other Stories; The Court of Boyville; Stratagems and Spoils; In Our Town; A Certain Rich Man,* etc.

Whitefield, George, one of the founders of Methodism, was born at Gloucester, England, 1714. He was educated at Oxford, became associated with the Oxford Methodists; visited Georgia in 1738 and 1739–41, and in the latter year doctrinal differences led to his separation from John Wesley, both of them being by this time disowned by the established church. Wesley believed and preached the doctrine of universal redemption; Whitefield was a rigid Calvinist. The latter's supporters now built him a large shed at Moorfields, near Wesley's chapel — which, being temporary, was known as the tabernacle; and his preaching gathered immense audiences around him. But he had no talent for organization; and as soon as he went away on his frequent and protracted journeys his supporters began to disperse. The countess of Huntingdon became a convert to his views, appointed him her chaplain, built and endowed chapels to maintain his Calvinistic doctrines. One of his most famous missionary journeys was that which he made to Scotland in 1741. His marriage, like that of John Wesley, was not a happy one. He made a number of visits to America, several of which lasted for two or three years. He died at Newburyport, near Boston, 1770.

Whitman, Walt, an American poet, was born in 1819 at West Hills, L. I. He learned the printing trade, taught school on Long Island, and wrote for newspapers and magazines. Later he became a newspaper publisher for a year, failed, went to New York to work in several newspaper positions, until, in 1846, he became for one year editor of the *Brooklyn Eagle.* Meanwhile he traveled widely in the United States and Canada. In 1855 appeared his first collection of *Leaves of Grass,* which he later greatly elaborated. He served as an army nurse at Washington throughout the civil war, writing in 1865 his *Drum Taps.* Later he produced his *Democratic Vistas, Two Rivulets,* and *Specimen Days and Collect.* Probably no American author, except Poe, has called forth so much comment at home and abroad. He died at Camden, N. J., 1892.

Whitney, Eli, American inventor, was born in Westborough, Mass., 1765. In 1792 he was graduated at Yale, went to Georgia, and for a time read law, while living on the plantation of the widow of Nathanael Greene. Here he invented the cotton gin, but owing to litigation growing out of the claims of fraudulent imitators, and despairing of obtaining his rights in the South, Whitney went to New Haven, Conn., 1798, near which city he became engaged in the manufacture of firearms, in which he made a fortune. He died at New Haven, 1825.

Whitney, Josiah Dwight, American geologist, was born at Northampton, Mass., 1819. He was graduated at Yale in 1839, and in 1840 joined the New Hampshire survey. He explored the geology of the Lake Superior region, Iowa, the upper Missouri, and California. In 1855 he was made professor in Iowa university, in 1860 state geologist of California, and in 1865 professor at Harvard. He wrote extensively on geological topics, and died in 1896.

Whitney, William Dwight, American philologist, was born at Northampton, Mass., 1827. He studied at Williams and Yale, and in Germany with Roth. In 1854 he became professor of Sanskrit at Yale, and in 1870 also of comparative philology. He was an office bearer of the American oriental society, edited numerous Sanskrit texts, and contributed to the great Sanskrit dictionary of Böhtlingk and Roth. He received honorary degrees from many universities, and was member and correspondent of several foreign academies, as well as knight of the Prussian order "Pour le Mérite." He waged war with Max Müller on fundamental questions of the science of language. Among his works are: *Material and Form in Language; Darwinism and Language; Oriental and Linguistic Studies; Life and Growth of Language; Essentials of English Grammar; Sanskrit Grammar; Logical Consistency in Views of Language; Mixture in Language,* etc. He was also editor-in-chief of the *Century Dictionary.* Died at New Haven, 1894.

Whittier, John Greenleaf, American poet, was born of Quaker parents at Haverhill, Mass., 1807. In his younger days he worked on his father's farm and learned the shoemaking trade, but early began to write for the press, and in 1831 published his first work, *Legends of New England,* in prose and verse. He carried on the farm himself for five years, and in 1835-36 was a member of the legislature of Massachusetts. After having edited several other papers, he went to Philadelphia to edit the *Pennsylvania Freeman,* an anti-slavery paper, the office of which was burned by a mob in 1838. In the following year he returned to his native state, settling at Amesbury, where (or at Danvers, Mass.) he chiefly resided until his death. Among the numerous volumes of poetry which he published from time to time are: *Moll Pitcher; Lays of My Home; Miscellaneous Poems; The Voices of Freedom; Songs of Labor; The Chapel of the Hermits; Home Ballads; Snow Bound; In War-Time; National Lyrics; Ballads of New England; Miriam; Mabel Martin; Hazel Blossoms; The King's Missive; Poems of Nature,* etc. He is best known for his poems, *Barbara Frietchie, The Barefoot Boy, Maud Muller,* and *The Pipes at Lucknow.* Died, 1892.

Wickersham, George Woodward, American lawyer, attorney-general of the United States, 1909–13; was born in Pittsburgh, Pa., 1858. He was graduated from the law department of the university of Pennsylvania in 1880, M. A., 1901. Previous to graduation he had been admitted to the Philadelphia bar and practiced there until 1882, when he removed to New York city, and in 1883 entered the law firm of Strong and Cadwalader; was admitted, four years later, to partnership in the firm, which connection he terminated upon becoming attorney-general.

Wieland (*vē'-länt*), **Christoph Martin,** noted German poet, was born at Oberholzheim, near Biberach, 1733. He studied at the university of Tübingen, returning to Biberach in 1760. In 1766 and 1767 *Agathon* made its appearance, which greatly contributed to establish his fame. His views on the subject of love are most fully and worthily expounded in the didactic poem *Musarion,* a work of singular grace and harmony of treatment. At Weimar in 1772 he wrote *The Choice of Hercules,* and the following year the lyrical drama, *Alceste.* His literary productiveness showed itself chiefly in the *History of the Abderites,* a work depicting the follies of small communities. This was followed by *Oberon,* a romantic heroic poem, the most perfect and enduring of his greater works, and translations of Horace, Cicero, and the Greek poets. Died, 1813.

Wiggin, Kate Douglas, American author, was born in Philadelphia, Pa., 1859. She was graduated at Abbott academy, Andover, Mass., 1878; married Samuel Wiggin in 1881 and George C. Riggs in 1895. She organized the first free kindergartens for poor children on the Pacific coast, and has been interested in that work ever since. Author: *The Birds' Christmas Carol; The Story of Patsy; A Summer in a Cañon; Timothy's Quest; A Cathedral Courtship; Penelope's English Experiences; Polly Oliver's Problem; The Village Watch Tower; Nine Love Songs and a Carol; Marm Lisa; Penelope's Progress; Penelope's Experiences in Ireland; The Diary of a Goose Girl; Rebecca; The Affair at the Inn,* in collaboration, etc.

Wilberforce, William, English statesman and philanthropist, was born at Hull, England, 1759. He was educated at St. John's college, Cambridge, and, by the death of his grandfather and an uncle, became the possessor of a handsome fortune. He entered parliament as the representative of his native town, when he had scarcely completed his twenty-first year. In 1784 he became member for the county of York, and held this position until 1812, when he became member for Bramber. In 1789 he first proposed in the house of commons the abolition of the slave trade, and, with the aid of Charles James Fox, this measure was carried in 1807. He afterward devoted himself to an agitation for the extinction of slavery, and this measure also he lived to see all but carried, the bill being finally passed a few days after his death in 1833. In 1797 he published a *Practical View of Christianity,* which has gone through innumerable editions; and all through life he gave his warmest sympathy to efforts for the spread of Christianity at home and abroad. He was buried in Westminster abbey, where a statue is erected to his memory.

Wilcox, Ella Wheeler, American poet and writer, was born near Madison, Wis., 1855, and was educated at the state university in that city. She was for many years a contributor of poems, sketches, etc., to the Milwaukee and Madison papers, the demand for her productions steadily increasing, and extending to the leading journals and periodicals of the country. For many years she has been on the staff of the *New York Journal* and *Chicago American.* Author: *An Ambitious Man; Sweet Danger; Poems of Passion; Poems of Pleasure; Kingdom of Love; Men, Women and Emotions; A Woman of the World,* etc.

Wiley, Harvey Washington, American chemist, chief of the bureau of chemistry, United States department of agriculture, 1883–1912; was born in Kent, Ind., 1844. He was graduated at Hanover college in 1867, and from Harvard in 1873; Ph. D., LL. D. He was professor of chemistry, Purdue university, 1874–83. State chemist of Indiana, 1881–83, and professor of agricultural chemistry, George Washington university, since 1899. Author: *Principles and Practice of Agricultural Chemistry; Songs of Agricultural Chemists; Foods and their Adulterations;* and numerous government bulletins and scientific papers.

Wilhelmina (*vĭl'-hĕl-mē'-nă*), **Helena Pauline Maria,** queen of the Netherlands, was born at The Hague, Holland, 1880, and is the only child of King William III. and of his second wife, Princess Emma, daughter of Prince George Victor of Waldeck. She succeeded to the throne of the Netherlands on the death of her father in 1890, though she came of legal age in 1898, when she was crowned queen. In 1901 she married Duke Henry, youngest son of the grand duke of Mecklenburg-Schwerin. Queen Wilhelmina is the fourth in the list of sovereigns of the Netherlands of the house of Orange since the reconstruction of the kingdom by the congress of Vienna in 1814-15. She is known to possess simple tastes, is an accomplished linguist, and an experienced horsewoman.

Willard, Edward Smith, actor, was born at Brighton, England, 1853. His first appearance on the stage was at the Theater Royal, Weymouth, England, 1869, in the *Lady of Lyons.* He supported Sothern at Glasgow and filled other engagements until he went to London in 1881, and became famous as the Spider, in *The Silver King.* He subsequently managed the Shaftesbury theater, London; produced there *The Middleman* and other plays. Appeared in America at Palmer's theater, New York, 1890, and since then has made thirteen American tours. He leased the Comedy and Garrick theaters in London, 1894–96, and since then has toured the United States in *David Garrick, Tom Pinch, The Middleman, Professor's Love Story,* etc.

Willard, Emma C., American educator, born at Berlin, Conn., 1787; educated privately and at Hartford academy. In 1809 she married Dr. John Willard. She established a girls' boarding school at Middlebury, with improved methods of teaching; also established a girls' seminary at Waterford, N. Y., which was afterward removed to Troy. In 1830 she traveled in Europe, and by her efforts a school for the training of native women teachers was founded in Greece. Among her books are: *History of the United States; Universal History in Perspective; Last Leaves of American History;* and a book of poems, of which the best known is *Rocked in the Cradle of the Deep.* Died, 1870.

Willard, Frances Elizabeth, temperance reformer, was born at Churchville, N. Y., 1839. After

UNIV. OF
CALIFORNIA

EMPEROR WILLIAM II.
From a photograph

some years spent in teaching she became professor of æsthetics in the Northwestern university, and was made dean of the woman's college in 1871. She began her active temperance work, in 1874, as secretary of the national Woman's Christian temperance union; in 1879 was made president of that organization, and held the office until her death. She was chosen president of the World's Christian temperance union in 1888, and in 1892 visited England as the guest of Lady Henry Somerset, the well known temperance worker. She was an orator of great eloquence, humor, and power, and her executive ability and genius for organization left an impressive mark on the country. She died in New York, 1898. Her books include many works on temperance: *Woman and Temperance* and *Glimpses of Fifty Years.*

Willcox, Walter Francis, American educator and statistician, was born at Reading, Mass., 1861. He was graduated at Amherst, 1884, Columbia law school, 1887; Ph. D., Columbia school of political science, 1891; LL. D., Amherst, 1906. He has been connected with Cornell university since 1891, and is now professor of political economy and statistics; chief statistician of 12th United States census, 1899–1902; statistical expert for war department upon censuses of Cuba and Porto Rico, 1899–1900; United States delegate to the international statistical congress, Brussels, 1903, Berlin, 1903, London, 1905, Paris, 1909. Author: *The Divorce Problem — a Study in Statistics; Supplementary Analysis and Derivative Tables, 12th Census*, and numerous census bulletins, and articles in economic and statistical journals.

William I., commonly called the Conqueror, was born in Normandy, 1027. He was the illegitimate son of Robert Le Diable, duke of Normandy, and succeeded to the dukedom in 1035. He laid claim to the sovereignty of England on the death of Edward the Confessor, pretending to be entitled to it under the will of that monarch. In 1066 he landed at Pevensey, in Sussex; defeated Harold II. at the battle of Hastings; and was crowned king of England in Westminster abbey on the Christmas day following. During his reign the Norman feudal system was developed, the forest and game laws were introduced, and the large district of country now called the New Forest was laid waste in order to provide the king with a hunting ground. The Channel islands, being part of William's duchy of Normandy, became attached to England on his accession. Having returned with an English army to reduce his revolted subjects in Normandy, he died at the abbey of St. Gervais, 1087.

William III., king of England, 1689–1702, was born at The Hague, 1650. He was the posthumous son of William II. of Orange, and of Mary, eldest daughter of Charles I. of England. In 1678, being then stadtholder of Holland, he went to England, and married Mary, eldest daughter of the duke of York, afterward James II. In 1688 he landed with a Dutch army at Torbay, in Devonshire, and was soon after invited by a convention parliament to accept the throne, which James had vacated; and in April, 1689, was crowned, together with his wife, Mary, with whom he reigned jointly until her death in 1694; afterward William reigned alone. In 1690 he defeated James at the battle of the Boyne. He afterward engaged in a war with France, which was brought to a close by the treaty of Ryswick, 1697. He died at Kensington palace in 1702, and was succeeded by his cousin Anne, second daughter of the fugitive James.

William IV., king of Great Britain and Ireland, third son of George III., was born in 1765. In 1779 he entered the navy as midshipman, was made a lieutenant in 1785, and in the year following received his commission as captain. In 1789 he was created duke of Clarence and St. Andrews and earl of Munster, and was made admiral of the fleet in 1801. In 1818 he married Adelaide, eldest daughter of the duke of Saxe-Meiningen, and the issue of this marriage was two daughters, both of whom died in infancy. By the death of the duke of York, 1827, the duke of Clarence became heir-presumptive to the throne, to which he succeeded on the death of his brother, George IV., in June, 1830. The great event of the reign of William IV. was the passing of the reform bill. After a fierce and protracted struggle the bill was read a third time in the house of lords in 1832, and three days afterward it received the royal assent. He died in 1837, and was succeeded by his niece, Queen Victoria.

William I., Friedrich Ludwig Wilhelm, king of Prussia and emperor of Germany, was born in 1797, second son of Frederick William III. of Prussia. He joined the army at an early age, and was engaged in the campaigns of 1813-14 against France. On the accession of his elder brother, Frederick William IV., to the throne in 1840, he became governor of Pomerania, and afterward sat in the Prussian diet, and vigorously supported the absolutist party. In consequence, he was so much disliked by the people that on the outbreak of the revolution of 1848 he fled to England; though he returned some months after, and was elected to the national assembly. In 1857, the king having become incapacitated for business, William was commissioned to act as regent, a commission which was renewed from time to time until his permanent installation in 1858. In 1861 he ascended the throne, and became the head of the North German confederation in 1867. He found in Bismarck an able minister who could rule without a parliamentary majority. At Ems, in July, 1870, the memorable interviews between William and the French ambassador, Benedetti, took place, which resulted in the Franco-Prussian war of 1870-71. William commanded at the decisive battle of Gravelotte and at Sedan. In 1871 he was proclaimed emperor of Germany in the palace of the French kings at Versailles. He married, in 1829, Augusta of Saxe-Weimar, and died in 1888.

William II., Friedrich Wilhelm Viktor Albrecht, king of Prussia and emperor of Germany, was born in 1859, eldest son of Frederick III. and Victoria, princess royal of England. He was educated at Cassel and Bonn, married Augusta Victoria of Schleswig-Holstein-Augustenburg, 1881, and succeeded his father in 1888. Since his accession he has taken much interest in social questions, and the strong initiative which he adopted in political affairs brought about the dismissal of Prince Bismarck in 1890. His independence, ability, and aggressiveness have placed Germany in the foremost rank of the enlightened world powers. In 1907 he spoke of the German nation as "the block of granite upon which the Lord our God can build up and complete His work of civilizing the world." Early in 1908 he established a winter residence on the island of Corfu.

William I., Frederik Willem, first king of the Netherlands, grand duke of Luxemburg, was born in 1772. His mother was a niece of Frederick the Great, and his father was the last stadtholder of the republic, as William V. As prince of Orange he had command of the Dutch army until the French conquest of 1795. In 1802 he received from his father the principality of Fulda and other territories which had been given to him in compensation for the Netherlands; but he lost them in 1806 for refusing to join the Rhenish confederation. He became a Prussian general, was taken prisoner at Jena, and after his release served in the Austrian army at Wagram in 1809. In 1815 he was declared king as William I., under a limited constitution, and with Belgium included in the new kingdom, exchanging his German possessions for the grand duchy of Luxemburg. The Belgians having established their independence with the aid of France in 1830–32, he was obliged to acknowledge it in 1839. In 1840 he abdicated in favor of his eldest son, and died in 1843.

William I., called the Silent, prince of Orange and count of Nassau, founder of the Dutch republic, was born in Dillenburg, 1533. At the age of fifteen he became page to the emperor Charles V., who took an almost paternal care of him, and in 1555 promoted him, over the heads of all his veteran officers, to the command of the imperial army on the French frontier. When Philip II. left for Spain, he appointed William one of the state council to help Margaret of Parma to rule the Netherlands as regent. He opposed the persecution of the Protestants, and refused to permit it in the provinces of which he was stadtholder. When the duke of Alva marched to Brussels and put to death Egmont and Horn, William, who had fled to Germany, had his property seized and his son sent to Spain as a hostage. After raising an army he marched against Alva, but was forced to retire to French Flanders, and with his brothers Louis and Henry joined the Huguenots under Coligny. In 1569 he sent out privateers, who captured Briel in 1572. This exploit was followed by the rebellions of Flushing, Haarlem, Dort, Leyden, and other cities, which acknowledged William of Orange as their prince. William and his brother captured several other towns, but the massacre of St. Bartholomew destroyed his hopes of French aid, and he was forced to disband his army. The Spaniards retook city after city, sacked Haarlem after a seven months' siege, and defeated and slew his brothers Louis and Henry. But William, by cutting the dikes and flooding the country, allowed Admiral Brissot to bring his fleet to the relief of Leyden, which had long been beseiged. In 1576 the five provinces which had all along held to Spain joined the states-general at Ghent, and formed a league under William. But two years later the new Spanish governor, Don John of Austria, won a victory near Gembloux. His successor, Alexander Farnese, also gained the Walloon provinces. However, William formed in 1579 a league between Holland, Zealand, Utrecht, Friesland, Gelderland, Gronigen, and Overyssel, which was the foundation of the Dutch republic. Two years later the united provinces declared themselves independent. William twice refused to become the ruler of the new country, and was assassinated at Delft, 1584.

Williams, George Fred, American lawyer, was born in Dedham, Mass., 1852. He was graduated at Dartmouth college, 1872; studied at Heidelberg and Berlin; was admitted to the bar, and has since practiced in Boston. He edited *Williams's Citations of Massachusetts Cases*, and volumes 10 to 17 *Annual Digest of the United States*. He was a member of the Massachusetts legislature in 1889, member of congress, 1891–93, and has since been prominent both in politics and in his profession.

Williams, John Sharp, American legislator and publicist, was born in Memphis, Tenn., 1854. He was educated at Kentucky military institute, university of the South, university of Virginia, and university of Heidelberg, Germany. He then studied law at the university of Virginia and in Memphis, Tenn., and was admitted to the Tennessee bar, 1877. He removed to Yazoo city, Miss., 1878, has since practiced law, and been engaged as a cotton planter. He was temporary chairman of the St. Louis convention, 1904; member of congress from 5th Mississippi district, 1893–1903; from 8th Mississippi district, 1903–09; and became United States senator succeeding Senator Money from Mississippi, 1911.

Williams, Roger, English colonist and founder of Rhode Island, was born probably in London, about 1604. He was a student at Pembroke, Oxford, and ordained a clergyman of the church of England; but, having embraced Puritan views, he emigrated to New England in 1631, and was assistant pastor at Plymouth, 1631–33, when he went to Salem to become pastor there. On account of his religious opinions, he was ordered to leave the colony in 1635, and in 1636 founded Providence. He was the first president of the colony established by himself; and the uniform justice and kindness with which he treated the native Indians is frequently referred to in the records of the time. He was one of the earliest advocates of the principle of perfect liberty of conscience; his chief work, *The Bloudy Tenent of Persecution for Cause of Conscience Discussed*, is still regarded as a remarkable exposition and defense of that principle. Died, 1683.

Williams, Talcott, American journalist, was born at Abeih, Turkey, 1849. He was graduated at Amherst college, 1873. He was on the staff of the *New York World*, 1873–77; Washington correspondent *New York Sun*, and *San Francisco Chronicle*, 1877–79; editorial writer *Springfield Republican*, 1879–81; editorial writer, *Philadelphia Press*, 1881–1912. Became first director, Pulitzer school of journalism, Columbia university, 1912. He is also a well known lecturer and contributor to the magazine press.

Willis, Nathaniel Parker, American poet and author, was born at Portland, Me., 1806. He was graduated at Yale college in 1827, and the same year published *Poetical Sketches*. He wrote for the magazines, and in 1829 started the *American Monthly Magazine*. After its merger with the New York *Mirror* in 1831, he traveled in Europe, recording his saunterings in *Pencilings by the Way*, which, with its lifelike and rapid sketches of old world scenes, at once gained for him a wide popularity. These pencilings were contributed to the *Mirror*, for which Poe also wrote. In 1839 appeared the most charming of his books, *Letters from Under a Bridge*. In 1841 he founded *The Home Journal*, editing it until his death in 1867. Among the best of his writings are the tales and sketches: *F. Smith; The Ghost Ball at Congress Hall; Unseen Spirits; Spring; People I have Met; Life Here and There; Hurrygraphs; Life of Jenny Lind; Fun Jottings; A Summer Cruise in the Mediterranean; A Health-trip to the Tropics; Famous Persons and Places; The Rag-bag; Paul Fane; The Convalescent*, etc.

Wilson, Francis, American actor, was born in Philadelphia, Pa., 1854. He first engaged in legitimate comedy at Chestnut Street theater, Philadelphia, 1877-78; as Cool in *London Assurance*, 1878–79; with Annie Pixley in *M'liss*, 1879; with *Mitchell's Pleasure Party*, 1880–83; started in comic opera as Sir Joseph Porter in *Pinafore*. He became leading comedian of the McCaull opera company and of the Casino, New York, 1885–89, where he created the character of Cadeaux in *Erminie*. Subsequently he organized his own company in which he has since taken leading comedy rôles in *The Oolah; The Merry Monarch; The Lion Tamer; Erminie; The Chieftain; Devil's Deputy; Half a King; The Little Corporal; Cyrano de Bergerac; The*

Monks of Malabar; The Strollers; The Toreador; Cousin Billy; The Mountain Climber; When Knights Were Bold, etc. Author: *The Eugene Field I Knew; Recollections of a Player; Going on the Stage*, etc.

Wilson, Henry, American statesman, was born in Farmington, N. H., 1812, of poor parents. His original name was Jeremiah Colbath, which he legally changed to Wilson on reaching manhood. He received a scanty education; was taught the trade of shoemaker, and became a prominent anti-slavery advocate. He was elected to the Massachusetts legislature by the whig party in 1840, and largely contributed to the formation of the free-soil party in 1848. In 1855 he succeeded Edward Everett as United States senator, and became one of the leaders of the republican party. In 1872 he was elected vice-president of the United States, on the same ticket with General Grant, and served until his death in 1875. He wrote several works on contemporary legislation.

Wilson, James, United States secretary of agriculture, 1897–1913; was born in Ayrshire, Scotland, 1835. He came to the United States in 1851, settled in Connecticut with his parents, and in 1855 went to Tama county, Iowa. In 1861 he engaged in farming; was a member of the Iowa legislature three terms, and speaker the last term; member of congress, 1873–77, and 1883–85; regent of state university of Iowa, 1870–74; for six years director of the Iowa agricultural experiment station and professor of agriculture, Iowa agricultural college, Ames, Iowa. He received the degree LL. D. from the university of Wisconsin, 1904.

Wilson, John, "Christopher North," Scottish poet and essayist, was born at Paisley, 1785. In 1797 his father left him 50,000 pounds, and he was sent to Glasgow university. In 1803 he entered Magdalen college, Oxford, and became famous both for his intellectual gifts and as an athlete. In 1807 he settled in Westmorland, where he purchased Elleray, overlooking Windermere, and associated with Wordsworth, Southey, Coleridge, De Quincey, and others of the "lake school." In 1811 he married and devoted himself to poetry, in 1812 publishing his *Isle of Palms*, and in 1816 *The City of the Plague*. In 1815 the loss of his patrimony through an uncle's unjust stewardship obliged him to give up Elleray and settle in Edinburgh. He was called to the Scottish bar, but on the starting in 1817 of *Blackwood's Magazine* he and Lockhart were chiefly responsible for its success. In 1820 he was elected to the chair of moral philosophy at Edinburgh. He published *Lights and Shadows of Scottish Life; Recreations of Christopher North*, etc. Died, 1854.

Wilson, Woodrow, educator, 28th president of the United States; born in Staunton, Va., December 28, 1856; A. B., Princeton, 1879, A. M., 1882; LL. B., university of Virginia, 1882; Ph. D., Johns Hopkins, 1886; LL. D., Wake Forest college, 1887, Tulane university, 1898, Johns Hopkins, 1902, Rutgers, 1902, university of Pennsylvania, 1903, Brown university, 1903, Harvard, 1907, Williams, 1908, Dartmouth, 1909; Litt. D., Yale, 1901; practiced law, Atlanta, Ga., 1882-83; associate professor of history and political economy, Bryn Mawr college, 1885–88, professor same, Wesleyan university, 1888–90; professor of jurisprudence and politics, Princeton, 1890–1902; president of Princeton university, 1902–10; governor of New Jersey, 1911–13. In August, 1912, he was nominated by the democratic national convention at Baltimore for president of the United States and elected November 5th. Author: *Congressional Government, a Study in American Politics; The State: Elements of Historical and Practical Politics; Division and Reunion; An Old Master and Other Political Essays; Mere Literature and other Essays; George Washington; A History of the American People; The New Freedom.*

Winchell, Alexander, American geologist and author, was born in Dutchess county, N. Y., 1824. He was graduated from Wesleyan university, Middletown, Conn., 1847; was president of the Masonic female university, Selma, Ala.; in 1853 became professor of physics and civil engineering in the university of Michigan, and two years later was transferred to the chair of geology, zoölogy, and botany there, which post he held until 1873. Between 1873 and 1878 he held the same position at Vanderbilt university. In 1879 he was recalled to the university of Michigan as professor of geology and paleontology, which he retained for the remainder of his life. His published writings embrace: *Sketches of Creation; The Doctrine of Evolution; The Geology of the Stars; Reconciliation of Science and Religion; Pre-Adamites; Sparks from a Geologist's Hammer; World-Life: a Comparative Geology; Geological Excursions;* and *Geological Studies.* He died at Ann Arbor, Mich., 1891.

Winsor (*wĭn'-zẽr*), **Justin,** American historian and librarian, was born at Boston, Mass., 1831. He studied at Harvard and Heidelberg, was superintendent of the Boston library, 1868–77, passing then to the librarianship of Harvard. From 1876 to 1886 he was president of the American library association. He was a large contributor to the periodical press and an extensive and instructive author. His chief publications embrace: *The Readers' Handbook of the American Revolution; Bibliography of Original Quartos and Folios of Shakespeare; Christopher Columbus; Cartier to Frontenac;* and *Narrative and Critical History of America.* He was also editor of the *Memorial History of Boston.* Died, 1897.

Winthrop, John, governor of Massachusetts colony, was born at Groton, Suffolk, England, 1588. He became a lawyer, and because of his good and religious character was chosen governor by the Massachusetts Bay company in 1629. The next year he came over, bringing with him 900 emigrants. He was elected governor 1630–34, 1637–40, 1642–44, and 1646–49. His influence was very great in the colony, and through it on the life, thought, and later politics and institutions of New England. His *Journal* is one of the most important sources of early American history. He died at Boston, 1649.

Wirt, William, American lawyer, was born at Bladensburg, Md., 1772. He was admitted to the bar in 1792, and settled to practice in Virginia. He was clerk of the Virginia house of delegates at Richmond, 1799; chancellor of the eastern district of Virginia, 1802; assisted in the prosecution of Aaron Burr, 1807; member of Virginia house of delegates, 1807-08; and in 1817 became attorney-general of the United States. In 1832 he accepted the anti-Masonic nomination for the presidency. He possessed a fine legal mind; was an orator of unusual attainments. Author: *Letters of a British Spy; The Old Bachelor; Life of Patrick Henry*, etc. Died, 1834.

Wiseman, Nicholas Patrick Stephen, English cardinal and Roman Catholic archbishop of Westminster, was born at Seville, Spain, 1802, of an Irish family settled in Spain. In his sixteenth year he entered, as an ecclesiastical student, the English college at Rome, and received holy orders in 1824. He was subsequently admitted to the degree of D. D.; was appointed vice-rector of the English college, and professor of oriental languages in the university of the Sapienza. In 1828 he published his *Horæ Syriacæ*, and in the end of that year was named president of St. Mary's college of Oscott. In

1850 he was named archbishop of the see of Westminster, and at the same time created cardinal. Besides high professional learning, he possessed rare and singularly varied attainments, was an eminent linguist, a scientific scholar, a finished orator, a vigorous writer, and a critic and connoisseur of art. He wrote: *Influence of Words on Thought and Civilization; Lectures on Science and Revealed Religion; Points of Contact between Science and Art; The Real Presence*, etc. He died in London, 1865.

Wister, Owen, American author, was born in Philadelphia, Pa., 1860. He was graduated from Harvard, 1882; from Harvard law school, 1888; was admitted to the Philadelphia bar, 1889. He engaged in literary work, 1891. Author: *The Dragon of Wantley: His Tail; Red Men and White; Lin McLean; The Jimmy John Boss; U. S. Grant, a Biography; The Virginian; Philosophy* 4; *Journey in Search of Christmas*, etc.; and much prose and verse in magazines. He also wrote in collaboration: *Musk-ox, Bison, Sheep and Goat*, in Whitney's American Sportsmen's library.

Witte (*vĭt'-ĕ*), **Count Sergei Yulievitch,** Russian statesman, of German origin, was born at Tiflis, 1849. He was educated at Odessa, entered the railway administration, and first gained distinction by his clever organization of the transport of troops in the war of 1877-78. He was called to St. Petersburg for employment there in 1879, and appointed in 1886 director of the Russian southwest railways. In 1888 he became head of the railway department in the ministry of finance, and chairman of the commission on tariffs; in 1892, minister of means of communication, and in 1893, minister of finance. In 1903 he was removed from the ministry of finance and made president of the committee of ministers. He was one of the Russian plenipotentiaries in the negotiations for peace with Japan in 1905, and was afterward made a count and appointed president of the new ministry, although in May, 1906, he was superseded. He is author of *The Principles of Railway Rates*, and *Friedrich Liss, Economist.*

Wolfe, Charles, British clergyman and poet, was born at Dublin, 1791. In 1814 he took his B. A. at Dublin. His *Burial of Sir John Moore*, in 1817, was so admired that even while its author's name remained unknown, and it was ascribed to Campbell, Byron, and others, it won for itself a secure place in the heart of the British nation. In 1817 he became curate of Ballyclog in Tyrone, and then rector of Donoughmore. He died in 1823.

Wolfe, James, English general, was born at Westerham, in Kent, England, 1727. His first service was in Flanders, where he took part in the famous battle of Dettingen, while in Scotland he was in the battles of Falkirk and Culloden. His skill and bravery at the attack of Louisburg won him the title of "hero of Louisburg." In the effort to drive the French out of Canada, Pitt, in 1759, gave the charge of the invading army to Wolfe, who had been made major-general. The story of his attack on Quebec, how he scaled the cliffs with his army by night, and died in the moment of victory, while his brave antagonist, Montcalm, dying too, said: "It is a great consolation to have been vanquished by so brave an enemy," is well known. He died in 1759.

Wolseley (*wo͝olz'-lĭ*), **Garnet Joseph, Viscount,** English field-marshal, was born in County Dublin, Ireland, 1833. He entered the army in 1852, served in Burmah, in the Crimean war, the Indian mutiny, and the China war of 1860; commanded the Red river expedition in Canada in 1870; commanded on the gold coast during Ashantee war, 1873; was governor of Natal, and later of Cyprus; gave up the latter post to command in the South African war of 1879-80. He then commanded the Egyptian expedition, 1882; Gordon relief expedition, 1884; and while commanding in Ireland was made field-marshal in 1894, and commander-in-chief after retirement of the duke of Cambridge, 1895. He retired in 1900. He wrote *Life of the Duke of Marlborough, The Decline and Fall of Napoleon*, and *The Story of a Soldier's Life.* Died, 1913.

Wolsey (*wo͝ol'-zĭ*), **Thomas,** English statesman and cardinal, was born at Ipswich, about 1475. He is said to have been the son of a butcher, and was educated at Magdalen college, Oxford, where he graduated at the early age of fourteen. Introduced at the English court by Sir John Nanfan, his great abilities and tact soon enabled him to gain the esteem of Henry VII., who, in 1508, made him dean of Lincoln. On the accession of Henry VIII. he became the king's almoner. In 1515 he was consecrated archbishop of York, and was about the same time appointed lord chancellor and prime minister, Pope Leo X. granting him in the following year the dignity of a cardinal of the church. From this time he was one of the foremost men in Europe, and, as his revenues were immense, his pride and ostentation were carried to the greatest height. In 1529 he was appointed, together with Cardinal Campeggio, to inquire, on behalf of Pope Clement VII., into the validity of Henry VIII.'s marriage with Catharine. The inquiry ended, however, only in a postponement of the question — a postponement which Henry could ill brook; and Wolsey was soon after deprived of the great seal, and ordered to retire to his diocese at York. In the following year he was arrested on a charge of high treason, and was ordered to be conveyed to London for trial. Illness delayed him at Sheffield Park for eighteen days. At length he reached Leicester abbey, and died there a few days afterward, in 1530. He founded Christ Church, Oxford.

Wood, Leonard, army officer, was born at Winchester, N. H., 1860. He was graduated from the Harvard medical school, 1884; LL. D., Harvard, 1899; Williams, 1902; Pennsylvania, 1903. He became assistant surgeon in the United States army in 1886, captain in 1891; was colonel of the 1st United States volunteer cavalry, rough riders, 1898; brigadier-general, July 8, 1898; major-general, December 7, 1898; brigadier-general, United States regular army, 1901; major-general, 1903. He was military governor of Cuba, 1899–1902; governor of Moro province, Philippine islands, 1903–06; commander of Philippines division, 1906-08; commander of the department of the East, 1908; chief of staff of army in 1910.

Woodberry, George Edward, American author and critic, was born at Beverly, Mass., 1855. He was graduated at Harvard in 1877. He was professor of English at Nebraska university, 1877-78, 1880–82, and professor of comparative literature, Columbia, 1891-1904. Author: *History of Wood Engraving; Edgar Allan Poe; Studies in Letters and Life; The North Shore Watch; The Heart of Man; Wild Eden; Makers of Literature; Nathaniel Hawthorne; America in Literature; Poems; The Torch; Algernon Charles Swinburne; Ralph Waldo Emerson; The Appreciation of Literature; Great Writers*, etc.; and editor of the works of several English poets.

Woodward, Robert Simpson, American physicist and educator, was born at Rochester, Mich., 1849. He was graduated at the university of Michigan, C. E., 1872, Ph. D., 1892; LL. D., Wisconsin, 1904; Sc. D., Pennsylvania, and Columbia, 1905. He was assistant engineer of United States lake survey, 1872–82; assistant astronomer of United

States Transit of Venus commission, 1882–84; astronomer, geographer, and chief geographer, United States geological survey, 1884–90; assistant United States coast and geodetic survey, 1890–93; professor of mechanics and mathematical physics, 1893–1905, and dean of the school of pure science, 1895–1905, Columbia; president of the Carnegie institution of Washington since 1905.

Woolley, Mary E., American educator, president of Mt. Holyoke college since 1900, was born at South Norwalk, Conn., 1863, daughter of Rev. Joseph J. Woolley. She was graduated at Wheaton seminary, 1884; taught history in the same; was graduated at Brown university, 1894, A. M., 1895; Litt. D., Brown, L. H. D., Amherst, 1900. She was instructor and later head of the department of biblical history and literature of Wellesley college, 1895–1900.

Woolman, John, American Quaker preacher, was born at Northampton, N. J., 1720. He was a farmer's son, and was for some time a tailor. He spoke and wrote against slavery, and published: *Some Considerations on the Keeping of Negroes; Considerations on Pure Wisdom and Human Policy, on Labor, on Schools, and on the Right Use of the Lord's Outward Gifts; Considerations on the True Harmony of Mankind; The Journal of the Life and Travels of John Woolman in the Service of the Gospel.* The latter was a favorite book with Charles Lamb. He died at York on a visit to England, 1772.

Woolsey, Theodore Dwight, American scholar, was born at New York city, 1801. He was graduated at Yale in 1820, studied at Princeton, and for three years in Germany. He was professor of Greek at Yale college, 1831–46, and was the president of that institution, 1846–71. He was an authority on questions of international law; edited in Greek a number of Greek plays, and wrote several religious works. He was president of the American company of revisers of the new testament. Among his works are: *Introduction to the Study of International Law; Political Science; Communism and Socialism; Divorce and Divorce Legislation,* etc. Died, 1889.

Worcester (*wo͞os'-tẽr*), **Joseph Emerson,** American lexicographer, was born at Bedford, N. H., 1784. He taught at Salem, Mass., and then turned to authorship. All his works were laborious — gazetteers, manuals of geography and history, etc. He edited Chalmers' abridgement of Todd's Johnson's *Dictionary,* with Walker's *Pronouncing Dictionary,* in 1828; abridged Webster's *Dictionary* in 1829; printed his own *English Dictionary* in 1830, *Critical Dictionary* in 1846, and quarto *Dictionary of the English Language,* 1860. He died in 1865.

Wordsworth, William. See page 94.

Wren, Sir Christopher, noted English architect, was born at East Knoyle, in Wiltshire, 1632. He was graduated at Oxford, and in 1657 left Oxford for London, where he became Gresham professor of astronomy. In 1660, however, he returned to Oxford as Savilian professor of astronomy, and the same year received the degree of D. C. L. In 1663 he was engaged by the dean of St. Paul's to make a survey of the cathedral, with a view to certain projected repairs in that vast fabric. But the building was leveled to the ground by fire in 1666, and Wren was the architect of the new cathedral, instead of the restorer of the old. Besides numerous churches, he built the royal exchange, London; customhouse, London; Temple Bar; the college of physicians; the royal observatory, Greenwich; Chelsea hospital; Hampton court; Greenwich hospital; Buckingham palace; Marlborough house; the towers at the west front of Westminster abbey, etc. In 1672 he was knighted and in 1680 was elected president of the royal society. In 1684 he was made controller of the works at Windsor castle; and in 1685 was elected grand master of the order of Freemasons. Died, 1723.

Wright, Carroll Davidson, economist, statistician, was born in Dunbarton, N. H., 1840. He received an academic education; began the study of law; served in the civil war from private to colonel; was admitted to the New Hampshire bar in 1867; member of Massachusetts senate, 1872-73; chief of Massachusetts bureau of statistics of labor, 1873–88; United States commissioner of labor, 1885–1902; and also, 1893–97, completed the eleventh United States census. He was honorary professor of social economics, Catholic university of America, 1895–1904; became professor of statistics and social economics, school of comparative jurisprudence and diplomacy, Columbian university, 1900; and was president of Clark college, Worcester, Mass., 1902–09. He was appointed by President Roosevelt a member and recorder of the United States anthracite strike commission, 1902, and was one of the original trustees of the Carnegie institute, Washington. Though not a graduate of any college, he received honorary degrees from Tufts, Dartmouth, Wesleyan, and Clark. Author: *The Factory System of the United States; Relation of Political Economy to the Labor Question; The Industrial Evolution of the United States; Outline of Practical Sociology; History and Growth of the United States Census.* Died, 1909.

Wright, Orville, American aëronaut and inventor, was born at Dayton, Ohio, 1871. He was educated in the public and high schools, and since 1903 has devoted his attention mainly to the invention and improvement of Wright Brothers' aëroplane flying machine. He made the first test at Kitty Hawk, N. C., 1903, and a successful long-distance test near Dayton, Ohio, 1905. Since that time he has amply demonstrated the practicability of the Wright Brothers' aëroplane. He has given many exhibitions in Europe and the United States.

Wright, Wilbur, aëronaut, brother of Orville, was born near Millville, Ind., 1867. He was educated in the high schools, four years at Richmond, Ind., and Dayton, Ohio. From 1903 to 1912, with his brother Orville, he devoted his time to the heavier-than-air flying machine, patented by Wright Brothers in leading countries of the world. He also gave numerous exhibitions at home and abroad. Died, 1912.

Wundt (*vo͞ont*), **Wilhelm Max,** German physiologist and psychologist, was born at Neckarau in Baden, Germany, 1832. He studied at Tübingen, Heidelberg, and Berlin; in 1875 became professor of physiology at Leipzig. He is distinguished in the field of experimental psychology, and has written on the nerves and the senses, the relations of physiology and psychology, logic, etc. His *Human and Animal Psychology* and *Outlines of Psychology* were translated in 1896. He is considered one of the foremost investigators in his field, and is a prolific writer.

Wu Ting-Fang (*wo͞o' tĭng'-făng'*), Chinese diplomat, was born at Hsin-hui district, Kwangtung, China. He was educated in Chinese literature and classics at Canton, in English at Hong Kong, and in law at Lincoln's Inn, London; LL. D., university of Pennsylvania, 1900. He practiced as a barrister at Hong Kong until 1882; was appointed, 1882, by Li Hung Chang, viceroy of Chihli, as legal adviser and deputy for foreign affairs in Tientsin; became promoter and chief director of the Kai Ping railway company, and built first railway in China; was later appointed by the imperial government co-director in the railway bureau, constructing railways in north China. He was also appointed chief director of

Tientsin university on its establishment, 1895; assisted in negotiating, at Peking, the Chino-Japanese treaty of commerce and navigation, ratified in 1896; was minister of China to the United States, Spain, and Peru, 1897–1902, and reappointed to the United States in 1907. He has written numerous articles on China in American magazines.

Wycliffe (*wĭk'-lĭf*), **John,** English religious reformer, was born at Wycliffe, near Richmond, in Yorkshire, about 1320. He is frequently called "the morning star of the reformation." He was the son, as is believed, of a Yorkshire squire, and studied first at Queen's and afterward at Merton college, Oxford. Attaining a high reputation for a knowledge of theology and of logic, he was raised to a fellowship in Merton, and was afterward made in succession master of Balliol and warden of Canterbury hall. There, and afterward in his country parishes, he attacked the abuses of the church and the character of the mendicant friars of those days; and his liberty, and perhaps his life, would have been in peril, if he had not found a protector in John of Gaunt, duke of Lancaster, who was favorable to the principles of the reformation. His last years were spent as rector of Lutterworth, in Leicestershire, where, a short time before his death, in 1384, he completed his translation of the Bible. He also wrote a large number of tracts or treatises in exposition or defense of the doctrines he preached.

Xavier (*zăv'-ĭ-ẽr*), **St. Francis,** Jesuit missionary, styled usually the "apostle of the Indies," was born in 1506, of a noble family, in the north of Spain. At Paris, where he studied and then lectured, he was associated with Loyola in founding the Jesuit society. He was ordained priest in 1537, lived at Rome in the service of the society, and was sent out as missionary to the Portuguese colonies in the East. He arrived at Goa in 1542, and labored with equal zeal and success among the corrupt Europeans and the native population. After a year he visited Travancore, where in a month he baptized 10,000 natives. He then visited Malacca, the Banda islands, Amboyna, the Moluccas, and Ceylon, where he converted the king of Kandy with many of his people. The mission he next founded in Japan flourished for a hundred years. He returned to Goa in 1552 to organize a mission to China. But the intrigues of the Portuguese merchants and difficulties caused by the governor of Malacca wore out his strength, and he died, 1552, soon after reaching the island of Sanchian near Canton. His body was ultimately buried in Goa. He was canonized in 1622. His only literary remains are his *Letters*, and a *Catechism* with some short ascetic treatises.

Xenophon (*zĕn'-ō-fŏn*), Greek historian, philosopher, and military commander, born at Athens, about 434 B. C. He was a pupil and friend of Socrates; joined the expedition of Cyrus against his brother Artaxerxes, and on its failure conducted the ten thousand Greeks — "the retreat of the ten thousand"— who went up with him back to the Bosphorus, served afterward in several military adventures, brought himself under the ban of his fellow citizens in Athens, and retired to Elis, where he spent twenty years of his life in the pursuits of country life and in the prosecution of literature. His principal works are the *Anabasis*, an account of the expedition of Cyrus and his own conduct of the retreat; the *Memorabilia*, an account of the life and teaching and in defense of his master Socrates; the *Helenica*, an account of forty-nine years of Grecian history in continuation of Thucydides to the battle of Mantinea; and *Cyropædeia*, an ideal account of the education of Cyrus the Elder. He died about 355 B. C.

Xerxes (*zûrk'-zēz*), king of Persia, son of Darius I., whom he succeeded on the throne in 485 B. C., was born about 519 B. C. In 481 he attempted to subdue Greece both by sea and land; and with his army crossed the Hellespont by means of a bridge of boats; was checked for a time at Thermopylae by Leonidas and his five hundred; advanced to Athens to see his fleet destroyed at Salamis by Themistocles; and left Mardonius with 300,000 men to suffer defeat on the fatal field of Platæa in 479. He then returned to Asia Minor, and, after an expedition against Babylon, in which he razed its temples to the ground, he was assassinated in 465 by Artabanus, the captain of his bodyguard. He reigned twenty years.

Ximenes (*zĭ-mē'-nĕz*), **Francis de Cisneros,** Spanish cardinal and statesman, was born at Torrelaguna, in Castile, in 1437. He was educated at Alcala de Henares, Salamanca, and Rome. His reputation for piety and learning led Queen Isabella to choose him, in 1492, for her confessor, and three years afterward to name him archbishop of Toledo. As confessor and confidential adviser of the queen, Ximenes, during the lifetime of Isabella, was the guiding spirit of Spanish affairs; and on her death in 1504 he held the balance between the parties of Ferdinand and Philip of Burgundy, husband of Joanna, the heiress of the crown. In 1506–07 he was provisional regent of Castile, and was regent of Spain, 1516–17. He died near Aranda de Duoro, 1517.

Yale, Elihu, English colonial official, was born at or near Boston, Mass., 1648. When four years old he was taken to England by his father, and never returned to America. From 1687–92 he was governor of Fort St. George, Madras; and later, governor of the East India company. He was also a fellow of the royal society. Yale college received his name in the charter of 1745. Previously the building and, before that, the school at Saybrook had been called by the name. His gifts to the institution amounted to about £500 in money and many books. He died in England, 1721, and is buried at Wrexham, Wales.

Yamagata (*yä'-mä-gä'-tä*), **Aritomo,** Japanese field-marshal, president of the privy council of Japan, was born at Choshu, 1838. He was junior vice-minister of war, 1870; lieutenant-general, 1872; minister of war, 1873; chief of staff of the imperial army during the civil war of 1877; minister of home affairs, 1885; commanded first army in the China-Japan war; visited Europe and America, 1888-89; was prime minister, 1889; minister of justice, 1892; president of privy council, 1893; inspector-general, 1895; attended the coronation of Czar Nicholas of Russia, 1896; became field-marshal, 1898; chief of general staff, 1904; and was created prince, 1907.

Yancey (*yăn'-sĭ*), **William Lowndes,** American politician and lawyer, was born in Georgia, 1814. He was a member of congress from Alabama, 1844–46; became a leader of the Southern secessionists; withdrew from the national democratic convention at Charleston in 1860; and was greatly instrumental in bringing about the civil war. He was sent in 1861 to Europe as a commissioner to obtain recognition of the confederacy. Died near Montgomery, Ala., 1863.

Youmans (*yōō'-manz*), **Edward L.,** American scientist, was born at Coeymans, N. Y., 1821. Although suffering for some years from almost total blindness, he pursued his studies in physics and chemistry with marked zeal and proficiency, his sister conducting experiments for him. Among his works are: *Class Book of Chemistry; Correlation and Conservation of Forces; Alcohol and the*

Constitution of Man; Handbook of Household Science; The Culture Demanded by Modern Life, etc. In 1872 he established and until his death edited *The Popular Science Monthly*, which has since attained a very wide circulation in both America and Europe. Died at New York, 1887.

Young, Brigham, at one time head of the Mormon church, was born at Whittingham, Vt., 1801. In 1832, having become a convert to Mormonism, he was made an elder of the church, and began to preach at the Mormon settlement at Kirtland, Ohio. Three years later he was sent as a missionary to the New England states, where he succeeded in making quite a number of converts. After the death of Joseph Smith, at Nauvoo, Ill., in 1844, Young was chosen president of the Mormon body. In 1848 he led his followers to Utah and founded Salt Lake City, where for several years he reigned supreme and bade defiance to the United States government. In 1852 he proclaimed polygamy, which had been condemned by the Mormon church, and in 1857, after having been territorial governor of Utah for several years, he was removed from office by President Buchanan. He died, 1877, leaving a fortune of $2,000,000 to be divided among seventeen wives and fifty-six children.

Young, Edward, English poet, was born at Upham rectory near Bishops Waltham, 1683. He was educated at All Souls, Oxford, and in 1730 became rector of Welwyn, in Hertfordshire. His chief poetical work is *Night Thoughts*, which were occasioned by the death of his wife and other sorrows, many of whose sententious lines, such as "Procrastination is the thief of time," have passed into proverbial use. He also wrote *Love of Fame, the Universal Passion;* the dramas, *Busiris, The Revenge*, etc. He died in 1765.

Young, Ella Flagg, American educator, was born at Buffalo, N. Y., 1845. She was graduated at the Chicago high school and Chicago normal school; Ph. D., university of Chicago; married at Chicago, 1868, William Young; engaged in teaching since 1862. She was district superintendent of schools, Chicago, 1887–99; professor of education, university of Chicago, 1899–1905; principal of the Chicago normal school, 1905–09; and superintendent of the Chicago public schools since 1909. President national educational association, 1910. Author: *Isolation in the School; Ethics in the School; Some Types of Modern Educational Theory;* and various monographs.

Younghusband, Sir Francis Edward, English soldier, explorer, and writer, was born at Murree, India, 1863. He was educated at Clifton and Sandhurst, entered the British army, and was promoted lieutenant-colonel, 1908, for service in India. He traveled in Manchuria, 1886; from Peking to India *via* Chinese Turkestan, 1887; on the Pamirs and in Hunza, 1889; on the Pamirs, 1890-91; was political officer, Hunza, 1892; political agent, Chitral, 1893-94; special correspondent of the London *Times* in Chitral expedition, 1895; and was British commissioner to Tibet, 1902-04. In the latter year he headed the expedition which forced its way into Lhassa, sacred city of Tibet. In 1906 he became British resident at Kashmir, India. Author: *Heart of a Continent; Relief of Chitral; South Africa of To-day*, etc.

Zahm (*tsăm*), **John Augustine,** provincial of order of Holy Cross in United States since 1897, was born at New Lexington, Ohio, 1851. He was graduated at Notre Dame university, 1871; Ph. D. from Pope Leo XIII., 1895. He entered the order of Holy Cross, 1871; was appointed in charge of the scientific department, 1874, director of same, 1875; and is now president of the board of trustees, Notre Dame university. He is a member of numerous scientific societies and has lectured widely on scientific and allied topics. Author: *Evolution and Dogma; Bible Science and Faith; Sound and Music; Catholic Science and Catholic Scientists; Scientific Theory and Catholic Doctrine; Science and the Church*, etc.

Zangwill (*zăng'-wĭl*), **Israel,** British man of letters, was born in London, 1864. He was practically self-educated, and received the degree of B. A. from London university. He then became a journalist; edited *Ariel;* and has written many novels, essays, poems, and plays; has lectured in Great Britain and Ireland, Jerusalem, Holland, and the United States, and is president of the international Jewish territorial organization or Zionist movement. Author: *The Premier and the Painter; The Bachelor's Club; The Big Bow Mystery; The Old Maids' Club; Children of the Ghetto; Merely Mary Ann; Ghetto Tragedies; The King of Schnorrers; The Master; Without Prejudice; Dreamers of the Ghetto; They that Walk in Darkness; The Mantle of Elijah; The Grey Wig; Blind Children*, verse; *Ghetto Comedies*, etc. Plays: *Six Persons; Children of the Ghetto; The Moment of Death; The Revolted Daughter; Merely Mary Ann; The Serio-Comic Governess; Jinny the Carrier; Nurse Marjorie; The Melting Pot*, etc.

Zeno, founder of the stoic philosophy, was born at Citium, in Cyprus, the date of his birth and death both being uncertain. He flourished in the early part of the third century B. C., and was a contemporary of Epicurus. At the age of thirty he was shipwrecked, and, having lost his property, adopted the doctrines of the Cynics, in which contempt for riches is conspicuously taught. Having made himself master of the various schools, he proceeded to open a school of his own, wherein he might bring forth the results of his inquiries and develop his own peculiar system. He selected for his purpose the "painted porch," and there until his death continued to teach those doctrines which, in spite of many objectionable features, inculcate the manly energy and simplicity, the patience and fortitude, and that reverence for moral worth which made disciples of so many noble Roman characters The Athenians honored Zeno's memory with a golden crown and a public burial, and his countrymen erected a monumental pillar in his honor. He is supposed to have died about 264 B. C.

Zeno, Greek philosopher of Elea, in Italy, was born about 490 B. C. He was a favorite disciple of Parmenides, visited Athens, and the illustrious Pericles was one of his pupils. According to the account usually given, on his return to Elea he joined a conspiracy to deliver his native town from the tyrant Nearchus, and on the failure of his plot was captured, and put to the torture. He devoted his great powers of argumentation to enforce the doctrines first broached by Xenophanes, and more systematically developed by Parmenides. His works were in prose, but only small fragments have been preserved.

Zenobia (*zē-nō'-bĭ-ȧ*), **Septimia,** queen of Palmyra, 267 A. D., succeeded her husband Odenathus, who had been acknowledged by Gallienus in the sovereignty of the Roman empire; but when Aurelian became emperor, he marched against her with a large army, and after defeating her in several battles besieged her in Palmyra. She attempted to escape by flight, but was captured and brought to Rome to adorn the triumph of her conqueror. After this she was presented by Aurelian with large possessions near Tivoli, where the remainder of her life was passed. She was a woman of great courage, high spirit, and remarkable beauty, and, with purity of morals in private life, she combined prudence, justice, and liberality in her administration of public affairs.

Zimmern, Helen, British author, translator, and critic, was born in Hamburg, Germany, in 1846, and was taken to England in 1850. She has been a correspondent for a number of German, English, and Italian periodicals, and has besides executed an immense amount of literary work of a high order. She resided in England until 1887, when she removed to Italy, where she has since lived. Author: *Stories in Precious Stones; Told by the Waves; Schopenhauer, his Life and Philosophy; Gotthold Ephraim Lessing, his Life and his Works; Half-Hours with Famous Novelists; Tales from the Edda; The Epic of Kings; The Hansa Towns; The Italy of the Italians,* etc.

Zinzendorf (*tsĭn'-tsen-dôrf*), **Nicolaus Ludwig, Count von,** founder of the Moravian brethren, or Herrnhutters, was born at Dresden, 1700. He was educated by his grandmother, a learned and pious lady, and in 1710 went to Halle, where he spent six years under the special care of Francke, the philanthropist. He was appointed a member of the Saxon state council, but political life was little to his mind, and he returned to his country seat in upper Lusatia. While residing there he accidentally met a wandering carpenter named Christian David, a member of the old sect of Moravian brethren, who described the persecutions to which the sect was exposed; and Zinzendorf invited him and his friends to settle on his estate. They accepted the proposal, and the colony received the name of "Herrnhut." Zinzendorf acted with great liberality to the settlers, and their success attracted much attention. In 1737, at the request of King Frederick William I. of Prussia, he was ordained bishop of the Moravians. In the same year he went to London, where he was received with much consideration by Wesley. In 1741 he went to America and founded the celebrated Moravian colony at Bethlehem, Pa. He finally settled at Herrnhut, and died, 1760. He was the author of more than 100 works in verse and prose.

Ziska (*zĭs'-kȧ*), or **Zizka** (*zhĭsh'-kȧ*), **Ján,** leader of the Hussites, was born at Trocznov, Bohemia, about 1360. He served in the English army in France, and afterward joined King Ladislas, of Poland, with a body of Bohemian and Moravian auxiliaries, and greatly distinguished himself in the war against the Teutonic knights. He was an adherent of the Hussite doctrine, and the cruelties exercised on its adherents excited in his mind the liveliest resentment. Sigismund was convinced that the conquest of Bohemia was impossible, and after a time proposed an arrangement with the Hussites by which full religious liberty was allowed; and Ziska, who had an interview with the emperor on the footing of an independent chief, was to be appointed governor of Bohemia and her dependencies. But the war-worn old chief did not live long enough to complete the treaty, for, while besieging the castle of Przibislav, he was seized with the plague and died, 1424.

Zola (*zō'-lȧ; Fr. zō'-lȧ'*), **Émile,** French novelist, was born at Paris, 1840. He was educated at the Lycée St. Louis, settled in Paris, and was for a time in the employ of Messrs. Hachette, the well-known publishing firm. His first important venture in fiction was *Les Mystères de Marseille,* and in this and in *Thérèse Raquin* he at once displayed his remarkable power in the critical analysis of human character. Soon after this he formed with Flaubert, Daudet, and the Goncourts the naturalistic school of fiction. The fruit in part of this was the series known as *Les Rougon-Macquart Family,* modeled somewhat after Balzac's *La Comédie Humaine.* The more notable subsequent stories are: *L'Assommoir; Nana; Pot-Bouille; La Joie de Vivre; Au Bonheur des Dames; Germinal; La Terre; La Bête Humaine; La Débâcle; Le Docteur Pascal; Le Rêve;* and *Lourdes.* The last forms one of a trilogy, which he called *Les Trois Villes — Lourdes, Rome,* and *Paris* — all in the extreme realistic vein. His last work, written in exile, occasioned by his courageous advocacy of the famous Dreyfus case, is entitled *Fécondité.* He was a knight of the French legion of honor, but was refused admittance to a seat in the French academy. He died in 1902.

Zoroaster (*zŏ'-rō-ăs'-tẽr*). See page 194.

Zwingli (*tsvĭng'-lē*), **Ulrich,** Swiss reformer, was born at Wildhaus, 1484. He served in Italy as a soldier, visited Erasmus at Basel in 1514, and two years later at the monastery of Einsiedeln began to preach freely. In 1518 he was appointed to the cathedral at Zürich, having previously opposed the sale of indulgences by Sansom. Attempts were made to prohibit his preaching, but the reformation grew at Zürich. In 1529 Zwingli met Luther and Melanchthon at Marburg, but two years later he fell in the battle of Kappel in the war with Bern. Died, 1531.
